

## MILLER CHOSEN ON FORUM CONFERENCE BASKETBALL TEAM

McPherson, Hahn, Newgard also Selected on Second and Third Teams

By Milo Hoisveen

Claudie Miller, Bison guard, who has delighted the Bison followers for the past four years on the football field and basketball court was selected for the guard position on an All-Conference team selected by Pat Purcell of the Fargo Forum. The manner in which Claudie has been performing in all the contests played by the Bison this season warranted him the honor.

### HONOR ROLL

#### First Team

Forward—Brown, Creighton.  
Forward—Letich, N. D. U.  
Center—Redfield, S. D. U.  
Guard—Corenman, Creighton.  
Guard—Miller, N. D. A. C. —

#### Second Team

Forward—Couchman, Des M.  
Forward—Hahn, N. D. A. C.  
Center—McPherson, N. D. A. C.  
Guard—Viegel, N. D. U.  
Guard—Beha, Creighton.

#### Third Team

Forward—Brower, S. D. State.  
Forward—Goldberg, N. D. U.  
Center—Means, Morningside.  
Guard—Newgard, N. D. A. C.  
Guard—VanCitters, M'n'side.

### McPherson, Hahn on Second Team

McPherson was picked to fill the center position and Hahn a forward position on the second team selections. Hahn was third in the conference scoring race while McPherson finished in the fifth position.

McPherson is regarded equal to any center in the conference. He had little trouble in securing the tip-off from any center pitted against him for the big fellow stands more than six feet above sea level and possesses the ability to reach a much higher altitude. Mac also counted many shots of the follow-up variety and worked well on the defense.

At the forward position Hahn was rated with the first three outstanding forwards of the conference. Hahn was always good for two or more field goals at the most needed time, and for this reason Hahn should be on a par with Letich who was a first conference choice but not an effective scorer when in the most tense fray.

### Newgard Gets Guard Job

"Jug" Newgard was picked as one of the first six outstanding guards of the conference. "Jug" had previously put in three seasons at the forward position and was converted into a stellar guard by Coach Saalwaechter. Newgard caused many of the conference high point men to be satisfied with few or no points when opposed to the Bison. When "Jug" was called upon to advance the ball he showed that he had not lost any of his cunning or ability as a forward.

During the early season Hermes threatened the leading scorers of the conference but was handicapped in the later season by an attack of tonsillitis which kept him from continuous play with his teammates and hampered his scoring ability. Hermes displayed fine defensive ball as well as being a big factor in the defense.

## SIGMA THETA PLEDGES GIVE PART TONIGHT

Pledges of Sigma Theta sorority will entertain the active members at their second dancing party, to be given at the Elk's Hall on Friday night. Earl Olsen's orchestra will furnish the music.

Chaperones for the party will be Mr. and Mrs. L. T. Saalwaechter, and Mr. and Mrs. Leslie Welters, Jr. Dancing will be enjoyed from 8:30 until 11:30 p. m.

Eloise Powers, president of the pledges, has charge of general arrangements.

## TEACHERS TO GET SPECIAL COURSES

TEACHING OF SCIENTIFIC SUBJECTS TO BE STRESSED IN THE SPRING TERM

"Since the North Dakota State college has been recognized as the center of scientific learning of this section of the country we feel that special courses in the teaching of scientific subjects has become a necessary feature of the curriculum of the School of Education", declared Dean A. D. Weeks.

The offering of four new classes for the spring term is a continuation of the policy of the school to develop teachers who become authorities in the teaching of their special subject after taking the field. The courses offered in the spring program are as follows: Teachers' Course in English by Miss Waldron; Teachers' Course in Mathematics, by Miss Grimes; Teachers' Course in Physics by Mr. Hoffman; Teachers' Course in Biological Science by Prof. G. E. Miller.

The School of Education now offers a total of eleven subjects of this type.

## Y HOLDS NOMINATIONS FOR CABINET OFFICERS

Nominations for cabinet officers of the College Y. M. C. A. were made at a meeting of the members held recently. The Student Y. M. C. A. elections are to be held on Monday, March 28, the same day as the regular college elections will be held.

