

Kellogg-Haines Party Pleases Big Audience

VARIED PROGRAM AND STRONG INDIVIDUAL TALENT MAKES HIT WITH MUSIC LOVERS.

The second number of the Citizens Lecture Course has left a host of friends in this city. Not only was the talent of the individual members all that could be desired, but they presented some new things in the line of arrangement and presentation of numbers.

The opening number was a strong arrangement of the "Welcome to Spring." The "Rosary" in quartet form was given as an encore and this was followed by a duet from Il Travatore, "Home to our Mountains." A humorous quartet, "Where are you going, my pretty maid?" scored a big hit, and the German singing school that followed kept the audience in a roar of laughter. This was the first real linking the audience received that the members of the party could act as well as sing.

The second part of their evenings program was their well known "Songs of the Sixties". This included a large number of old familiar songs, presented in the costumes of the times. This proved to be an attractive group and brought out the true beauties of these old songs.

In the intermission between the second and third parts of the program, the accompanist entertained the audience with some piano monologues. He was forced to respond to encore after encore and his little melodrama was as clever a bit of work as has been seen in a long time. He is also to be accorded distinction for being able to make a piano swear with fluency, accuracy and zeal.

The close of the program was the presentation of the second act of the opera "Martha" in costume. This abounds in pleasing melodies and bits of humor and has two features. The "Last Rose of Summer" is an integral and striking part of this act and was received with acclaim. The close of the act and of the evenings program was the famous "Good-night" quartette. All the lights were extinguished, and the effectiveness was greatly heightened by having the only illumination come from the candles which the singers held.

The Kellogg-Haines Singing Party will always be welcome, with their present personnel, in this city. Their program is well varied and original and their individual work is always pleasing.

FOUND IN A ENGINEERS NOTE BOOK.

The Ford is selected because it is easy to procure, is a hardy machine and grows indoors. It is easy to dissect and embraces the main parts of the higher machines without being complex.

The Ford is found in Lapland which is within the arctic circle and grows at its best in the tropics. It encircles the globe east and west and though found in the Himalayas is found in low swampy places. Few countries are without the Ford. Though spread far and wide it is not scarce in anyone place but grows in profusion everywhere it is found. It is nearly as thick as the fern.

—Dope Box.

THE DIFFERING WAYS.

By Ripley D. Saunders.

A dismal way is the downcast way, Saving up shadows for a sunny day, Nursing sorrow but to make it last, Scowling at joy till it hurries past, Living life as a nightmare dream, Seeing gloom in the place of gleam— O poor soul!

A happy way is the uplift way, Looking for sunlight every day, Banishing sorrow with a spirit high, Clinging to joy till it can't pass by, Living life as real and sweet, Seeing its beauty and grace complete O rich soul!

Knowing the truth of God's control.

MACS WHIP ST. THOMAS.

With McCallum as Individual Star, McGovern's Men Smash Cadets for 20 to 0 Score.

Playing a quality of football that has not been equalled by a Mac-lester football team for years, John-McGovern's football team wall-whipped the St. Thomas eleven 20 to 0 last Saturday on Shaw field.

The Macs outplayed their opponents in all departments of the game. Two touchdowns were registered by the victors within the first five minutes of play. The cadets were never dangerous and could not overcome the airtight defense of their rivals. —Ex.

Rah for the High School

STAG IS SUCCESS. ROYAL GOOD TIME ENJOYED.

The first High School Stag in the history of the institution was "pulled off" last Saturday evening in the music hall under the direction of the High School Y. M. C. A. Cabinet.

The affair was a success from beginning to end, with just the right kind of spirit predominating. Considerably over half the male enrollment of the High School was present, which must certainly be considered a good showing for an affair like this, since there were so many simultaneous attractions.

A large mat had been secured from the Armory and was used to advantage, especially by the younger boys. Several contests were participated in by representatives from the different classes, which consisted of such lively numbers as; obstacle races, peanut races, hammer throws, observation tests, etc.

About the most amusing moment was in the obstacle race when the representative from the Senior class in his great excitement tied his necktie around his ear instead of the usual place while the Junior representative broke his collar button but still won the race.

Hot baked beans, sandwiches and apples were passed around and were duly appreciated after such an exhilarating time.

THOMAS BUXTON WINS DECLAMATORY CONTEST.

Mary Radcliffe Takes Second Place. Others Are Good.

Thomas Buxton won first place, a gold medal, in the Sixth Annual Agricultural and Manual Training High School Declamatory Contest, held at the Little Country Theatre last Friday night.

His declamation, "Dundreery in the Country," was given in a very pleasing manner and in a way in which the audience were very much interested.

Miss Mary Radcliffe, was given second place. Her declamation, "Her First Call on the Butcher," was a humorous one and pleased the audience very much. "The Lawler and the Cat," by Gladys Plath and "My Wife's Husband," by William McLeod, were also given very well. This contest throughout proved to be one of the best given so far.

