

SBHE approves degrees, merger

The State Board of Higher Education has approved three new bachelor's degrees and a department merger. The decisions came at the board's Sept. 25 meeting in Grand Forks.

A Bachelor of Science with a major in criminal justice was approved, which actually is a change from an emphasis to a major. According to Craig Schnell, provost and vice president for academic affairs, NDSU has offered a criminal justice emphasis in sociology since 1975. He said there have been 175 to 220 students enrolled in the emphasis during the past eight years.

Also approved was a Bachelor of Science with a major in health education. The degree will have two options, including community health education and school health education. Currently, NDSU offers a minor in health education. Schnell said the degree's options allow graduates to find employment in community and voluntary health agencies, clinical and corporate settings and school systems.

The new Bachelor of Fine Arts in art is structured to prepare students for graduate school or professional careers in art. Schnell noted that the Department of Visual Arts currently awards Bachelor of Arts and Bachelor of Science degrees, and the BFA request was made because of student demand.

The board also approved the merger of the Department of Political Science with criminal justice faculty in the Department of Sociology to form a new department. The Department of Criminal Justice and Political Science will be housed in the former YWCA building, located at 1616 12th Ave. N.

NDUS chancellor search committee announced

A committee to guide the selection of a new North Dakota University System chancellor has been named, according to Richard Kunkel, president of the State Board of Higher Education and search committee chair.

Search committee members are Kunkel; Bev Clayburgh, SBHE member; Pam Kostelecky, SBHE member; NDSU President Joseph A. Chapman; Ann Burnett, NDSU associate professor of communication and NDUS faculty adviser to the SBHE; Stacy Horter, North Dakota Student Association representative; Sharon Etemad, Lake Region State College president; Charles Kupchella, University of North Dakota president; Lee Vickers, Dickinson State University president; Eddie Dunn, NDUS vice chancellor; Mike Hummel, BNI Coal president; and Lona Anderson, realtor.

The group's first meeting is scheduled for some time in October. The position will become vacant in November when Larry Isaak leaves to assume the presidency of the Midwestern Higher Education Compact, a 10-state higher education collaboration based in Minneapolis.

The board has selected the executive search firm of Robert H. Perry and Associates Inc., Washington, D.C., to conduct the search.

President Chapman to deliver State of the University Address

President Joseph A. Chapman will deliver his fifth State of the University Address at 11 a.m. Thursday, Oct. 9, in Festival Concert Hall. All faculty, staff, students, alumni and friends of the university are invited. A reception will follow in the Reineke Fine Arts Center lobby.

United Way campaign to kick off

NDSU's United Way of Cass-Clay 2003 campaign kicks off Thursday, Oct. 2. Department representatives will receive information and pledge forms, and campus personnel can expect to receive United Way materials within one to two weeks.

President Joseph A. Chapman encourages participation by faculty, staff and students. "This campus has long enjoyed an earned reputation of hard working, dedicated and caring people," he wrote in a letter to the campus. "In that light, we ask you to remember the upcoming campaign for the United Way of Cass-Clay. Your contributions help to make our community a better place to live, work and learn."

Char Goodyear, NDSU employee campaign coordinator, said the 2003 goal is \$75,000. For several years, NDSU has raised \$50,000-\$65,000 in its annual campaign.

"Across our campus, departments are striving to reach the next level. We believe that the generosity of our people can also reach the next threshold," Goodyear said.

A new United Way of Cass-Clay program called "Dolly Parton's Imagination Library" is included this year. Designed to put free books in the hands of preschool children who are residents of Cass or Clay Counties, parents need only to submit a registration form and each month a new book will be mailed to the child.

"The Imagination Library is a wonderful, innovative way to encourage children to read," said Rick Johnson, university general counsel and loaned executive for the campaign. "I encourage people to think about this innovative program and the other valued services United Way supports as they consider making a pledge."

The United Way of Cass-Clay supports 36 member agencies. Last year, community contributions provided such things as free school supplies for 1,854 children; more than 49,000 nights of shelter for 4,333 homeless individuals, children and families; and nearly 209,000 meals to hungry people in the community.

For further information about the NDSU campaign, contact Goodyear at 1-1068 or char.goodyear@ndsu.nodak.edu. For information about United Way, visit www.uwcc.net.

University system sets record enrollment

The North Dakota University System reports the fall enrollment is at a record high for the state's 11 colleges and universities.

A total of 41,620 full- and part-time students are enrolled across the system, compared to 39,614 one year ago. The figures represent a 5.1 percent increase.

"The high enrollment is a reflection on the quality of and access to our academic programs," said chancellor Larry Isaak. "We're very pleased a record number of students have chosen to attend our colleges and universities. Parents and students trust that the university system will provide a vital link to a brighter future. It is our goal to meet their expectations."

UGPTI awarded federal contract

The Upper Great Plains Transportation Institute at NDSU has been awarded an \$8.7 million five-year contract to maintain and enhance software programs used by the Federal Motor Carrier Safety Administration and safety inspectors nationwide, according to Brenda Lantz, director of the institute's Transportation Safety Systems Center.

