

## A. C. Wins First Game By A Large Margin

DECISIVE VICTORY WON OVER WAHPETON SCIENCE SCHOOL ON THEIR HOME GROUNDS.

SCORE 32 TO 0

SCIENCE SCHOOL PUTS UP A GAME FIGHT, BUT WERE OUTPLAYED — BOYS TREATED FINE.

In the first battle of the season Coach Reuber's aggregation trimmed the Wahpeton State Science team by a score of 32 to 0 on the latter's field Saturday afternoon. The Aggies romped up and down the field at will and carried the ball for long successive gains.

Coach Cavine's men could gain no ground and were thrown for a loss on nearly every attempt. The husky A. C. forwards proved a big factor on the defense, frequently breaking through the line and downing their opponents in their tracks.

Time was taken out repeatedly for the Science School in the first quarter which made the game rather slow and probably accounts for no scores in that quarter.

At 3:00 p. m. Wahpeton kicked off to the A. C. who steadily advanced the pigskin toward their opponents goal, but were unable to score and when the whistle sounded for the end of the first quarter the ball was in Wahpeton's territory on the two-yard line.

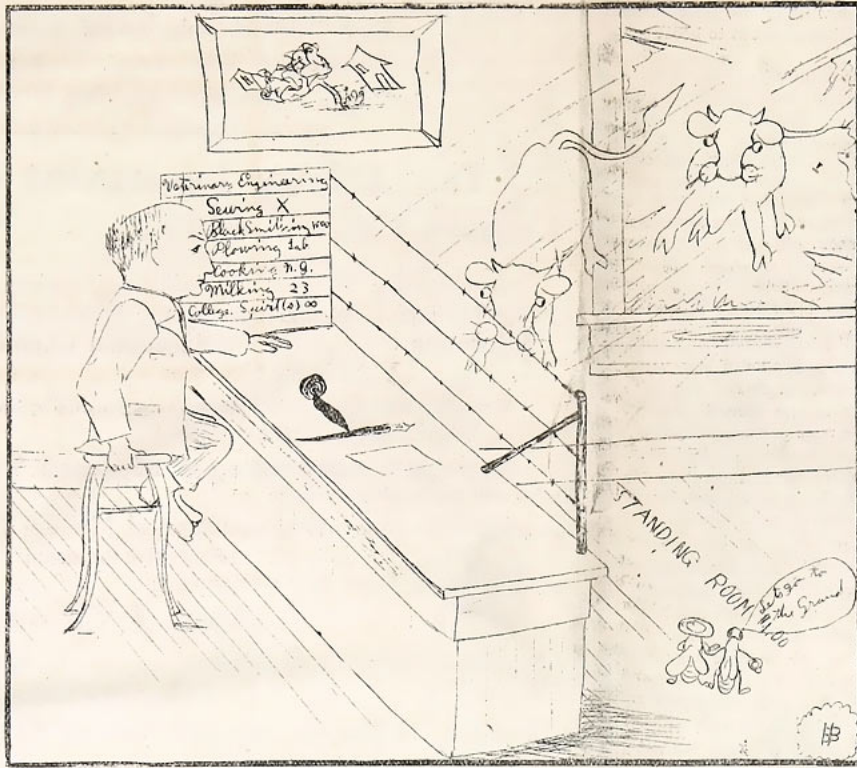

Shortly after the beginning of the second quarter Schroder was shoved over for a touchdown and Calkins kicked goal. In the third quarter Parizek took the ball across the goal line for two touchdowns and Calkins added to the score by booting the leather squarely between the goal posts from the thirty-five yard line. In the last quarter DeWine and Parizek annexed two more touchdowns to the list.

For the Science School, Shirley played a star game being handicapped by an injured hip. It would be a hard matter to pick a star from the A. C. lineup as all the men showed up well. Calkins used excellent judgment and proved to be an able little field general. Balsinger and DeWine carried the ball well making long consistent gains. Parizek was there on receiving passes, picking three out of the air and carrying them for touchdowns. Ewen, at full, used his weight and speed to good advantage and made his share of the touchdowns.

Faculty Manager E. S. Keene and Student Manager R. Colley accompanied the team. Coach Robinson of the Fargo high school refereed, Prof. Wigger of Breckenridge umpired and "Lennie" Wirtenberger of the A. C. acted as field judge. The boys speak very highly of the treatment they received in Wahpeton.

The lineup was as follows:  
Hackett..... c .....Crocker  
Edwards-Boucher.. le .....Dunn  
Olson..... rg .....Carter  
Schroeder..... lt .....McDonald  
Kelly..... rt .....Scharm  
Parizek..... re .....White  
Perry..... le .....Mebolsted  
Calkins..... c .....Shirley  
Ewen..... fb .....Robins  
DeWine-Foss..... rf .....Gilles  
Balsinger..... lf .....Crowder  
Next Saturday the team will play the Aberdeen Normal team on our own grounds. This team kept the Brookings team from scoring in three of the quarters in a game make our boys play the game the best they know how to beat them.

Dean Shepperd will attend the First Conference of the Committees on Agricultural Development and Education, to be held Oct. 18-19, in St. Paul and Minneapolis. Thirteen states of the middle west are to be represented. He will also act as judge at a Corn Contest at Fingal, during the week.

SHORTHORNS BLOWING IN  
A local phrase illustrated.

## MANY IMPROVEMENTS IN THE POWER HOUSE

The power house has been the scene of busy operations the past summer, and it will no doubt be of considerable interest to the people who have not been here during the summer to know some of the changes which have taken place.

