

# THE WEEKLY SPECTRUM

EDITED AND CONTROLLED BY THE STUDENTS OF THE NORTH DAKOTA AGRICULTURAL COLLEGE.

VOL. XXXIV. NO. 23.

NORTH DAKOTA AGRICULTURAL COLLEGE, THURSDAY, APRIL 14, 1921.

PRICE 5 CENTS

## NEW ORGANIZATION FORMED TO AID BOARD OF ADMINISTRATION IN APPOINTING PRESIDENT

### WATCH FOR IT NEXT WEEK. WHAT? THE BIG FRESHMAN ISSUE

Every college has a red letter day. Perhaps the red letter day may be the opening of the fall term, the obtaining of a new bulletin board, or a victory over the U. N. D. These all go down in the history of our college as important events.

Along with the above we also find another day, perhaps not important to us now but usually one that will be remembered by us in years to come. This day may be known by several different names in keeping with the college traditions. In many colleges it may be spoken of the time when all cares are thrown away and we allow the Freshies just one little taste of freedom. The day has now arrived. Next week we will have the pleasure of reading from the latest edition of the Freshman Spectrum. According to those in charge it will contain all of the latest scandal which authorities can unearth. Certainly we will look forward to this day as one of our red letter days.

### BASE BALL

The undisputed baseball champions, our own gang, will not get a single game in our own state this year, so like the Alexander of old, they are looking for other worlds to conquer.

By the present looks of things they will get a ten day trip thru S. Dak., Iowa and Minnesota. Manager Borderud and Coach Borleske are hard at work on the schedule which at present looks as though it would contain games with Aberdeen and Mitchell, S. D., Sioux City, Des Moines, Dubuque, Fayette and Decorah, Iowa; and either St. Olaf or Carleton, of Northfield, Minnesota.

The boys are working hard every afternoon, though the bad weather has found them inside again.

### IS THIS THE REASON?

The University is certainly finding ample reasons for not having a ball team this coming season. Their reasons have been as numerous as Babe Ruth's home runs. Yet it seems to the majority of baseball lovers and students of the A. C. that Davis has omitted so far the real reason for not wanting a ball team at the U. A few of us remember the outcome of the contest last spring between the two colleges, and a few are willing to wager on a similar result should the two meet again this spring. It appears as though our friends on the North think too much of Borleske's ability as a coach of the National game. So far this year they have a clean slate against the A. C. Far be it from us to want to rob them of it, for it may be years before the same thing happens again. "Nuff Said."

### SENIORS TO WEAR CAPS AND GOWNS

The Senior class have ordered caps and gowns for use from June third to June fifteenth. Within a short while it seems we are to have with us again a fine array of gowned seniors. Class rings and pins are now foremost in all seniors' minds and within a short time it is expected that a design may be selected which will prove a standard for all classes to come.

### WHAT BECOMES OF THEM?

The First of a Series of Articles on the Futures of Students Specializing in the Various Lines of Work.

Most students, after they have asked another student on the campus and found out what course he is taking, simply reply with an "Oh" and let it go at that. They do not spend much time thinking or worrying about any course or profession except the ones they are pursuing.

A few, however, will wonder if the other fellow has struck upon a more promising field, especially if they are a little undecided as to what shall be their life work; and it is therefore the object of this series of articles to set forth the future prospects and opportunities in the different branches so that when one learns that his friend is studying civil engineering, agriculture, or chemistry, he will not think immediately of a man looking thru a transit, pitching hay, or washing beakers.

We shall turn our attention first to the students of agriculture as this is an Agricultural College, and a fair proportion of the men students are pursuing courses of study in this general department.

What becomes of the "Ag" student when he is graduated? Does he go home, if he lives on a farm, and run the farm on scientific principles, or does he go to some other school and teach the methods of modern agriculture to members of the next generation? He does both of these and more. Some are inclined to think that the only value a course in agriculture can be to a man is to enable him to secure a maximum efficiency out of a minimum of land; while others hold the opinion that the modern agricultural methods and principles are good only as theories, to be taught in schools and colleges and handed down from professor to pupil, and next to worthless when it comes to putting them into practice.

While there may be some truth in both of these ideas, the prime object of present day education along agricultural lines is not to give the student a collection of ideas and rules whereby he may increase production, nor of theories and laws that are only fit material for textbooks and the classroom. America has been and is an agricultural nation. She produces a large percentage of the world's food supply, and it should not therefore be unusual that a goodly portion of her business should be carried on in connection with agriculture. The graduate "Ag" student, then in addition to being a first class farmer, cattle breeder, or dairyman is, and should be, an economist, a business man. He is vitally interested in the effects of supply and demand, in market conditions, and foreign relations. In fact he is a true American, a farmer in the broadest sense of the word, and a producer of wealth.

