GAY CAT DAY

Final plans for North Dakota State's greatest Gay Cat Day are on their way to completion and before the annual event is at hand, the merits of the proposed program demand attention.

The emphasis placed upon freshmen-sophomore rivalry is a distinct step forward. During the past few years, this tradition has been sadly neglected. The freshmen have had it too easy, and upon becoming sophomores they have had nothing to look back upon, on tradition to carry forward. It is lamentable that this has happened, but in the fututre it may easily be corrected. The Gay Cat Day program provides a tug of war and a pole rush both of which will revive the rivalry which flared only at times last fall. The Spectrum sincerely hopes that this will continue, and that upperclassmen of the future will be proud that they are upperclassmen becouse they had to work for the honor.

The acts put on by the fraternities and sororities on the campus will in time, it is hoped by many, merge into an annual event of its own, staged in a downtown theatre.

It is needless to say that a campus cleanup is in order.

As a whole the program as made by the commission should provide the students with a day of good wholesome fun. It seems very probable that another step in the advancement of this event will be taken Wednesday.

WHEN YOU GET IT

"You don't want what you want when you get it." This line from an old time song seems to hold true with several students on the campus with reference to student government. Student Court, held yesterday afternoon, brought out the presence of mind but absence of body of student campus law violaters.

The student commission form of government at North Dakota State college is as democratic as any in the country. Those who fail to respect its power are only casting reflections on themselves as a part of that government. Any action that will tend to weaken student government will tear down school consciousness and student pride. The Spectrum believes the student body as a whole has confidence in itself, and hopes no more evidences of disrespect will be manifested.

The Bison took 11 firsts out of a possible fifteen. Besides this, Saalwaechter's men piled up many second and third place points in nearly all events. Baldy Hays had a good day and copped three first places for 15 points He captured the honors in the pole vault, high jump, and broad jump. Sands, the phenomenal Norwegian ,took two firsts in the century and 220 dashes. In the century, his powerful legs carried him over the distance in ten seconds flat.

Jake Wahl took both the shot put and discus. Konichek finished first in the 440 and Nelson took first in the two mile and second in the mile. Wollan ran a pretty race to win the 880. The Bison relay team copped the relay in a handy fashion with Aitken, Peschel, Zeissler, and Sands running in the order named.

A strong wind hampered some of the events but the meet was handled in an excellent manner. Saaly's men are showing up well and should make a creditable stand against the University next week-end.

When Dad was a "Modern Youth"

BICYCLES, stereopticon lectures, and the "gilded" youths with their horses and carts; at night the midnight oil burning in student lamps while the gas lights glared and flickered across the campus—the gay nineties when Dad was in college seem primitive to us to-day.

Now it's sport roadsters, the movies, and radios. At night the MAZDA lamp replaces the midnight oil in dormitory rooms, while modern

street lighting sheds its friendly glow over the campus.

Without electricity we would have none of these improvements. To-day's marvel of electrical invention becomes to-morrow's accepted utility. In the coming years, by taking advantage of new uses of electricity you will be

No One Can Know His Eyes' Condition

Without undergoing an examination. No one can tell anything about the eyes merely by looking at them. They must be examined by instruments that detect the slightest deviation from normal. So there is very little use asking anyone if his eyes are normal. He doesn't But our examination would tell him. Then we could correct the defects we found.
