Deach Says--

To anyone who can present the athletic department with a baseball that is absolutely waterproof, cleats that will not carry more than 17 pounds of clay sand and grass, and figure out a means of clothing the footballers in such a manner that the daily flood will be no hindrance to their actions, he will give them a distinguished rating in his "Whos Who."

Rain, mud, water, snow, ice, sleet, and then we try to get enthused over spring athletics. Much as we dread it we must get out the sign "Game called because of an over-surplus of H 2 O" play will be resumed later.

Something wrong in the Big Nine conference when a coach can't get enough games for his team. At the start of the season one school in the conference wrote that they wished to play four games of baseball with the Bisons. Two there and two here. Everything was favorable at this end and now we can't even get a game. Someone said that a Minneapolis paper had it that the Bisons were going to win the baseball championship in the conference this year. Perhaps that may have frightened them. Washington "U" is scheduled to play the Bisons on June 4 and we are looking forward to the opportunity to compete against such a strong club. Just what is the cause of it all is rather hard to ascertain.