While most students graduated in agriculture engage in some branch of the profession, or in teaching it, there are some who, due to varied causes, take up other lines of work, as banking, insurance, law, etc., which, while not directly connected with agriculture, are nevertheless very closely related to it.

### MAYOU LEAVES FOR CONFERENCE

George C. Mayou of the Extension Department, left Sunday night for Minneapolis, where he will attend a conference of plant pathologists of the Northwestern states. The meeting will be held at the University of Minnesota and will continue for a period of three days.

The following letter is a copy of the one sent in regard to organization:

March 30, 1921.

Fellow Former Student:

Theold N. D. A. C. needs the backing of those who have received blessings from her. Our endeavor at this moment can do more good for the A. C. than it can even a few weeks hence.

The Former Students' Association is born of a desire of all former students who wish to be of any possible assistance at this critical time in its history. There are many functions which this association may take part in, namely, lend assistance to the athletic board, new student expansion, Homecoming days, etc., possibly with a paid secretary in time—but the big issue right now is our next College President.

At present we are a disintegrated force. This letter asks you to unite in one big central body fully organized with representatives authorized to act in behalf of all of us as Former Students.

As an initiatory move it is desired to nominate a committee of three former students to act as an advisory committee to the State Board of Administration which has been delegated to select the next president of the Agricultural College. For this purpose we are enclosing a card bearing the names of fifteen of our prominent, active, and possibly best informed members who have been chosen from all classes, all courses and all occupations as being representative. Vote for three of these, or if you prefer to vote for someone not listed thereon, do so in the blank spaces provided. The list is a suggestion—not a closed nomination. The three receiving the highest total will be authorized to represent us. The man getting the highest total will be considered chairman.

FORMER STUDENTS' ASSOCIATION,

By the Temporary Committee.

Return This Ballot At Once. Count Will Be Made May 1st.

List of nominees follows alphabetically. Add your own choice if you prefer. Vote for three only.

Frank Darrow, M. D., Fargo, Doctor.  
Homer Dixon, Grand Forks, Autos.  
Art Fowler, Fargo, Lawyer.  
Ben Meinecke, Fargo, Contractor.  
Claude Nugent, Fargo, Seeds & Grain.  
Fred Olson, Fargo, Seeds & Grain.  
Peter Olson, Grafton, Farmer.  
Bob Reed, Amentia, Farm Manager.  
A. D. Scott, Fargo, Real Estate.  
Al Sorenson, Webster, Farmer.  
Ed Traynor, Starkweather, Farmer.  
Ruhle Wehe, Larkverne, Dairyman.  
Les Wheeler, Fargo, Engineer.  
C. A. Williams, Fargo, Baker.

Former Student.

## MEMORANDUM OF INFORMATION CONCERNING ARMY APPOINTMENTS

There are more than 4,000 vacancies in the commissioned personnel of the Army. When promotions under the reorganization law are completed, about 1,200 of these vacancies will be in the grade of first lieutenant, the remainder being in the grade of second lieutenant. While it is not proposed to fill all vacancies at present, the necessity for more officers for the Army requires that a portion of the vacancies be filled without delay. An examination for appointment will, therefore, be held April 25, 1921. This examination will be competitive for 2,585 vacancies; the appointments to be distributed among the branches of the Army as follows: Infantry, 812; Cavalry, 35; Field Artillery, 600; Coast Artillery, 268; Engineers, 118; Air Service, 400; Signal Corps, 114; Quartermaster Corps, 35; Ordnance Department, 86; Chemical Warfare Service, 32; Philippine Scouts, 85. As a result of this examination, no appointments are to be made in branches of the service other than those named above.

The date announced (April 25th, 1921) is that of the final examination. Prior to that date applications must be submitted and applicants undergo a preliminary examination. All applications are to be received and acted upon by Corps Area Commanders who are also charged with conducting the preliminary and final examinations. For the states of North Dakota, Minnesota and South Dakota, these will be handled by Commanding General, Seventh Corps Area, Fort Crook, Nebraska. Details of information concerning examinations for appointments are contained in regulations now being distributed, and application blanks

may be obtained at any military post or station. Applications should be submitted by the applicant at the military post or station nearest his place of residence (Fort Meade, South Dakota, or Fort Snelling, Minnesota). Writing to the Adjutant General at Washington, D. C., for information or blanks will only cause delay.

It is contemplated that successful candidates will be announced and appointed, or nominated for appointment, about two months after the examination. Candidates attending schools or colleges will, therefore, have an opportunity to complete the present school year before being appointed.

All successful candidates will be arranged in their order of merit as determined by the final examination and will be appointed in the Army in such order. They will also be placed on the promotion list in such order without regard to the branch of the Army in which appointed. Those candidates who attain the highest marks on examination will, therefore, have priority in advancement to the vacancies existing as first lieutenant. To be informed as to the full details concerning examinations and appointment, it is necessary that candidates consult the regulations which are being sent to all military posts and stations. However, the prospective candidate's attention is directed to the following important points:

1. Eligibility for appointment is fixed by law and requests for exceptions cannot, therefore, receive consideration by the War Department. The age at the time of appointment must be between 21 and 30 years.

