Our environment is influential on how we feel and act.
Much of the success or failure attributed to an environment can be traced to its perceived experiential quality (PEQ).

Although one may be designing a Physical Rehabilitation Clinic, other divisions of wellness must be considered.
The **Biophilia Hypothesis** suggests that there is an instinctive bond between human beings and other living systems. Natural elements help in the reduction of stress.

**Basic Concepts**

- Sense of Control + Access to Social Support + Positive Distractions = Reduced Stress
## Typology & Program

**Rapid City Rehabilitation Clinic**

### In Patient Rehabilitation Service
- Rehabilitation
- Physical Therapy

#### Space
- Multipurpose Training Room: 600 sf
- Classrooms: 400 sf
- Restaurant/Dining Areas: 800 sf
- Patient Rooms: 5000 sf