Nominees for the College Y. M. C. A. officers are: Donald Grant, Victor Lindgren, for president, the one receiving the lowest vote becomes vice-president; Leonard Rygg, Frederick Grant, for treasurer; Glenn Smith, Carl Ash, for secretary; and Stanley Brentson and Arthur L. Roe, for high school.

## COLLEGE PEOPLE SPEAK AT SHELDON COURSES

Prof. Lyman E. Jackson was one of the speakers from the college for a two days Farmers' Short Course held at Sheldon last week. Prof. Jackson's talk was on "Farm Crops". The second day Miss DeLong from the Extension department spoke on "Homes", and Dr. Don McMahon of the veterinary department spoke on "Diseases".

## FRESHMEN DYE SCARFS

All colors of the rainbow will be in evidence on the campus in a few weeks when the freshmen in the art classes of Miss Dorothy Hatch begin wearing dyed ties and scarfs which they have been making this term.

## CHEMISTRY ESSAYS ARE SUBMITTED TO NATIONAL CONTEST

Thirty-one Freshman Themes Selected for Nationwide Competition

Two hundred students of the School of Chemistry entered the national essay contest of the American Chemical Society, according to Dr. L. L. Carrick, acting dean of the School of Chemistry, who has charge of the contest.

### Local Contest Undecided

Judging of the winning essays in the local contest has not been completed.

Thirty-one essays written by freshmen students were sent into the Chemical Society contest headquarters last week.

### Themes Practical

Six distinct branches of chemistry and its application to industrial life were discussed in the selected essays.

Names of the students who competed and their topics follow: "The Relation of Chemistry to Health and Disease," Daniel Danielson, Hayb DeKleine, Thelma Lee, Harry Schrag; "The Relation of Chemistry to the Enrichment of Life", Arlene Burt, Walter Nelson, Carroll Nye; "The Relation of Chemistry to Agriculture or Forestry", Lawrence K. Ellson, Russell Weiser, Charles Hayford, Billie Eastgate, Ole Grottden, Lewis Nelson; "The Relation of Chemistry to National Defense", Grace Lamont, Erwin Theissen, Kenneth McCullough, Arthur Johnson, Harry Conroy, Frances Keene; "The Relation of Chemistry to the Home", Frances Ross, Dorothy Lieb, Grace Swanson, Margaret Greene, Ethel Benedict, Sabra Caylor, Dorothy Hartstein; "The Relation of Chemistry to The Development of an Industry or a resource of the United States", Agnes Hanson, Milo Hoisveen, Elsmere Chamberlain, Lucille Edlund, Albert Anderson, and Arthur Midstokke.

## KEGGS, WHIPPETS, STILL IN NET RACE

Monday night the hard driving Tappa Keggs quint overwhelmed the Barracks men 30 to 13. The Tappa Keggs cagers were never in danger.

The Whippets and Wolves staged a close battle, with the Whippets finally emerging victors, 19-11. The battle was undecided up to the final whistle while each team exchanged leads several times.

The Keggs athletes continued their winning streak Tuesday night by defeating the Architects 32-16.

With a .769 average, the "Y" quint heads the league. The Whippets and Tappa Keggs each have a chance to tie the Y. M. C. A. team in the final standings. In that event the tie will be played off next week among the leaders.

## PHI OMEGA PI FORMAL PLANNED FOR APRIL 2

Miss Esther Skjelset has been placed in charge of the annual spring formal of the Phi Omega Pi sorority. The date chosen for the party is Saturday, April 2. The occasion will also mark the twelfth anniversary of the founding the Beta chapter.

## GRADUATE SPEAKS AT AGRICULTURE SEMINAR

S. J. Sigfusson, graduate student of the School of Agriculture gave a report at the first of a series of two agronomy seminars which was held in room 210 of Agricultural hall Wednesday and Thursday afternoons at 4 o'clock.

