

LORADO TAFT

FAMOUS AMERICAN SCULPTOR ONE OF THE GREAT FEATURES OF CITIZENS LECTURE COURSE THIS YEAR—CARRIES TWO TONS OF BAGGAGE TO ILLUSTRATE LECTURE.

SIX NUMBERS ON COURSE CAUSE FAVORABLE COMMENT EVERYWHERE—SEASON TICKETS NOW ON SALE AND RESERVED AT FOUT & PORTERFIELDS DRUG STORE.

No introduction of Lorado Taft is needed to the intelligent American public; but we believe a word as to his career will be of interest to those who anticipate the pleasure of hearing him.

A native of Illinois, he was graduated from the State University of Champaign at the age of nineteen. His taste for sculpture revealed itself when he was a boy of thirteen. A foreign sculptor had been called from Chicago to mend the statues of the newly acquired University collection, broken in transit, and young

Taft watched him with growing interest and a desire to emulate him. Throughout his school days and later college life he constantly pursued modeling in clay, and thus laid the foundation for the fame which came to him after his studies in Paris, where he went in 1886. He studied three years in the Ecole des Beaux-Arts and took honorable mention at the close of the first year, and the first prize of the "atelier" at the end of his third year. After the close of his student life in Paris he returned to this country and became in 1886 instructor in the Art Institute of Chicago, which position he has held ever since. He is a member of the Municipal Art Commission of Chicago, a Director of the Municipal Art League, a member of the National Sculpture Society, and was for two years President of the Western Society of Artists. He is one of the best known sculp-

turs of this country, and no one is more capable of learnedly reviewing art subjects. During the Columbian Exposition Mr. Taft frequently lectured in the Fine Arts building, and came to be recognized as an authority on all matters relating to works of art, as well as to his chosen profession. Two groups, the "Sleep," and the "Awakening of the Flowers," by him adorned the entrance of Horticultural Hall, and excited much admiration. Mr. Taft's letters in the Chicago Record on the art of the Paris Exposition of 1900, were widely quoted. His History of American Sculpture, published in November, 1913, has been fitly termed "a monumental work," and has received many columns of praise from the best critics.

Mr. Taft's sculpture includes the statue of Schuyler Colfax at Indianapolis, General Grant at Fort Leavenworth, and figures on various military monuments throughout his country. He has modeled busts of many eminent writers and educators of this country. In ideal sculpture he has produced figures of "Despair" and "Knowledge," and the impressive group, "The Solitude of the Soul," which won a medal at Buffalo.

Mr. Taft is an easy and fluent speaker, full of spontaneity, alive with humor, interesting his audience as he carries them almost unconsciously through an evening of the highest educational value. His lectures, as shown from the synopsis following, are full of information and thoroughly illustrated, either by actual processes of modeling or by the stereopticon.

"A Glimpse of a Sculptor's Studio," or "How Statues are Made." The materials—clay, plaster, marble, bronze. The tools. Building up a bust from life. The problem of features, proportion and expression. The big skull. The muscular mask. Rapid changes in the shape of the head. The portrait of the Princess of Lamballe. From youth to old age, with occasional digressions. Building up a figure; pose and proportions. Expression in lines. Draping a statue. The plaster cast. Piece molds and "lost" molds. Chopping out a cast. The marble. The pointing instrument. Trials and perplexities of marble cutting. Triumphs of the sculptor's art. Illustrated fully of each step by the actual process upon his stage.

Lyceum of Engineers Hold An Initiation

Dantes Horrors Pale Before Fearful Tests.

Last Friday night the Lyceum of Engineers held their first initiation of the season. The trembling candidates were Elmer Dyne, Melvin McGuigan and Miller Vance and a truly noble trio they proved to be for all were up and around early the next morning. They all passed the acid, fire, water and other tests safely and were finally admitted to the society.

It seems as this year should prove a very active one for the members of the Lyceum of Engineers, for besides the old members back there will be quite a few to be picked from the Freshman class. This year the Freshman class has more engineering students than ever before. Also it is part of the Society's program to have technical programs presented quite often this year. The members of the society will probably be called upon, once a term to give a talk on some scientific or engineering subject. Practicing engineers will also be secured to address the society.

Four men on the Missoula squad weigh over two hundred pounds. No wonder the price of pork has gone up on the Chicago market, when our friends have such a corner of the product.

DR. EXNER COMING

Y. M. C. A. Workers Will Address Students.

Dr. Max J. Exner of New York City will address the men of the college next Friday.

Dr. Exner is a brother of Prof. F. F. Exner of the Carleton department of Chemistry. He is a Carleton graduate and has been abroad as a foreign missionary. Returning from the foreign field he took up a medical course and is now lecturing in the interest of the Y. M. C. A. work.

He will arrive here Thursday. His first lecture will be delivered Friday morning, at 9 o'clock in the Armory to the men only. He will lecture to the girls, at four o'clock in the Ceres Hall Gymnasium. These lectures which take the place of the convocation on the following Monday morning and at the usual convocation period on Monday the classes which normally meet at Friday at nine will meet. He will also speak to the General Association Committee Thursday in Ceres Hall at supper time.

INFORMAL SORORITY PARTY.

The old members of the Chi Gamma Psi sorority entertained the new members at the first performance of the Grand Friday evening.

The girls were then invited to the home of Miss Bertha Gunderson, where an informal evening was spent, at the close of which a delicious lunch was served. Miss Stoner acted as chaperone.

DAIRY BUILDING IS OCCUPIED.

