With A RAH! RAH! RAH! And A DA-CO-TAH! YE-E-E-E-AH!

Did the Band make a Hit?

Well, we guess yes!

(Courtesy Mr. Homer Dixon.)

Well, it's all over. Yes it's a fact that what the Band boys have been looking forward to for the past three months, is now a thing of the past, a memory that will visit us in years to come and a memory that will many times be our most welcome guest during some quiet hour, away off in the future. Then too, there is the immediate value to be gained from knowledge we have gained of big business, in watching 650 hogs per hour go from the stock yards to the storing room and refrigerator cars; in seeing the raw wool as it comes from the sheep's back made into some of the finest mackinaw blankets and goods that are made at the present day; in examining the immense grain boats of the Great Lakes from the bottom of the bins and engine rooms to the pilot's cabin above and from the great anchor on the prow to the immense propellor blades on the stern; in following the wheat which grows on our great North Dakota prairies as it goes from the freight cars into the mammoth storage bins of the largest type of concrete elevators and frem there into the hold of the largest type of lake steamers carrying 650,000 bushels of wheat to the eastern ports of the Great Lakes. In this respect the trip had its educa-

You all know what a great send off the band received last Wednesday evening at the Great Northern depot. And if you use your imagination slightly I think you can picture somewhat the scenes that occurred in the car for about the first fifty miles of the trip. But it would require quite a stretch of the imagination to picture the bright smiling faces around the breakfast table, in the beautiful new cafe room of the new Great Northern depot in Minneapolis the next morning, when the beautiful waiters (for everything looked beautiful then) set the appetizing breakfast before that hungry

Shortly after the blare of a trum pet was heard and then we lined up for our bow to the people of the Flour City. After a few selections The morning was a ra in the depot Colley blew his little whistle and we started up Nicollet heavy gray blanket, but the citizens evenue. The boys felt good and swung into the stride to Boyd's boys from the bread basket state drum like good fellows. We played were not downhearted, as we played a number of selections on the march a concert immediately after we stepand soon arrived at the Journal and pd onto the platform, did not even Tribune buildings where we played take time to go into the depot. It a number of selections and scared all of the Mexicans out of the town, for the report was circulated that we were the first regiment band from North Dakota on our way to Mexi-It was here that our posing for the camera fiends commenced and from that on we certainly were popular with the camera men. Leaving there we serenaded the Daily News and University Club and arrived at the West Hotel and stretched our selves out on the floor for an hour's

ing will open its eighth summer ses- to make a man conscious of the resion June 2nd, 1914, at the North sponsibility he assumes in taking Dakota Agricultural College. This charge of an engine. course is already well known, but to those who are not familiar with the work given, this article may be of interest.

We have at the present time naded the commission men, then revolution taking place in the methleft our instruments in the live stock, ods of farming, a revolution of no pavilian and departed for Switft's less importance than the revolution guests of the University Club of I acking house. The Swift Company which the manufacturing industry experienced when the steam engine was introduced in the last century. to ask a question there was an an- The application of steam and gasoanswer standing only a few feet line engines to farm work has asdemand that provisions be made for the proper training of men to oper-

The course in traction engineering aims to do this in as short a time as is consistent with success. In the four weeks that the student entire time in getting at the principles of operation of the steam and gasoline engine and combines this with practice on a large number of engines in the laboratory and in the also in front of the Stock Exchange field. A man will have the opportunity of familiarizing himself with as many types of engines in this short time as the average engineer will operate in a lifetime. The course is duct us through telling us of how he completion of each selection they made as practical as possible embody secured a number of the rich gems would hoot like a pack of coyotes ing only such things as can easily be grasped and those things which are of special benefit to the engineer in

Steam Engineering.

The course in steam engineering is limited to a consideration of the Traction Engine and only such subjects are taken up as will be of the greatest benefit to the man who wants to run an engine in the field. In the lectures, which are given in the forenoon, the various parts of discussed in a clear and simple way, constant use being made of models and parts of engines. Sectional samples of injectors, pumps, lubri-Sectional cators, oil pumps, valves, etc. are at hand by which these parts can easily be explained and readily understood

In the afternoon the students are given such work as setting valves, babbitting, setting tubes, lacing tails of a large number of engines. belts, etc.