(Continued on Page 2)

### HARRY L. KINGMAN GIVES INTERESTING TALK

A group of college students listened to an interesting talk by Harry L. Kingman on Thursday evening of last week.

Mr. Kingman is at present on his way to China in the interest of the student Volunteer Movement of the Y. M. C. A. He was born in China; has traveled around the world two and one-half times, and has been across the American continent eleven times. He is a former first baseman of the New York Yankee club, and has taken a great interest in athletics all his life. He is a graduate of Pomona College, the University of California, and of the Y. M. C. A. College. He was captain of the baseball team while in college.

His great personality held his audience at strict attention and all who heard him speak highly of him.

### FOR THE ASTRONOMERS

The spring months are good months for star gazing. The spring months of 1921 will be especially good for star gazing. This is not foolishness, for it is a fact that in the heavens at the present time are to be seen some of the most beautiful arrangements of planets, and constellations of stars visible.

No one who ever thinks about what is around him besides the earth on which he lives, and who ever looks into the starry universe can fail to recognize the bright object in the western sky after sunset. In the columns of the papers many people have written asking what this "bright star" is. This is not a star at all, but is the planet Venus. Venus is at present in her descending node—that is, she is going in the opposite direction from the earth. She will therefore sink lower each night toward the sun, until she fails to show at all after sunset, in the west, but will be seen in the east before sunrise—as a morning star.

Closely rivaling Venus in brilliancy at the present time is Jupiter, the giant planet. Old Jupiter is to be seen in the east at sunset. He cannot be mistaken, as he is by far the most brilliant object in his part of the heavens.

The planets Mars and Saturn may also be seen at this time. Mars is very dull—too close to the sun to be a good object. He, however, is located between Venus and the sun. Saturn is near Jupiter—a yellowish object distinguishable from the stars about it, by its steady light and non-twinkling qualities.

In the southwest we find the most beautiful constellations in the universe. The Pleiades, Taurad, and Oxion with his three belt stars pointing directly to the great day Star Saxis. These bright objects will soon be lost to view for they set four minutes earlier each night as the world makes its way around the sun.

The sun is making his way northward. He now rises at about 5:45 a. m., and sets at 7:10 p. m. The days have again conquered over nights since the days are gradually lengthening. The sun will soon be so high that cold weather will be an impossibility in spite of north winds.

### CADET BAND

With the beginning of the spring term things looked bad for the band. However, thru a re-arrangement of band practice this difficulty was overcome and the gang are all out in full force again. The band is now working upon several new overtures.

### MODEL HIGH SCHOOL PRESENTS PLAY

"THE MAN FROM HOME"  
By Booth Tarkington and Harry Leon Wilson.

#### CAST OF CHARACTERS

Daniel Voorhees Pike -----  
-----Vernon E. Sanford  
The Grand Duke Vasil  
Vasilvitch ---Howard Parkinson  
The Earl of Hawcastle -----  
-----Jonas Sturlaugson  
The Hon. Almeric St. Albyn ---  
-----Forest Rohan  
Ivanoff -----Clement C. Resch  
Horace Granger-Simpson -----  
-----Lawrence Boerth  
Ribiere -----Omar Cline  
Mariano -----Verne McCaul  
Michele -----Robert Sanderson  
Carabiniere -----Marcus Rue  
and Clarence Erickson  
Ethel Granger-Simpson -----  
-----Hatlie

Comtesse De Champigny -----  
-----Florence Dieterich  
Lady Creech ---Ruth Hendrickson  
Time—The Present.  
Place—Sorrento, Southern Italy.  
ACT I.—The terrace of the Hotel Regina Margherita on the cliff at Sorrento. Morning.  
ACT II.—The entrance garden. Afternoon.  
ACT III.—An apartment in the hotel. Evening.  
ACT IV.—The terrace. Evening.  
The play consists of four acts, the scenes of which are laid in Italy and concern the developments arising from a beautiful American girl's desire to marry for a title. Rehearsals are now being staged under the able leadership of Miss Lieberg. The play is to be given at the Little Country Theatre on Thursday, April 21, at 8:00 p. m. Tickets will be on sale at the Book Store.

### TRACK NEWS

Two inter-scholastic meets for the track team are being arranged for by Coach Borleske and Manager Roche.

Ellendale Normal School will be met at Ellendale during May and a tentative meet has been arranged for with Carleton College here.

There will also be an inter-class track meet held either during the last week of April or the first week of May.

Although the call has not been issued for track men as yet, many have signified their intentions for trying out and competition will be keen for places. Harry Quick will lead the Yellow and Green this year.