Mr. Sigfusson's talk was on "The Differences of Soil and the Methods of Plant Technique."

He is assistant superintendent of the Canadian experiment station located at Brandon, Manitoba.

Mr. L. R. Waldron reported Thursday afternoon on "The Interpretation of Field Data".

## REMINGTON SPEAKS AT MINNESOTA "U"

"ARSENIC IN HUMAN ENVIRONMENT" IS SUBJECT OF SPEECH BEFORE CHEMISTS

Professor Remington of the school of Chemistry spent Monday and Tuesday of this week at the University of Minnesota, visiting the Departments of Physiology and Physiologic Chemistry. On Tuesday he addressed the Physiology Seminar of the University on the topic "Arsenic in Human Environment."

In his address Professor Remington discussed some experiments which he has been making in his laboratory here with reference to the amounts of arsenic which may be present in articles of food and condiments used by man. A very interesting development of this work, and one which has not been previously reported, is that ordinary tobacco contains enormous quantities of arsenic when compared with ordinary articles of food. While small amounts of arsenic stimulate, larger quantities are violently poisonous, and the line has not been sharply drawn.

The address provoked a most active discussion, and many suggestions for further work along this line.

## HIGH SCHOOL DISTRICT CAGE FINALS TONIGHT

The Fargo and Wahpeton high school quints will meet in the College Armory this evening to settle the basketball championship for the first district.

Although Fargo High gained a victory over the Wahpeton five in their previous contest no edge is conceded the Midget basketeers. Both teams vanquished their strongest sub-district opponents by decisive margins.

The victor of Friday's contest will be the district representative at the state tournament which will take place at Mandan. It is thought that the survivor of this contest will be one of the most serious contenders for the state title.

## "ALL COLLEGE" TO BE HELD SATURDAY

The final all-college dance of the winter term will be given Saturday night in the college armory. Dancing hours are from 8:30 to 11:30 p. m.

Miss Bernice Cramer, commissioner of social affairs, will have charge of the student party that is being sponsored by the Student Commission.

Dr. and Mrs. Trowbridge and Prof. and Mrs. J. R. Dice are serving as chaperones for the informal party.

Earl Olsen and his Collegians have been obtained to play.

## PEER GYNT STAGED WITH SUCCESS AT COUNTRY THEATRE

Scenery and Orchestra Features of Norwegian Stage Classic

The career of a dreamy, story-telling beggar, wild and inconstant as the Norwegian fjords he hunted upon, was unfolded in Ibsen's five act drama, "Peer Gynt" staged at the Little Country Theatre Wednesday and Thursday evenings.

### 77 Have Parts

Seventy-seven students in the department of public discussions took part in the play, directed by A. G. Arvold as an experiment in staging a large production on a small stage.

### Melchior, Fog in Leads

Constance Melchior, as Ase, Peer Gynt's mother, shared with Harold Fog, playing Peer Gynt, the stellar roles in the drama.

Miss Melchior and Mr. Fog portrayed with utmost reality the cynical, tragic situation of a mother's nature being haunted by her son's failings. Peer's actions, even his pranks, are dominated throughout the play by his selfishness.

His wretchedness is brought out at every turn. He trots about in rags. Neighbor's remarks bother him not a mite, as he goes on story-telling, stargazing, and making love to every lass.

Revenge is also a part of Peer's nature. He kidnaps the Hegstad bride to rebuff her later. He is insolvent to the Dovre king. He is lustful. Peer's failings drive him out of his homeland to get wealth but not happiness.

Solveig, a character part excellently portrayed by Charlotte Blake, meets Peer for the first time at the Hegstad wedding. Peer Gynt, wanted for his kidnapping activities, hides away in the mountains. Solveig promises to wait until he, Peer, has undone his wrongs.

His presence at the deathbed of his mother again reveals Peer's character. He plays at driving her to heaven as she is dying. Even then they exchange rebukes.

Part two of the drama finds Peer an old man, traveled and wealthy. He is not happy. The vision of Solveig's waiting haunts him. His disgust with humanity is uppermost even at the wrecking of his homeward bound ship.