Late last week, Professor Tompkins moved over into the new Dairy Building, and will be "At Home", here from now on. The interior work is not all completed but is being pushed rapidly. The things lacking are lighting fixtures, lockers, some of the desks and a lot of other small equipment which has not arrived yet. All the telephones are in and it is now possible to reach the building over the phone.

The Dairy Barn is almost at the point of completion. The men are working on the interior finishing, placing concrete floors, installing stanchions and other small features. It is expected that it will be ready for occupancy very soon.

POLYTECHNIC MEETING

A regular meeting of the North Dakota Polytechnic Society occurs Wednesday evening, October 14th, in the Engineering building at the Agricultural College. The meeting will take the form of an engineering symposium, a group of four papers being presented by members of the Engineering Department of the Agricultural College. It is the purpose of this kind of a meeting to give a series of short snappy talks upon live topics within a certain field of technical work or investigation. The scope of each paper is necessarily limited as the whole program lasts only from an hour to an hour and a half. This plan was tried at one of the meetings of the society last year when members of the Chemical Department of the Agricultural College gave a series of papers and demonstrations. The interest and the success which attended the trial was so great that the program committee have incorporated several symposiums in this year's program. The Agricultural and Chemical Departments of the Agricultural College each have an evening's symposium later in the year. There will also be groups of papers upon each of the subjects, bread and wood, but in these instances members of several departments of the College will present different phases of one main topic.

At this first meeting, Dean E. S. Keene will take the subject, Storage Batteries. He will give a brief discussion of the working principle of the original Plant storage cell, which will be followed by a description of the mechanical construction and characteristic properties of the head Plate and Edison storage batteries. The form of materials used in construction and the methods of assembling the parts will be illustrated in each case by dissected cells. It is time permits a demonstration of the use of the storage battery for house lighting will be given.

Prof. R. M. Dolve has selected the topic, the Relation of Carbon Dioxide to Boiler Efficiency. This is an age of conservation. The many devices installed in a modern steam plant are for the purpose of saving heat. That these have been successful is evident from the fact that approximately four times as much power can be secured from a certain amount of steam with the modern engines than with those of an older type. But the efficiency of steam generation in the boiler room has not kept pace with the efficiency with which it is converted into work in the engine room. Ordinarily as much as 40 per cent of the heat in the coal is wasted in the boiler room. This waste is largely due to the heat carried away in the gases passing up the chimney, the excessive volume of which is usually not realized unless some method of continuous measurement is provided. Prof. Dolve will show how a material saving in fuel can be effected by the use of a carbon dioxide indicator and recorder, illustrating his remarks by diagram and apparatus.

Prof. R. H. Slocum will talk upon Drainage Problems. He will make a report upon some work he was engaged in the past summer in Wilkin county, Minnesota. As some unusual conditions were encountered in this survey, his paper ought to prove extremely interesting.

Prof. M. B. Erickson will describe a recent type of steam engine, the so-called "locomobile." He will present the reasons why this engine was devised and show lantern slides with its construction illustrated diagrammatically.

A cordial invitation to be present

Dr. Guild Talks At Convocation

ILLUMINATING SIDELIGHTS ON THE PRESENT WAR.

The speaker of last Monday was very closely followed and gave a talk that was well worth listening to. Dr. Guild knows the peoples and the countries of which he spoke well and his observations of the underlying causes back of this war were intensely interesting.

He started in by saying that he would endeavor to be original and not say anything about bright faces and "such an inspiring group of students," for he feared that it had been said so often that the students would begin to get swelled up over the statement. He called attention to the advantages of living in this country, "the sirlon cut of the universe," and said that he was very glad that the Atlantic ocean was located where it is and that as far as he was concerned, there was no necessity of moving it, but that they could leave it right where it is.

The only place in Europe where the nations now at war live in unity is in the harassed little republic of Switzerland. Switzerland is at the present time in a pitiable condition, for her sure revenue, the tourist trade, is gone, and her army of three hundred thousand men has to be supported.

He made the statement that he did not believe in an inferior race, but that some races were backward races.

Dr. Guild regards the Emperor of Germany as the strongest and ablest man in the world. Under his leadership, Germany has been planning for conquest, expansion and commercial supremacy. Shut in on all sides with her increasing population, Germany had to expand and it is to the Turkish Empire that the Germans are looking for their expansion. The Turkish government was most strongly condemned by the speaker, who stated that it was the worst on the face of the earth and that it ought to be removed. He said that it was so rotten that its postal service is not trusted at all, but that each nation that has business there conducts its own mail service. The Germans have become very friendly with the Turks and have placed them under very heavy obligations to Germany. Upon the inevitable fall of the Turkish dominion, the Germans hope to gain expansion there.

Of two things, the speaker expressed himself as certain; that the French people and government did not want this war and that the English did not want this war. It is due to dynastic tendencies on the part of three kings. George of England is not counted in the running for, as the speaker put it, "The English people have taught the king to walk softly, like the family cat." He pointed out as the worst curse of this war the fact that the race is bound to be propagated by the feeble and the old men as all the young men are engaged and liable to be lost.

PROF. DYNES HEARD FROM.

Has Located and Begun to Teach.

Professor Dynes, who left this school a short time ago to accept a position in the Farm Crops department of Cornell University has written back to friends at this place describing his work and the school at which he is now stationed. He has already started in on his regular work and likes it although he says he is a little homesick for news. He has had trouble in getting accustomed to their campus of which all Cornellites are very proud, and which according to his description, must resemble a miniature mountain range more than anything else. He also expressed his regrets at being compelled to leave in such a hurry that he was unable to bid many of his friends good-bye.

FRESHMAN CLASSES LARGEST EVER.