### 1921 FOOTBALL SCHEDULE ANNOUNCED

A tentative football schedule for next fall has been arranged and includes eight games.

Oct. 1—Jamestown College; there.  
Oct. 8—Hamline University; here.  
Oct. 15—Moorhead Normal; there.  
Oct. 22—S. D. State; here.  
Oct. 29—U. N. D.; there.  
Nov. 5—Fargo College; here.  
Nov. 12—Concordia College; here.  
Nov. 18—Montana University; there.

The schedule as given above will give the A. C. plenty of chance to prove to the citizens of N. D. that we have a team which can compare with that of the small colleges of any state. Coach Borleske is trying to arrange a game with Gustavus Adolphus College also.

# THE WEEKLY SPECTRUM

A WEEKLY COLLEGE NEWSPAPER. PUBLISHED BY THE STUDENTS OF THE NORTH DAKOTA AGRICULTURAL COLLEGE, FARGO, N. D.

## GENERAL STAFF

H. H. ZIMMERMANN ..... EDITOR-IN-CHIEF

ADVERTISING RATES on application.

Address all communications to Business Manager, THE SPECTRUM, Agricultural College, North Dakota.

Entered as second class matter at the postoffice, Agricultural College, North Dakota.

## THEORIES.

The other day I overheard a man remark, "He has a fine lot of theory in his head." This statement was no doubt cast because the person speaking had known the person of whom he spoke and found his knowledge unpractical. In every college it is necessary to teach theory, since without it there would be no sciences. A professor may show you a theory and its practical method of application but he cannot remember this application for you. The value of a college education lies not in the grabbing up of innumerable theories without ability to use them but in view of their use in the future. A businessman is always weary of a head filled with theory alone but never of a head filled with theory which its owner can apply.

## FARE PLEASE.

The tendency of the American student today is to have a very enjoyable time while in college. A good many leave home with this in mind while others leave with the intention of making good. Both go to college, one only for a good time, the other enjoying himself and at the same time absorbing as much knowledge as possible. The first perhaps in time becomes known only as a good fellow; the other a good fellow and a student. The first soon forgets that another has toiled to make his education possible. Years later we find them; one a drifter, the other a steady and highly respected man in his community. Both had the same chance; one passed it by. Are you passing your chance by? Are you wasting your fare?

## AT LAST—A REAL BULLETIN BOARD.

Thru the efforts of the Student Commission we are going to have a new bulletin board in front of the main building. The need of a new bulletin board has been evident for some time, but not until lately has anything been done about it.

The new bulletin board will be located in approximately the same location as the present one, only closer to the sidewalk, so all who pass may read, without getting their feet muddy. It will be longer and more substantial than the old one, and about the same height.

The board now in front of Main will probably be repaired and placed near the main entrance to the campus, although this point has not been decided upon definitely.

## OUR CAMPUS

Now that spring is here the unsightly and exceedingly bad habit of cutting across the campus in various places has been resumed by most of the students and faculty. DO NOT DO IT! We are reputed to have one of the most beautiful, if not the most beautiful, campus in the Northwest, but this will be no longer true if the present conditions are allowed to continue unchecked. There are several bad paths worn across the campus already and they should not be made worse.

Fellow students, you should have a guilty conscience every time you willfully cut across the campus, and the fact that your room, or the place where you board, is over on Fourteenth street, should not alter this conscience one bit. The lawn is to look at, not to walk upon, as a public highway. You are going to college to develop your mind, but if your mind is so weak that it will not keep you from walking on the grass, you ought not to be here. Above all, do not be misguided by the fallacious arguments that just because the baseball squad practices out on the campus, or some of the professors park their cars on the grass, you have a perfect right to help wear unsightly paths.

## PHARMACY NOTES

President Valero of the North Dakota Pharmacy Club has called a meeting to decide upon rings or pins for Freshmen members.

There is considerable agitation for a compulsory life insurance law somewhat similar to the State Hall Insurance law for students connected with the N. D. pharmacy school due to the many outbreaks of several of the students.

Miss Klatz has decided to give up pharmacy and take up tailoring, due to her ability to mishandle all coats, etc., left in the hall.

Phil Balsey and A. Moore were not satisfied with the ordinary day so they have arranged a seven o'clock class. They must be figuring on running a daylight saving drug store.

Bill and Hank Trepanier report that on a recent trip to Grand Forks

they noted that the train still stops there.

Peterson hopes in time to open a store where all he will have to do is whistle for customers.

Ahlness, Welch and Trumbull report a great shrinkage in marks due to recent weather conditions.

## NEW LEADER OF CASS COUNTY BOYS' AND GIRLS' CLUB

Wm. Mortenson, a member of the graduating class of 1921 has been elected leader of the Cass County Boys' and Girls' Club. Bill will receive a B. S. degree in Agriculture in June.