Scenery effects of the play were remarkably realistic. The Dovre king's hall and the ship wreck were colorful and impressive. Added to these were the many costumes, made by students in duplicate of the originals. All the scenery was painted and prepared by students.

A 20 piece orchestra, under the direction of Fred Byerly, a senior student of Dr. Putnam, was also a feature. Grieg's music for the different scenes was well given.

The large cast performed well considering the "first night" and the cramped conditions under which they worked. The burden of the play lay on Mr. Fog and Miss Melchior. Other outstanding characters were Aslak, the Smith, played by Carl Ash; Solveig, by Charlotte Blake; The Dovre King, Jorgen Birkeland; Mads Moen, Leonard Rygg; The Captain, Mercade Cramer, and the Stranger, Floyd McDunn.

### WHO ARE THEY?

The "military training in colleges" question which has bloomed out at our sister institution, the University of North Dakota, during the week promises to excite interest. Such interests become all the more interesting when the proponents of the question are considered, and when one realizes that State College is the next stop after the University.

We know individual student dissenters are on every campus. Such students are doubtlessly sincere in their beliefs. As least many of them make sacrifices to maintain their stands. What we are not entirely clear on is this. "Who are the itinerant speakers that make the rounds of our colleges?"

Are they crusaders in the van of a better, peace enduring civilization? Are they dominated by a desire to lead us as students, in our formative period, into a new field of thought which approaches the ideal? Are they interested primarily in the student?

Or are they circuit preachers about their business of swinging the hatchet of discontent? Is this militarism hubbub that has festered first at some of the large eastern colleges, has infested Minnesota and now our own state university a natural one? Do the students calculate both sides of the question? Do they know their references?

Certainly these anti-militarism speakers are entitled to stomp the college world. But students should know from whence they come. The University's speaker Roswell P. Barnes comes to them under such an impressive title, "executive secretary of the Committee on Militarism in Education". What may it be?

It isn't fair to the average student to have some "high pressure" talker drop in on him to sell him a piece of Utopia. The student if he's not sold learns a deal. One need not look far to see the difficult position our college class is in. Whether one would believe it or not, the college generation of today and succeeding ones are certain to be leaders tomorrow. The college is a citadel that no faction can afford to overlook.

As students in a formative period, we can be made most anything of. Saints or hypocrites, conservatives or radicals, we may become. It is every student's duty to draw his own conclusion on a question. But he should ask himself, "Who advocates this?" "What are his credentials?" If he is satisfied—well. It's such a simple matter to pamphlet and preach now a days that discretion at once becomes the better part of valor.

### WHY PROFESSORS GET GRAY

These are some of the reasons:  
The bluffer. The boy with the loud voice and empty head. The fellow who took the course before . . . The sweet little co-ed who doesn't know what it's all about, but who needs at least a B in the course. The silent bird who might have something worth while to say but who keeps this something hidden. The collegian who hasn't read that far in the text and attempts to stage a filibuster and throw the class off the track. The deadly serious young radical who knows only that he's radical. The equally serious young conservative who believes only what his grandfather believed. And the boy who is taking the course just for the credit. The sleepers don't count unless they snore.

Four years of class discussions have given us sympathy for the professor. No wonder he gets gray.—Ohio State Lantern.

## Milady's Silk Stockings from Spruce Trees, Latest

### WILFIELD HURT EULOGIZES WONDERS OF MODERN CHEMISTRY IN RECENT ARTICLE

Midas of fairy tale fame is still with us in the form of a chemist, one may infer from an article on chemical advancement written recently by Will Hurt, senior chemist.

"The chemist is able by manipulation of molecules and atoms to give the girl friend silk stockings made from spruce tree, the fabric being one that makes the silky worm wonder if all his work has been in vain. Or the chemist may make a powder that will destroy the boll weevil.

"Before 1850, chemistry was an infant in the scientific world. Since that time the chemist has discovered and investigated the properties of 250,000 different compounds.

