

NDSU, Drinka honored by CASE

Drinka

NDSU received several awards at the Council for Advancement and Support of Education (CASE) District VI conference Jan. 23, in Kansas City, Mo. In addition, Keri Drinka, director of college advancement for the College of Arts, Humanities and Social Sciences and College of Science and Mathematics, was recognized with the Distinguished Service Award.

Drinka was recognized for her service to CASE District VI, including serving as district treasurer, Finance Committee chair, Arrangements Committee chair, Food and Beverage Committee chair and Registration Committee chair. She also has served on the district's board of directors.

She was described as a person who served "with great energy, accuracy and distinction as the treasurer of the district," and that "she exemplifies volunteerism at its best."

In the area of Excellence in Alumni Programming, NDSU received a grand gold for special groups programming and a bronze for student advancement programming.

In Excellence in Electronic Publications for Alumni, NDSU was awarded a silver for its alumni Web site.

NDSU received a silver for the President's Report/Annual Report in the category of Excellence in Communications-Overall.

In Excellence in Communications-Periodicals, NDSU received a gold for its magazine and a silver for external audience tabloid/newsletter.

For Excellence in Writing, NDSU received a silver in the feature story category and a bronze in the speech category.

Under Excellence in Graphic Design, NDSU received a gold for a poster of one, two or three colors.

NDSU received a gold in the CD/DVD category of Excellence in Multimedia.

In Excellence in Fundraising Materials, NDSU received a silver for fundraising videos or DVDs.

NDSU also received a gold for special events organized around special occasions in the Excellence in Fundraising Special Events category.

"The judges of the CASE District VI contest recognized the quality of the work produced by NDSU," said Jim Miller, NDSU Development Foundation executive director and the CASE district representative on the national board of directors. "The organization serves development officers, alumni organizations and campus communicators, and we did well in all areas."

President Chapman announces awards

President Joseph A. Chapman has announced the availability of three awards designed to support and enhance the engagement of NDSU with Fargo and the state of North Dakota. Each award carries a stipend of up to \$20,000.

The Ozbun Economic Development Award is established to stimulate NDSU faculty to assist the state in the area of economic development.

The Efficiency in Government Award sponsors studies to increase efficiency in state, county or city government in North Dakota.

The Community Projects Award sponsors studies for betterment of the community in the area of social concerns.

Persons interested in the awards should submit a one-page proposal with a proposed budget to the President's Office no later than March 27.

PEOPLE

Soleim writes children's book

Heather Soleim, coordinator of transfer services in the Office of Registration and Records, has written a children's book titled "God's Incredible Creatures: The Gift of Sharing."

Published by Reel Productions, the book is loosely based on a series of videos called "God's Incredible Creatures," released by Exploration Films. The series of videos explores creationism and the unique physical properties many animals possess.

In Soleim's book, Sammy, a squirrel has just found the largest acorn ever and doesn't want to share it. On Sammy's desperate quest to hide the acorn from his sister, he meets a few of God's creatures. Sammy's efforts teach children that everyone has been given important gifts in life.

Soleim has been employed by NDSU since November 2001. She says her writing is inspired by her love for nature and her daughter, Lily. The book is available at the Varsity Mart.

Sellnow named journal editor

Deanna Sellnow, professor of communication, has been selected to serve as editor of *Communication Teacher*, a publication of the National Communication Association. The journal, which is published quarterly, focuses on innovative pedagogical practices and systematic assessment research of such practices in communication classrooms.

Sellnow said she is honored by the opportunity to serve the profession in ways that contribute directly to the improvement of teaching and learning in the field.

Sellnow's tenure as editor will run from 2008-10, and she will begin accepting manuscripts Feb. 1.

Jauhar honored in India

Prem P. Jauhar, research geneticist with the USDA—Agricultural Research Service, Cereal Crops Research Unit, Northern Crop Sciences lab and adjunct professor in plant sciences, was recently honored by T.V. Rajeswar, governor of the Indian state of Uttar Pradesh and chancellor of Chandra Shekhar Azad University, Kanpur, India.

On Nov. 27, Jauhar received the Robe of Honour and the University Memento for his outstanding research contributions. He also was named an Honorary Fellow of the Indian Society of Biotechnology.

"I have previously received several international awards, but it was indeed a pleasure to be recognized in India, my motherland," Jauhar said. "I felt most honored to be recognized by Gov. Rajeswar."