"The largest freshman class in our history." That is the report that comes from almost all the colleges and universities. The war in Europe is the reason given. Business depression caused by the war allows many young men to go to college who would otherwise be needed in business. This is an unexpected result.

Ninety-three million barrels of Portland cement was made in this country in 1913, and all but 4,000,000 barrels of it were used here. The supply of materials in this country is practically inexhaustible, and manufacturers say they must have an export trade to use up their surplus.

HIGH SCHOOL NOTES.

A large number of girls were present at the Castalian Literary meeting last Friday evening and a very interesting program consisting of songs, reading and solos was enjoyed by every one.

After the program the officers were elected as follows:

President—Esther Heidner. Vice-President—Katherine Herzor Secretary—Olga Schmidt. Treasurer—Marie Kirk.

The program committee and society reporter were also appointed. After the meeting a social session was held. Every one reported a grand time.

Prof. E. A. Ross, U. of Wis. to Visit A. C.

WILL LAUNCH NEW RURAL SOCIAL STUDY AND SERVICE WORK.

"I guess your college is about the only place in the country I would be willing to go so far in order to do what you want me to do," is the statement made by Prof. Ross in a letter to the Y. M. C. A. received Monday morning, in answer to a request to help launch the Rural Social Study and Service Work which is to be taken up by the Social Service Committee of the Y. M. C. A. of the college.

"What more than anything else brings me is what I saw and learned during my trip in South America. There I beheld such preponderance of city life over rural life and such apathy and lethargy of the rural population owing to the exploitation and neglect that I returned red-hot for rural life betterment. I have greatly developed my philosophy of the rural problem and of the policy for rural betterment so that I have something new to say and fresh illustrations to offer. I will be glad to fire my message into the whole bunch of you, and the busier you keep me the day I am with you, the more I shall be rewarded for the long journey." Such a spirit as this and from such a well known economist if used to launch the study work should send it forth with enthusiasm and energy sufficient to keep it going thru the year and on into the years to come at A. C.

But the impetus will be felt beyond the bounds of the college, as the men for whom this work is planned are those men who are going back to live in various communities of the state where they will build up social and religious work in relation to country life, which carried out in connection with the rural schools and churches will ultimately result in better conditions for those communities.

It is planned to hold a weekly group meeting or meetings during the fall and winter terms, conducted on the seminar plan, in which these problems will be discussed. Actual facts and conditions that exist in certain sections of the state are to be used in this study in order to bring the work right home and point out methods of betterment. This training should be of great value to the men of the Industrial Course particularly and to the college men who intend to go back to the farm to live.

It is not definitely decided as yet just when Prof. Ross will be here but it is expected that it will be some time in the latter part of November. The students are indeed fortunate in having as big and busy a man as Prof. Ross, promise to spend a part of his time here with them and will no doubt derive great inspiratio nand enthusiasm from his visit.

MATERIAL FOR THE CEMENT AGE.

Ninety-three million barrels of Portland cement was made in this country in 1913, and all but 4,000,000 barrels of it were used here. The supply of materials in this country is practically inexhaustible, and manufacturers say they must have an export trade to use up their surplus.

Mr. Halvor Aakhus, Business Manager of the Agazhus, has made arrangements with E. B. McCracken to photograph all pictures for the Agazhus.

President Worst Asks Students' Co-operation

Meets Students More than Half Way in Proposal to Keep Social Life on the Campus.

It is common knowledge on the campus that steps have been taken during the opening weeks of the school year to put on a series of dances, depending to a large extent upon A. C. student patronage, at one of the down-town dance halls. It may not be generally known, however, that the man who has taken the leading part in the effort to promote these commercial dances did not see it necessary to talk the matter over with the President even so much as to get his opinion on the matter. In view of the fact that the President went so far as to provide free social entertainment for the student body last year and has plans for an even better arrangement this year, the oversight is significant.

In the course of the advance sale of tickets for these dances reports were circulated that the College planned to provide no social parties and dances for the students this year. This is far from the facts, as arrangements are under way and have been for some time for a series of College parties which will provide dancing, and amusement for those who do not dance, as well. The first of these occurs October 16th, Friday of this week.

The President has done all that could possibly be expected of him by the students in this matter; he called Mr. Bolsinger to his office and there laid before him the plans of the College and also the reasons why he did not favor any student taking it upon himself to provide amusement for other students on a commercial or profit-making basis. He urged Mr. Bolsinger as a scholarship student to at least stand with him in his efforts to keep student amusement on the campus where the expense could be kept at a minimum and the conditions most favorable. He went even further, by stating, as he has in the statement given below, that students who come to him may be entertained with a hearing if they request the use of the Armory for parties. The Armory is offered, heated and lighted, and outside guests permitted to attend. The expense may be cut to the minimum of mere music and refreshments, cutting the cost per dance per student from a dollar to at least half of that. Could the President be more generous to anyone? Why should co-operation not be the proper thing? The one change that was desired was that the dances should be taken off a profit-making basis. Mr. Bolsinger was asked to return and see the President which he failed to do.

The President appeals to the men and women of the College, especially to the scholarship students, to uphold him in his request that so-

cial life, dances, etc., be not allowed to become commercialized. He asks that students co-operate with him in keeping the social life on the campus, and that a spirit of co-operation with him, instead of defiance toward him be the rule in working out the social life. He asks that our parties be made mostly College parties, of course not barring particular friends from outside, but keeping the parties largely student in character. The expense over and above that which the College has gladly offered to furnish should be borne by all alike; the dances should be cost-price parties, no object of profit should prevail, and a report of the finances should be made public to the student body, by a published report in the Spectrum. Dances conducted in such a manner would foster a spirit of good will, the dances would be open to all, just as now planned by the dancing club headed by Mr. Bolsinger, but they would be far more democratic and satisfactory to the students than under a system where profit making is attached. It can be safely regarded by all that any man or group of men students who are really trying to render a needed service to the student body are not going to be deeply interested in the profit attached. As a matter of fact service for better social life with commercial interests involved is hardly service at all. If the present system is inadequate let men rise up who will GIVE their service in co-operation with the President aiming to serve the whole student body with the best amusements possible at the lowest possible cost.

