Improving Physical Health: Designing urban environments for better physical health.

Master Plan

1 Highway 23

Sculpture Plan

33rd Street Narrative

The 33rd street Narrative of Highway 23 shows a major residential road along the railroad tracks. The new design will encourage pedestrian movement in the urban theme. The new design of the road incorporates a wide bike trail on one side of the road with a wide buffer zone, to accommodate bikers and pedestrians. Business moved closer to the trail to help create a street life along the road. Located in the central part of town Highway 23 is a major corridor that brings people through town. Located on the highway are many major destinations. Bike trails would continue along the entire railroad tracks and connect to existing bike trails. A community building with information about the trails, restrooms, and community rooms will be placed in the zone. Small picnic places can be found throughout the area.

Railroad Park Narrative

Located along an existing railroad track and a residential area is of the park. The park was designed to provide a safe and enjoyable area for recreation. The new design of the park incorporates a wide bike trail and pedestrian walkway on one side of the road. Business moved closer to the trail to help create a street life along the road. Located in the central part of town Highway 23 is a major corridor that brings people through town. Located on the highway are many major destinations. Bike trails would continue along the entire railroad tracks and connect to existing bike trails. A community building with information about the trails, restrooms, and community rooms will be placed in the zone. Small picnic places can be found throughout the area.