Professor Smith reports that his class in differential equations is progressing nicely, as they have learned how to find the orthogonal trajectories of a family of confocal and coaxial parabolas.

## MEMORANDUM OF INFORMATION CONCERNING APPOINTMENTS IN THE ARMY

(Continued from Page 1)

At the time of the final examination each candidate must be in one of the following classes: (a) A warrant officer or enlisted man of the Regular Army having not less than two years' service as such; (b) A member of the Officers' Reserve Corps of the enlisted Reserve Corps; (c) A member of the National Guard; (d) A graduate of a technical institution approved by the Secretary of War. Any civilian of the required age who passes the preliminary examination may readily become eligible to take the final examination by entering either Class (b) or (c) above.

2. The preliminary examination consists merely of an inquiry into the physical, moral and mental qualifications to determine whether or not he has the requisite qualifications to justify his proceeding with the final examination. Such a preliminary examination will avoid inconvenience and unnecessary expenses to both the applicant and the government in many cases.

3. The final examination is the same for all candidates and to insure strict justice to all, the examination papers will be marked by central boards convened in the War Department. The scope of the mental examination is such as to insure the Army getting men of the required educational foundation to satisfactorily follow a career as an Army officer. The elementary part of this examination embraces the subjects of history, grammar, geography, arithmetic, algebra, geometry, trigonometry and physics. The advanced part of the examination consists of a large number of subjects including mathematics, languages, literature, electricity, chemistry, law and minor tactics. Examination is required in but three of the subjects of the advanced group to be selected by the candidate.

4. Candidates for appointment in the Air Service, Engineers, Signal Corps and Ordnance Department are required to satisfy certain technical requirements, either by examination or by having graduated from technical schools.

5. The regulations provide liberal exemptions from examination in various subjects according to the education, training and experience that the candidate has had. The granting of exemptions has been placed entirely in the hands of the examining boards and requests for exemption cannot, therefore, be considered by the War Department.

6. Each candidate is permitted to express one or two choices of the branch of the service in which he desires to be appointed. In making appointments, however, while preference of candidates will be given consideration, the War Department reserves the right to assign them to such branches of the service as may be necessary.

In consideration of all the facts it is apparent that the present offers an exceptional opportunity for appointment in the Army and it is anticipated that no difficulty will be experienced in securing the number of good officers for which the examination is held. Should a number of candidates in excess of those for which the examination is held, receive a passing mark on examination, those making the lowest mark will not be selected for appointment nor will they be placed on an eligible list for further appointment, as the experience of the War Department has been that such eligible lists are unsatisfactory both to the Government and to the individual.

## MORE ABOUT THE MEN'S GLEE CLUB

The Men's Glee Club, better known as the Men's "Near Harmony" Club, is comprised of about twenty men of the college and high school. It was organized by a group of fellows on the campus who were lovers of music, more or less, and wanted to see something of this sort started for the welfare of the college. For a number of years this institution has been without a glee club, while other colleges and normal schools have been taking trips with theirs and advertising their schools in this manner.

Not much can be expected of the Glee Club this spring, but it is the desire of Dr. Putnam, and others interested in its welfare, to get a good start for the next school year.

It has been suggested by some of the students and members of the faculty that a group composed of the Glee Club, the Cadet Band, and one of Mr. Arvold's plays, be taken around the state at some time, to help advertise, and increase the enrollment of the college. Such a thing would certainly be a good boost for our school, and with the proper man to boost it, it should work out satisfactorily. The base ball squad might also be included if the trip were taken in the right season, for every town in the state has a ball team, and this would surely create an interest in the school among the high school athletes.

It is up to every man at the A. C. who can sing to get behind the Glee Club and help boost it. There is no reason why the A. C. should not grow in every line, and it is only by co-operation among the students that we can help it to grow. Dr. Putnam is an able instructor and a hard worker, and it is up to us to go 50-50 with him, and show him that we mean to make the Men's Glee Club a success. Anyone who wishes to join can do so by seeing Dick Falkenstein or Dr. Putnam at any time, or by coming to the rehearsals, which are held in the Music Hall on Monday, Wednesday and Friday at 12:45 p. m.

## VIOLET RAYS

A Column Devoted to Science.

Doktor Heinrich Nelson, our famous scientist, announces that he has finally succeeded in expressing the beautiful in the form of a mathematical equation. "Inasmuch," says Dr. Nelson, "As a thing is beautiful when it is a free, adequate and spontaneous manifestation of the universal idea inherent in the species, I have no doubts as to the possibilities. I will be glad to demonstrate and illustrate my perfect equation to any aspiring student of science," adds Dr. Nelson.

The discussion at the Women's Science Club on the evening of the day after tomorrow was on the subject, "The Earth's Orbit." Miss Soule brought forth the explanation that the orbit is the place where the earth goes and stays. Miss Challey, however, said that it had already gone. Miss Maxwell then pointed out that it was still going and much commotion was caused when Miss McLachlin declared that it was neither going or coming but that it stayed there. The ladies came to no decided conclusion.