Shortly before leaving for the Dry Farming Congress the President gave out the statement which follows:

"It is a mistaken idea that has been given circulation of late that there are to be no social life activities provided by the college this year. Plans for parties to be held on the campus will be carried out either as heretofore or along similar lines. Any dancing clubs organized or contemplated will be entertained by the faculty and arrangements may be made whereby they may secure the Armory for a limited number, heated and lighted, provided they supply the other expenses to their student patrons at cost and furnish the entertainment committee with the names of all non-student guests.

In my opinion the faculty will strongly oppose dancing parties held off the campus, especially if they appear to be commercialized, as such an arrangement is not in harmony with the wishes of the faculty and the greater part of the student body."

BATTLE FOR TWO HOURS.

Citizens of Madison and Students of Wisconsin U.

Madison, Wis., Oct. 7.—Students of the University of Wisconsin tried to throw a town boy into Lake Mendota, mistaking him for a fellow student, and precipitated a street fight in which 300 students battled with as many citizens for two hours. For an hour the city fire department poured streams of water into the crowd without dispersing the fighters.

C. R. Van Hise, president of the university, stood bond for the four students who were arrested and addressed the 1,500 students who surrounded the police station, finally persuading them to return to their homes. Three town youths who were arrested also were released on bond.

MATERIAL FOR THE CEMENT AGE.

Ninety-three million barrels of Portland cement was made in this country in 1913, and all but 4,000,000 barrels of it were used here. The supply of materials in this country is practically inexhaustible, and manufacturers say they must have an export trade to use up their surplus.

WOMEN AS BAD AS TOBACCO.

Women and tobacco are two things which Coach Alonzo Stagg, of Chicago University, has tabooed from his football squad.

Coach Stagg recently posted a notice on the athletic bulletin board at Chicago calling for spring football practice. On the bulletin was written these words: "No fussers or smokers are wanted."

This expression by Coach Stagg should come as rather a violent shock to one of the amorous proponents of the gentle art of fusing; but on serious thought, is it not true that the fusser is as great a menace to society as the cigarette? In our opinion, he certainly is; and is no more to be tolerated.

The fussed and the fussed are equally obstacles in the path to the other; and when anything worth while is to be done by either individual, he or she, even though the weakly tender passions may have to be wounded, should maintain a separate existence.

UNIVERSITY 150 YEARS YOUNG.

Brown University, at Providence, R. I., is to celebrate its 150th anniversary October 11th to 15th. Brown stands high as an institution of learning. It has about 1000 students.

THE WEEKLY SPECTRUM

The Official Publication of the Student Council.

Published every Wednesday of the school year by the students of the North Dakota Agricultural College, at the Ulsaker Printing Co., 311-315 Broadway, Fargo, N. D.

In cases of non-delivery, change of address, or change of ads. please notify the Business Manager. Office on the first floor of Francis Hall. Subscription rate \$1.00 per year. Single copies 5 cents.

Entered at the Post Office of the Agricultural College, North Dakota, as second class mail matter.

WELCOME, SHORT COURSES!

Glad to see you! Especially the new ones. The old-timers will have plenty of friends to extend their special greetings to them, but it is to those who are here for the first time, that the Spectrum wishes to extend its most hearty greetings.

There used to be a time, in the pre-historic days of the institution, when a Short Course student was regarded as material upon which the would-be wags of the student body were accustomed to practice their near jokes. That time however, is long past. The institution is too proud of the students who come to the Short course and the work which is done there, to countenance such a state of affairs.

For those who, for one reason or another, are forced to content themselves with the shorter course, we wish that they may gain every advantage that the course offers. We wish this, not merely along scholarship lines, but in those things which will make you look back to the time spent here as one of your pleasantest memories.

FARM HUSBANDRY SCHOLARSHIPS.

Very few people around the institution know where the Farm Husbandry Scholarships come from which are given out each year. Most of them are given to the school by the various railroads in the state. They were secured by the efforts of the President and their acceptance should involve a strong sense of responsibility to the school.

This matter was brought to our attention, by the case of one graduate of this course, who had received one of these scholarships, and who refused later to fulfill his part of the contract. There were several different things offered this young man which he might do, and fill his part of the contract and he choose to send in to the school data, which was desired for its work.

STAFF CHANGES.

A number of staff changes have taken place in the past two weeks, as a glance at the head of this column will indicate. The Editor has lost two of his oldest and most valuable men, Mr. Alexander, who handled Campus Gleanings and Mr. Dixon who took charge of the Athletic department.

IS IT A JINX?

If it is, Please Kill It.

It almost begins to look as though we had a real live jinx camped on the trial of our doughty football warriors. The superstitious fans are beginning to get decidedly nervous for the welfare of the team. Two accidents within a very short time, laying out first string men and hushies at that is liable to start an epidemic which might result fatally.