On going thru the power house many improvements and changes will be noticed. A new 310 H. P. Franklin water tube boiler has been installed by Mr. T. P. Riley, which brings the heating capacity of the plant to a total of 370 horse power. This is one of the best boilers in the northwest, and it requires less coal and gives better steam than the other boilers.

A new large Burnham Vacuum pump capable of taking care of over 100,000 sq. feet of radiation has been installed and is working very satisfactorily. Owing to the above changes all pipes in the power house were overhauled and changed. All machinery and boilers were brightened up with polish and paint, and the walls were given a coat of white-wash making the place both bright and cheerful.

Several new cabinets were made which are being used for batteries, tools and electric supplies. The clock which regulates the bell system has been removed by Mr. Anderson, from the library to the power house and new wires laid in conduits underground, from it to all the buildings.

A high pressure main has been laid from the power house to Ceres Hall, which will supply steam for the laundry and kitchen purposes, and do away with the steam boiler at present installed in the basement. This main is over 800 ft. long; thus requiring considerable work to install it.

Mr. Anderson is also installing a 110 horse power Ball steam engine directly connected to a 75 Kilowatt generator; also a switch board with Ammeters, Volt meters and the necessary apparatus which goes with the switch board. This machinery is to furnish power for all the motors in the shops and buildings, which will be a great saving to the institution.

The power house has been equipped with a fine drill press and emery wheel and lathe. This machinery will enable Mr. Anderson to do a great deal more of his repairing.

The Farm Husbandry, Power Machinery, and Homemakers courses have now opened. So far the registration has been large. Prospects are that there will be more enrolled in these courses than ever before. These students are an industrious lot and usually have as much, or more college spirit as the long course students so we are glad to see them back.

## Convocation.

Prof Remington was the speaker at this week's convocation exercises and choose for his subject, "Modern Knighthood". The address was brief but to the point. Prof. Remington showed that the ideals that made knighthood possible are not characteristic of any one time or any one group of men, but are eternal and that the same incentives that led to the deeds of brain and brawn and knightliness in days of old, still exist and still wield an influence on the lives and actions of men. In order to more clearly make his point, he illustrated by drawing from Tennyson's "Idylls of the King", taking especially "Coming of Arthur," "Story of Gareth" and "Story of Sir Galahad". Prof. Dynes of the Agronomy Department will deliver the next Convocation address. He will give us a few of the impressions he received at Cornell last year. It is understood that he will dwell at some length on athletics.

## SCHMIDT ADDRESSES TEACHERS.

The Department of Education lecture for Oct. 9th was given by Prof. C. C. Schmidt of Teachers' College of the State University. His subject was the Work of the Committee of Seven, a standing committee of the State Educational Association. He reviewed the two written reports already prepared by that Committee and gave an interesting exposition of the principles governing the revision of subject matter in the schools of the state. His discussion of the meaning of educational vocation was especially interesting. He showed that Latin, for example, was a vocational subject in that it prepared for law and ministry. The modern idea of culture was discussed by the speaker and many interesting ideas brought out. The lecture abounded in close analysis and reflected current tendencies. A good attendance of students, faculty members and some visitors was present. The lectures are being held in the Physics lecture room at 3:30 on Mondays.

W. R. Porter, Superintendent of Demonstration Farms, left Saturday for Colorado Springs, where he will address the Dry Farming Congress, on "Crop Rotations as Means of Conserving Fertility and Moisture."

The Department of Soils has just received a copy of Frank Cameron's book "The Soil Solution." It is an excellent summary of the work of the Bureau of Soils, U. S. Department of Agriculture.

## ENGINEERS ARE VERY MUCH ALIVE THIS YEAR.

The Engineering Society took a decided boom Friday night by beginning the year with an extraordinary feed. The Engineers are boosting this year. They are following the policies of Fargo, but instead of a better and greater Fargo, they are boosting for a better and greater Agricultural College. The Engineers surely mean business the way they have started, and there will be something doing before the year is over.

Invitations were extended to the Engineering Professors and they were well answered. The principal speech of the evening was given by Prof. Keene, in which he spoke of the benefits a student obtains in an engineering society and he urged all college engineers to be members who are not members at present. Each of the Professors attending the meeting gave a short talk which seemed to put a great deal of life in the society.

The engineers also agreed that the pass word for the coming year shall be "Boast," which signifies that the engineering society shall grow.

With the year so well begun and many plans laid for the future, there is no doubt that the engineers shall prove themselves one of the foremost societies of the institution.

## DR. HARRIS SPEAKS TO Y. M. C. A.

The regular Sunday afternoon service of the Y. M. C. A. was addressed by Dr. Harris, who spoke on the subject, "Religion as a factor in the college man's life." The speaker began with a short biography of his early life, (being raised in a strictly orthodox family) and though a small boy he was always eager to learn something new from his parents regarding religion.

He emphasized strongly the importance of Christian influences on the young college man who has perhaps left home for the first time and has not reached that age in which the character has become sufficiently set to withstand those influences.

The meeting next Sunday will be addressed by Rev. Adams of the Presbyterian Church. Subject "What is Religion?"

Mr. Tibert made a hurried trip to the Sub-station at Williston over Saturday and Sunday to make arrangements for the building of a seed house especially adapted to their needs. The contract for constructing the building was let and work on the structure has already begun. It will be completed this fall.

Mr. Geiken, the College shepherd, is now in Montana visiting.

## Freshmen Entertained By Wily Sophomores

SOPHOMORES GIVE A "HARD TIME" PARTY IN THE ARMORY SATURDAY EVE.