The music for the evening was furnished by the Castalian and Hesperian Literary societies. The president of the evening was Winnie Crouch and the judges were Mr. Nelson, Mr. Peters and Mrs. A. G. Arvold.

The new dairy barn has been occupied. It is certainly up to the minute in dairy construction. From the outside one would take it for a mansion built on the old English style. There is, however, a decided change on the inside from this style of dwelling, and also from the common run of dairy barns. It is model and modern in every way.

There's slinging the "mush" on the new silo at a temperature of 135 F. Rain, snow, and frost don't stop them.

Have Returned from Educational Convention

President Worst Together With Dean Keene, Professor Randlett, and Mr. Cooper Have Returned from Washington Where They Have Been Attending the American Association of Agricultural Colleges and Experiment Stations Together With Land Grant Colleges Engineering Association.

The above named members of the faculty report that it was the best meeting that has ever been held. At this session the A. A. C. E. S. & L. E. A. were combined as one society.

In 1862 the Morrill act gave every state the right to establish colleges of mechanic arts and agriculture. This in time gave rise to the existing society.

At this meeting which was held at the Ebbot House there were gathered about 400 distinguished men prominent in educational work and its phases. The members represented about 30 different states. It was at this meeting that President Worst was elected first vice-president of the society, which is no small honor.

While at Washington, the members of the L. E. A. visited the Bureau of Standards. It is this department that furnishes the standards of weights, measures, and comparison of commodities of all things that have to be standardized. C. W. Stratton is at the head of this department and is an old friend of Dean Keene's. Although the Dean did not have much time in which to thoroughly cover the department he saw many things that would be of interest to us.

One machine showed the difference in weight of a two pound and a one pound weight suspended six inches apart due to the force of gravity acting upon them. A bolometer showed the aggregate heat from 137 different stars. In the research lab, it was found that the light from a tungsten lamp would be increased 5 per cent by polishing the filament. Experiments were also conducted here with the glow-worm and lighting bug to find the true cold white light which these animals possess.

Student Directories Ready

Will Be Distributed at Main Building To-Day.

The first complete directory ever published at the college is ready for the students to-day. It contains the name, city address and phone call of every member of the faculty, station staff, stenographers, janitors and students. The student directory also includes the course and year of the students.

It is complete in every detail and will greatly enable any one who wishes to look up any person connected with the college in a very short length of time. These directories have been published thru the efforts of the College Y. M. C. A. for the benefit of the students and others connected with the college and experiment station, and are made in just the right size and style for insertion in the back part of your 1914-15 Handbook. In this way you will always be able to have it with you for use whenever you most want it. This directory is similar to those published in the larger schools of the country by the students and shows how fast the A. C. is progressing along the real essential lines of college activities.

These directories are to be placed on sale at the Main Building to-day for a very small sum, in order to cover the expense of printing only. As they will only be on sale for today make sure that you secure yours early and before they are all gone, as you will find them one of your handiest possessions and will be helping along a good thing.

In another lab, it was found possible to tell whether or not a boiler had been overheated by the crystallization of the iron.

The greatest honor which the Dean said he received was when he was shown the standard meter. He was taken into a vault with walls six feet thick and with mammoth steel doors and locked in. He was then allowed to view the precious piece of iron to his utmost satisfaction.

In another of the labs, was a machine that would test out 1,700,000 pounds. A bar of steel three and one-half inches in diameter was pulled apart with as much effort as one would exert when breaking the smallest of small threads by this machine.

At this meeting it was practically shown that the Agricultural colleges would control the courses in engineering.

The A. A. C. E. S. meets annually, one year at the capitol and the next year at some outside point. It is possible that the next meeting will be held in California. The session lasts thru three full days and subjects are discussed that have a bearing on rural life, education, and society with any other subjects which treat directly or indirectly with the farmer and his problems. It is possible that in time to come the agricultural colleges will crowd the universities back to the plain academic teachings in all cases where the two schools are not conducted in common.

President Worst said today that the Washington meeting was the best that he has attended and that the entire program was most entertaining and beneficial. This is the eighteenth year that President Worst has taken in these meetings, of the nineteen sessions of the association, he having missed only one, which took place while he was touring Europe.

He said that the weather in the east has generally been poor, but that there were several days that were very cold, exceptionally cold for that part of the country. In Ohio, where he and Mrs. Worst visited their old homes, a splendid time is reported.

Thanksgiving Dinner For Students

Mrs. Gilbert to Entertain Those Who Are Unable to Go Home On Thanks Day.

A real home style Thanksgiving Dinner is to be served in the Dining room of Ceres Hall on Thanksgiving Day by Mrs. Gilbert, for the regular boarders and for those students of the Agricultural College who are unable to visit their homes on that day or who have made no previous engagements. Mrs. Gilbert has made plans to have the large dining room very appropriately decorated in the college colors and the parlors will be open for the guests after the repast has been partaken of.