The safety systems center is a specialized software development center operated by UGPTI in Lakewood, Colo., to develop and maintain front-end software for state and federal motor carrier safety specialists.

FMSCA, a unit within the U.S. Department of Transportation, maintains highly sophisticated safety information gathering and processing systems to ensure safety of motor carrier operations in the United States. A major part of the agency's field systems includes a group of programs used by safety investigators and inspectors on the highway, at borders and during safety reviews and audits.

Tasks will include developing field system software, preparing software documentation, quality assurance and testing, analysis and technology research, program management and developing client software applications.

Some of the field systems software packages include roadside driver and vehicle inspection, commercial driver license information access, roadside access to critical carrier information for inspection prioritization, carrier safety profile software, hazardous materials inspection software and field data routing software. The efforts will be enhanced through related research conducted by Lantz and other colleagues at the Transportation Institute. For more information about the program, visit www.ugpti.org/tssc.

ITS issues plan, instructions for protection against e-mail worms, viruses

Information technology services has outlined its plans for handling threats to campus computers posed by e-mail worms and viruses.

As of Sept. 1, approximately 800 campus computers had been infected with either the Lovsan/Blaster or Nachi/Welchia worm because the necessary Microsoft patch had not been installed. According to Microsoft, computers with Windows 2000 or Windows XP operating systems that become infected may become vulnerable to remote computer attackers taking control of their machine. Approximately 400 campus computers still need the necessary Microsoft patch.

ITS will take the appropriate steps for handling virus or worm threats. The department will issue a "Security Alert" when notified of critical vulnerability that could affect campus computers, and provide access to current patches and anti-virus software available through local servers. Infected computers will be removed from the network until they are cleaned and fixed, and central monitoring and updating of campus computers is planned.

Campus Windows computer users should obtain the latest critical updates and security patches available at <http://its.ndsu.nodak.edu/security>. Users also are encouraged to install Software Update Services (SUS), which automatically searches for and installs the most recent updates, and to keep their

anti-virus software up to date. Anti-virus software is available at no charge, and may be downloaded at <http://its.ndsu.nodak.edu/virus/index.shtml>. SUS information is found at <http://its.ndsu.nodak.edu/sus>.

Archives unveils online 'scrapbook'

The University Archives has unveiled a new historical "scrapbook" via the Internet. The first of what may eventually be several scrapbooks to be placed on the Web is titled "Nil Desperandum," which translated from Latin means "Never Despair."

The scrapbook gets its name from the group Nil Desperandum, which was organized in March 1927 and open to all women students of the former North Dakota Agricultural College who excelled athletically and academically.

The scrapbook also covers the Women's Athletic Association, which was organized in 1920. In April 1927, the association petitioned to become affiliated with Delta Psi Kappa, the national physical education sorority. The NDAC chapter was established on June 2, 1927.

The scrapbook, which depicts events and activities during 1925-27, consists of 44 pages. Each photograph in the scrapbook may be clicked on to enlarge. Wherever possible, links to the NDSU Archives Buildings Exhibit Web site have been added.

"The scrapbook presents scenes of NDAC during the mid-1920s, including general activities, buildings and sports," said Michael Robinson, archivist, noting that all the scanning, links and technical aspects associated with the exhibit were handled by senior computer science major Dan Hamre. "One of the most interesting sections of the scrapbook is the photo listing and activities of the members of Nil Desperandum. The amount and extent of their activities is awesome.

"As with all of our exhibits, what we hope to achieve by presenting glimpses of the history of NDSU is a greater understanding and appreciation of where we have come from. We hope it provides a framework for where we are now and where we are going as a premiere land-grant university," said Robinson.

According to Robinson, the mission of the University Archives is the preservation and making accessible the historical, legal, fiscal, administrative and social records of the university. As an on-going priority, he said, the University Archives is making available to students, alumni and all interested parties, through Web exhibits, some treasures that otherwise would not be viewed.

Nil Desperandum may be viewed at www.lib.ndsu.nodak.edu/archives/exhibitions/nildesperandum/1x00.html.

To visit the University Archives exhibition Web site, go to www.lib.ndsu.nodak.edu/archives/exhibitions/index2.html.

People

Miller named to CASE national committee

Jim Miller, NDSU Development Foundation executive director, has been elected to a three-year term to the Council for Advancement and Support of Education (CASE) National Committee for Institutionally Related Foundations.

The committee is responsible for monitoring issues of concern to institutionally related foundations. It works with the staff of the National Center for Institutionally Related Foundations to provide leadership for national associations on issues involving foundations; to provide leadership and guidance for center staff to develop educational programs and other produces and services for foundations; to help develop briefing papers, model policies, standards and guidelines, and other material to help foundations function effectively and maintain productive relations with institutions; and to help with the organization of programs such as conferences, seminars and program audits.

"I am pleased that I can represent NDSU on a national board with foundations that are meaningful in the national scope of higher education," Miller said.