### Germany Leads Work

"Germany led the work and was successful because it placed its technically trained men in industries best suited for their individual temperaments. Now this method is being carried out in America, and because of the quick adaptability of this nation it is rapidly reaching chemical supremacy.

"The latest American development, one which has taken the world by storm, is that of producing lacquer. Now an automobile finish has been produced that will dry in half an hour. Drying required three weeks in varnish finishes.

"Lewsite is a compound that shows what dormant possibilities may be brought out when the need arises. It has suggested a cure for sleeping sickness. Discovered in 1892, it was filed away with the rest of the 250,000 and left there until sleeping sickness became so prevalent that it was brought to light. It is a compound of acetylene and arsenic. Both are deadly poisons. Acetylene was once thought only a gas, with which the small boy made tin can and bombs which was used in the early day automobile lamps, and arsenic was the thing grandma put on bread to kill rats. Harnessed, these two killers, gave the chemist material for a cure for a deadly disease.

"Although chemistry was one of the last of the physical sciences to be developed, it has taken the most rapid strides of them all. Chemical preservatives keep fruit and vegetables, so that the American may eat oriental delicacies. The chemist transforms the ores of the mines into pure metals, he gives the world perfumes that have never seen flowers, he provides concrete that will dry in 24 hours, and he is the life long friend of the small boy, having given the latter a tasteless castor oil. He studied the reason that the leper could not take chalmogra oil and has made it palatable so that it can be used to fight the disease.

"In the forest conservation program the chemical engineer has found a place. By the use of old paper, the wood supply, necessary for the paper used in one issue of a New York newspaper, has been cut from 40 acres to an area much less."

### COEDS CONSIDER HIGH COSTS OF EDUCATION

"How many pair of stockings does she need?"

"Let's get her formal when she is a sophomore."

"Aren't two hats enough?"

These are some of the questions that students have been hearing from the freshman home economics students. They are not mentally unbalanced as might have been concluded. On the other hand they are making budgets for a girl entering State College.

They bought clothes for the four years of her college career on sums ranging from \$100 to 250. Each girl also made her own personal budget. Many of the girls plan to put these clothing budgets into practical use.

### HOCKEY SEASON IS A SUCCESSFUL ONE

By Johnny Diemert

Any hope of securing more hockey games for the Bison sextet has been lost since the early spring weather turned all of the hockey rinks into veritable swimming ponds.

Although the hockey team has played only two games this year, it is not going down in the annals of Bison athletics as a failure. On the contrary, it will be regarded as a huge success. In the two game series played at Fargo against the fast St. Thomas sextet, the Bison proved their worth to the fans by emerging victoriously from one of the games. Led by their clever captain, Bib Falk, the St. Thomas puck chasers succeeded in taking a game from the University of Minnesota hockey team, the pace setters in Big Ten hockey.

Prior to this year an inter-collegiate hockey game had never before been played at Fargo. The sport is only in its infancy in this vicinity and its progress must be gradual. People have to learn to know and to like the game before they can appreciate it. They must witness the games themselves. For this reason Captain Thomas E. Smith, the director of the destinies of the Bison sextet, has turned down many offers for games away from Fargo.

Captain Smith wishes to state that he has many prospective games slated for the hockey team for next year, including games with St. Thomas and Minnesota University.

## NORWEIAN MOVIE TO BE SHOWN SOON

"Once Upon A Time", will be the third Scandinavian classic to be presented on the screen under the auspices of the College Y. M. C. A. The play will be shown at the college armory at 7:30 p. m. Thursday, March 17.

The drama, written in 1885 by Holger Drachmann, has become one of the romantic classics of the Danish stage. P. E. Lange Muller composed some of his most enchanting music for it, as much a part of the play as Grieg's music is of Ibsen's "Peer Gynt", said Eric Thomsen, College Y secretary, who obtained the film.

### GLADYS BOCKWALDT WINS BOWLING TOURNAMENT CUP

Gladys Bockwaldt, junior in education, recently won a trophy cup offered as a prize in the Women's Sports club bowling tournament staged at the Grand alley last week. Miss Bockwaldt scored a total of 1,439 in a nine game series to lead the opposition. Her closest competitor tallied a 1,326 count.