The City Y. M. C. A. are also managing a Thanksgiving dinner for the students of the city who are unable to visit at home on that day and this will be served by the Mothers of the City. If you plan on accepting the invitation of the City Y. M. C. A. for Thanksgiving dinner, leave your acceptance at the College Y. M. C. A. office, and also that of any friend who you might plan on taking with you, provided the friend finds himself in a situation similar to that of yourself on Thanksgiving Day.

Professor O. O. Churchill has been engaged as professor of Agronomy in the Agricultural department. He comes from Oklahoma Agricultural College. We are glad to welcome him back again.

No wonder so many people turn socialists, say we.

EDUCATIONAL MOTOGRAPHS

This week's program of industrial Motion Pictures takes up the subject of Bituminous Coal Mining, with especial emphasis on Safe Methods.

Over two thousand feet of film will be shown of scenes, such as testing for gas underground, air drills at work, miners loading coal, miners lying track, drilling for shooting, loading coal after shot, loading and shipping coal, miners leaving checks and returning.

These films are from the U. S. Bureau of Mines taken especially for educational purposes. And a profitable hour is assured for all who attend, Friday afternoon, 4:45 p. m. Physical Lecture Room, Engineering Bldg.

Ellen H. Richards Memorial Celebration

Little Country Theatre Thursday December 3.

The seventy second birthday anniversary of Mrs. Ellen H. Richards, will be celebrated by the Department of Home Economics at the North Dakota Agricultural College, Thursday afternoon December 3rd. Mrs. Richards was for more than 40 years a leader in the Home Economics Movement and to her more than to any other person we are indebted for the modern movement to make common matters of food, shelter and clothing the subject of scientific study. Mrs. Richards produced our first books applying science to the home and established the Journal of Home Economics. To continue the work of such a leader a Memorial Fund has been established by the American School of Home Economics to be used for scientific investigations in Home Economics and for publications.

A program is to be given in the Little Country Theatre at the college and the Department will be open to all members of the faculty, students and citizens of Fargo and Moorhead. The Club ladies of Fargo and Moorhead will be especially interested in the program of the day as several exhibits are to be displayed in the Home Economics building at the College showing the work in Domestic Art, Dietetics, Food Work etc. The program is to be held in the Little Country Theatre and no admission is to be charged but contributions to the Memorial Fund will be asked for. The program is as follows:

HOP AND RECEPTION TO TEAM ON RETURN.

Friday afternoon, after drill, everybody who was free in school gathered at the Armory to help celebrate the return of the team by an informal reception and dance. There was a large number present and a good time was enjoyed. The members of the team were in great demand and had to tell the story of their Western trip over and over again. The music which furnished by the Cadet Band was excellent, as the insistent demand for encores testified. There were no speeches, everybody simply turning to, and enjoying themselves in their own fashion and the procedure was decidedly popular with all.

Most of the members of the squad which made the trip were present to say "hello" to their friends. Some people seemed to be disappointed that they had not come back full-fledged cow-punchers and rangers. According to the Montana papers, this school is in the "East" and so there must have been some live experiences in store for our "Bostonian" team. Wonder if they killed any Indians for the amusement of the team? Refreshing to get a glimpse of the real West when you live so far East, don't you know?

Although the embargo has been lifted on livestock in the union stock yards in Chicago, the 1914 International Live Stock Show will not be held.

Noted Educator Speaks In Chapel

Dr. Ross, of Wisconsin University Pleases Those Who Hear Him.

Professor Ross addressed a full Armory at the Convocation hour Monday, on "The Agricultural Problem."

At the beginning, Dr. Ross outlined the difference between the country problem and the problem presented by the city. He also outlined the forces bringing about the country problem in which so much interest is taken today.

One of the chief factors is the unprecedented increase in foodstuffs amounting to 75 per cent in eighteen years.

He then explained the three elements in the program adopted for the solution of the Agricultural Problem: better farming; better business and better living. Better farming was the phase receiving the most attention twenty years ago, but today the country is seeing a new light in better business and better living.

Dr. Ross gave a concrete illustration of what is meant by the phrase, "Agricultural Problem" by numerous examples of the rural conditions in Vermont and other eastern states. He led the audience to clearly decide that the problem in the eastern states was the result of degeneracy in moral and institutional life.

He then set about to analyze the situation and drew conclusions as to the real cause. The cause of the backward condition is not moral degeneracy but lack of leadership. The Doctor has invented a new phase "folkdepletion" to represent the condition existing in rural communities.

He prophesied the repetition of the same conditions in North Dakota unless preventative measures were taken at once to keep the people on the farms and save to the country those energetic and pace-setting elements who are leaders.

Thanksgiving Concert Pleases Large Crowd

Mrs. Porters Reading is Big Feature of Program.

Those who attended the Sunday Thanksgiving Concert in the Armory were well repaid.

Mrs. Porter is a reader of rare talent and the grip which she kept on the audience was testimony to the fact. Of the other numbers, the rendition of "Seek Ye The Lord" deserves special mention. It is a beautiful setting and was well presented. The remainder of the program, which is given below was very much appreciated.