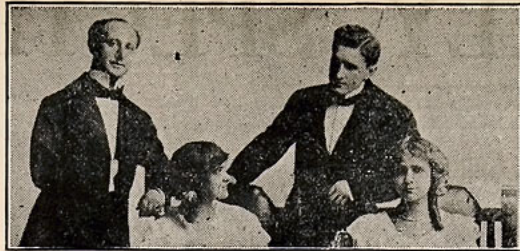

FRESHMEN RULES WASHINGTON

Lafayette College has a faculty bowling team. Considerable enthusiasm is manifest; and several matches have been arranged, one with the faculty of Lehigh University.—Penn. State College. "Hobo Day" will be celebrated on November 14, the occasion of the big game between North Dakota University and State College. Local enterprise contemplates the offering

of substantial prizes for the best costumes in the student parade. It is also planned to take moving pictures of the events to be shown in the various movie theatres of the state.—South Dakota State.

Among the lectures given at the university during the school year is the series known as the Matriculation lectures. These lectures are required of all freshmen and credit is given for proper attendance and for understanding of the course covered.

Faint advertiser never won fat profits.

THE KELLOGG-HAINES SINGING PARTY.

Kellogg-Haines Party Will Present Program Here

An Organization which Captivates Musical Layman and also wins A admiration from Critics.

In the Kellogg-Haines Singing Party there is an attraction which has no superior in its particular line of work in the Lyceum today. There are five in the party, three gentlemen and two ladies. Much of their program is given in elegant and appropriate costumes. Some of these numbers are the best example of humor and wit that good musical literature has to offer.

The chief claim that is made for this company is that they present entertaining concerts of such solid musical character and fresh wholesome power that it is sure to captivate the musical layman while winning admiration from the musical critic of the severest type. As some one has truly said: "They have discovered just what most audiences want in the way of musical entertainments—some real good work in music and then some of the light and catchy with a big allowance for humor and melodious rhythm."

THE FOOTBALL COACH.

The football coach is full of gloom; For joy he hasn't any room. He goes to bed at night and sighs, And in the morn his woeeful cries Re-echo in the morning air, And in his heart is deep despair. How sad to be a football coach! For there is nothing can approach The awful gloom that fills his frame Until there is a football game His helpless cripples wipe the yard With other men and slam them hard And kick them in the vertebrae And smash and crash and wound and slay

And bust their ribs and crack their jaws Amid an eager crowd's applause. And when the fearful fray is o'er The coach becomes a gloom once more.

His soul is sore, his heart is sick, And he requires a doctor quick. He says: "My team is on the bum And injuries are sure to come, And when we play that game next week— O! Moses, I can scarcely speak!" And thus he moans and thus he groans

And draws his monthly bunch of bones. These coaches never realize That they are very funny guys. —Chicago Examiner.

The rule for the wearing of the green caps is usually lived up to, but occasionally one sees some Freshman who goes about without the specified headgear. This is a rule which is never enforced but which has become a custom. When a man refuses to wear one he naturally gives the impression that he is not in sympathy with the customs at the college.

College rules are not always pleasant, it is true, and they sometimes result in hardship to an individual. They are intended for the general welfare, however, and it is up to the student body to get into the spirit of the institution and to conform to its customs and regulations—Washington University.

Why does it happen that the girls all tease "Smiles" Baumgartel during the noon hour each day? (I would go easy if I were you. I once knew a pet bobcat that used to "smile" the widest when he was merely considering which side of the head he was going to slam you on. (K. L.)

Coming Events.

- October. Friday, 16. Hear Dr. Exner. All College Reception, Armory, 8 p. m. Saturday, 17. Football, St. Thomas vs. N. D. A. C. Dacotah Field. Saturday, 24. Football, Macalester vs. N. D. A. C. Dacotah Field. Industrial Course Stag. Saturday, 31. Football, Fargo College vs. N. D. A. C. Dacotah Field. All-College Halloween Party. November. Saturday, 7. N. D. University vs. N. D. A. C. at Grand Forks. Friday, 13. Football, U. of Montana vs. N. D. A. C. at Missoula. Literary Society Festival, Armory.

Moving Pictures for This Week.

Thru the efforts of Mr. R. A. Corbett, acting for the Lyceum of Engineers of the North Dakota Agricultural College, the students of the school are to be given a series weekly motion picture entertainments that will extend thru the year. These entertainments are made possible by the courtesy of manufacturers who are willing to furnish films depicting the various manufacturing processes and industries to be described.

The second of the series will occur Friday, October 16 in the Little Country Theatre. The lecture will be descriptive of the manufacture of tires as reproduced by the Goodrich Company of Akron, Ohio. The lecture will be given by Mr. L. H. Shepherd, who is also general sales manager of the Company. Mr. Shepherd is well acquainted with the processes of rubber manufacture and is a fluent talker. He is also something of a prize to secure as many institutions have tried to secure him as lecturer and have not been successful. The lecture—from tree to tire—will follow the process of the building of an automobile tire from the rubber tree to the finished article as it appears on the wheel of the machine.

Sunday Lecture.

Next Sunday afternoon at 2:30, Prof. Ladd will speak on "Making the best of Our Opportunities". Every man is invited to attend.

Orchestra Rehearsal.

Regular rehearsal will be held Thursday at 4:30. All persons who play some orchestral instrument are urged to come out and help build up an organization of which we may all be proud.

Notice.

Next weeks convocation will be held this week on Friday at nine o'clock. This is for the men only. The girls will meet in the Gymnasium at Ceres Hall at four P. M. of the same day. All students should notice that Friday's nine o'clock class will recite on Monday following at the same hour.

Educational Lecture.

Prof. R. P. Robinson of Fargo College will give an address October 13, at 3:30 P. M. in room "G" of the Mechanical Arts Building. Subject to be announced.

An ounce of "now" is worth a pound of "bye and bye."