CASE is the largest international association of educational institutions, with more than 3,000 colleges, universities and independent elementary and secondary schools in 49 countries, including the United States, Canada, Mexico and the United Kingdom. Representing the institutions are more than 38,000 advancement professionals in alumni relations, communications and development.

Norris receives Minnesota Historical Society award

Jim Norris, associate professor of history, received the Solon J. Buck Award from the Minnesota Historical Society for best article published in "Minnesota History" during 2002. The award will be presented to Norris at the society's annual meeting scheduled for Nov. 13 in St. Paul, Minn.

Norris' article, "Bargaining for Beets: Migrants and Growers in the Red River Valley," was published in the winter 2002-03 edition. The article examined the changing dynamics in the relationship between Mexican American migrant workers and the region's sugar beet producers from the 1920s to the 1950s, with specific attention given to ways in which "patronismo" (paternalism), helped to shape much of the interaction between the two groups.

"I'm very honored to receive this award, especially since this article was the first piece I had published on what is, for me, a relatively new research field," Norris said. "When I came to NDSU in 1997, I was impressed by the land-grant university ethic and wanted to move my work into something local. Once I completed an earlier study, I devoted my research attention to this Red River Valley sugar beet labor project."

The Solon J. Buck Award is named for the society's director who established "Minnesota History" in 1915 and went on to become a United States archivist. The award recognizes excellence and creativity in both research and writing.

Norris received a doctorate in history from Tulane University, New Orleans.

Outstanding NDSU alumni to be honored at Homecoming

The NDSU Alumni Association will honor four alumni award recipients for 2003 at the Alumni Honors dinner Friday, Oct. 10, at the Fargo Holiday Inn. The social is scheduled for 6 p.m., followed by dinner at 6:45 p.m. and the program at 7:30 p.m. Tickets are \$30, and can be reserved by calling Kristi Weston at 1-6807.

Horizon Award

The Horizon Award is given in recognition of individuals who have graduated from NDSU within the past 10 years and have distinguished themselves in their professional fields and/or service to their community.

Allison

The award recipient is Amie (Lorsung) Allison, who developed an interest in space at an early age. While attending NDSU, she completed four semesters of cooperative work with NASA, and after receiving a bachelor's degree in electrical engineering in 1995, began working with the NASA/Payload Operations Branch, Mission Operations Directorate in June that same year.

Allison served as a certified flight controller in Houston's Mission Control Center, and participated as a flight controller on seven shuttle flights. She later moved to the position of Russian segment specialist flight controller for the NASA/International Liaison Office, Mission Operations Directorate. In that position, she was responsible for the development of the functional cargo black databook, which describes the systems, hardware and operations of the Russian module. While in that position, she received the Boeing Employee Appreciation Award.

Allison, who currently lives in Japan, is operations engineer at the Japan Manned Space Systems Corporation-America Inc. Her responsibilities with the Japanese Experiment Module (JEM) flight control team include engineering support to NASA and operations preparation for the Japanese-built centrifuge and rotor.

Heritage Award for Alumni Service

The Heritage Award for Alumni Service, which signifies outstanding volunteer service to NDSU, will be presented to Robert Crom.

Crom

Crom received a master's degree in education administration from NDSU in 1957. He also has a bachelor's degree from Iowa State University and a doctorate in communication from Michigan State University.

Crom began his 13-year career at NDSU in 1953 as an instructor, and was the first director of communications. He served as assistant to President Hultz and President Albrecht from 1959-66. He chaired a multi-disciplinary committee that established the first instructional program in mass communication, and designed and taught a year-long sequence of undergraduate courses in agricultural communication and journalism. Crom was key in creating what is now known as the Office of University Relations.

Crom also established a committee of alumni that was the driving force behind the university's name change, involving a statewide general election referendum in 1960. As a result, voters approved the change in name from North Dakota Agricultural College to North Dakota State University.

Crom also was a farm reporter in Mason City, Iowa; a radio and television specialist for the U.S. Department of Agriculture, Washington, D.C.; director of alumni affairs and dean of university extension at Iowa State University; and director of Extension and Outreach for the National Association of State Universities and Land Grant Colleges (NASULGC), Washington, D.C. He retired from that position in 1993.

During his career, Crom has received numerous honors, including the NDSU Blue Key Doctor of Service Award, the National Farm House fraternity's Master Builder of Men Award, the Iowa Farm-City Council's Achievement Award and the Minnesota Extensions Service Director's Award for Distinguished Contributions.

Alumni Achievement awards

Alumni Achievement awards are given to alumni who have excelled in their chosen profession. Awards for 2003 go to Larissa "Lauri" Grunig and Gen. Charles F. "Chuck" Wald.

Grunig

Grunig received a bachelor's degree in English from NDSU in 1967. She earned a doctorate in public communication from the University of Maryland, College Park, and she has been on the faculty there since 1978. She currently is a professor of communications, teaching public relations and communication research.

Grunig's research interests center on public relations, development communication, communication theory, gender issues, organizational response to activism, organizational power and structure, and scientific and technical writing.

