Ashland

Great Lakes & Industrial Mining Pier & Shipping Exhibits
Problem Statement
How does the configuration and organization of elements in a space influence the engagements of its participants?
Theoretical Premise/Unifying Idea
Design has a significant influence on one's actions. By using elements both designed and in nature we can engage and evoke responses in a foreseen manner.

Justification
Instead of relying solely on the usage of signage and advice from others to navigate and perceive architecture, the use of visual cues, created from natural and built elements, will influence the actions and engagement of each visitor.