Steam Engine Field Practice.

In the field practice the student is given the opportunity of handling a large number of engines uder work ing coditions. The student here gets the practice in guiding the engine on the road as well as lining up to the separator. He also gets the experience in watching the fire, the pump, the injector and the lubrication system of the engine. The adjustment of bearings and the general care of the engine are continually pointed out by the istructors in charge, the

The School of Traction Engineer- whole object of this training being

Gas Engineering.

Gasoline engines are coming into general use more and more every day and it is but a question of a few years till we will find a gasoline engine on every farm. The uses to which a gasoline engine can be put on the farm are many and as a consequence we find a great variety of engines on the market ranging in size from the small one horse-power engine for running the cream separator to the 80 horse-power traction engine for threshing and plowing. Realizing the importance of this new prime mover, we aim to give our students exceptional opportunities for becoming proficient in the handling of gasoline engines.

The course of istruction in line engineering is carried out along the same lines as the course in steam engineering, consisting of lectures delivered in the forenoon and actual work on engines in the afternoon.

Gas Engine Lectures.

The lectures on gasoline engines take up the principles of operation of the four cycle and two cycle engines giving special attention to those features embodied in the en-gines used on farms. The four cylinder engine is considered at length with its application as a motor for the automobile and traction engine. Carbureters and systems of ignition are given careful consideration, constant use being made of sectional samples as well as those from engines in the laboratory and in field. The standard types of engines accessories like carbureters, spark plugs, igniters, coils, timers, auto sparkers, magnetos, etc., hand and by the aid of these the student readily grasps their princithe engine are taken up in order and ple of operation and is well prepared to make the necessary adjustments and repairs in the field.

Gas Engine Laboratory.

The gas engine laboratory is well fitted with stationary engines ranging from one horse-power up of all the standard makes. Each student is given the opportunity of handling each of these engines and in that way becoming familiar with the de-At the same time he is given a definite exercise on each engine to supplment the information gathered in the lecture room. For instance, on one engine the "jump spark" is studied in detail, on another "mixtures" are investigated and on a third auto-sparkers, etc., etc., The course is so arranged as to give each student a thorough knowledge of the gasoline engine as a whole

Gas Engine Field Practice.

A number of gas traction engines have been provided to give the students the opportunity them in the field and thus get the necessary practice for running these engines for plowing or The course offers an excellent opportunity for comparing the various gas tractors on the market.

Power Farming.

Lectures will be given on the cost of operation of tractors for plowing, seeding, harvesting and threshing, due attention being given to the various hitches for these various

OUT OF TOWN.

Owing to the fact that the Editor was called out of town over the week end, he was forced to rather unceremoniously dump the greater burden of this issue upon the staff, at about ten minutes notice. regrets that he was forced to do this and hopes that it will not happen again. It is possible that this issue may be held up for eight hours, in order to obtain the detailed write-up of the band trip, should the latter not be in on time.

CO-ED ISSUE.

We understand that the girls are actively considering ways and means of editing a girls' issue. We hope that this will be carried through as the girls of this school ought to be able to turn out an issue that would be a winner. Let us hope that the next few weeks will see the publishing of the best girls' issue that has ever been put out.

AN IMPROVEMENT.

A number of improvements have been suggested that ought to be made in our campus and we should like to suggest one more that we believe worthy of consideration. The walks which goes from the Armary around by the Music Hall to the Chemical Buildings is possibly the most traveled walk on the campus, but its condition is hardly in keeping wit hthe use it gets. It would be appreciated by many, if it could be replaced by a substantial concrete walk. It would improve the appearance of that part of the campus very much.

CERES HALL

Mrs. George Flath and Miss Flath called on Miss Iverson on Friday afternoon.

Billy is waging war on a Mexican The outcome is not known.

Last Wednesday evening the a number of the Ceres Hall girls went down to hear the concert and see them off at the depot.

Monday evening Mr. Sweetman entertained the Mission Study class er. at dinner at Ceres Hall.