Grunig received the Institute for Public Relations Research and Education's Pathfinder Award for excellence in research in 1989. A 1990 survey conducted by P.R. Reporter, said she was one of seven educators nationwide named most often as a role model and mentor who has helped shape and share the body of knowledge in public relations.

She was the 1994 recipient of the Jackson, Jackson and Wagner Behavioral Science prize, sponsored by the Public Relations Society of America (PRSA) Foundation, for her public relations research. In 1995, she was elected to the Honor Roll of Women in Public Relations, and was named Outstanding Educator by PRSA in 1996. In 1999, she was named to PRSA's National Capital Chapter Hall of Fame, and was listed in PR Week's 100 most influential public relations people of the century and one of the country's top 10 educators.

Grunig's professional experience includes newspaper reporting and editing, and public relations consulting. She was founding co-editor of the Journal of Public Relations Research, has written more than 200 publications and is lead author of the first book about women in public relations.

Gen. Charles F. "Chuck" Wald earned a bachelor's degree in pre-law from NDSU in 1971. A member of the 1969 national champion football team and Alpha Tau Omega fraternity, Wald earned his commission through the Air Force ROTC program. He currently is deputy commander of the U.S. European command headquarters in Stuttgart, Germany.

Wald

Wald completed squadron officer school at Maxwell Air Force Base in Alabama in 1975. He served as an O-2A forward air controller in Vietnam, T-37 instructor pilot and F-15 flight commander. He also was assistant squadron operations officer, operations officer, chief of the U.S. Air Force combat terrorism center, assistant executive officer for the Air Force chief of staff, director of operations, support group commander, operations group commander, executive officer to the director of operations and U.S. senior national representative for the allied air forces central Europe headquarters.

He commanded the 31st Fighter Wing at Aviano Air Base in Italy, and served as special assistant to the national defense review's chief of staff. He was director of strategic planning and policy at U.S. Air Force headquarters, and served on the joint staff as vice director for strategic plans and policy. Prior to his current position, Wald commanded the 9th Air Force and U.S. Central Command Air Forces at Shaw Air Force Base, S.C.

Wald completed air command and staff college at Maxwell Air Force Base, and received a master's degree in political science from Troy State University in 1982. He completed national war college in 1990 and the program for senior officials in national security at Harvard University in 1993. Wald is a command pilot with more than 3,200 flying hours, including more than 450 combat hours over Vietnam, Cambodia, Laos, Iraq and Bosnia.

Wald has received numerous awards and decorations throughout his military career, including the Defense Distinguished Service Medal, Defense Superior Service Medal with oak leaf cluster, Legion of Merit with two oak leaf clusters, Distinguished Flying Cross with two oak leaf clusters, Meritorious Service Medal with oak leaf cluster, Air Medal with six oak leaf clusters, Aerial Achievement Medal, Air Force Commendation Medal, Presidential Unit Citation with oak leaf cluster, Joint Meritorious Unit Award, Combat Readiness Medal, National Defense Service Medal with service star, Vietnam Service Medal with service star, Southwest Asia Service Medal with service star, Humanitarian Service Medal, Republic of Vietnam Gallantry Cross with Palm and Republic of Vietnam Campaign Medal.

NDSU epidemiologist studies West Nile virus

Margaret Khaita, epidemiologist and assistant professor of veterinary and microbiological sciences, has found herself at NDSU studying a disease that was first identified in her native country of Uganda 66 years ago.

"I think it's very ironic that one of the first projects I did here at NDSU was study West Nile virus because it was first identified in the West Nile District of my native Uganda back in 1937," Khaita says. The West Nile virus was first identified in North America in 1999.

"The North Dakota state veterinarian had collected some data on horses with WNV in 2002, and these data needed to be analyzed," Khaita said. She collaborated on the project with Charles Stoltenow, NDSU extension veterinarian and associate professor of animal and range sciences. "Because West Nile virus had just spread to North Dakota, it was important to know how the disease affects horses."

At the time the data was collected, a West Nile virus vaccine for horses had just been conditionally approved. It was found that the vaccine did improve the horse's odds of recovery especially if the manufacturer's recommendations as to number and time between shots were followed.

From the data, Khaita and Stoltenow found that it could be determined clinically, with some degree of certainty, whether an infected horse would live or die. "Horses that were infected and had become disoriented were mostly able to recover," Khaita says. The horses that were no longer able to get up from their hind legs or were completely down, usually didn't recover. Also, older horses stood less chance of recovering from West Nile, according to the study. The pair hopes to have results of the study published in the *Journal of American Veterinary Medical Association*.

Khaita also studies an E-coli bacteria in beef that causes health problems mainly in children and older adults with weak immune systems.

Khaita teaches epidemiology courses to undergraduate and graduate students through the NDSU Great Plains Food Safety Institute and the Department of Veterinary and Microbiological Sciences, and plans to introduce two new epidemiology courses.

"I like it when I can use the tools I have to answer practical questions," Khaita says. "Right now I'm trying to identify some of the animal health problems we have in the state, and then I will try to solve the problems using the background training I have."

"Most food safety issues deal with organisms that affect animals and people so you can't separate the two. We need to address the problem in animals so it doesn't spread to the human population," Khaita says.