Bernhard's Academy for Select Dancing

At the Mansion, Sons of Norway hall, No. 309 Broadway, Fargo, phone 2444. Very latest dances taught by a Professional Instructor and Society Teacher, direct from New York and Europe. Private Lessons and class instructions given daily and nightly and select assembly every Thursday evening. Also Children's classes. We teach, successfully, those who have failed at other schools.

North Dakota Agricultural College

For Completeness of Equipment and Facilities for Instruction is Unsurpassed in the North-West THE COLLEGE DEPARTMENT OFFERS

Pharmaceutical Chemistry — Civil Engineering — Mechanical Engineering — Agriculture — Chemistry General Science — Biology — Home Economics — Education — Veterinary Medicine and Surgery — Architecture — Architectural Engineering.

These courses are available to those who have completed the equivalent of a High School training. For those who have not had such a training

THE AGRICULTURAL AND MANUAL TRAINING HIGH SCHOOL OFFERS

Complete Secondary Courses in — Agricultural — Mechanic Arts — Draftsmen and Builders — General Science — Rural Teachers

SPECIAL COURSES

Farm Husbandry, Homemakers, Pharmacy, Power Machinery.

THIS COLLEGE offers to the young people of this state an education which is thoroughly in line with modern thought and demands. It spends no time on dead languages or such subjects as are of little practical value. It aims to fit young men and women who can think and investigate for themselves; who can deal with social, agricultural and industrial problems of the day.

THE LABORATORIES are thoroughly equipped, and the instructors are specialists in their lines. Exceptional advantages are offered in chemistry, physics, botany, zoology, literature, mathematics, and engineering subjects.

Graduates from approved High Schools are admitted to Freshman Class. Tuition Free. Board and Room \$4.75 to \$5.00 per week.

WRITE TO THE REGISTRAR FOR CIRCULARS, CATALOG, AND ADMISSION BLANKS.—FALL TERM BEGAN SEPTEMBER 14.

WOODS' MACHINE DISPLAYS
LOTS OF PEP AND WIPES THE FIELD WITH WAHPETON.

Tearing the field up like a lot of wild men and jumping into every bit of the game with a surprising amount of pep and ginger, Coach Woods' gridiron pets walked all around the up river Science team and demonstrated that they were fast, live and a bunch of fighters. They started off with a rush and pushed a touch down over right off the reel.

The line, according to those who saw the Jamestown game, has tightened up a lot and shows much improvement, while the backfield is working much smoother and faster. Although the wet weather had made many anticipate a wet field and a slow game, it was in surprisingly good shape and hardly at all slippery. There was a very good crowd out, and, as had been predicted, the work which had been done at the rallies showed in the rooting; it will however, need a really close game to bring out all that the sideline yell artists can do. The new reserved seat section is proving very popular, especially among the down town people, who appreciate being able to come out to a game and find their seats waiting for them.

The Science team had a pair of ends with a proclivity for spoiling runs, but outside of that, their team did not bother the wearers of the Maroon and Grey very much. Captain Caulkins was pulled during he game to give Movold a workout and the youngster showed up in good shape. Kell, the reliable, is there with bells on and is always in the way when it comes to piling them up. Catlin and McQuillan are on the job in their usual fashion and show excellent early season form.

Peterson from Moorhead High played a neat game throughout and one that pleased the crowd. Bolly was in good shape and up to all his old tricks in ripping them up and down the back. The Aggies showed some very pretty playing of the open type, towards the latter part of the game, and made a number of big gains via the air route. The game as a whole was very encouraging to the backers of the team and all are looking forward to the collection of

St. Thomas' scalp next week. The game follows in more detail:

Wahpeton kicked off and the Aggies took the ball down for a touch-down. McQuillan carried it over and Catlin failed to kick goal. Abbott kicked off for the Aggies and the ball was returned to the 20 yard line and lost on downs. Wahpeton held the Aggies pretty good and Abbott put his boot under the ball for a pretty punt, but the Aggies were there and the ball was not returned. Wahpeton was held on downs and punted, and Caulkins returned it 15 yards. Abbott was pulled around from tackle for the yards and Bolsinger went over for a touch-down. Caulkins kicked goal, 13 to 0. On the next kick off Abbott put the ball nearly to the goal in pretty style and Scientist was downed in his tracks.

Wahpeton fumbled, Gilles was laid out for the Science School and Movold went in as quarter in place of the veteran Caulkins on the Aggie squad. The Aggies fumbled and after a little scrimmage Catlin broke away 45 yards for a touch-down. Catlin tried a place kick in the second quarter but failed. A bit of speedy playing on each side brought the half to a close with the score 13-0.

Second Half.

In the second half Wahpeton opened up and tried the forward pass for a couple of good gains. The Aggies got the punt and punted and Wahpeton got a chance and failed in a drop kick. The ball was in Wahpeton territory a good deal of the time in this quarter. In the fourth quarter the Aggies opened up and rung the bell at 41 before the end of the game.