The debaters, Mr. Weji and Mr. Baumgartel, were entertained at a dinner given at Ceres Hall on Tuesday evening. After the dinner the bad gave a concert in front of Ceres Hall and short talks were given by Messrs. Arvold, Weji and Baumgartel. AGGIES ANNEX THREE

MOORHEAD NORMAL, WAHPE-TON SCIENCE AND WAHPE-TON INDIANS TAKEN INTO CAMP-TEAM IS SHOWING IM-PROVEMENT.

On Tuesday, the twenty-first, Coach Haskin's charges opened their season by taking into camp the Moorhead Normalites by a count of 5 to 0.

The day was a bitter cold one and only a handful of the faithful ones were on hand to witness the con-test yet in spite of the adverse weather conditions both teams put up a good exhibition of ball. Otis was on the firing line for the Aggies and held the Normal to one hit. Whiting took his offerings behind the bat in fine style. His throwing to bases was good and he straightened out two of Carlander's twisters for safe hits. Carlander, the king of the Normal heavers, worked for Moorhead and Bastine

The Aggies first scores came in the third inning when McBride doubled, went to third on Parizek's sacrifice and scored on Whiting's single. Whiting stole second, went to third on McLean's error and scored on B. Carlander's error. the sixth inning Parizek got life on B. PARIZEK TO CAPTAIN BASEBALL.

At a meeting of the baseball letter men last Tuesday Ed Parizek, second baseman on last year's team, was chosen to lead the Aggies during the ensuing season. This is Ed's third year on the team and his experience and natural ability make him well fitted for the position. His stick work has always been of the best and as a fielder he is above par.

Here's for success and all good wishes for Capt Parizek.

tel, which by the way was a beautiful hotel and they certainly did great. make us feel at home there. Immediately after breakfast we lined up in front of the depot and then serenaded the newspapers and Commer-After the parade cial Club rooms. we left our instruments at the club rooms and with Assistant Secretary McCarthy of the Duluth Commercial Club as guide we inspected the Aerial Bridge for which Duluth is noted and which is one of the greatest engineering feats known to modern time. Crossing the canal on the bridge we visited the U .S. Government Life Saving station and then returned to the club rooms where the Commercial Club had prepared ter. a fine meal for us.

There were a large number of the business men of Duluth, including Mayor Prince and Mr. Hugo, friend of President Worst) who listened to the concert we gave there immediately after the noon meal.

We then started for the Woolen Mills and Grain Elevators having been previously prepared for the trip by a short talk from Mr. Barnes who is responsible for many of the big activities of that section. He told us of how freight rates on grain had been reduced one-sixth by means of the present system of grain transportation which was carried on upon the Great Lakes. That is that the water rate was one-sixth less than the railroad rate. This is as I remember his telling it it seems he said that the rail rate was about 10 or 11 cents and the lake rate about 1 1-2 cents. He then told of the size and differences of the boats and methods of handling for greatest economy in time and labor.

We were first taken through the Woolen Mills, where we saw the raw material go through the different processes to the finished product. Then we were taken up to the top of one of the large elevators by means of a little passenger elevator and it certainly was a great ride. Five fellows in a little car about four feet square, going up through a little shaft the top of which looked about as big as a shoe box. Well, we got there, and got down safely and then took a little steamer over to one of the big boats that was being loaded with wheat for shipment to Buffalo.

The ship was a monster, being a little less than 600 feet long. When empty it only drew about of water. The deck was three or four times as big as the floor of the Armory. We then went through the power plant of the elevator and back to the Commercial Club once more where we were served with one of certainly was great and the quality for a king.

The evening we were entertained by the men of the city in the Commercial Club rooms and were favor-

the Shrine Quartette. There were also a number of speakers and our own quartette took a big part in the program as did the band. It was a jolly good mixer and they treated us machines. Lectures of the construc-

Sunday morning we breakfasted at eight and met in the dock at nine and took a trip to Superior, Wisconsin, in a little steamer. We came back the same way and then took a launch for an hour and a half ride out into the lake about seven miles. This was a great trip and coming back we came in closer to the shore where we could see the beautiful houses built along there. Duluth is a queer city and it would take a long time for us to see it all. It is 22 miles long, one mile wide, and 1 3-4 miles high. But we could see a great deal of it from the wa-

Another big meal awaited us on our return to the hotel and then we assembled at the Masonic Temple at 2 o'clock for a short rehearsal before our afternoon concert. The concert started at three and we had packed house, the auditorium there in the Masonic Temple being completely filled and many standing. The best part of it was ,however, that they were certain[y appreciative and we had met audiences enough by that time to be able to tell it. This fact helped us a great deal and we went through that music everyone doing his best.