"I felt NDSU was a good fit for me because I'm very interested in food safety, which is one of the issues I'll be able to address here," Khaita says. "I read about North Dakota and the prairies of North America as a child, especially about all the grain that is grown here, but I had no idea I'd end up here."

Khaita studied veterinary medicine at Makerere University, Kampala, Uganda, and received her master's degree at the University of Edinburgh, Scotland. She has a doctorate from Ohio State University, and completed post-doctoral work at the University of Nebraska-Lincoln prior to coming to NDSU in January.

Khaita says she has been impressed with the amount of collaboration that takes place on the NDSU campus. "I'm able to work with other departments on campus, the state veterinarian and the state epidemiologist. I'm also able to share some of the advanced equipment that we have here in the department and on campus."

College of Agriculture, Food Systems, and Natural Resources announces new faculty

The NDSU College of Agriculture, Food Systems, and Natural Resources is welcoming four new faculty members to campus. They include Simeon Kaitibie, research assistant professor of agribusiness and applied economics; Anatoliy Skripnitchenko, research assistant professor in agribusiness and applied economics; Margaret Khaita, assistant professor of veterinary and microbiological sciences; and Paul Ode, assistant professor of entomology.

"We are proud of the qualifications and backgrounds of the faculty who have joined our college this year, and we look forward to having them on our team," said Patricia Jensen, vice president and dean of agriculture, food systems and natural resources.

Kaitibie comes to NDSU from Oklahoma State University, where he was a postdoctoral research assistant in the Department of Agricultural Economics. Kaitibie earned his bachelor's degree at Njala University College, University of Sierra Leone, Freetown, Sierra Leone. His master's degree and doctorate are from Oklahoma State University, Stillwater. Kaitibie's research interests include production economics, farm management, agribusiness management and food safety policy.

Skripnitchenko previously was a research assistant at Purdue University's Department of Agricultural Economics and a visiting scholar at the USDA's Economic Research Service. The recipient of the Travis Manning Book Prize for 1997-98, Skripnitchenko earned his bachelor's degree at the National Agricultural University, Kiev, Ukraine, and his doctorate in agricultural economics from Purdue University, West Lafayette, Ind. He lists international trade and development economics among his research interests.

Khaita joins NDSU from the University of Nebraska-Lincoln, where she was a postdoctoral research fellow in the Department of Veterinary and Biomedical Sciences. Khaita earned her bachelor's degree at Makerere University, Kampala, Uganda; her master's degree in tropical veterinary medicine from the University of Edinburgh, Scotland; and her doctorate in veterinary preventive medicine and epidemiology from Ohio State University, Columbus. She is a member of the Phi Zeta National Honor Society of Veterinary Medicine.

Ode previously was a postdoctoral research associate with USDA-ARS Beneficial Insects Introduction Research at the University of Delaware, Newark. He received his bachelor's degree at Earlham College, Richmond, Ind., and his master's degree and doctorate in entomology at the University of Wisconsin-Madison. His vita lists seven publications.

Events

Homecoming week to feature State of the University, dedications

Several major events, including President Joseph A. Chapman's State of the University Address, will be among the featured highlights during Homecoming celebrations Oct. 9-11. Dedication ceremonies are scheduled for the Minard Hall Addition, Equine Science Center and the Criminal Justice and Public Policy building, and a groundbreaking for the Horticultural Demonstration and Research Plots also is planned.

The State of the University Address, the fifth to be presented by Chapman since he came to campus, is scheduled for 11 a.m. Thursday, Oct. 9, in Festival Concert Hall. Everyone on campus and the public is invited.

The dedication for the new \$3.2 million Minard Hall Addition is set for 12:15 p.m. Thursday, Oct. 9. The 23,000 square foot building includes seven new classrooms, two Problem Based Learning laboratories and a coffee cart area.

"It's like having a new and good-fitting suit. We can breath a little easier in terms of classroom space and the number of students we can seat," said Thomas Riley, dean of art, humanities and social sciences. "Metaphorically, it combines the arts with the humanities and social sciences by joining the Music Education Building and Festival Concert Hall with Minard Hall."

Dedication ceremonies at the Equine Science Center are set for 2:30 p.m. Friday, Oct. 10. Completed this summer, the 400-stall horse barn is a 600-foot by 134-foot building located near 19th Avenue North and east of 57th Street North. About 35 students currently are enrolled in the equine studies program.

"The reality of the building and the equine program is a great time for celebration for us. We are very pleased with the building and the interest expressed by students, the community and the faculty. We thank President Chapman for giving us the boost of support that helped make a dream become reality," said Patricia Jensen, vice president and dean of agriculture, food systems and natural resources. "The facilities will allow a unique partnership between the community and NDSU, unlike any other that I'm aware of in the United States."

A groundbreaking ceremony for the Horticultural Demonstration and Research Plots is planned for 8:30 a.m. Saturday, Oct. 11. The plots will be located at the northwest corner of the intersection of 12th Avenue North and 18th St. North.