## College Traditions Thrown To The Winds

CONTRARY TO COLLEGE CUSTOM TWO LOWER CLASSES HAVE PEACEFUL GATHERING.

As the freshman class has grown from day to day, by new registrations, the members of the sophomore class have trembled and quaked with fear and were on the verge of nervous prostration, when one sophomore mind more brilliant than the rest, conceived the idea of taking necessary precautions to prevent any differences that might arise between these classes.

Accordingly it was proposed to enfeeble the unsuspecting freshmen (and any senior prep. that might pose as a freshman and come unbidden) into the Armory, where by the proper feeding of "taffy," the new arrivals could be tamed and rendered harmless.

The plan met with favor from the very start, for some of the sophomore boys, desiring to make the acquaintance of some of the fair freshmen co-eds without the annoying presence of the upper classmen, thought it a capital idea.

Invitations written on the cheapest paper to be found, announced to the surprised Freshmen that their presence was desired at a Hard Time Party in the Armory, Saturday evening, Oct. 14.

A prejudiced sophomore handed us the following account of the affair and we publish it, to show the college public, to what extent the sophomores are retrograding and also as a warning to the freshmen not to take the apparently friendly advances of the sophomores, seriously:

Saturday evening seventy-five Sophs and Freshmen gathered at the Gym in response to invitations sent out by the Sophs. The party was in honor of the Freshmen. As the Freshmen arrived they were presented with a stick of candy to suck and a ticket which had the name of an animal or bird on it. They did not need any instruction in how to suck the candy as it came to them naturally. After the Freshmen had finished their suckers, a game of football took place. The stars in the game were Misses Ewen and Griffin for the girls and Hugh Carr and Max Waldron for the boys. Following the football game, those present arranged themselves in groups according to the name on their tickets. These groups competed against each other in the different contests that were then held. The first contest was a potato race and in this the "pigs" were successful. Next came the doughnut eating contest. A doughnut was attached to a string and the contestants were to eat it without the aid of their hands. The "owls" won this event. Miss Lough succeeded in eating the sugar and the hole only. In the cracker eating contest, Carr was the successful contestant eating his cracker in a way which spoke of long practice. Miss Poole won the girls' hobble skirt race, which was due no doubt, to the fact that she has been in training for some time while the others had not. The representative of the "rats," Miss Pederson, won in the lemon eating contest. Miss Pederson succeeded in devouring a whole lemon in less than a minute.

When the events were over, prizes were awarded in manner of rattles, A. B. C. blocks, milk chocolates, etc. After the prizes had been awarded, dancing followed, and those who did not dance were amused by a series of boxing and wrestling contests. Following the dancing, partners were chosen by means of throwing aeroplanes over a wall, those with corresponding aeroplanes being partners.

## High School Team Plays No Score Game At Casselton

Last Saturday, Coach Kalmbach led his snappy band of high school warriors to Casselton and held Casselton High School to no score. The A. C. boys showed up exceptionally well considering the fact that the game was the first of the season and several of the line men were green having had no football experience before this fall.

In the first quarter neither team was able to gain consistently though the ball was in Casselton territory during most of the period. The second quarter started with the A. C. boys making long gains and steady line plunges sent the pigskin within striking distance of their opponents' goal only to lose it on downs and have it punted out of danger.

In the third and fourth quarters which was played recently so will Kalmbach's men outplay their opponents in every department of the game and time after time they carried the ball within a few yards of a touchdown but Casselton held and punted out of danger.

McKee at quarter, played a steady game and with the exception of one or two instances displayed good generalship. Kiefer and Sonquist deserve much credit for their long gains and snappy playing. The line was weak in the first two quarters, but during the intermission between the second and third quarters the coach gave them a rousing talk and they went back and fought like old warriors, throwing their opponents back at will. The team, as a whole, showed clearly that they have the right kind of stuff in them and with a week's more practice under their able leader they will develop into one of the best high school teams in the state.

For Casselton, Pinkham and McIntyre played a star game, although they failed to get around end or through the line, an occasional forward pass being their only means of gaining ground. The following men, officiated and gave perfect satisfaction: Frank Darrow, referee; Nesbit, umpire; and "Jew" Elliott, field judge. Four members of the Fargo high school team accompanied the A. C. boys and their support was appreciated.

The A. C. lineup was as follows: Mikkelsen, le; Bjornson, ll; Struple, lg; Whitney, c; Rommel, rt; J. Hall, re; McKee, q; Sonquist, fb; Kiefer, lb; D. Hall, rb.

BOARD MEETING.  
The board of trustees met last Tuesday. They sanctioned the installation of a generator and a complete electric power plant so as soon as it can be installed the college will not have to depend upon the city plant for its light and power. Pres. Worst and Dr. Van Es, were selected as delegates to represent this institution at the meeting of the National Association of Agricultural Colleges and Experiment Stations, to be held at Columbus, Ohio, game time next month.

Prof. Donegheue has been invited to address the Grain Growers Association of Forman, N. Dak., at that place, Oct. 21. He will speak on subject "Interest Young People in the Farm."

The following refreshments were served: Sandwiches, pickles, co. ee, cake and apples. Vernon Arvold succeeded in being the only one to fill his coffee.

The party broke up about 11:00 p. m., with the Freshmen voting the Sophs good entertainers. The party was in the nature of a "Hard Time" party and the Sophs were dressed accordingly. Carl Paine, without doubt, excelled the others in the nature of dress, having on a bright red vest, green shirt, yellow necktie, tight trousers with a pattern of C. in black and white squares, and black socks, and yellow and black shoes.