Hubert P. Wolfe who, in the guise of a dramatist, has been seeking for a scientific explanation of love, has given up in despair. Altho he has

dropped the subject he still maintains that it is caused by a mysterious wave in the ether whose vibration is more rapid than that of light. He scoffs at the idea that it is a disease.

Prof. Carrick, of the chemistry world, who is noted for having upset more theories advanced by aspiring young chemists of today than any other man in the scientific world, has but recently found the flaw in Colin Stewart's "Turbidity, Muclage and Chewing Gun" theory.

Harriet Lewis has unearthed an old manuscript which proves beyond a doubt that the common catapillar (Fuzzius Creepaloverus) is nothing more than an upholstered worm.

Our philosopher, Louis Munkeby, contributed the following: "Some of us have more ups or downs than others, but when we get to the cemetery we will all be on the dead level."

Leo Osman, a rising young physicist, is attempting to explain electri-

cal induction by, as he terms it, a "peculiar wiggle of the ions." Mr. Maunders, an authority on the subject, says it has big possibilities.

## LOVED AND LOST CLUB TO MEET

The Loved and Lost Club announce their meeting which is to be held on Thursday, April 14, 1921. Among the speakers present will be A. M. Waldie and Hubert Wolfe. The last part of the evening will be spent in discussing ways and means of aiding those seeking membership to become eligible. Due to the unusual amount of early spring weather there has been a large number of applicants. All desiring membership should lay their case before Wm. B. Gass at once as the membership is limited.

## A STUDENT'S PRAYER

Blest be the tie that binds,  
My collar to my shirt,  
And covers up my hairy neck,  
And all the surplus dirt.

## North Dakota Agricultural College

For Completeness of Equipment and Facilities for Instruction is Unsurpassed in the Northwest.

### THE COLLEGE DEPARTMENT OFFERS

Pharmaceutical Chemistry — Civil Engineering — Mechanical Engineering — Agriculture — Chemistry — General Science — Biology — Home Economics — Education — Veterinary Medicine and Surgery — Architecture — Architectural Engineering — Chemical Engineering.

These courses are available to those who have completed the equivalent of a High School training. Those who have not had such training

### The AGRICULTURAL and MANUAL TRAINING HIGH SCHOOL OFFERS

Complete Secondary Courses in Agriculture—Mechanic Arts—General Science—Rural Teachers.

### SPECIAL COURSES

Business Training, Draftsmen and Builders, Farm Husbandry, Homemakers, Pharmacy, Power Machinery. THIS COLLEGE offers to the young people of this state an education which is thoroughly in line with modern thought and demands. It spends no time on dead languages or such subjects as are of little practical value. It aims to fit young men and women who can think and investigate for themselves; who can deal with social, agricultural and industrial problems of the day. THE LABORATORIES are thoroughly equipped, and the instructors are specialists in their lines. Exceptional advantages are offered in chemistry, physics, botany, literature, mathematics and engineering subjects.

Graduates from Approved High Schools are admitted to Freshman Class, Board and Room \$6.25 to \$7.50 PER WEEK

**SEVENTEEN PUPS INITIATED PAST WEEK**

**MANY NEW MEMBERS ARE WANTED IN ORDER TO GIVE A BIG DANCE AT END OF YEAR.**

The past week has seen a renewed activity among the Order of Yellow Dogs in the form of initiation of seventeen new pups. April 6, the initiation was held at the Alpha Kappa Phi House and April 10, a formal initiation was held at the Theta Chi House. The new pups that were taken in are: Stuart Kelley, Harold Kelly, Robert Mares, Roy Reis, Floyd Borderud, Gerald Andrews, Leonard Sivertson, David Buchanan, Ralph Irick, Willard Trumbuhl, Merle Benchool, Hubert Wolfe, Winfield Tarbell, Colin Stewart, Leslie Ball, George Mayoue and George Bohlig.

The organization was founded last December when Samuel Nelson, Keeper of the Meat, of the Mother kennel at Grafton installed a Fargo kennel with the assistance of Seth Welch, Delbert Sage and M. R. Latimer, members of the Grafton kennel. At this time the following pups were initiated: Mathew Tindal, John Kraemer, Wayne Underwood, William Gass, Betram Wick, Anton Flamer, Jonson Roache. The Fargo kennel now consists of 27 men. This organization is open to all men that can fulfill the necessary requirements, namely that of being a real man, in two respects, and although it has been confined to students here at the college it is nevertheless going to be open to all the young men of Fargo.

The organization was founded in Paris among service men and when they returned it was turned into a civilian organization and at the present time there are from five to fifty kennels in every state in the Union. New York has fifty kennels, and North Dakota has seven kennels: Fargo, Grafton, Langdon, Lisbon, Williston, Grand Forks, and Bismarck. Other towns are petitioning for kennels. In each one of these towns there are included in their membership all the live young fellows of the town, and although they have not gained much national foothold, they are coming to the front.

