Bison Personalities In the News

LAURA JANE HUGELEN

Presentation of the 1944-45 BISON has been a difficult task especially for the staff members of the NDAC annual.

Under the editorship of Sue Stenerson this year's BISON promises to be one of the best. Sue is a senior in Education from Minot.

On the financial side Laura Jane Hugelen acting as business manager is responsible for the success of the BISON. Laura Jane is also a senior and will graduate from the school of Home Economics. She is from Wahpeton.

The annuals can be obtained by the presentation of the spring activity ticket at the circulation desk at Room 123 Science Hall. Spring is really here, we hope. Seems we have said that before and you know what happened, but there's no harm in trying and trying is just what we've been attempting to do in the course of the past five months. It's the presenting of The Spectrum that we have reference to. It hasn't been an easy job, believe us, and we've had our ins and outs and ups and downs to say the least of it. There comes an end and this seems to be it, so at this time the staff would like to stand up for any praise do them, (we hope there is some), and sit down while you, the readers, tell us all the things we've done wrong in one way or another. (This time we'll not do any hoping.)

Couldn't help but gloat quite a bit after hearing the straight dope from President Eversull as to the status and rating due the AC via the Army. If the Army presented "E" flags to colleges, I'm sure the AC would be one of the first to receive one. Makes one feel just a little more proud of your Alma Mater.

Also at the Honors Day Convocation couldn't help but notice how Lt. Smith kept the attention of all in his talk. He really is a fine speaker and has something about him that seems to hit the mark.

While on the subject of handing out praises and although a little behind time, some mention is due to the Lilac Festival held a week ago. Many students spent much time and effort and the over-capacity house was indeed gratifying. To those that witnessed the spectacle little need be said concerning the characterizations presented in the skit scenes from "A Mid-summer Nights Dream." In a few words they were all terrific to say the least and made a big hit. Hats off to you, Bumpkins.

THANKS

We wish to take this opportunity to thank the merchants who have advertised in The Spectrum during the past year and we hope that our readers will acknowledge them for their cooperation with us.

Picnic Cancelled

The all college picnic, sponsored by the Y. M. C. A., which was to be held Thursday, May 24, has been called off. This was requested by Dean Sevrinson to make it possible for everyone to attend the Thursday Coffee Hour honoring Mrs. McVeety, Librarian at N. D. A. C.

Only Two More Weeks

NDAC PENN

Seasonable Stuff ..

BY UNCLE LOUIE'S NIECE

Courage, children! Only two more weeks. One more Chem. Lab, two more tennis classes, etc., etc.; I have a little schedule all written out, and every day I check off classes of the past, count classes of the future, and wish there were no classes of the present. But don't we all these days?

Spring should be a dreary season if there were nothing but spring. It would be drearier if there were nothing but classes. Luckily we DO have picnics. Of course, we also have rain, but who does that bother? After all, the mustard covers twice as many weiners when diluted 50% with rain water. Besides, a beautiful spluttering campfire gives a person such a nice warm glow in this cool weather, especially when one's fur coat catches on fire. True, the potato chips may become a bit dampened and soggy (it's because of either absorption or adsorption; I'm not sure which. I've only had two terms of Chemistry.) But they can easily be toasted over the open fire, and soon become their natural crisp selves. They smolder so beautifully when they fall into the fire, too. I really enjoy picnics, although even to a picnic those relatives must tag along. But then, what would a picnic be without a few ants?

The other day while on a picnic I saw my girlfriend set her bottle of coke in the grass while she toasted her weinie until acclimated. (A true acclimated weinie is slightly cracked. So is the toaster, or why would he be sitting on the damp ground in a mosquito-infested park just to carbonize the missing link from a long chain of sausages?) Anyhow, just as a little gnat neared the neck of the bottle, no doubt seeking nectar, a member of our group rescued the bottle from its attacker. As he snatched the coke from the grass, my friend pointed at him and said, "That's my pop!" He looked a little young to be her father, but of course I never doubt my friends.

(Silly, ain't I?) The less friends one doubts, the more friends one gains. Then again, the more friends one confides in, the more chances one takes of being double-crossed. My, my. Remind me to write a book of philosophical phrases sometime. Then I can sit by my fireplace on the long cold winter nights and enjoy myself as I page through my literary wonder. My, how cheerful and bright the blaze will blaze as I rip out pages and throw them in one by one.

I'm afraid I'm beginning to develop a slightly cynical attitude. I'm ready for vacation right now. "Semper Paratus", that's me. That phrase reminds me of a happening in a recent Foods class. The subject was potato cookery, the product was delicious, the problem was a surplus of sample product (this class meets right after lunch.) As she downed her sixth baked potato rosette, one gallant but cracking Home Economics girls was heard to scream wildly, "Semper Potatoes!" (We admit that's corny, but maybe she's from Iowa. Who knows? Anyhow, she said it.)