The Dacotah Quartette made its usual hit and then some, they were shop. called back again and again, one encore was not enough so they responded to two of them. The band accommodated at the college dorminumber of encores and now the fel- nished at \$4.50 per

tette sang for the hotel guests in the dining room and then we beat it pany of bright young men assem-for the train arriving in time to find bled from all parts of the Norththree of the wind jammers with fairies. We hastily pi[ed these three gentlemen onto a baggage truck and gave them a ride for their lives. After a final serenade the train started and then we all gathered in one coach and all of the pasthe best feeds of the entire trip. It passengers of the train came in there of the cooking and service was fit Quartette joined by request of the passengers.

Gathering in the car again we were called to order by Bachman who told the boys of the good work they had accomplished and of how he appreciated it. He was greeted "What's the Matter With Bachmann?" followed by nine Rahs for Bachman, and the yelling was penuine because of the fact that the band boys have come to hold a of plans and air castles for the big trip to San Francisco at the close of the school year 1015.

Piling out at 7:30 Monday morning the fellows were just in time to was called upon for a speech and he arriving at the college for their 8 ner, presenting them each with a o'clock classes they brought a close bouquet of roses from their respec getten for a long time.

Prof. Bell states that the bird migration wave, which has halted in gian, the Editor asks all the girls to this vicinity late[y, is one of unusual make an effort to keep from cutting duration and size. There have been across the lawns. There is a much many comments on the number of used path down there that saves robins that have literally covered the campus for the past few days. them not to use this path she draws The reaso for the unusual number is the following moral: caid to be that the migratory flight Take the walk, yo uneed the exer has been halted here by the procise and it isn't any further than at langed cold weather. INTER COLLEGE ORATORICAL CONTEST - UNIVERSITY TAKES FIRST PLACE.

The one public speaking event it which all of the colleges of the state are represented is the Inter-Collegiate Oratorical Contest. This year marked the eighteenth contest of its kind and the same was held at Grand Forks with contestants from the following five schools: N. D. A. C., State Science School, N. D. University, Fargo College and Jamestown College.

The N. D. University carried away the highest honors with the oration "An Apostle of Progress," given by Mr. Lester Smith. This orator presented his subject smooth, highly finished manner. He had an unusual amount of grace and as he described the life of Dolliver as that of the apostle, heralding progress to the world, one felt that he portrayed his theme in a highly oratorical style.

The oration taking second place was "The Educated Patriot's Attitude Toward Immigration," by Mr. Musberger of Fargo College. He explained the old and the new immigration and the attitude of the educated men toward the same. The oration was well thought out and Mr. Musberger's delivery indicated that not only had he thought it out well but that he also believed in what he said. However, if one would offer any suggestion on the matter perhaps they would call for [ittle further consideration of the attitude of the common citizen toward the question since they form such a large percentage of the number and backbone of our naton.

Mr. Dan Darrow represented our college in the contest with the oration "Academic Freedom," showing that suppression of economic and social discussion is attempted in all walks of life, that it is felt decidedly in our cosleges, and encumbers our instruction and gives direct allusion to the unfortunate circumstances which lately occurred in our

The oration was given in a straight forward manner. Its effect was convincing as well as oratorical and the orator's stage presence was good. The audience was, however, held by the earnestness of the orator and the truthful and impressive style of oration.

Mr. Dysart represented James-wn College with the oration "Mob Rule." This was presented in excellent form and dealt with the danger and frequence of mob outbreaks in the United States.

The State Science School was represented by Mr. Theo. Zeyher with the oration "Alexander's Vision." This portrayed the masterfulness of not only this conqueror but succeeding conquerors, their thoughts and ideals.