# FOOTBALL SATURDAY ABERDEEN NORMAL At the Athletic Park. Game called at 3:30. Be there with your Voice.

Published every Tuesday of the school year by the students of the North Dakota Agricultural College, at the Ulsaker Printing Company, 519 Second Avenue North, Fargo N. Dak.

E. M. Evingson ..... Publisher

Entered as second class matter September 28, 1907, at the post office at Agricultural College, N. Dak., under act of Congress of March 3, 1879.

Subscribers are requested to give prompt notice of any non delivery or delay of papers. All communications should be addressed to Business Manager "The Weekly Spectrum," Agricultural College, N. Dak.

Up to this time the Spectrum has been a little tardy in getting out. After this, however, we hope to have it out promptly, at eleven o'clock every Tuesday. Ulsaker Printing Company, who is printing the Spectrum this year, have been handicapped in not having their own linotype machine as the composition work has always been delayed thus making the paper a little late. Their own machine has now arrived so they will be able to do rapid work. This will make it possible to deliver the Spectrum when the students expect them every Tuesday.

This year there are quite a number of students who are anxious to attend the International Fat Livestock Exposition, if satisfactory rates can be secured from the railroads. This show is of immense educational value to our Agricultural students, but they cannot afford to pay the regular fares for this distance, so it is hoped that the railroad will see fit to offer the best possible rates. The authorities at the exposition usually do their part by giving all agricultural students who attend complimentary tickets.

All students wishing to take part in the High School Declamatory contest, which occurs Nov. 24, should see Prof. Arvid as soon as possible. This date is not much over a month away so the declaimers who intend to compete for honors will need to get busy immediately. The High School and College declamatory contests are both held in the fall term this year to make room for some literary society meetings and other important events in the winter term and at the same time gives us more interesting events in the fall term.

The Closed and Open Shop question will be aired and dissected by the Athenian aspirants for debating honors, at the next meeting of the society, Friday evening. The preliminaries will be held at that time.

The following members are now working on the question:—Glynn Livingood, Clarence Williams, Lansey Montgomery, Clifford Schroeder, Bertha Camp, Mabel Cox, Ella Heider, Dean Mendenhall, E. W. Anderson, and Reginald Colley.

From such an array of good material, the Athenian society should succeed in developing a team capable of defeating even the Philomathians who are holding their preliminaries at a later date.

In order to supply an ever increasing demand for data and information from persons interested in public questions and topics for general discussion, the Department of Public Speaking and Discussion has established a magazine and newspaper clearing house. It accepts and collects copies of magazines, newspapers, pamphlets and books which individuals, or families have used and read, but do not care to keep or store. From these copies it clips articles upon various subjects, and places the same, mounted and classified, into package libraries for the use of the citizens of the state of North Dakota. If you possess any copies of old magazines, newspapers and pamphlets that you do not care to keep, send them in. The same will be collected and very much appreciated. Give them to Prof. Arvid who has charge of the Department of Public discussion.

From present indications, within the next five years, there will be not less than 50 positions requiring graduates from the Agricultural College course, open in this state at salaries ranging from 1200 to 2500 dollars each. If North Dakota boys do not get in line for these positions the men will be brought into the state from the outside. There will also be a large number of teachers of Domestic Science needed in the High Schools of this and surrounding states. The demand for men educated and specially trained in agriculture and women prepared to teach Domestic Science will far exceed the supply for ten years to come. Engineers will also be in great demand, as well as young men educated for special work in Chemistry and Biology. The food and soil work are yet in their infancy and plant pathology will require more—far more—attention in the future than in the past. Any young man, ambitious to obtain an education and render big service with his education, will find that agriculture and those subjects bearing directly upon it, offer far the best field at the present time.

"Education has changed since my day. The vocational part of it has been made a much greater feature, and I recognize its value. The years that have been spent in the discipline of the mind might well be spent in a palatial preparation for the field that one has to follow in life. In the Philippines we found it most essential to instill into the youth the actual knowledge as to the profession or trade they are to follow.

"There is no Branch in which it is more important than in the agricultural field, for upon agriculture we depend entirely. I hope many of the young men I see before me will become farmers. Farming is a profession, and unless we learn how to take out of the soil double the amount per acre that we now take out of it in fifty years we are going to be dependent on other countries for our food.

"I don't think that time will ever come. I have every confidence in the American farmer, and especially in the embryo farmers who are studying the principles and the scientific rules that apply to agriculture." —From Pres. Taft's recent address at the Washington State College.

In this issue, our readers will note the two page ad. announcing the opening on Oct. 30th., of the new Cafeteria, which is now in process of construction on the corner of 12 Ave. and College Str. Just such an establishment has been a long felt want among the A. C. Students, and this want will be satisfied in an ideal manner by this new enterprise launched and to be managed by Heller and Barrett. M. E. Heller, well known student here, has had considerable experience along this line, while Miss Sadie Barrett who as a student here, took considerable work in Domestic Science and for some time, manager of the University Cafeteria at Grand Forks needs no recommendation to students, who know of her ability.

The building to be occupied is a very neat and substantial structure and the interior will be finished in oak in Early English style. The dining room will be fitted with tables and regulation arm chairs. A feature will be the fine banquet room seating about sixty people. In furnishing of these rooms, the desirable homelike effect, so dear to all students away from home, has been kept in mind.