College "Y" Quartet
Crossing the Bar Crawley
Messrs. Yerrington, Porter, Jaqua and Williams.

Piano.
Polonaise in E Liszt
Mrs. Ruth Klein Stockholm.
Reading (a)
The Discontent of Hermas, and His Loss Mrs. Porter.

Quartet
Seek Ye the Lord Buck
Misses Johnson and Dolve, Messrs. Yerrington and Wolf. Soprano Obligate by Miss Fern Grothers.

Violin
Cavatina Raff
Mr. Ray Sweetman
Accompanied by Mrs. Stockham
Reading (b)
Love in Search of a Word.
Mrs. Porter.

Voice
The Publican Van de Water
Mr. Bertrand Allen Orr
Accompanied by Miss Marlon Johnson
Reading (c)
Riches, Unrest, Fear, Recovered Joy
Mrs. Porter.

College "Y" Quartet
Now the Day is Over Barnby
Doxology
Praise God From Whom All Blessings Flow.
Audience.

VISITORS LICKED BY OLD SENTINEL

North Dakota Aggies Fail to Make First Down Against University's Famous Mountain.

NOT ON THE LEVEL

The North Dakota Aggies were ingloriously licked this morning by Mount Sentinel. They tried everything they had on the old hill, only to slide homeward at luncheon time baffled and worn out. The Flickertails couldn't make a first down on the mountain. The score: Mount Sentinel, 2,000 feet; North Dakota Aggies, 0.

The Fargo men, who are to meet the University of Montana football team here tomorrow afternoon, started from town this morning for a practice scrimmage against Mount Sentinel. Fargo, be it known, is not more than 920 feet higher than the ocean at low tide, and the Aggies hoped to become used to Montana's elevation by doing a little mountain climbing. North Dakota—the Red River part of it, at least—hasn't any mountains, but the visitors didn't mind that at all.

With Captain Caulkins in the lead, they sallied toward the campus of the university this morning. At the foot of the mountain they lined up for the kickoff, and the battle was on. For a few yards the Aggies went like wildfire. They swept straight up the mountain, sure of their ability to get to the top and back in time for an inspection of the university before lunch.

Two sparry rushes were followed by a call for "time out." The right tackle called for a substitute, and refused to play any longer. The rest of the team plunged forward, losing a player at every down.

After two hours Captain Caulkins reached the "M." placed about quarter-way up the hill. Behind him, draped on the fences or prostrate on the ground, lay the rest of the team. Caulkins decided to let it go at that. He couldn't play a forward pass game unaided, and it was evident that rushing tactics wouldn't gain any ground. He retreated without dignity or breath and left Mount Sentinel undisputed winner of the battle.

The Aggies admit that they were beaten, but claim that they were cheated. "That mountain's not on the level," they say. "It's uphill all the way."

This afternoon the Aggies went through a light practice on Montana field. They did nothing more strenuous than kick and pass the ball and charge up and down the field several times. The students who braved a dismal rain to watch the workout were disappointed when the Dakotans showed none of their plays or formations. This depression was aggravated by the fact that in their fighting clothes the visitors look fully as heavy as the varsity. They have a strong, beefy line, a pair of heavy-rangy, rapid ends, and a big backfield, composed of tall streaks of lightning. They will give Montana a merry battle tomorrow.
Missoula Sentinel Nov. 12, '14.

DR. STEARNS AT VESPERS

Next Sunday afternoon, at the Vesper Service, Dr. Wallace Stearns of Fargo College will give an illustrated lecture on "Agriculture and Home Economics in the Far East." Dr. Stearns has been thru the countries of which he is to speak, and knows the conditions there. He has a fine set of slides illustrating his talk, and it will be an hour of interest, as well as of profitable instruction. The methods of agriculture and the home life in the far eastern countries is still very primitive, and is a great contrast to the conditions as they exist in our country.

There will be special musical numbers. The meeting is held in the Little Country Theatre, at four o'clock Sunday afternoon. Every student in the institution is cordially welcomed.

STUDENT DIRECTORIES OUT TO-DAY

THE WEEKLY SPECTRUM

The Official Publication of the Student Council.

Published every Wednesday of the school year by the students of the North Dakota Agricultural College, at the Ulsaker Printing Co., 311-315 Broadway, Fargo, N. D.

AN APPRECIATION.

We desire to extend our congratulations to the A. C., not only upon the victory they won, but also upon the splendid exhibition of college spirit and loyalty to their team.

The above clipping, from the editorial columns of the Student will certainly be appreciated at this school. Even if the spirit at this school has been all that could possibly be desired during the past season, it is always pleasing to hear an appreciation from some one outside of the school.

We most heartily second the sentiment of the Student when they say that the winning or losing of the game is of slight importance, if the occasion of the game brings forth from all concerned, a spirit which shall result in closed and more cordial relations between the two schools.