**EBULLITIONS OF  
EBONY BLOTT**

By Everett Wallum

Seventy-seven students took part in Peer Gynt. That wasn't a play, that was a convention.

If that many people can get on the L. C. T. stage, why not stage Ben Hur or the Battle of Waterloo?

ANYWAY, THE PLAY WAS VERY INSTRUCTIVE IN THAT THE AUDIENCE DISCOVERED THAT THEY DO OTHER THINGS IN NORWAY BESIDES FISH, MASTICATE LUTEFISK, AND PLAY A MOUTH ORGAN.

We hope interest in the drama will not have any serious effect on the sale of snuff.

Some of the "Norwegians" in the play include: Sullivan, McDunn, Powers, Kretschmar, and other unmistakable Norse monickers.

Anita Blake was the Bird Crier in the cast. We wonder who was the cry from the far off city.

WE WONDER IF THE FACULTY REALLY SERVED TEA TO SENIORS YESTERDAY AFTERNOON. OF COURSE, SENIORS SHOULD BE OLD ENOUGH TO TAKE CARE OF THEMSELVES, BUT WE WOULDN'T LET THEM TEAR LOOSE ALL OF A SUDDEN LIKE THAT.

Maybe tea was served so that Seniors would have grounds for graduating.

There is no doubt but what studying bee life by mail takes the sting out of the subject.

After an exhaustive survey, we have discovered that many students at this college study by mail. The mail usually says: "either study or get to work".

The legislature may give us a wing to the "Ag" and science buildings. How about a couple pin feathers for the armory?

AMONG THE MOST APPROPRIATE BALLADS OF THE SEASON IS THE ONE SUNG FOR THE RECENT "U" TRIP SPECIAL TRAIN ENTITLED "THOUGH YOU BELONG TO SOMEBODY ELSE, TONIGHT YOU BELONG TO ME."

One uncomfortable thing about the damp conditions of the campus is that you have no comeback when informed that you are all wet.

If Volstead is really interested in making the country dry, he has a good territory on the ten thousand oceans on our campus.

And till tourists go to Minnesota to fish and to Venice to view city canals!

WE HOPE IT DOESN'T REACH THE STAGE WHERE THE LOCAL CO-ED WILL SAY: "WELL MOTHER, I'M GOING TO SCHOOL. GIVE ME M YWATER WINGS."

Anyway, if you're late to class, you can tell your instructor that you got cramps and had to float for a while.

**BLUEJAY QUINT  
LOOP CHAMPIONS**

CREIGHTON ANNEXES CONFERENCE GANFALON WITH EIGHT VICTORIES

Creighton with eight victories and one loss annexed the conference honors. The fact that the Jay team suffered but one defeat does not indicate the obstacles which the Omaha quint had to overcome to annex the gonfalon.

The Champs were turned back by the Morningside cagers in their last conference tilt. The Bluejays had much difficulty in disposing of the Bison and the North Dakota University quints, and barely nosed out their two leading contenders in the four games in which they opposed them.

The Bison suffered six conference defeats in the 14 loop tilts on schedule. The Bison opponents were the conferences most serious title contenders, and three of the setbacks which the Bison underwent occurred in the last two minutes of play. Creighton proved to be the only conference team which the Bison were unable to defeat.

**K. KEATING IS NAMED  
CHIEF PAINT CHEMIST**

Kenneth J. Keating, an alumnus of North Dakota State College, has been named chief chemist of the Smith-Alop Paint and Varnish company of Terre Haute, Ind.

Mr. Keating is a graduate of the school of chemistry, where he specialized under Dean W. T. Pearce in paints and varnishes. Mr. Keating's appointment adds to a long list of graduates of the college who have achieved signal success in the paint industry. Mr. Keating recently attended the annual meeting of the company held at Chicago.