Kirk of Iowa refereed the game and Wickam of Moorhead High was umpire. The lineups are as follows:

Aggies	Wahpeton
Peterson	White
Hamilton	l. e. Schram
Abbott, Nemzek	t. Vaught, Do-
Whiting, Amold	g. m enick
Pope	l. g. N. Anderson
Kelly	e. Gottleman,
Bjornson	r. g. Hansen
Mikkleson	r. t. Osis, Aasid
Dann, Perry,	r. e. Trechel, Toney
Caulkins, Movold	q. Ulsaker
Bolsinger, Wood	l. h. Meyer
McQuillan	f. b. Robins
Catlin	r. h. Gilles

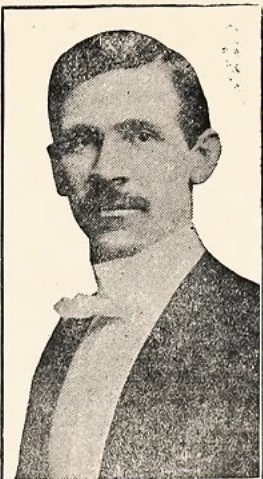

FOOTBALL RALLY—A GOOD ONE

A Large Number Out And Lots of Pop Displayed.
Friday at 1 P. M. promptly (note the adjective—who says we aren't

improving. Ed.), a large number of A. C. rooters gathered at the Armory. It was a great rally and everyone present showed lots of enthusiasm. The band turned out in full force and gave a few good selections during the course of the meeting. Bill Mendenhall was elected cheer-leader and was ably assisted by (Drink-of-Water) Christiansen. The rooters showed great improvement over the last rally and Saturdays yelling should show the results of their hard work.

Professor Remington told about the great need the team has for a loyal band of rooters that have a system behind their work. He showed where the rooters part came in and urged the students to be on the field to do their best as rooting is the root of our opponents troubles. (This way out!)

Dean Keene gave a short talk showing how to get the best possible results. The strong point which he brought out was to get organized (no, not organized across the Red); to form a well organized band of rooters and to stick together thru-out the game. If this can be accomplished, the North Dakota Agricultural College will be able to show up any college in the Northwest when it comes to rooting as every man and woman here is loyal to the team and will stick by them until the "pig-skin" has been carried over the last yard and the team brings home the "bacon".

STRICKLAND W. GILLILAN.

FINNINGAN FARM

Noted Humorist Has Big Crop of Roses and Nasturtiums at Roland Park

Strickland Gillilan's happiest, as well as his busiest times, are when he is at home on Finningan Farm, Roland Park, Maryland, with his flowers and his family. He says he is going to have the biggest crop of roses and nasturtiums next summer that has ever been grown in that flowery community. Nasturtiums are a speciality of Mr. and Mrs. Gillilan, and they claim to know exactly how to grow the greatest variety in size and color and fragrance.

Hesperian Meeting.

The first regular program of the year was a marked success. If every program this term is equally successful, we could rely on a very interesting line of presentations. The first stunt pulled off was the entertainment given by the new members to the old ones, but these stunts did not furnish much amusement to the new fellows. Next the officers gave a few snappy speeches and this was followed by a map demonstration on the European war.

The meeting was brought to a conclusion only after everybody had helped clean up all the ice cream, cake, etc., that they could take care of. All expressed the opinion that they had had a rattling good time.

(Dope Box—2.)

Why do all the waiters gather around Miss Wild's table after dinner?
(It cuts me to the heart, Reginald, but I cannot tell you. Why don't you ask Ollie, yourself? (K. L.)

CAMPUS CLEANINGS

SPECIAL BULLETINS.

The first representatives of the Farm Husbandry course blew in yesterday, but unlike their cohorts who in the old days, came to the A. C. for the first time in cabs, these two walked from the station, and carried a telescope between them on a stick. That's the spirit, fellows! The old A. C. is no place for plutocrats anyhow.

FOOTBALL DEPARTMENT.

A write up of the Wahpeton game would be altogether superfluous; therefore we will simply say, "Is everybody satisfied?" and await the usual answer of "—Yes!"

On to St. Thomas.

PERSONAL AND SOCIAL.

Mr. Christiansen is again attending classes after spending three pleasant days in Fargo with his Chicago lady. Needless to state, said girl is some girl; otherwise Chris would not be tempted to forget his school duties.

WE SYMPATHIZE WITH YOU, BOOB.

Boob says that his broken nose doesn't hurt him much now, but nevertheless does cause him much mental agony. On investigation we learned the reason. He has been forced to break his standing date with Miss (now don't get curious) for the Million Dollar Mystery at the Isis. Hard luck, Boob!

THE WEARER OF THE GREEN.

A Dilworth negro has worked out a very novel color scheme by setting off his dusky complexion with an A. C. green cap. Let us congratulate the Freshmen on their new member.

Birds of a feather? Of course not!

Willie McLeod's new password is "Hey, fellows, got any laundry?" Willie will get your number if you don't watch him.

HERE COMES THE BRIDE.

Prof. Keene. "Miss Keye, do you know how much cake is a ton?"
Kitty. "No sir."
Prof. Keene. "You will probably be more interested very soon."

WHERE IGNORANCE IS BLISS.

One rainy morning last week as a group of Freshmen approached the campus they noticed the sign "Closed", across the main drive. Whereupon they threw their hats in the air and were not seen until the next day.

THE CHEMISTRY OF STEEL.

There has always been some question whether steel is a chemical combination of iron and carbon or only a mechanical mixture. Recent experiments seem to show that it is both; a part of the iron is in chemical combination with the carbon and a part is free; but there is no free carbon.

A dollar in the hand is worth two in the debit column.

College Students--

Pay By Check

The "pay-by-check" way safeguards you from theft and loss.

It helps you economize by giving you a record where every dollar goes. Then, too, a dollar, in the pocket is easily spent. You think twice before you write a check.

Let us open a checking account for you.

JUST A THOUGHT FOR YOUNG MEN.

You will probably work for others before you are "your own boss." Where will you work and what will you do? You should work for people who know more than you do, so you may benefit by their experience and superior knowledge. But such people are busy men and want you to come to their offices with a fair degree of proficiency.

Dakota Business College
Makes a speciality of training young people for office positions—as clerks, bookkeepers, stenographers, cashiers, credit men, secretaries and managers—its graduates advance through these stages to businesses of their own.