SAME THING.

Aprpos to the above, we would like to suggest that the same spirit, improved a little, if possible, will go a long way towards helping to land the basketball championship. Don't forget it.

FOOT-AND-MOUTH DISEASE.

(Reprint From News Letter of Department of Agriculture).

The outbreak of foot-and-mouth disease has already affected an area so large that it is evident that most active measures are necessary to eradicate it.

Both in virulence and in extent of area affected this present outbreak is more serious than any of the five previous ones which have occurred in the United States.

These previous outbreaks have not been sufficiently serious either to familiarize farmers with the symptoms of the disease or to render them fully alive to the losses that it occasions when permitted to gain a firm foothold.

The contagiousness of the disease explains the action of the Federal authorities in quarantining such large areas. The practice is to clap a blanket of quarantine on the State in which a case of the disease has been found, and then, by exact investigation, determine the exact area infected.

year. The chief danger is that there may be infected herds whose existence is not reported to the proper authorities. Farmers are therefore urged, both for their own protection and as a duty to their neighbors, to report immediately all cases of suspicious sore mouths or lameness among their stock.

Foot-and-mouth disease affects chiefly cattle, sheep, goats and swine, but there are a number of other animals of less commercial importance which are also susceptible.

The first indications of the disease are a chill followed by a high fever, the temperature rising rapidly, sometimes to 106 F. In a short time vesicles about the size of the pea appear in the mouth at the end of the tongue, on the inside of the cheeks, and on the gums.

Once the disease is well established it becomes so painful for the animal to eat that food is frequently refused altogether. Strings of saliva hang from the mouth, and flesh is lost with astonishing rapidity.

being estimated by some authorities at 5 per cent, although it frequently is much greater than this. The mortality, however, by no means represents the real losses occasioned by the disease. No revenue is possible from infected herds, and in the case of dairymen an outbreak of foot-and-mouth disease frequently means that their business is completely ruined.

Ceres Hall Notes

Were there five parties in Ceres Hall Parlor Saturday Evening? Yes, so they say.

Miss Dorothy Price entertained about sixteen young ladies of the hall to a spread, Wednesday evening. A very dainty spread was served, after which stunts were enjoyed by those present till the 10:20 bell rang to call order.

The Y. W. C. A. will conclude at their next regular meeting, Tuesday evening the series of talks given by Rev. Walters of the First Methodist Church. Everyone is invited to come.

The Misses Ivy Waechter, May Radcliffe, Marlon Brainard and Olive Bailey entertained at dinner Sunday the Messrs Winney Crouch, Charles Hein, Elder Otis and Elmer Steinhau. The occasion being the sixteenth birthday of Elder Otis.

Miss Trixie Lamb entertained the Messrs George Backstrom and Johnnie Johnson at dinner, Thursday evening. After dinner, Johnnie Johnson entertained the young ladies of the hall in the parlors with several violin solos.

The Misses Ethel Poole, Elsie Stark, Ruth Olsen and Myrtle Johnston entertained Messrs G. B. Magee and J. C. Stark at a luncheon Sunday evening. A four course luncheon was served on a beautiful white table, the decorations being four pink carnations? The affair was pronounced a grand success.

The industrial courses of the Agricultural College entertained at a dinner in honor of Mr. Ross, from U. of Wisconsin and members of the faculty, Monday. The tables were decorated with red carnations; plates were placed for 96. A four course dinner was served, after which a short address was given by Mr. Ross.

Mrs. Gilbert entertained at dinner Sunday, Prof. and Mrs. Peters, Prof. and Mrs. Donehue and children.

Miss Ella Radcliffe spent Friday and Saturday with her sister, Mary. The Phi Upsilon Omicron Fraternity received a lovely bouquet of carnations and Narcissus from one of the Minnesota Girls, Miss Georgia Belle Elwell, Monday evening.

The girls of Ceres Hall wish to express their deepest sympathy to the Heindner Family in their hour of great sorrow.

A prize of five dollars will be offered every two weeks by the "Iowa State Student," for the best news story turned into the office of the college paper by any member of the staff. The story may be of any length and the time elapsing between the event and the writing of the story will be considered.—Ex.

(—Notice Column—) KEY GRAND LECTURE COURSE.

Rev. John A. Ryan, Professor of Economics at St. Paul Seminary, well known author and lecturer, will speak at the Grand Theatre, Sunday evening at 8 o'clock on the subject, "The minimum wage law and how it operates in America."

AN OPPORTUNITY TO LEARN SPANISH. Owing to the possibility of an increased amount of trade between the United States and the South American countries there will be a demand for men who have a speaking command of Spanish.

Within the next few years there will be in South America many positions in Engineering, Commercial and Industrial lines which the College men of this county will undoubtedly fill.

The city Y. M. C. A. has anticipated this need and is organizing in it's Night School a class in Conversational Spanish. The class will meet twice a week under the direction of a competent instructor, and promises to be a popular course.