The judges of the contest were Prof. Sloan of Iowa State University, Dr. Leonard of Minneapolis and Prof. Lyman of Chicago, graded on thought and composition while the judges on delivery Supt. Edwards of Moorhead, Dr. Stinson and Dr. Ryan.

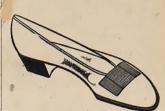

At the close of the contest Mr. Stockwell, representing the Masonic Grand Lodge, presented watch which is given annual[y the winner by this body, Mr. Smith being the fortunate recipient.

The band boys caught the 7:56 car up to sshool this morning and entertained the passengers by singing all the way up. Their rendition of the old favorite, "Cheer, here the gang's all here," was especially appreciated, although the sung was somewhat expurgated. One of the noble youths who gave us his seat to a damsel fair was cheered to the echo and his seat mate was subjected to vociferously vocal queries as to "Where did you get that girl?" We print below the revised popular song. It should bid fair to become a parlor favorite in its new (and purified form.)

Cheer, cheer, the gang's all here. Musn't say the naughty word, Musn't say the naughty word, Cheer, cheer, the gang's all here, Musn't say the naughty word,

INTERCLASS LEAGUE

BASEBALL. Standing of the Teams.

Won Lost 1000 Sophomores ... Seniors 1000 1000 High School 0 Juniors

The high school ys. Seniors game last Tuesday did not count as a schedule game as it went only four The Freshman-Soph, innings. Junior-Senior and Freshman-High School games had to be postponed fore two reasns, namely: cold weather and absent team members who were away with the band. On Friday evening though, the Sophs and Juniors managed to lock horns and went five rounds, the final score beig 2 to 1 i favor of the second year men. Scoopeus Lefthandus Perry, the port sided hero of the Soph Co-eds was on the firing line for the Sophs and fed the chesty Juniors out of his palm at all times. Sorenson was the Junior slab artist, performing in a very satisfactory fashion, but his teammates did not give him the support that he desrev-

(Note-Over 30 spectators were present. Some spirit-hey?)

PICKUPS AND PUTOUTS.

Fred Bennion, coach at the University of Utah, has been secured to coach Montana State next year. Coach Bennion is recognized as one of the best athletic tutors in the Rocky Mountain conference and his coming to Montana is beig heralded with joy by the studets and sup-porters of that institution. It is of especial interest to the N. D. A. C. as our football team will meet Montana State at Bozeman on Nov. 18.

Pie a-la mode-A piece of cake, Fatimas and coffee Great athletes make. (?) Frank Peter's score book is the

most baffling puzzle that we have ever met with. It took us until 3 a. m. Sunday to decipher the semi-Runic symobls therein and convert them into a coherent box score and

summary. N. D. Gorman, better known to us as "Gink," a former baseball, football and basketball star, was a campus visitor last week.

JUST TOO MEAN, OLD CHAP.

Reg, you sure are the victim of circumstances. We think the band boys played a pretty mean trick on you when they appropriated all the lower berths in the car and made you cramp your dignified length into an "upper." Probably you are lucky that you didn't get assigned to a hammock, Reg. Be an optimist; you know a drum major ing at is a picture of a carrot."-Ex. sleeping in a hammock would have been an awful spectacle. Give thanks for small blessings.

Shubert, the theatrical manager, will buy the Chicaga Inter-Ocean and vited run a daily paper. Ford, the auto o'clock.

his taste," as the old woman remarkman, takes another way of getting rid of his millions. "Every man to ed when her husband kissed the Dakota cow.—Ex.

MILITARY DEPARTMENT

(Marvin Kirk.)

Last Monday, Company B was drilled in close order, and Company A was given skirmish drill, the different methods of advancing, the signals, and the way to fre.

On Tuesday, Company A was given close order drill, and Company B extended order. Near the end of the hour, the corporals of Company A were given some practice in drilling their squads alone. This will be a feature of the inspection this year, that we did not have last year.

Friday the band was gone, so the regular weekly review, parade, and inspection could not be held, so battalion drill was given for a while, and then the men were taught to stack and take arms. The corporals were also given a chance to show off their squads again. The squad drill is improving rapidly, and that part of the inspection this time will doubtless be excellent.