Well, I guess I can stop eating gunpowder with my daily Wheaties; I won't be shooting my mouth off to you anymore—at least for a couple of months. And now, as I stand on the deck of my luxury steamer, "The Cantankerous Tank," and watch the golden sun sink into the red of the western sky, I sing to you this little verse which is the tender parting song of the Colloid City Chemists Union. It is called, "Shed a Tear for Me — I'm Doomed", and it goes like this:

"If I were to precipitate,
 I'd settle down right now;
 I'd not stay in colloidal state
 And cause a nasty row.
 But since micelles must decline
 To settle, I'll do worse;
 I'll find myself a medium,
 And then—I will disperse."

Uncle Louis always loved that. Well, goodbye for the summer, and always remember, if you can't be beautiful, be a moron. It's more fun anyhow; take it from one who nose.

Odds

And

Ends

Long, long ago when I first began to deal in this kind of hod-wash every week, I decided that in the last issue, I would attempt to be nice. I find that it is harder to do than anything I have attempted before.

I believe Mary Hilleboe to be the cutest freshman girl on the campus. She is also as sincere as she is cute.

I believe that the SAEs have been overlooking great possibilities in Bill Stockman. He is wonderful. He is one person that continually takes the other fellows feelings and opinions into consideration.

I believe that Don Burns is another male that has been slighted. He is one of the very few sincerely friendly people on the campus.

I believe that Marj. Peterson is the best liked person on the campus. I have yet to hear anyone say anything against her.

I believe that Hjalti Palsson is a wonderful example of what is referred to in psychological circles as "adapting oneself to his surroundings." I marvel and admire this boy.

I believe that Laura Jane Hugelien is the sweetest individual on

campus. She is one who works quietly but very efficiently.

I believe that Mr. Sackett is the most humane instructor on campus. He has allowed the students to know him and still has their respect.

I believe that Dorothy Allen and Betty Lou Payne are the prettiest girls on campus.

I believe in George Duis.

I believe that Jean Broman is the most potential source of unexploited talent on campus.

I believe that Audrey Remme and Adelaide Dinwoodie are the best actresses on campus.

I believe that Kay Ranney is the loveliest person on campus.

I believe that Les Walters is one fine person. He really has a lot to offer.

As any fool can plainly see, this column is made up entirely of my own personal opinions. May they be accepted for what they are worth.

I wish to apologize to anyone that I have mentioned in my column, if I have hurt them in any way. I wrote merely for fun and for laughs.

As Little Tim said, "God bless us, one and all."
 —Mary Tilden.

Sigs Defeat Theta Chi

In the first game of the play-off in the intramural softball championship, Sigma Chi defeated Theta Chi by a one-sided 11-1 score.

Dale Myhra pitched his first game of the tourney, going the distance for the winners, and gave a superb performance allowing only one hit, a scratch single in the seventh, as his teammates were collecting 9 hits off the offerings of Grove and Warner who divided the mound duty for the losers. Myhra had eight strikeouts also to his credit and worked himself out of many a hole with his fine pitching ability.

Sigma Chi collected four runs in the first, one in the third, three in the fifth, two in the sixth, and one more in the final frame to match Theta Chi's only tally in that inning.

The next game between these two teams is scheduled for next Monday at 5 p.m.

Geology Class On Field Trip Today

The Geology class, consisting of 16 students, are taking a field trip today with Dean Minard, Mr. Carl Englehorn, soil scientist, and W. W. Moberg, geology instructor, into Minnesota. They plan to cover about 200 miles.

The group will visit sand pits in Sabin where delta formations, cross-bedding, and wave action will be seen. They will study soil profiles, view various beach ridges which are remnants of glacial Lake Agassiz, and glacial erratic boulders. Another point of interest will be to visit the highest point in Clay County to observe the triangular iron marker. Big stone moraines, kames, and kettle holes, together with the studying of the work of ice in the Detroit Lakes region, will add to the interest of the trip. The group will climb Detroit Mountain and study the solifluction slopes. They also plan to stop at Buffalo River State Park on their return from the lake region.

Maj. Robert D. Long of Park River, Eighth air force P-51 Mustang pilot, has been assisting in aviation medical research while on operational duty in England. As a member of the 339th Fighter group, he and other group pilots have been testing a new flying suit which has defeated "blacking out" or temporary loss of vision by preventing blood rushing from the brain during high speed maneuvers, states a public relations release.

The "G-suit," as called by the airmen, is fitted inside with five rubber bladders which span the abdomen, thighs and calves, says the release. By inflating beneath the tight-fitting garment, the bladders compress the veins, blocking any draining of blood from the brain into the lower extremities. For its pressure, the suit connected by a special valve to the Mustang vacuum pump. The bladders inflate in direct proportion to the amount of centrifugal force exerted against the pilot.

Former NDAC student, Maj. Long graduated from the Walsh County Agricultural school and also attended Miami university.