It will continue for about four months and will be open to any man in the city. In addition to this the City Association offers twenty-five different courses in the evening school including Mechanical and Architectural Drawing, Show Card Writing, Salesmanship, Gas Engine, Public Speaking, and English for Foreigners.—Adv.

The university school of mines has won a very wide recognition for its work throughout the state of North Dakota and throughout the United States. It has been praised highly in government reports and in private correspondence.

Recent letters from large international manufacturing companies have complimented Dean Babcock on the work he has done on lignite and lignite tars in particular and on the mining work in the state in general. It has been pointed out recently that the work being done by Dean Babcock is of an immensely valuable type and that a great quantity of work is being handled continually.

The work now done at the school of mines is precisely the kind of work the Germans are doing and which has given them their pre-eminence in economic

Athletic Activities

Aggies Return from West All Enjoy Big Trip

Drop Both Games In Sister State—Does Not Affect Record Here.—High Altitude New to Players.

Friday morning Coach Wood and his squad of pigskin booters arrived in Fargo after a nine days sojourn in our sister state to the West. They first played Montana University at Missoula where they lost by a score of 13 to 0. Although the score was one-sided, the game was anything but that; while if the officials were as unbiased as they were supposed to be, and knew the game the way they should have; it would no doubt have resulted in a touch-down for each team.

Team Goes to Yellowstone. After leaving Missoula, the team journeyed to Gardiner, the Northern entrance of Yellowstone National Park. After spending several pleasant days in the park, sight-seeing and climbing mountains, the squad returned to Bozeman and took on the Montana Aggies; where they again met defeat. This time, however, they were outplayed and are not ashamed to lose to such a team.

The game was clean and hard fought from start to finish. During the first quarter, the Dakotans played Montana off her feet. Receiving the ball on their own 20 yard line and resorting entirely to line bucking, they carried the pigskin to Montana's 10 yard line only to lose the ball on a fumble.

At the end of the first quarter, the Dakotans were exhausted on account of the high altitude and during the remaining periods, Montana scored three touchdowns.

For the invaders, Nemzek and Bolsinger proved to be the best ground-gainers; while McQuillan's forward passes averaged over 35 yds. For Montana, Travers, the speedy full-back proved to be the star.

The Game in Detail.

Montana won the toss and chose to defend the south goal. Nemzek kicked 50 yards to Travers who returned 20. Ruby was thrown for a loss of one yard on his attempt to round left end, but Travers added four when he skirted the right wing. A forward pass from Travers to

Romney failed and Travers punted 45 yards to Caulkins who came back eight. On the first play, Bolsinger took eight yards around left end. McQuillan punched right tackle for six yards and Bolsinger again carried the ball around left and for six yards and making it first down. Nemzek made 12 yards around right end in two trials, and Bolsinger added to more through right tackle. A forward pass failed, but the college was penalized 15 yards for interfering with the receiver. A fumble recovered by the college gave them possession of the ball. Travers tried right tackle for no gain. Covert punched center on a shift play for one yard and on an attempted forward pass, Travers was thrown for a fiveyard loss. Travers punted 40 yards to Caulkins the ball going outside. Bolsinger tried right tackle for no gain, but Nemzek squirmed through the other tackle for one yard. Dakota was penalized five yards for off side. McQuillan was thrown for a five-yard loss, on an attempted forward pass. On the next play the visitors again lost ten yards when Nemzek was caught by Jolley. McQuillan punted 25 yards to Ruby, who returned one. The college fumbled on the first down and Dakota recovered the ball. McQuillan went through right tackle for three yards. Bolsinger hit the right and the left side of the line for four more. Nemzek punched left tackle for five yards, making it first down. Three attempts through the line netted three yards and a forward pass was intercepted by Travers who returned two yards. The quarter ended with the ball in the possession of the college on their own five-yard line.

Opening the second period Travers tried right tackle for no gain. Dakota was penalized five yards for off side. Ruby went through left tackle for three yards and Travers circled right end for six more, making it first down. Ruby tried left tackle twice on shift plays for a gain of ten yards and Travers made seven around right end before he was stopped. Romney hit center for no gain, but Ruby made it first down again when he hit left tackle for three yards. Travers circled left end for a gain of 17 yards and Ruby punched the line for three, no gain, an dthen six yards. Romney tried left tackle for no gain. Travers tried right end for two, but the ball went over to Dakota. Nemzek went around left end for two yards but the visitors were penalized five yards for starting before the ball was snapped. McQuillan hit left tackle for one yard and Bolsinger added two more through right guard. A forward pass, Bolsinger to Nemzek, netted 15 yards. Nemzek and Bolsinger tried the line twice for no gain and after an incomplete forward pass the ball went over to the college on Dakota's 45-yard line. A procession of blue jerseys then started for Dakota's and due to the ferocious line-smashing of Roubidoux the ball was finally carried over by him for the first touchdown of the game. Jolley kicked out but on the try for goal Ruby missed and the score stood 6-0 for Montana as the half ended.