Students will welcome this addition to their convenience, especially those who live in Fargo and Moorhead, who will no longer need to bother with cold lunch to be eaten in a lonely class room. Never again will tardiness at breakfast mean going without till noon. Student patrons of the Cafeteria can be supplied with coupon books at ten per cent discount. One advantage of this system is, that you do not have to pay for meals which you eat elsewhere. Boys so inclined will find at last a place where they can enjoy the company of their favorite coed at dinner.

It is understood that the management will make a specialty of College banquets and Sunday dinners. The regular hours will be from 7 A. M. to 10 P. M., and on special College occasions, the doors will be open as long as necessary.

The Spectrum staff will come in for its share of the benefits, as the Cafeteria will be able to dispense late feeds to the overworked exaggerators of College happenings and thus supply the necessary inspiration when

the imagination has been stretched to its limit.

Success to the hustling promoters of the enterprise.

Our first game of football this fall has been played. The team has shown that they can deliver the goods. Next Saturday they will play their first game at home. Then it will be our turn to show what we can do for the team. That is not the time to begin, however. Start right now by taking an interest in the team and getting out to boost for them.

A mass meeting of all the students will probably be held next Friday to choose yell leaders and to create more enthusiasm among the students. This is one thing you can not afford to miss. The new students, in particular will need to be there to learn to give the college yells in unison.

SEED LABORATORY SUMMARIZE ITS WORK

In the Seed Laboratory Messrs. Stevens and Campbell are busy summarizing the work of the past year preparatory to the annual report, and even at the present time there is a large number of seed and plant samples coming to the laboratory for analysis. Perhaps no division of the department of Biology has created so much public interest as the work of the Pure Seed Laboratory under the provisions of the Pure Seed Law. It is a line of work which has given the finest opportunity of aiding the farmer in an educational way and at the same time furnish him valuable information with regard to the seeds which he is to sow or sell for seed. During the past year, the seed laboratory kept a list of all those persons who had good flaxseed for sale and furnished this list to people who wished to buy such seed for their use or for sale to others. This year it is the intention to keep a similar list of all those farmers who have any kind of seed of high quality for sale for seed purposes and to furnish this list to those who ask for that particular kind of seed. For example, if farmers have timothy seed for sale and will list the same with the Pure Seed Laboratory, those who wish to buy timothy seed will be furnished this list on inquiry and they may correspond with those parties who have the timothy seed for sale. This applies to wheat, oats, barley, corn and other seeds, but of course the seed laboratory will not expect to place on this list anything but seeds of high quality. Those who have seeds of high quality which they are saving for seed purposes should send a sample to the laboratory and state how much they have which they intend to keep for sale as seed and this will prove a matter of importance not only to themselves, but to those who are interested in the purchase or sale of seeds for sowing purposes.

PRES. WORST HONORED.

President Worst recently received another high honor. He has been selected as a member of a National Country Life Commission, which this year meets in Spokane, under the auspices of the Country Life Committee of Spokane Chamber of Commerce. Among the subjects to be considered there are the methods of marketing farm products, increased farm production, better country roads, the betterment of the rural church and the reorganization of the country school. President Worst is one of the greatest authorities in the country on this subject, and it is for this reason his presence was desired on this board of trustees. The other trustees are all men with a national reputation. They are—L. H. Bailey, the head of the Agricultural College, Cornell University, and a well known writer on agricultural subjects; J. J. Hill, of Minnesota, too well known to receive comment here; K. L. Butterfield, of the Massachusetts Agricultural College; Charles H. Banett, J. Georgia, Henry Wallace, the well known writer from Iowa; Edward Ward the well known sociologist from Wisconsin University; Whitman H. Jordan of New York, N. D. Coburn of Kansas, W. D. Hoard of Wisconsin, G. H. Powell of California, W. Gunsaulus of Illinois, Walter H. Page of New York, N. C. Bacheider of New Hampshire, B. O. Fowler of Arizona and Joseph Chapman, Jr. of Minnesota, who will be remembered as one of the prominent speakers at the Grain Growers' convention last winter. Every one of these men are leading men from whom is to promulgate plans for an

their respective state. The international convention of this kind.

LISZT CENTENARY.

One of the most interesting numbers of the Grand free lecture course will take place next Sunday evening when will be celebrated under the auspices of Prof. Boehmer, the centenary of the great musician, Frank Liszt. Liszt was born in a little town in Hungary on Oct. 22, 1811. At an early age he showed great musical ability and was placed under the instruction of the best teachers. After completing his musical education, he moved to Paris where he produced much of his work. His early work was brilliant but eccentric and full of mannerisms, but his fame rests on his later work which is noble and that of a great composer. Liszt was a rare combination of a great virtuoso and a great composer. He developed the technique of the piano immensely and greatly increased its value. He lived at Paris, Geneva and later at Weimar. It was while at Weimar in 1850, that he had courage and perception enough to champion the great Wagner, who had just begun his work. It is doubtful whether Wagner would ever have obtained a hearing were it not for Liszt. Liszt died in 1886, honored by the whole world.

The program next Sunday will be in the nature of a Liszt recital by Prof. Boehmer's students. It will be preceded by a brief talk by Prof. Boehmer, who will also interpret each number as played.

The A. C. students are strongly urged to attend. Below is the program:

- Serenade (Standehen) ..... Schubert
- Winnifred Ryan.
- My Sweet Repose..... Schubert
- Helen Engebretsen.
- Erlkoning ..... Schubert
- Hilma Killander.
- Nightingale ..... Alabreff
- Sylvia Fortin.
- Grand March..... Tannhauser
- Bertha Hagen. .... No. 12
- Hungarian Rhapsody ..... No. 12
- Irene Carpenter.
- Love's Dream..... No. 2
- Howard Case.
- Hungarian Rhapsody ..... No. 2
- Clara Bohnsack.