"This will be a tremendous addition to NDSU," said Albert Schneiter, professor and chair of plant sciences. "It will make a nice welcome for visitors coming to campus from Interstate 29. The first thing they'll see coming over the 12th Avenue overpass will be the NDSU gardens."

The first phase of the plots' development will include annual and perennial plants, an iris collection and NDSU's historic day lily collection covering four to five acres. Future plans call for the addition of a rose garden and turf research plots, with the gardens eventually covering 10 to 15 acres.

Immediately following at 8:45 a.m. is the dedication of the Criminal Justice and Public Policy building, 1616 12th Ave. N.

The 11,000-square foot building formerly housed an NDSU sorority and the YWCA. Remodeled to include offices, classrooms and computer clusters, the building will become the home of the Department of Criminal Justice and Political Science, entities of the Upper Great Plains Transportation Institute, the Red River Basin Institute and some sociology classes. Four criminal justice faculty and three political science faculty will have offices in the building. Two more faculty members are expected to join the department within the next year.

Also on Oct. 11, a rededication ceremony for the Memorial Union is planned for 11 a.m. at the south entrance, weather permitting. The building, which turns 50 years old, opened during Homecoming week in 1953.

The ceremony will feature special recognition of several individuals who played an important role in the history of the Memorial Union, including Dale Brostrom, who served as the first director for 10 years while also being the director of Churchill Hall. Also to be honored are former faculty member Glen Hill and a group of students who traveled to South Dakota State University to get ideas for getting the campaign started to fund the building project. In addition, Catherine Cater, professor emerita of English, will be recognized for her work with students to establish the permanent art collection in the Memorial Union Gallery.

"We are also putting together a time capsule," said Kara Stack, assistant director of campus programs. "We want to put in things that show what life is like for students of today. Our plan is to have it opened in 50 years."

A pep rally and the Bison Feed are scheduled for 11 a.m. at the Bison Sports Arena, followed by the Bison vs. the University of Nebraska-Omaha Homecoming football game at 1 p.m., in the Fargodome.

Alumni Association, Development Foundation Homecoming events set

The following 2003 Homecoming schedule includes NDSU Alumni Association and Development Foundation events, plus some campus events. If no phone number is listed, call the NDSU Alumni Association at 1-6800 for more information.

Friday, Oct. 10

- Bison Athletic Hall of Fame luncheon, 11 a.m., Fargo Holiday Inn. Tickets are \$15 per person. Call NDSU sports information at 1-7197 for details.
- "It's YOUR Art" exhibit reception, 4 p.m., Memorial Union Gallery. Call 1-7900 for details.
- Little Country Theatre sculpture unveiling, 4 p.m., Askana Hall south lawn.
- Auditions for the part of Tevye in NDSU's production of "Fiddler on the Roof," 5-7 p.m., Walsh Studio Theatre. Call Pamela at 1-6657 for details.
- Reception with film director Chris Eyre, 6 p.m., Fargo Theatre. Screening of the film "Skins," 7 p.m. For more information, call Jaclynn Davis Walette at 1-8205.
- Alumni honors social and dinner recognizing outstanding alumni, 6 p.m., Fargo Holiday Inn. Tickets are \$30 per person.
- Gold Star Band centennial celebration social and banquet for band alumni and friends, 6:30 p.m., Ramada Plaza Suites.
- Blue Key Homecoming show and coronation, 7:30 p.m., Festival Concert Hall. Entertainment by student groups.
- All-alumni and friends social, 9 p.m., Fargo Holiday Inn. Free.

Saturday, Oct. 11

- Homecoming 5k Classic, 8 a.m., NDSU Wellness Center. Contact Brent Parmer at 1-8317 or Brent.Parmer@ndsu.nodak.edu for more information.
- Gold Star Band breakfast and practice, 8 a.m., Fargodome lobby.
- NDSU Alumni Center open house, 9 a.m.-4 p.m. Refreshments will be served.
- Parade, 10 a.m., University Drive and 12th Avenue North. Includes Homecoming king and queen, Gold Star Concert Band and various floats. For more information, call the student activities office at 1-7787.
- Pep rally and Bison feed, 11 a.m.-12:30 p.m., Bison Sports Arena. Tickets are \$6.50 for adults and \$3.50 for children under 10. Includes entertainment by the Gold Star Concert Band and NDSU alumni band, face painting, jumping booth and a clown.
- Football game vs. the University of Nebraska at Omaha, 1 p.m., Fargodome. Tickets are available by calling 1-6378 or at www.gobison.com.
- Gold Star Band post-game social, 4:30 p.m., Fargodome second floor conference rooms.
- Bison Bidders Bowl, 5:30 p.m., Fargo Holiday Inn. The event, sponsored by the NDSU Development Foundation, includes cash and gifts auctioned and raffled to benefit the university. Tickets are \$90 per person, and advance reservations are required. For more information, call the NDSU Development Foundation at 1-6844.

Biotechnology perspectives workshop planned

NDSU, the NDSU Extension Service and the Department of Agriculture will sponsor the "Domestic and International Perspectives of Biotechnology" workshop, scheduled for 1-8 p.m. Monday, Oct. 13, at the Fargo Doublewood Inn. Dinner will be provided.