The line up was as follows: N. D. A. C. — Montana Peterson le. Jolley Bjornson lt. Taylor Hamilton, Lolland lg. Garvin Kelly, Pope c. Noble Mikkelsen, Lolland rt. Hodgson Emerson rg. Duquette Dann, Gazette re. Osenburg Caulkins qb. Romney Bolsinger lb. Roubidoux McQuillan fb. Travers

The following is an extract from a letter received by Coach Wood from the Athletic Director at Montana State College. "By their clean, hard-fought battle which your boys put up here they made a splendid impression on our people. We hope to continue relations with you."

Yours truly, Fred Bennion, Athletic Director.

The following is taken from the Bozeman Chronicle: "The game was particularly free from intentional roughness, although Punk Taylor was taken out during the first 10 minutes of play with a dislocated shoulder. This was the first instance that time was ever taken out for the star tackle, and without a capable substitute, Montana's chances would have been materially weakened by the loss of this star. To the visiting team also is due credit for their admirable pluck and skill, for every one of their number put "pep" into the game from start to finish.

The North Dakota boys are as sportsmanlike a bunch of athletes as ever visited Bozeman and win or lose we will all be glad to have them visit us again another season.

ORANGE DAY IN LOUISIANA.

New Orleans, November: Enormous impetus is now being given citrus fruit culture in Southern Louisiana, and the people of this State will celebrate November 19, as Orange Day. From the early days of the French and Spanish occupation Southern Louisiana has produced excellent oranges, but the industry is only now being developed in a large way. Sugar lands and the drained humus covered lowlands are being found splendidly adapted to orange culture.

The boll weevil and the removal of tariff protection on sugar are causing some remarkable economic changes in Louisiana. During generations the cotton farmers of Louisiana produced nothing but cotton and the sugar planters produced nothing but sugar, each purchasing meats, food stuffs of all kinds and general supplies from other States. The boll weevil has forced the cotton farmers into diversified farming and cattle and stock raising, and they are finding the new method far more profitable than the old. The same thing is true in to sugar belt.

Throughout Southern Louisiana the citrus fruit industry is now being rapidly developed. Many new orange groves are being set out. In Orleans Parish a single grove of 7,500 acres of oranges, through which there are 50 miles of paved highways, is being developed as a park. A seedless variety of Louisiana sweet oranges, recently discovered, has been awarded the Wilder Pomological medal.

On November 3, the voters of Louisiana so amended the State Constitution as to make the laws affecting investment capital as favorable and friendly as any in the world.

Publicly owned river front warehouses and harbor facilities are being installed and arrangements have been made to supply many miles of water frontage for private development of New Orleans.

The removal of the tariff on sugar has wiped out many fortunes in Southern Louisiana, but a new era of development is bringing far more prosperity to Louisiana than the boll weevil and tariff have taken away.

Galesburg, Ill., Oct. 24.—A hair raising battle between the freshmen and sophomore classes of Knox college occurred today and the fev lower class men who still retain their scalp-locks are in hiding. The second year men resented the victory of the freshmen in the annual class scrap, and began rounding up their opponents and operating on them tonsorially. About thirty freshmen had lost their hair before the class realized the scrap was not over. Then both sides began clipping and hair literally flew.

Over five thousand college marksmen is the record for the college year ending June 30th, 1914. Through the combined efforts of the National Rifle Association of America and the National Board for the Promotion of Rifle Practice, rapid strides are being made looking to the introduction of rifle shooting as one of the recognized sports in the colleges throughout the country and the movement has been still further stimulated by a recent act of Congress authorizing the free issue of rifles and ammunition to college and university rifle clubs.—Ex.

Which Shall It Be? In selecting a school would you rather GUESS or be SURE? Unfortunately, all business schools look about the same—on paper. But some schools PROVE what they can do for YOU by what they have done for others. Just 49 out of 53 young people in Fargo banks attended Dakota Business College—think of the proportion! Just 685 banks outside of Fargo employ Dakota Business College pupils—more would hire them if D. B. C. could supply more graduates. Can you question whose pupils will be at the head of these institutions in the future? These are cold, solid facts that anyone can check up. You have to do no guessing—no experimenting when you select a school in which to get a commercial training. Just choose Dakota Business College FARGO, N. DAK.

The sudden death of Mrs. John Roy Campbell, formerly Miss Ella Heidner of this city and of the class of 1912, came as a shock to her relatives and friends in this city.

Mrs. Campbell graduated from the department of Home Economics of this institution with the class of 1912. She began to teach in the fall of the same year and was engaged at various times, in Halstad, Bemidji and McIntosh, all in Minnesota.

Her marriage to John Roy Campbell, well known at this school through his connections with the Better Farming Association, took place in June of this year. At the time of her death she was at her home in Mott, which is Mr. Campbell's headquarters as County Superintendent of the Association.