While at the college Kenneth Keating was active in student affairs. He was a charter member of Delta Kappa Sigma, social fraternity, and of Alpha Chi Omega, professional chemistry fraternity. He was also a member of Scabbard and Blade, honorary military fraternity.

Delta Pi Fraternity announces the pledging of Victor Madsen, Freshman M. E.

Milton King, who has been confined at the St. Luke's hospital for the past five weeks, returned to his home at Bismarck, Wednesday.

March, 10, 1927.

Dear Torgor:  
I got a new slant on the meaning of that word drill. Further evidents, Torg, of the value of a college education. I used to think a drill was a steel tool to make holes in hard things, don't you? Well, I still think so, only moreso. A drill is a vyolant form of exercize that makes holes in your shoes, kinks in your back, and brooses on your shoulders.

I enlisted for duration in this here ROTC with which all good colleges like the A. C. College is all broke out, but during the winter months when they administered this drill business in the armerie I didn't think so much about it. Now sring has come and we get our drill out between Gaud's blue sky and Satan's stsicky gumbo. (Torg that durration" business I ppoke of menas for the length of my college carear, which now promises to be about twice as long as the Notorious 30 years war that Sherman wrote about.)

I belong to company J. That's the crack outfit of the whole ROTC. I forgot to say ROTC stands for "Rough on Tender Collegians". But I aint so tender anymore, except in my pocket-book. They put the pick of the school in J Company. Everyone of us original boys what has a method all our own of rolling packs and carrying rifles, much better and more comfortable than Uncle Sam prescribes, belongs to this outfit. Our skipper (that's the captain in naval language, Torg) says we'd make tempting shock troops for the natiest war that was ever fought.

I'm getting my spring suit from Flaten. It's a knockout and it isn't setting me back much, only \$40.00, but you better send me some money.

Olaf.  
P. S. Me and Flaten just unpacked the new Spring ats. Some dandy ones, too. Think that Sherman was righte'n a skunk, what he said about war.

**CLUBS ATTENTION!**  
A short write-up of the aims, purposes, and activities of the following clubs (75 words) together with a list of the officers must be turned over to the 1928 BISON on or before March 15: Chemists Club, Architects Club, League of Women Voters, Y. M. C. A., N. D. P. C., State College Engineers Club, Home Economics Club, Women's Senate, Womens Senior Staff.  
Dick Hackenberg, Editor.

**CORTRIGHTS GIVE DINNER FOR SENIOR LETTERMEN**

Mr. and Mrs. Ion J. Cortright entertained eight senior lettermen at a dinner given at their home 6 p. m. Monday. Members of Bison athletic teams who were guests are: Claudie Miller, Elmer Marks, Rae Kneeshaw, Bill Gray, Ade Wall, Johnny Mach, Elmer Hansen, and Mercade Cramer.

**FRIDAY MORNING DRILL WILL BEGIN MARCH 18**

Friday morning classes in military work will not begin until March 18, according to Capt. Thomas S. Smith, in charge of the battalion at the college. The classes which would have begun today were deferred because of classroom work which was thought more advantageous than practical drill.

Prospects for winning back a distinguished rating are good if favorable conditions mean anything, according to Captain Smith. A handicap which the department has at the present time is a shortage of two regularly commissioned officers. Captain Andrews' transfer left the college unit below its officer quota. Negotiations are underway for another instructor, and possibly two, according to Captain Smith. He was unable to obtain the officers originally asked for, but alternates are expected to be detailed by the War Department soon.

Excellent fall weather should place the showing of the cadet corps far in advance of its showing last spring, believes Captain Smith. At that time, the unit had had practically no fall drill and was forced to devote spring work to fundamentals entirely.

**SIGMA TAUS DEFEAT DELTA SIGS 21 to 18**

The Sigma Tau cagers led by Don Andrist, forward, played the Delta Sig five off their feet to win 21 to 18 Monday. The Sig team trailed at the half 13-9 mainly through the accurate shooting eye of Konichek, Sigma Tau center. During the third quarter the Delta Sig team staged a determined but vain rally.