During his visit, he gave a plenary lecture on "Biotechnology as an Important Tool for Incorporating Value-Added Traits in Cereal Crops," at the International Conference on Biotechnology. He also served on the conference's international advisory committee.

Jauhar traveled to India in November, and also gave lectures at several universities, including Delhi University, Delhi; Indian Agricultural Research Institute, New Delhi; Banaras Hindu University, Varanasi; National Botanical Research Institute, Lucknow; Punjab University, Chandigarh; Rajasthan University, Jaipur; and Jai Narayan Vyas University, Jodhpur.

Jauhar's research embraces diverse areas of classical cytogenetics and biotechnology, and their relevance to plant breeding. He discovered the genetic control of chromosome pairing in polyploid species. Jauhar's current research focuses on wheat germplasm enhancement using both classical cytogenetic and modern biotechnological tools. His lab produced the world's first transgenic durum wheat in 1995 and standardized the procedure for genetic transformation.

Jauhar is an associate editor for the *Journal of Heredity*, an international journal of genetics. He is a Fellow of the Crop Science Society of America, the American Society of Agronomy and the American Association for the Advancement of Science.

Harvey receives Charles A. Weyerhaeuser book award

Mark Harvey, professor of history, received the Charles A. Weyerhaeuser Award for his book, "Wilderness Forever: Howard Zahniser and the Path to the Wilderness Act."

The Forest History Society in Durham, N.C., gives the award annually for the best book in forest and conservation history. The author must exhibit fresh insight into a topic and must provide a narrative analysis that is clear, inventive and thought provoking.

"I am delighted to be the recipient of the Weyerhaeuser award," Harvey said. "It is one of the top book awards in the field of environmental history."

The University of Washington Press published "Wilderness Forever" in 2005. Harvey's biography tells of Zahniser's efforts to defend threatened wilderness areas by lobbying for federal legislation to protect primitive areas in national forests.

The Forest History Society prefers to keep judges for the award confidential. One unidentified judge wrote: "Harvey does an excellent job of bringing Zahniser's life into perspective and reconstructing the pivotal role he played in the early formation of the Wilderness Society, and most importantly, the passage of this landmark legislation."

"Having served as a judge for this award in past years, I know that the competition is stiff," Harvey said. "Being honored with the award this year is something I will always cherish."

EVENTS

Agricultural Technology Expo planned

The 59th annual Agriculture Technology Expo is scheduled for 9 a.m.-4 p.m. Saturday, Feb. 10, in the Agriculture and Biosystems Engineering building.

"Fueling the Future" is the theme for the one-day event allowing students to display new technology in agriculture and engineering. It also is an opportunity for the public to attend and gain an understanding of agriculture and its technology. A student team, assisted by faculty advisers, is responsible for putting the show together.

More than \$1,000 in scholarships will be awarded to the top project winners in the divisions of power; machinery; structures; electrical power and processing; soil; water and environment; and precision agriculture.

Presentations will include alternative fuels and improvement of fuel efficiency, a quarter-scale tractor, hydro mulching, compaction, advantages of no-till, laser leveling and auto steer, seed priming, residue tillage, recommended storage and usage of biodiesel, floor trusses, types of grain elevators and implements.

The show is free and open to the public.

Radiation safety course scheduled

Gary Stolzenberg, radiation safety officer, is scheduled to present a course titled "Laboratory Use of Radioactive Material," from noon-5 p.m. Monday, Feb. 5, in the Family Life Center 319.

The course is designed for users of radioactive materials in a laboratory or in a field application. Successful completion of the course is required in order to use radioactive materials on campus. Stolzenberg will cover the basic theory of radioactivity, biological interactions with radiation, radiation protection, minimizing exposure levels of radiation, rules and regulations of radiation, safe handling of radiation, decontamination and lab procedures.

Registration is required. The course fee is \$25 for NDSU and cooperative agreement institutions and \$50 for all other participants.

Registered students must attend the full session. Students should bring a scientific calculator. People in the class will not pass unless the entire class is completed and they receive a passing quiz score.

For more information or to register, contact Stephanie Wegner at stephanie.wegner@ndsu.edu or call 1-7759.

NDSU Spring Career Fair

The NDSU Career Center will sponsor the Spring Career Fair, scheduled for 10 a.m.-3 p.m. Tuesday, Feb. 12, at the Fargodome.

