Stressing the importance of getting spring term registration completed as soon as possible, Registrar A. H. Parrott announced this week that late fees will be charged all students who fail to complete the task by April 1.

Since many of the advisors and school deans will not be available for consultation during the winter term final examination period or the spring recess, Registrar Parrott encourages students to finish preliminary details of registration this week.

To quote the Spectrum of October 15, 1926: "The Registrar is noted for his ability in remembering, name by name, all the students in college. We say this advisedly as there are a great number of Russians and Swedes registered. If a freshman forgets his name, and doesn't care to write home and find out what it is, just ask the Registrar." This may be old, but it still is good, just ask a Swede who owns one.

Continuing with the "quack" theme, Carol Pritchard's new shiny fabric Eisenhower jacket is definitely ducky.

Also notice Mathew's short green wool slacks or long green shorts—take your choice. And note Warner's burn-sugar wool jersey dress with the studded belt, definitely knock-out.

Column Questions Test Scholars Intelligence

By Jac Pushor

This week the Spectrum questionnaire contains a group of questions that every intelligent college student should be able to answer. Four correct answers gives you an excellent rating; 3, good; 2, fair; 1, poor.

George Rulon made an excellent rating. The correct answers can be found hidden on page 4.

1. What would you do if you had just cut a class and then sighted your instructor while making your getaway from Science?

(a) Whip out a pair of dark glasses and a false beard,

(b) Trip on the nearest object and lay low until the coast was clear,

(c) Dash up to the teacher, slap him on the back and slyly wink.

2. What would you do if you turned down a date, accepted another and then discovered the first fellow was riding in the same taxi as you and your date?

(a) Introduce him as your fifth cousin,

(b) Nonchalantly light a cigarette and set up a smoke screen.

(c) Or change the color of your lipstick.

3. What would you do if you walked into an 8 o'clock class with a Grain Belt label sticking to your overcoat?

By Joyce Tindall

Housekeeping on a cooperative basis is definitely the order of the day in NDAC's new Trailer Town, for as Mr. and Mrs. Paul Grinde have learned, housework and homework can conflict with each other. They explained the importance of some sort of schedule, for in living space of these dimensions day-by-day care is essential.

Paul Grinde of Lakota, N. D., and his wife, Edith, of New York City, moved into their portable home January 14, and were immediately confronted with the problem of cleaning and unpacking, making out schedules, and re-

viewing the first week of the winter term. According to both of them the work soon assumed larger proportions when their silverware and most of their furniture failed to arrive on time. Mrs. Grinde told of eating with measuring spoons and sitting on packing boxes while both the heat and refrigeration seemed non-existent!

Paul Grinde, comparing trailer life with other ways of living, said, "I believe that I would rather live here for all four years of school than have an apartment within a short distance of the campus because of its general comfort and economic aspects." Confirming his statement, he described the central laundry maintained in Trailer Town, the commissary which will open next term where canned goods, bought wholesale, can be purchased at one cent above cost, and a trailer's most important feature—complete convenience to all-college activities.

The trailer group has been organized into two wards or districts with an alderman in charge of each. Committees under the jurisdiction of Mayor Hugo Littig are now working on various improvements such as a definite laundry schedule for its users, street lights, and repair of the walks in the trailer camp.

Mr. Grinde was with the Army Air Corps, 459th Fighter Squadron, stationed in India for 30 months; while Mrs. Grinde served in the WAVES. His only comment on his service in India was that 30 months was just too long and too hot!

Edith Grinde is in the school of applied arts and sciences while

Paul Grinde is enrolled in agricultural education.

In the division of housework many amusing incidents arise as when Mrs. Grinde decides to have baked potatoes for dinner and discovers that while they have been supposedly baking for hours, the stove has run out of fuel! The two of them have found several short-cuts in trailer housekeeping for though the size of their home would indicate a minimum of work, actually it entails a good share of their time.

In discussing the attitude of married veterans on college life and its goals, Paul Grinde felt very definitely that under the GI Bill of Rights more people are now going to school with concrete plans and incentives to gain as much as possible from their education.