Range shooting started Thursday afternoon, and was continued Saturday forenoon. In spite of the windy weather, some good scores were made. This range shooting is much better practice than the door target practice. The regular Krag Jorgenson rifles are used, and the range is two hundred yards. The bulls eye is eight inches in diameter, and so is about the size of a man's head.

Yesterday a sham battle was to be fought between Company B, defending the rifle range, and Company A, which was to capture the ranges. As the reports of the battle were too late to be published in this issue, they will be given next Tuesday.

PANAMA PACIFIC INTER-NATIONAL EXPOSITION.

Thirty-five nations have accepted the invitation of the United States to participate in the Panama-Pacific International Exposition at San Francisco in 1915. The nations are as follows: Argentine Republic, Australia, Bolivia, Brazil, Canada, Chile, China, Costa Rico, Cuba, Denmark, Republic, Ecuador, Franie, Guata mala, Haiti, Holland, Honduras, Italy, Japan, Liberia, Mexico, New Siam, Spain es0uPer shrdl hrdlhrd ma, Persia, Peru, Portugal, Salvador, Siam, Spain, Sweden, Turkey, Uruguay and Venezuela.

The exhibit palace of Machinery at the Panama-Pacifice International Exposition has been turned over by the contractors to the exposition management and will shortly be ready for the installation of exhibits. The building covers nearly nine acres. Three other exhibit palaces will be ready by the first of May and all will be completed by July 1st.

More than two hundred and twenty conventions, at which more than 500,000 accredited delegates are expected to assemble, will meet Sa Francisco during the Panama-Pacific International Exposition in 1915. Among these are 21 agricultural societies, 20 business, 22 edu cational, 35 fraternal, 7 genealogical. 23 Greek letter fraternities, 15 governmental and civic societies, 5 historical and literary, 15 industrial, 9 labor, 13 professional, 8 religious, 19 scientific and 7 social service.

"Well, Well!" exclaimed the nearsighted man as he sonk into an easy chair, "the fashions in women's clothes keep on getting smaller around the ankles, don't they?"

"That isn't a fashion magazine," exclaimed his wife, sharply, "that's a seed catalogue. What you're look-

Gee. Whizz! My ink is friz.

"Did that young man kiss you last night, Amy?'

"Yes, Olga." "And you allowed him to?" "Why he just did."

"Why didn't you stop him?" "Why, Olga, you told me never to interrupt anyone."-Ex

The Law students of the University of North Dakota put out an issue of The Student this week, and it is one of the most interesting and entertaining numbers that we have received from our sister school.

College put out a girls' issue of the Collegian. It was a twelve page issue and it certainly was a hummer. The Co-eds issue is an annual affair at South Dakota State and this was the third annual issue.

Wanted-A typist. Must be good looking. Apply two years from date. Stormann & Dahl .- The Student.

Announcement :"If we get canned for this we'll all go to the A. C." Editorial Staff .- The Student.

HE REPEATED.

In St. Louis there is one ward that is full of breweries and Germans. In a recent election a local The Co-eds of South Dakota State option question was up. After the ing the votes. One German was calling off and another taking down the option votes. The first German running rapidly through the ballots said: "Vet, vet, vet, vet ... denly he stopped. "Mein Gott!" he cried, "Dry."

Then he went on-"Vet, vet, vet, vet,...." Presently he stopped again and mopped his brow. "Himmel!" he said. "Der son of a gun repeate-

WHAT'S YOUR NAME?

But alas! and alas! that all names must change so with the fashions. "The utterance of the mere name," Atlantic, "is one of tie most pewerful auxi[iaries which the lover of pity, when the husband returns home at night to falter out the tale of his ruined fortunes,'

True, but suppose that the wife had cried, 'Marmaduke!'

Lord Orvi[le's "My beloved Miss Anville!" can no longer thrill us; we are grown less punctilious; and it is hard in these days to think of young lps quivering, of young voices growing soft over our own Puritan names.

'Keziah!' 'Yes, Increase!'

-Atlantic.