Equipment.
The school is run like an office. It is equipped with roll top desks, adding machines, loose leaf books, card ledgers, cash registers, billing machines, filing cases and other things for illustrating and teaching business, order and system as they are practiced in first class offices.

Teachers.
Its teachers are EXPERTS who have earned BIG SALARIES out in the business world DOING the very things they are now TEACHING. These people can teach you more than other teachers.

The Expense.
It costs very little to take Dakota Business College course, compared with taking a course in medicine, law dentistry, engineering etc., yet a D. B. C. graduate has a greater earning capacity than a young man just out of Harvard or Yale. (This statement can be proven beyond question.)

Good Positions.
Dakota BUSINESS COLLEGE has a large number of business men and firms that have virtually contracted to take every graduate it can turn out. By taking a course of training at D. B. C. your future is sure—you take no chances.
Think these matters over very carefully and then drop in some day and talk your future over with

F. LELAND WATKINS, A. M.
President D. B. C.

Faculty Parties to Students

Last Saturday night in the homes of some of the professors a half dozen of them in fact were parties for groups of 10 or 12 students.

At the home of Professor Carl Hennes the boys were treated to a magnificent spread and a good evening of entertainment followed. At Mr. and Mrs. C. J. Allen's home a dozen fellows spent a good evening and similar groups spent pleasant times at Professor Miller's, Professor White's and Professor Chase's.

It is the plan of Mr. William Guy and his committee on faculty parties to furnish home parties for every man in the institution some time during the fall term. A good spirit of fellowship is bound to be built up throughout the college because of these parties, and the friendly relations between the students and the faculty which they promote.

This department of the Association work has been kindly received by the men and we trust that Bill Guy will meet with unbroken success in carrying out his program.

Military Department

(By Marvin Kirk)

The drill this week has been on ceremonies. Battalion parade was the first one tried, then review, escort of the color, and guard mounting. The band is a necessity in all of these ceremonies, and Captain Bachman has been out with his men every afternoon, and they have given us some splendid music. This is quite a hardship for the band, for it cuts in on their time for practice, and they have to practice till nearly five o'clock to make up for it. Three cheers for the A. C. Band!

Parade and review were each tried twice, and the officers and men have a fair understanding of them, but the escort of the color, and guard mounting were not so simple, and since they were tried only once, they were not mastered at all. For both of these, a third company was formed from the two regular companies, making three companies of four squads each. None of these

ceremonies have ever been used here before, except parade and review, so the officers could not help out much. This was especially evident in the ceremony of guard mounting, for it is not described in the Infantry Drill Regulations, and only a few of the officers had the Manual of Guard Duty, in which it was described.

A door has been cut in the north end of the gun room, so that there will be less confusion in getting the guns out, and especially in returning them. Some new supplies have been received for this year. There are 100 new rifles, with bayonets and scabbards, four 22 caliber gallery rifles, and six sabers. This brings the total number of guns up to 238.

Ceres Hall Notes

Mr. James Guy of Bourbon, Ind., spent Saturday with his children Olive and Bill. Mr. Guy was on his way to Churches Ferry to attend to Business Matters.

Miss Elise Stark was one of the judges at the Casselton Corn Show, Saturday. They judged the cooking and school exhibit displayed by Cass County Children and the cooking of the women of the county.

Misses Dorothy Price and Gladys Platt visited with friends at Casselton Saturday and Sunday and also took in the Corn Show.

The social committee of Student Government Association of Ceres entertained the new girls of the Hall on the field back of Ceres, Monday evening at a marshmallow roast. Some young men decided to break up the party but the number of girls overcome the boys and they departed to parts unknown.

Miss Myrtle Maechter attended a Party given by the Juniors of Fargo College, Wednesday evening.

Messers Wallace Manikowske, William Fish and Miss Julia Mankowske of Morton visited with their sister Cecil Sunday while enroute to Bismarck where they will attend Bismarck Exhibition.

Misses Ethel Poole, Olive Guy and Elise Stark autoed out in (county?) Sunday with Miss Grace Mayer. A grand time was enjoyed by those who were out?

Miss Olive Guy was delighted when she received some flowers Wednesday evening. The question is, where did they come from.
Miss Olive Guy and Cecile Man-

kowske gave a spread Tuesday evening to a large number of girls at the Hall. After having eaten up all the feed, each departed having spent a lovely evening.

Miss Elise Stark judged the bread and sewing display at Alice, Tuesday.

Miss Agnes Hutchinson spent Sunday with Miss Miller of Oak Grove.

It is Not Always Easy
To apologize,
To begin over,
To take advice,
To be unselfish,
To admit error,
To face a sneer,
To be charitable,
To be considerate,
To avoid mistakes,
To endure success,
To keep on trying,
To forgive and forget,
To profit by mistakes,
To think and then act,
To keep out of the rut,
To make the best of little,
To shoulder deserved blame,
To subdue an unruly temper,
To maintain a high standard,
To recognize the silver lining,
BUT IT ALWAYS PAYS.
—The Bulletin.

MONTANA STATE U.

The Montana Motion Picture company of Butte had a camera man at the college last Monday and Tuesday taking pictures of the college buildings and equipment, and also of the different forms of the student activities. These pictures will be shown all over the state until the start of the Panama-Pacific Exposition next February, when they will be taken to San Francisco to be used in the exhibit from Montana and will be shown in the Montana building. This representative has been travelling all over the state taking pictures of all the state institutions and various cities of Montana. The pictures are being made under the direction of the Montana committees of the Panama Pacific Exposition.

Announcement.

Prof. Bernhard's Select Assembly Dance will be held hereafter on Thursday evening instead of Friday evening at the Mansion, Sons of Norway Hall, 309 Broadway.