Miss Bertha Hagen, it will be remembered, won the prize for piano playing at the Industrial exposition against competitors, many of whom had had years more of experience than she.

POLYTECHNIC SOCIETY.

Mr. Congden spoke before the Polytechnic Society last Wednesday evening on the subject, "Phases of Food and Sanitary Inspection in North Dakota." He stated some of the common practices in the adulteration and the unsanitary conditions of slaughter houses, dairies, creameries, bakeries and restaurants throughout the state. At the close of his paper Mr. Congden showed a series of slides representing conditions as found in the state. The paper was then offered for discussion and a lively debate followed which lasted for some time. The attendance was very good, there being quite a number of visitors present. After recess, the society went into business session.

# The North Dakota Agricultural College

For Completeness of Equipment and Faculties for Instruction is unsurpassed in the Northwest

The College Department offers Eleven full Courses viz:

- Agriculture
- Mechanical Engineering
- Education
- Civil Engineering
- Home Economics
- Pharmaceutical Chemistry
- Veterinary Science
- Biologic Science
- General Science
- Chemical Engineering
- Chemical Science

The courses are available to those who have completed the equivalent of a good high school training. For those who have not had such a training

The Agricultural and Manual Training High School offers complete secondary courses in:

- Agriculture
- Engineering and Manual Training
- General Science
- Domestic Science
- Commerce
- Rural Teachers Training

These courses all fit fully for college entrance

### Special Courses:

- Pharmacy
- Commerce
- Homemakers
- Farm Husbandry
- Power Machinery

A Complete Commercial Training is Offered to All Students

## THIS COLLEGE

OFFERS to the young people of this state an education which is thoroughly in line with modern thought and demands. It spends no time on dead languages or such subjects as are of little practical value. It aims to fit young men and young women for responsible positions in life. The demand of the present is for men and women who can think and investigate for themselves; who can deal with the social, agricultural and industrial problems of the day. This demand the Agricultural College is attempting to supply.

The Laboratories and Shops are Thoroughly Equipped  
The Instructors are Specialists in their respective lines  
Exceptional Advantages are offered in Biology, Chemistry, Domestic Science, Literature, Mathematics, Engineering and Veterinary Science

Graduates from approved High Schools are admitted to the Freshman classes of all courses.

Credit is allowed in the Agricultural and Mutual Training High Schools for all work done in the country schools.

Tuition Free. Board and Room \$3.75 to \$5.00 per week.

For Catalogs and Circulars address the Registrar

**Agricultural College, North Dakota**  
Farm Husbandry, Power Machinery and Homemakers' Courses Begin Oct. 16th

## The S. & C. Clothing Company

Phone 1324-L 520 Front Street

We Sell Sophomore and Kuppenheimer Clothing

Crosett and O'Donnell Shoes

Stetson and Lamphers Hats

We give 10 per cent discount to all A. C. Students.

Drop in and look us over.

W. H. Suave E. L. Christianson

The women of North Dakota are ably represented at the Women's Auxiliary of the Dry Farming Congress Convention at Colorado Springs, by Mrs. J. H. Shepperd and Mrs. C. W. Kelly of Devils Lake. Both have taken great interest in this kind of work in this state and if the expense of the trip had not been so great they would have taken a large delegation with them from this state.

The number of applications sent in, indicates that the Farm Husbandry course will have an extra large enrollment. About 16 men are expected to graduate from the course this year.

# Our Fall Stock

Is now complete

New suits and overcoats in styles which appeal to the college men, made by

Hart, Schaffner & Marx  
Knox, Stetson and Gordon Hats in stiff and soft shapes. Hanan, Packard and Regal shoes in all the new lasts.

Every article that the well dressed man needs can be found here.

**J. F. HOLMES & CO.**

100-102 Broadway

## PERSONALS

Victor Parker of the class of '09 stopped off in town for a short visit Thursday evening.

Harry Herbrandson is back from the twin cities, where he was called to act as a witness in a railway accident case.

Wm. Maxwell of the Farm Husbandry class of '10 was a recent visitor on the campus.

The traction engineers, who need plenty of room, have been taking advantage of the warm weather by getting some outdoor practice in running the engines.

Donald Dike, famous here as a forensic artist, but who has had charge of the campus at the University, during the summer was here to call on his friends the middle of the week. Mr. Dike is going west this winter so will not be back to school this year, altho he may return next year.

Odin Stenehem, who last year was one of our expert solo cornet players was recently operated on for appendicitis, at Northwood. According to all reports he is getting along nicely. He is expected back to school as soon as he is able to get around.

Prof. Martin will speak at a Dairy meeting held at Courtenay tomorrow.

Immediately following the departure of Mrs. Shepperd for Colorado, Dean Shepperd made haste to make arrangements with Drs. Van Es and Schalk for a frolic in the shape of a hunting trip and accordingly Saturday witnessed a general exodus in the Northwest corner of the campus.

Superintendent Hoverstad of the Farmers Institute is literally swamped with applications for institutes. The office has filed about three hundred of these applications this fall. The difficulty in financing the institutes will probably be surmounted in another week, when the different organizations of the state interested in the work will report.

The State Pharmacy Board meets here today. About twenty candidates will go thru their paces.