While at school Mrs. Campbell was active in many lines, especially so in public speaking work. She was an Athenian, member of the Y. W. C. A. winner of first and second places in two college declamatory contests and commencement orator for her class in her graduation year. She has a large number of friends at this city and wherever she has taught. This was due to that spirit which was so aptly expressed in the 1912 Agassiz as, "The warmth of genial courtesy, The calm of self-reliance". She will be greatly missed by all who knew her well.

ball team at the university are unusually bright.

The varsity squad will not begin work until after the Christmas holidays, but all aspiring basketball candidates now are working for the interclass contests, which will be played Dec. 5, 9 and 12.

The varsity squad will be selected from the material brought forth in these interclass games.

"Bob" Lowe, a star forward of last year, H. Murphy, the center, and Captain Murray, who played guard, are the only last season's regulars who are in school this year. Richards and McCutcheon, two of last year's subs, also are trying out for positions.

The schedule has not been made out, but an effort is being made out to sign up a number of the big teams of the northwest.

Minnesota university offered the Flickertails a game for January 9, but, owing to the fact that the team will not be in condition to play at that time, the offer had to be turned down. An effort is being made to schedule a game for a later date.

Manitoba university also will be asked for two contests, one here and one on the Winnipeg floor. The North Dakota Aggies and Fargo college also will be played. The season also will include a trip to the Twin Cities, when Hamline, Macalester and one or two other institutions will be played.—Ex.

TEN COMMANDMENTS OF GOOD CITIZENSHIP.

1. Thou shalt honor Thy city and keep its laws.
2. Remember Thy cleaning day and keep it wholly.
3. Thou shalt love and cherish Thy children and provide for them decent homes and play grounds.
4. Thou shalt not keep Thy windows closed at night.
5. Thou shalt keep in order Thy alley, Thy back-yard, Thy hall and stairway.
6. Thou shalt not kill Thy neighbor's bodies with poisonous air, nor their souls with bad companions.
7. Thou shalt not let the wicked fly live.
8. Thou shalt not steal Thy children's right to happiness from them.
9. Thou shalt bear witness against Thy neighbor's rubbish heap.
10. Thou shalt covet all the air and sunshine Thou canst obtain. (Ind. State Board of Health Bul.) —Dope Box.

Plans have been made for the presentation of the staging of a play by the members of the Kent Literary society of the local high school on Dec. 11. The play which will be given is called the Sophomore and will be under the direction of Miss Parkell, dramatic coach of the high school faculty.

The play is a live and breezy college tale with its football stars and cruel professors. The heroine is not forgotten and the play has the usual college mixups and is full of student pranks. A good cast has been picked and all are enthusiastic over the prospects of its production. Robert Stewart, sophomore, star fullback on football team Charles Boise "Kink" Bannister.....George Sullivan "Reddy" SimmsDudley Smith "Dutch" HendricksHomer Sands Three sophomores. "Buster" Brown, manager of the team Elmer Vatter Livingstone, head coach of the team Max Murray "Owl" Griggs, a greasy grind Paul Elliott Professor Alden, professor of physics Linn Huey Hope Alden, his daughter Marie Huey "Aunt Mary" ScottHelen Turner "Cousin Mathilda" Dwiggins. —Ex. PRACTICAL COURSE IS MADE POSSIBLE.

Addition to Electrical Building Will Accommodate Classes in Architecture.

The completion of the new wing of the Electrical Engineering Building will give the University equipment for one more practical course. This new addition is being built to accommodate classes in Architecture, and will be ready for occupancy in a week or two.

On the lower floor are a lecture room, water color room and offices. Both of the large rooms have windows along two sides and are finished in light wood and white plaster, owing to the necessity for a strong light in rooms devoted to art. The lecture room, on the west side of the building, is to be equipped with plaster casts from Caproni, in Boston, as well as loan exhibits of Boston, the Portland Art Association, and from Messrs. Doyle, Whitehouse and Mayer, Portland architects.

The second floor has an exhibition room on the west side and a drafting room on the east, as well as a san office and small library. The upper floor is finished in fumed oak, with Colonial pillars and leaded glass doors.—Oregon.

U. OF ILLINOIS ERECTS GIANT LABORATORY.

American Universities Meet Chemical Demands During War.

The University of Illinois is the first institution to take advantage of the wholesale destruction of chemical laboratories in Germany. The University is about to lay the corner stone for the largest chemical laboratory in the United States and the second largest in the world. This is one of the first large steps taken in this country to place the United States in the position formerly held by the Gatherrland.

Oregon Agricultural College has also taken strides in this direction by installing two new courses namely the Chemical Engineering and the Agricultural science groups. The courses have not a very heavy enrollment this year but a very large percentage of increase is expected next year.

Einar Blix has been heard from by some of the local campusers. He is now in charge of the extension work of the G. N. R. R. in western Montana, and expects to understand seven languages upon his return.

The Portland Cement People are erecting the silo in cool weather in order to form an idea as to the efficiency of erecting cement construction under light frosts.