The Fargo kennel was late in getting started, due to the forgetfulness of the mother kennel to send the obligations, but it went ahead and organized, and the following are among the executive officers: Seth A. Welsh, Grand Growler; M. R. Latimer, Keeper of the Meat; and William B. Gass, High Mastiff.

It is the hope of the Fargo kennel to get in as many as they can this year and to confine their activities to a large dance at the close of the school year.

The initiation fee is just large enough to cover the membership card that is given you and the dance will be charged for as an extra assessment. All those who want to become members of this Grand Order kindly turn in your application to the Grand Growler, Mr. Welsh, or any of the other Yellow Dogs and an initiation will be promptly arranged.

**LITTLE RAYS OF ALL COLORS**

As Siberia grows colder the animals are more dense.

The skeptical bone is in the head. The heart is in the diagram, just below the shoulder.

The climate of Chili is warm part of the time and cold the other part. The climate in the north is cold in the winter and warm in the summer; in the south it is warm in the summer and cold in the winter.

The spinal cord keeps us from falling together. To cure a burn starch it and wrap it up tight.

When a person has fainted make him walk around until the blood leaves his head.

**VETERINARY**

Ham boasts of one thing and that is that he is a self-made man. But he was very selfish for he didn't put very much hair on the top of his head.

**WANTED**—Some nice young lady to do my sewing. See Ham Larson.

Do you know Jack? So do I. Funny, isn't it.

First Ag.—"Notice how fat the Soph vets have been getting lately?"  
Second Ag.—"What is the reason?"  
First Ag.—"Well you see they

have finished chemistry and are living on bacteria now."

Heard in Physiological Action of Drugs:  
Bill—"Ham, did you ever see a comeback?"  
Ham—"No, did you?"  
Bill—"Yes, Targle went home and now he is back. That's a comeback isn't it?"

On the mule behind  
Two legs we find;  
And two we find before.  
If we stand behind  
Before we find  
The two behind before.

We wonder where the Pharmacists would be if it wasn't for the vets. Ask Prof. Nelson.

What was Jack Hendrickson doing in Grand Forks over Sunday? How is she, Jack.

**THINKING**

Tho'ts of the home just left,  
Tho'ts of the friends behind,  
Tho'ts of the days gone by,  
Spent with one I love.  
Dreaming dreams of the future;  
Tho'ts of home and love  
Fill my mind as I watch  
The landscape float by.

Thru prairies wide and free  
Now of the winter snow,  
Soon to cover all with a blanket;  
Over streams few but sluggish,  
Into the foothills and up  
Thru the beautiful Yellowstone,  
And on into the mountains  
My thots are of thee, my sweet.

Curving in and out, we go  
Thru valleys, deep and narrow,  
Around mountains huge and high;  
The scenery is great, my dear,  
But, oh, how I wish you were near.  
To think in quiet meditation  
Of the North Dakota winter  
And the home we hope to find.

Thots of the winter left behind,  
Thots of the cold escaped,  
Thots of the warmth ahead,  
Thots of the friends to make,  
Thots of the home to make  
My home, my sweet, not ours  
Blind my eyes with tears,  
As westward I go.

Yes, ever westward we go,  
Seeing something new, something different,

Crossing mountain and valley,  
Wondering of God's great power,  
Recognizing His majestic handiwork  
In all that we speed by;  
Yet, thinking, thinking, thinking  
Of one I left behind.

Thots, again of the days to come,  
Thots of life to be mine,  
Thots of the home to be ours,  
When in the fullness of God's love  
You shall come or I shall go  
To forget in your arms, my dear,  
The thots of this long, long, ride  
As Homeward we go.  
—Nobody.

**LOSING OUT PUBLIC SALE**

As I have been asked to leave the country I will sell you, at public sale, on my place, one and one-half miles north of Glastone, seven miles west, one mile north of Rolyaton, on Sunday, May 21st, the following property:

## AMONG the GREEKS

### ALPHA KAPPA PHI NOTES

Seth Welch and Nosey Trumbull have moved their belongings into the chapter house and are situated comfortably there.

Vernor Trowbridge is back in school after a week of hard work for the railway.

Francis J. Robinson and L. Cochran were visitors at the Chapter house on Sunday, April 10.

R. L. Mayou was a visitor at the Alpha Kappa Phi fraternity last Saturday.

### ALPHA ZETA NOTES

The following students in agriculture of the class of 1923 have been pledged by the local chapter of Alpha Zeta: Stanley Wilner, Murville Peightal, Harper Brush, Earl J. Heising.

The scholastic standing of these men place them among the upper two-fifths of their class. Their personality and qualities of leadership measure them up to Alpha Zeta standards and the active members of Dakota chapter will be proud to welcome them into their midst.