The digestive proclivities of Mr. Stanley Abbott, Mr. Gustafson and Bll Mendenhall were taxed to the utmost, Monday evenng when the valby two of the girls in Junior Cook- taking the form of phosphate ing, and not only dared this one but lime. expressed themselves as willing to again accept should a second invieditorials. Anyhow, their digestive troubles may have come from eating too much.)

Washington and Whitman College.

NEW WIRELESS APPARATUS BEING INSTALLED.

The wireless apparatus which was ordered by the Engineering Department some time ago has arrived and is now being installed in the room formerly used only as a photometer room on the third floor of the Engineering building. The apparatus consists of 1 K. W. flexible transformer, a 1 K. W. oscillation transformer, heavy current sending key, aeria[switch, variable condenser, rotary spar kgap giving 3,600 oscillations per minute, receiving transfermer, a pair of 2,000 ohm wireless receiveres, a pair of 3,200 ohm wireless receivers, an audion detecter and several other smaller accessories such as switches, etc.

Practically all of the apparatus has been obtained from the J. J. Duck Co., of oledo, Ohio, and represents instruments of the highest order in their respective lines. instrument is neatly finished, being pleasing to the eye as well as efficient.

At present the apparatus has no been put in any permanent place as it was decided to build a table purposely for it and the instruments will be placed on it as soon as it is in place. However, some of the in-struments have been tried out and communication is being held every day with other stations in the near vicinty. As soon as the new aerial is put up, it is expected that the station will be in easy communication with the staton at the Unversity of North Dakota at Grand Forks, about one hundred miles away ,and a[so numerous others within about the same radius. It is intended to erect this aerial between the Engineering Building and the further end of the Mechanic Arts Building and to have it about 200 feet long and about 100 feet abov ethe sideand about 100 feet above the sidesize and height messages can be re ceived over distances of around 1,-500 miles and messages can be transmitted over distances of from 150 to 200 mi[es, weather conditions of course affecting both the sending and receiving of messages over such long distances. There is also some question at present about erecting a single wire aerial, feet long and 80 feet high, between certain buildings on the campus. This aerial would be used exclusive-[y for the reception of stations using high wave lengths, such as the one at Arlington, Virginia, which sends out government time signals to all stations over the country and somesays the Contributor in the Jaunary times uses a wave length of 3,200 metres (over two miles long.) The advantages of being able to recieve emphasis or emotion can summon to messages o fthis kind from governhis aid," and further on, "There is hardly a passion which does not sometimes avail itself of this simple kind mentioned above would put but potent instrument. 'Philip!' the the North Dakota Agricultural Colwife exclaims in a burst of love and lege on a par with other institutions throughout the country which have large wireless installations.

QUEER THINGS IN

YOUR MAKEUP.

Rather odd it seems to know that the human body contains no fewer than four substances which are so inflammable that, in a pure state, they will "go off" by spontaneous combustion.

For instance there is phosphorus. The body of a person weighing one hundred and twenty pounds contains twenty-two ounces of this substance, which, as everybody knows, readily takes fire of its own accord, if exposed to the air. It is combinto mak

The body of a human being weighing one hundred and twenty tation come their way. (Ed. Read pounds contains one ad a half the quotation at the head of the ounces of magnesium, two ounces of sodium, and two and a half ounces of potassium. The first of these, a substance of silvery whiteness, is so readily and fiercely combustible that it has to be kept tightly corked Intercollegiaté debating is, at in bott[es to prevent it from ignit-Washington, the main college ac- ing of it sown accord. THEY DID OBSERVE.

"I think that children are not so observing as they used to be." a member of the School Board to a teacher whose class he was visiting. "I hadn't noticed it," replied the teacher.

"Welf, I'll prove it to you," answered the committeeman. Turning to the class he said:

"Someone give me a number."
"Thirty-seven," said a little girl Hewrote "73" on the board. Nothing was said.

"Well, some one else give me a

"Fifty-seven," said another child. He wrote "75" on the board, and smised knowingly at the teacher when nothing was said. for a third number and fairly gaspe dat the indignation manifested by a small red-faced urchin, who said "Seventy-seven and see if you can change that."

Tarbell very feelingly remarked (when after a hard parade, permission was given to fall out). "My the bottom of their soles." (souls.)