Seward Hoel, one of our last year's Pharmacy students was induced this summer to go to northwestern. He went this fall but didn't like it and now has returned to the Agricultural College to finish his course.

Several members of the faculty were present at the boosters banquet given by the Fargo Commercial Club, Tuesday evening. The address of Hugh Chalmers the famous manufacturer was the feature of the evening.

Prof. Randlett will represent this institution at the First National Conference on Civics and Social Center Improvements at Madison, Wis., which will be held in the near future.

Mr. Thomas who pitched for the Pickets of Grand Forks this summer was visiting his friend Bert Gorman over Sunday.

It is rumored that John Thysel, '08, is about to be married. The young lady is from Tennessee. This move on the part of Mr. Thysel is not unexpected among his friends here as it was known that this romance has been budding for some time. The Spectrum offers congratulations.

The department of Geology has received consignments of apparatus and chemicals. The apparatus includes two new barometers and an automatic hygrometer for the weather bureau.

Prof. Zieffe, the faculty newlywed, is carrying a fair sized scar on the northeast corner of his face, these days. Mrs. Zieffe says it was a safety razor while the professor looks meek and says nothing.

Dr. Dolt delivered his illustrated lecture on "Palestine" at the First M. E. Church on Monday evening.

The department of Expression at Fargo College, of which Mrs. Remington is the head, will give an amateur play, "The Chauffeur," about the first of Nov. The cast is made up of advanced students in Expression with a few outsiders. The proceeds from the play will go towards beautifying the Fargo College campus.

Prof. McArdle spent Saturday at the lakes, gathering his crop of spuds.

Ephraim Krantz was a late arrival who came to finish the two years Pharmacy course this year.

Ephraim Westlund took a vacation at his home near Horace, the last of the week.

The University students are already considering coming down here in a special train for the U.-A. C. game which will be played here Nov. 12. We hope they come.

College men are debating whether or not they will put on a nightshirt parade the evening before the Vermillion game. However, if the girls continue in their urging it will undoubtedly be done.—From S. D. A. C. Industrial Collegian.

Frank Darrow acted as umpire in the Fargo—Moorhead football game Friday afternoon.

The date for the faculty reception has not been set yet altho it will probably be given about the 27th of this month or on the first open date on Friday or Saturday after Pres. Worst returns from Colorado Springs.

The Crack Squad will hold the final tryout for the eight vacancies now existing in the squad, this afternoon at 4:30. About twenty men are aspiring for places on the squad and the competition is quite keen.

Several valuable additions have been made to the band during the past week. A baritone, bass and Cornet appeared in the brass section and two saxophones were added to the reeds. The band is playing so proficiently that Doctor Putnam is kept busy supplying new music.

Butt's Manual which was executed as a part of the Crack Squad drill last year, is receiving the attention of Company A, and two drill periods were devoted to this exercise with

With the coming of the Farm Husbandry students, Dean Mendenhall will get busy with Company B.

Miss Ella Stoa of Albert Lea, Minn., visited with her cousin Bertrand Stoa, between trains Saturday. Grace Radford spent Saturday, Sunday and Monday with her folks at Warren, N. D.

E. Westlund is assisting in the Soils laboratory.

Company "A", will soon be placed in charge of Cadet Captain Frank Peters.

Many of our students are being sought as judges at various contests in the state.

Prof. Beckwith, now Professor of Bacteriology at the Oregon Agricultural College, has recently been heard from. He has one hundred beginners in bacteriology this year. That is several times as large as this class usually is here, and is quite a promotion for Prof. Beckwith.

The college has been giving away piles of tomatoes the last few days. Hundreds of gallons of ripe tomatoes were canned at the college canning factory and several hundred bushels sold, but the little three quarter acre patch was producing more than they could dispose of, and as there was danger of frost any time, they were given away.

Cal Henis, ex-editor of the Spectrum, kindly remembered this office with an appropriate poster, which is now adorning the walls of the sanatorium. It has exercised a wonderful salutary effect on the language of the staff.

## Ceres Hall

Miss Lila Elliot dined with Miss Ethel Poole at Ceres Hall Sunday noon.

Miss Jessie Thompson has been visiting her sister the past week.

Miss Mary Gibbens has been shut in with a severe cold but is recovering nicely now.

Charles Jacobson of New York is visiting his sister Miss Jacobson, the Domestic Art instructor.

Mrs. and Miss Grasse and Mrs. Hammond were guests of Mrs. Marshall at tea Wednesday afternoon.

Mary Thompson spent Saturday and Sunday at her home at Ayr.

Mr. Dynes who was visiting Miss Fern returned to Garner Saturday morning, Miss Dyne accompanying him.

Misses Grasse and Donaldson, Prof. Dynes and Prof. Martin were the chaperones at the Hard Time Party given by the Sophomores Saturday night.

Miss Hoover attended the Industrial Exposition at Bismarck this week.

November 1st, the girls of the Domestic Science Department, serve dinner to the members of the State Teachers Association at the Masonic Temple. It is estimated that 800 people will be there.

SURE AND PROFITABLE START.

To Whom It May Concern:

As a graduate, it is, indeed, a pleasure to say a few words in favor of Aaker's Business College. I was placed in a stenographic position by Prof. Aaker, which I have successfully filled due to his school and the excellent training received while there. After working for eight months, my salary was increased 40 per cent. Several excellent positions have been offered me since leaving college, which I have been obliged to decline.

O. O. Grindahl.

Write for further information to A. B. C., Fargo, or Grand Forks.