### ACHOTH'S ELECT NEW OFFICERS

The Achoth Sorority have elected their new officers for the coming year. The following members have been elected: Florence Isensee, president; Frances Root, vice president;

Ruth Dawson, secretary; Vivian Hurly, treasurer; Violet Erickson, corresponding secretary; Huldah Skjelset, Kahav editor.

### PHI UPSILON OMICRON

Miss Thelma Edelbrock of Wahpeton, N. Dak., spent the week end with her sister, Miss Olivia Edelbrock.

Pledging services were held at the chapter house Wednesday evening for Miss Anna Jorgenson and Miss Ethel McGuigan. A luncheon was served at six o'clock, and a social hour was enjoyed afterwards.

Miss Lucille Moritz spent the week end at the home of her parents at Glyndon, Minn.

Next Tuesday evening installation services will be held for the following officers, who have been recently elected: President, Eleanor Trowbridge; vice president, Mildred Jenkins; recording secretary, Naomi Soule; treasurer, Harriet Ashland; corresponding secretary, Alice Woldy; journalist, Ruth Sanderson. These officers will succeed the following, who are retiring at this time: President, Lucille Moritz; vice president, Leila Maxwell; treasurer, Lillian Miesen; recording secretary, Agnes Sorensen; corresponding secretary, Charste Mikkelsen; journalist, Elean Trowbridge; chaplain, Mildred Jenkins; historian, Marian Addison.

### JOKES

Proceedings in Math. 17:  
Prof. Householder—"What are the roots of this equation?"  
Hofmann—"Plus or minus zero."  
Prof.—"All right; now what is the difference between these two roots?"  
Bishop—"The plus one is on top."

Prof. Householder—"What happens the closer to zero you get?"  
Bishop—"The farther from infinity you are."

Duerner (in M. E. 28)—"What are the prerequisites in this class? I don't believe I have them."  
Prof. Erickson—"That's right. All they are is a little common sense."

Prof.—"Don't put that there."  
Student—"Do you mean not to leave it out?"

Quammen has made a new discovery. Everybody wishing information ask him about those "heat loving" bacteria.

Teacher—"If four singers form a quartette, what do two singers form?"  
Bright Boy—"A Gillette."

### CAN YOU IMAGINE?

Dr. Pearce without a moustache?  
Matt Tindall without his line?  
Snorri without a girl?  
Tony Flamer not in a hurry?  
Waldie remembering anything?  
Kelly working?  
Charste Mikkelsen stepping out?  
Edith without Mike?  
Arvold using hair tonic?  
Jensen not playing baseball?  
Anyone smoking in the president's office?

A game of cards in the library?  
Coach Borleske without chewing tobacco?

Prof. Smith late to an eight o'clock class?  
Frost in the springtime?  
Nobody cutting the campus?  
Don. Bishop not making any noise?

Fat Nichols without a waste line?  
Bluebooks costing only a cent apiece?

The Band taking a trip?  
Carrick not flunking anyone in chemistry?  
A new armory?  
Peightal getting to an 8 o'clock class on time?

McLaughlin riding a street car?  
Harry Swanson not telling a "new one"?

### SECOND LETTER FINDS WAY TO SPECTRUM OFFICE

Dere Elsie:

Well, Elsie, I sure done a lot since I wrote you last. They has been lots of doings here at college, but of course I don't go to all of them because you know I haf too study perty hard.

I will tell you what kind of coases I am studying. Maybe you won't understand what they are because some of them are perty scientific, but maybe I can explain it too you. I am taking mathematics which is a scientific name for arithmetik, and anatamy, which is all about the insides of horses, and cows and so on and stocking judging which learns you how to judge good livestock, and then we have a coarse in forge shop which means making things out of iron. This is sure a interesting coarse and when I get thru I bet I know quite a bit.

We have to drill like soljers every other day, and it sure is a hard graft. All of the fellas are in a company, which has a major, and captain and corporals an so on. The major is a young bird by the name of tindall and he shure thinks he is smart making us run around and heave them guns and everything. I bet I get even with him some day.

I went down two the Nesster with Swierre Peterson last nite who is my room mate. The Nesster is the name of the pool hall here in Fargo and a lot of the college fellas go there in the evenings. They sure have got a swell place. Why I bet they got about 20 pool tables in there. Me and Swierre played a couple games and I beat him so bad he didn't want to play no more so we went two the Grand.

The Grand is in the same block as the Nesster and is a swell theatre. They have movies and stunts, and so on and it only costs a fella 15 sense if you sit up stares. Us fellas always sit up stares cause they ain't no use paying 35 sense to sit down stairs when you can see better upstairs, is they?

Well its getting perty late so I guess I better stop.

Hoping to here from you soon,

Your cosin,

ERIC.