The 2007 Spring Career Fair is an opportunity for students of all majors from NDSU and surrounding colleges to interact with more than 100 firms in a business casual environment for the purpose of exchanging information on co-ops/internships as well as full-time positions.

There also will be concurrent company presentations from 10:15 a.m.-3 p.m. The 12-minute presentations will give participants a detailed description of the company and positions available.

Jones to present 'Winterreise'

Robert Jones, associate professor of vocal music, is scheduled to present a faculty recital at 7:30 p.m. Friday, Feb. 9, in Beckwith Recital Hall. Andrew Froelich, professor of music, will accompany Jones on piano.

Jones' recital will feature Franz Schubert's "Winterreise, Op. 89," a cycle of 24 songs written in 1827 set to the poetry of Wilhelm Müller.

The work represents a zenith in German lieder, or song cycles. Operatic in scope, the work portrays a journey of the rejected lover away from the home of his beloved. The hostile winter environment mirrors the agitated psychological state of the wanderer as he drifts toward the infinity of madness.

Jones also is scheduled to present the recital at the University of Mississippi on Feb. 13 and at Delta State University on Feb. 15.

Hospitality and dietetics majors host fine dining restaurant

Majors in the fields of hospitality and dietetics are scheduled to host a fine dining restaurant on campus, open for lunch at 11:30 a.m. Tuesdays and Thursdays until April 26, in the West Dining Center.

Each meal features a set menu, planned by instructor Sherri Nordstrom Stastny. "Come hungry," Stastny said, noting the meals are varied, served quickly and prepared fresh. "Meals are large."

The meals feature popular restaurant items such as entrée salads, steaks, baked potatoes and fresh baked breads.

Reservations are preferred and may be made by calling 1-7023. Reservations can be made until 10 a.m. the day of the meal. Patrons are encouraged to arrive at 11:30 a.m., but may start their meal any time before noon. Tickets are \$7.50 and include a beverage service. No tipping is allowed.

The West Dining Center is located between the three residence hall towers on campus, just south of Newman Outdoor Field. For more information, contact Stastny at 1-7479.

Food production management lab to host fiesta

The food production management lab is scheduled to host a fiesta at 11:30 a.m. Thursday, Feb. 1, in the lower level of the West Dining Center.

Erin Cuomo and Andrea Klisch, juniors in the coordinated program for dietetics, will prepare southwestern chicken chili soup, chicken fajita wraps with Mexican corn and zesty refried beans. There will be a chocolate hip padder bar for dessert.

Reservations are preferred and can be made by calling dining services at 1-7023. Reservations will be accepted until 10 a.m. Feb. 1. Tickets are \$7.50 and include a beverage service.

For more information, contact Dining Services at 1-7023 or Sherri Stastny, food production management lab instructor, at 1-7479.

Ghana brown bag scheduled

"From Ghana, West Africa, to Fargo, North Dakota," a brown bag seminar sponsored by the YMCA of NDSU and Multicultural Student Services, is scheduled for noon Wednesday, Feb. 7, at the Memorial Union Century Theatre.

Graduation student Noah Addy will discuss why someone from Africa comes to North Dakota. "It is meant to serve as a motivational speech for other students who may have been in my shoes at some point in time," Addy said. "It is also for domestic students who may be taking many opportunities in the U.S. for granted."

Addy will discuss his cultural background, his journey to the United States, the opportunities he encountered, the struggles he faced and how he has overcome them.

Walette and Carter to host Sisterhood Circle

Jaclynn Walette, Multicultural Student Services director, and Malika Carter, assistant director, are scheduled to host a Sisterhood Circle at 2 p.m. Wednesday, Jan. 31, at Ceres Hall 201.

Sisterhood Circle is a monthly meeting for women of color and their allies to discuss various topics in a supportive environment. Each meeting begins with a short reading or video, which is a catalyst for the conversations. Participants will reflect on issues, share experiences, listen to each other and think about how to improve their own lives and communities through the synergistic power of the circle.

Possible topics for Sisterhood Circle include campus and community climate for people of color, remaining connected with allies, interracial relationships and Islam and women.

The group is open to all women of color whether student, staff or faculty and their allies. All circles take place in Ceres Hall 201, unless otherwise noted. For more information about Sisterhood Circle, contact Carter at Malika.Carter@ndsu.edu or 1-7383.