Mr. Kirschman (Tr. German class) "Miss Kurtz, Wer liebst du?"  
Miss Kurtz: "Ich liebe dich."

Extension Department  
Is Widening Its Scope

For some time Prof. Arvold has been busy gathering and classifying valuable information of all kinds so that it can be secured at a moments notice for any one who wishes to use it. All of this information has been gathered only by a large amount of effort but is of value only so far as it used, not necessarily by our students, but by any person who can make use of it. Few people thruout the state, however, are aware of this mass of information which they can use by asking for it, so the October number of the Extension was devoted to this phase of our extension work. It is called the public discussion number. On the front page is a very appropriate design, worked out in two colors showing the scope of the extension department. It consists of two concentric circles, a small red inner circle with an A. C. monogram in the center from which extend five radii showing the five different branches of the extension service:—Public School Cooperation, Press Service, Lecture Courses, Educational Exhibits and Public Discussion. As was stated before, this issue deals with the last named department. We can not do better than to quote it to show the scope and aim of the work done here.

**Aim.**  
"The Department of Public Discussion of the North Dakota Agricultural College through the Department of Extension seeks to vitalize the sources of information that lie hidden in the columns of the newspapers and the magazines, on the leaves of books, pamphlets and addresses stored in the garret, the cellar, the office and the library shelf. Its aim is to make the country homes, the country churches and the country school houses of North Dakota, social centers where men and women and their children can meet to discuss problems relative to their own pursuits in life as well as the welfare of the community, the state and the nation in which they live, to assist them in broadening their horizon and to make life on the farm worth while. Its object is to reveal and not to conceal knowledge. Its field is the state of North Dakota and its people. While organized primarily for the rural population, the

Department ever stands ready to aid and assist all classes. Its services are rendered free to the citizens of the state.

**cope.**  
The field of work is broad and comprehensive. The Department aims to aid organizations connected with the country school, the country church and the country home. It, however, will assist any club, society or individual in the state. Wherever men and women, young and old, congregate for social betterment and the common good, the Department stands ready to serve. Farmer's clubs, neighborhood clubs, civic clubs, science clubs, literary societies, debating societies, study clubs, school teachers' clubs, commercial clubs, in short, any association of people, or any individual in the state of North Dakota can obtain the services of this Department free of charge.

**SYSTEM.**  
**Sources of Information.**  
In order to render the best possible service, the Department gathers data and information from city, state and national libraries, from state and federal commissions, from bureaus of civic, economic, educational, scientific and social research, from public men and women, from publishing concerns and from the various departments of the Agricultural College.

It collects bulletins, reports, speeches, pamphlets, magazines, and newspaper articles and keeps in constant touch with libraries, publishers and public men. The Department can supply information on many topics which individuals and organizations in the country, the village and even the city could not obtain without trouble and time. In case the Department does not possess the material it will use every means available to get it in as short time as possible. Requests for information receive prompt attention.

**Clearing House.**  
The Department of Public Discussion maintains a clearing house. It accepts and collects copies of newspapers, magazines, pamphlets and books which people of the city and country have read, but do not care to keep. From these newspapers magazines, pamphlets and books and books, it clips articles and places the same (mounted) in the package libraries.

**Package Libraries**  
The best material upon public questions and topics for general discussion is usually found in periodicals, magazines, newspapers, reports, bulletins, pamphlets, speeches and addresses. Such information is not easily accessible to the majority of people. It is difficult to get and very often not available in small communities and the country. The department recognizes this fact and in consequence clips, classifies and mounts articles from magazines and newspapers, collects reports, bulletins, pamphlets and addresses upon scores

of public questions and topics for general discussion. These, in turn, are made up in compact packages called Package Libraries. Whenever possible; duplicate package libraries are made upon various subjects. These libraries are loaned to citizens of the state under certain rules and regulations.

**Co-operation.**  
The principle laboratories of the Department are public and private libraries. Through the co-operation of the North Dakota Agricultural College Library, the Library Commission at Bismarck, the various libraries in Fargo and Moorhead, the Congressional Library, the members and National Commission and Bureaus of Research, the efficiency and equipment of the Department are excellent.

**Method.**  
The Department will serve the people of the state in the following manner:

First:—By sending bulletins, briefs and reference lists upon public questions, topics for general discussion and miscellaneous subjects—free of charge.

Second:—By reference to public men, public and private libraries, societies, commissions, books and publications.

Third:—By giving sources of information and lists of authorities to men and women who have become interested in certain problems.

Fourth:—By lending material and package libraries upon various subjects, manuscripts of plays, copies of declamations and orations to responsible parties for a period of time.

Fifth:—By sending suggestive topics to persons who are undecided as to what they want."

The literature which this Department is able to send out includes almost everything from amateur plays to bulletins on scientific problems in farming. Any county school teachers or other residents of the state could send here to get appropriate selection for any entertainment. Debaters can get some of the best material obtainable on both sides of almost any question. In fact any person who wants facts for any purpose will be able to secure them here. This will be of immense benefit to the people of the state especially to the ones who have no good libraries in the neighborhood where they can secure up-to-date material on our most important problems. This is going a long way to fulfill the motto of the extension Department which is: "If you can't come to The College—The College will come to you."

Tuesday morning at the Catholic Cathedral, Peter J. Henhen, the foreman in farm crops, was united in the holy bonds of matrimony to Miss Olga Olsen, formerly of Ceres Hall. The happy couple spent the week visiting in Minnesota. They will immediately begin housekeeping in their home on Fourth Ave. N. The Spectrum extends its heartiest congratulations.