The workshop is designed to present various public views regarding biotechnology. In addition to the focus on biotechnology crops, perspectives relating to the health industry are expected to be presented.

A schedule and registration information is available at www.ag.ndsu.nodak.edu/biotech/workshops.html. Requests for accommodations related to disabilities should be made to Melanie Ziegler at 1-7171 one week prior to the workshop.

'Beyond Words' display at library

"Beyond Words: Celebrating America's Libraries," a photo exhibit sponsored by the American Library Association (ALA) and the Library of Congress, is scheduled for display Oct. 2-23 in the Main Library's Lower Level Gallery.

The exhibition began traveling throughout the United States in January 2001, and will continue to be shown through November. NDSU is the exhibit's only North Dakota location.

The display showcases 21 award-winning photographs, which were entered in the Beyond Words photo contest in January 1999.

"These photos capture the magic of our libraries and the way they touch our lives everyday," said Nancy Kranich, ALA past president.

Mathew to give statistics seminar

The Department of Statistics' Distinguished Lecture Seminar will feature Thomas Mathew of the University of Maryland-Baltimore County Campus. His talk, "Generalized Confidence Intervals," is scheduled for 3 p.m. Friday, Oct. 17, in Loftsgard 380.

Mathew will review the concept of a generalized confidence interval introduced by Weerahandi. Mathew considers the concept particularly useful for obtaining confidence intervals for messy parametric functions in "nice models." He will give several examples where confidence intervals can be easily obtained using the generalized confidence interval idea. He will include the Behrens-Fisher problem, interval estimation of a bound normal mean and tolerance intervals in a one-way random model.

Prior to Mathew's presentation, coffee and cookies will be served from 2:30-2:45 p.m. and an RRC/ASA chapter meeting will be held from 2:45-3 p.m.

The visit is made possible by grants from the Cooperative Sponsorship Committee, the NDSU Department of Mathematics, the NDSU Department of Statistics and the ASA Red River Valley Chapter.

Cultural Awareness Month events set

NDSU will celebrate Cultural Awareness Month in October with a variety of educational events, including a special appearance by American Indian filmmaker Chris Eyre, director of the acclaimed motion picture "Smoke Signals."

Other scheduled events include brown bag seminars, on-campus screenings of "Smoke Signals," an art exhibit and an international and multicultural dance party on Halloween. All events are free and open to the public. The full schedule of activities is as follows:

Wednesday, Oct. 1

A screening of the film "Smoke Signals" is scheduled for 7 p.m. in the Memorial Union Century Theater. The film is directed by Chris Eyre and stars Adam Beach. Paul Boswell, director of Multicultural Student Services, will present a brief introduction to the movie, which is based on the Sherman Alexie novel, "The Lone Ranger and Tonto Fistfight in Heaven."

Friday, Oct. 3

"Smoke Signals" will be shown at 7 p.m. and 9:30 p.m. in the Century Theater.

Friday, Oct. 10

American Indian filmmaker Chris Eyre will present a special program at 1:30 p.m. in the Century Theater. Eyre's other films include the contemporary American Indian drama, "SKINS," and the Tony Hillerman mystery, "Skinwalkers," co-starring Wes Studi and Adam Beach.

Sunday, Oct. 12

NDSU will have an informational booth at the annual "Cultivate Our Cultures" communitywide celebration scheduled for noon-4 p.m. at Fargo South High School. The event, coordinated by the Cultural Diversity Resources Office, features ethnic food, cultural exhibits, children's games and a parade of ethnic dresses. Scheduled performers include an African ensemble, an American Indian drum group and musicians from Sri Lanka. For more information, call 526-3004.

Wednesday, Oct. 15

A YMCA of NDSU brown bag seminar, "Diabetes: The Health Risks for All," is scheduled for noon in the Memorial Union Peace Garden Room. A panel of guests will help identify risk factors and health symptoms that may lead to the onset of Type II (adult onset) diabetes. Scheduled panelists include Colleen Demarce, outreach health worker for Native American Programs/Family Health Care Center; J. Wade Hannon, associate professor in the School of Education; and Yeong Rhee, assistant professor of health, nutrition and exercise sciences.

Friday, Oct. 17

"Honor the Earth: Multicultural Journeys," a one-day exhibit by artist Betty LaDuke, is scheduled for 9:30 a.m.-9 p.m. in the Memorial Union Gallery. A reception is scheduled at 7 p.m. The exhibit is a collection of LaDuke's work that celebrates her experiences in the African country of Eritrea. The painter, printmaker, activist and teacher describes her work as a celebration of cultural diversity. The event is sponsored by the Memorial Union Gallery and the North Dakota Peace Coalition. For more information, call the gallery at 1-8239.

Tuesday, Oct. 28

"Top 10 Ways to Improve Your Lifestyle," a brown bag seminar sponsored by the YMCA of NDSU, is scheduled for 12:30 p.m. in the Memorial Union Peace Garden Room. A panel of multicultural students studying pharmacy, nursing, nutrition

and counseling will share their "Top 10" ideas for adopting and maintaining a healthy lifestyle.

Friday, Oct. 31

International Programs and Multicultural Student Services will host the International and Multicultural Dance Party scheduled for 6-11 p.m. in the Memorial Union Dakota Ballroom. Planned events include "Cultural Jeopardy," games, door prizes, giveaways, Halloween costumes, music and dancing.

Cultural Awareness Month sponsors include the NDSU Black Student Organization, Campus Attractions, Cultural Diversity Resources, Fargo Theatre, Hispanic Organization of Latin Americans, International Programs, Memorial Union Gallery, Multicultural Student Services, Native American Programs/Family Health Center, Native American Student Association, Northern Plains Voices, Tri-College University and the YMCA of NDSU.

For more information, call NDSU Multicultural Student Services at 1-1029.

'Beyond Boundaries' technology in teaching conference scheduled

"Beyond Boundaries," a regional conference on integrating technology into teaching and learning, is scheduled for Oct. 23-24 in the University of North Dakota Memorial Union, Grand Forks.

The conference will highlight regional faculty and administrators' experience and success with technology in various learning environments. Sessions designed for faculty and administration, students and other professionals are planned.

The scheduled keynote speakers are Tony Bates, director of distance education and technology at the University of British Columbia, and Steven W. Gilbert, founder of the Teaching, Learning and Technology Group.

For a detailed schedule and registration information, visit www.beyondboundaries.info, call (701) 777-2663 or (866) 579-2663, or e-mail to conferences@mail.und.nodak.edu.

Visual arts alumni exhibition scheduled

A visual arts alumni exhibition is scheduled for display from Oct. 7-Nov. 2 in the Reineke Visual Arts Gallery. A reception is planned for 4:30 p.m. Friday, Oct. 10.

The annual exhibit will feature recent work by various NDSU visual arts graduates, and recognize their accomplishments.

Gallery hours are 10 a.m.-5 p.m., Monday-Friday. For more information, call the gallery at 1-6484.

Communication brown bag seminar set

"What I Should Have Said," a brown bag seminar sponsored by the YMCA of NDSU, is scheduled for noon Wednesday, Oct. 8, in the Memorial Union Peace Garden Room.

Curt Biller and Jodee Bock of One Degree Consulting will address ways in which to achieve better results with assertive communication.

For more information, call 1-5225.

Film director to visit NDSU

Chris Eyre, director of the award-winning film "Smoke Signals," is scheduled to visit NDSU at 1:30 p.m. Friday, Oct. 10, in the Memorial Union Century Theater.

Eyre, a member of the Cheyenne and Arapaho tribes in Oklahoma, also will be on hand to discuss his work following a showing his latest film "Skins" at the Fargo Theater later that evening.

Eyre has a master's degree in filmmaking from New York University. He is the recipient of the Haig Manoogian, Warner Brothers and Martin Scorsese Post Production Awards, and the first place Mobil Award at New York University's First Run Film Festival. He was awarded the Rockefeller Foundation Intercultural Film Fellowship in 1995.

He has participated as a film fellow in the Sundance Institute's labs for screenwriters, producers and filmmakers, and was named the United States award winner of the Cinema 100/Sundance International Award.

All events are free and open to the public. Eyre's visit is sponsored by the North Dakota Humanities Council, Northern Plains Voice, NDSU, Concordia College, Minnesota State University Moorhead and Tri-College University.

For more information, call 1-8205 or (218) 299-3969.

River ecologist David Arscott to speak at NDSU

Two presentations by river ecologist David B. Arscott, Stroud Water Research Center, are planned for Oct. 2-3 at NDSU.

Arscott is scheduled to present "Floodplain Dynamics along the River Continuum" at 12:30 p.m. Thursday, Oct. 2, in Stevens Hall room 231 during the class session of limnology. The public is invited.

Arscott also will present "Life in a Dynamic Floodplain River: The Tagliamento River, NE Italy," at 3 p.m. Friday, Oct. 3, in Stevens Hall room 230. Refreshments will be served following the seminar. The seminar is sponsored by the NDSU Biotic Resources Program, with support from ND EPSCoR, the North Dakota Water Resources Research Institute, Cooperative Sponsorship and the College of Science and Mathematics.

Prior to joining the Stroud Center, Arscott was a research assistant professor at the University of Minnesota-Crookston. He currently is project coordinator for Stroud's water quality monitoring program in New York. The Stroud Center, located in Avondale, Pa., is known for its pioneering research on streams and rivers.

For more information on the seminars, or to schedule a visit with Arscott, contact Mac Butler, professor of biological sciences, at 1-7398, or Malcolm.Butler@ndsu.nodak.edu.

Shorts and Reminders

Macintosh representative on campus

NDSU's Apple representative is scheduled to hold an informational session at 2 p.m. Thursday, Oct. 9 in the Memorial Union Prairie Room. Planned discussion items include Panther, the G5 and Soundtrack. All Mac users are welcome to attend.

Union Food Court specials for Oct. 1-8
