NORTH DAKOTA AGRICULTURAL COLLEGE TUESDAY, MAY 30, 1911.

PRICE 5 CENTS

Our Base Ball Team Wins One Game And Loses Two

WAHPETON LOSES 8-4; MACALESTER WINS 7-2; MINNESOTA WINS 6-1. WILL PLAY FARGO COLLEGE TOMORROW.

Last Monday morning our baseball team journeyed to Wahpeton where they played their return game with the Science School. The boys up the river went down to defeat to the tune of 8 to 4. Baker pitched and fanned seventeen of the Scientists and if it had not been for the ragged fielding of our team, we would have shut them out. Our team had their batting eye open and they landed heavily on the ball. Gorman connected for two safe ones which brot home the same number of runs.

The baseball team left Tuesday evening for Minneapolis where they played Macalester on Wednesday and the University of Minnesota on Thursday.

Wirtenberger pitched the first game which resulted in a score of 7 to 2 in favor of Macalester. Altho the Presbyterians succeeded in hitting the ball to some extent, still it was not due to this fact that they won the game. Our infield played rather loosely and made several costly errors which helped our opponents materially. Hard luck seemed to pursue our boys for altho they succeeded in smashing the ball it was invariably into the hands of a fielder.

In the game with the U. of M., Baker pitched in his usual magnificent form and allowed only five scattered hits which should not have netted the varsity a single score, but here again our infield fell down and the final result was 6 to 1. The only earned run of the game was made by our boys in the second inning when Baker got hit by a pitched ball, stole second and scored on McConn's drive into right field. The game with Park Region had to be called off on account of death to one of their players. This left an afternoon free for the boys which they spent to good advantage visiting the Insane asylum at Fergus Falls and the place seemed to appear very inviting to them and some even regretted leaving.

We have two games left on our schedule which are of the greatest importance in deciding the State championship. On Wednesday we play Fargo College on their diamond and on Saturday we meet the "U" on their own grounds. We have not as yet met the boys from the College on the hill and a hard contest is expected, as they have succeeded in beating up everything they have met with so far but a battle royal is promised and every student should turn out to help our boys win. The game next Saturday also will be hard fought as the first time we played them they played us a hard close game and we won out by a hair's breadth.

High School Seniors Entertained at A. C.

DELTA PHI BETA AND ALPHA MU HOLD OPEN HOUSE.

An innovation in College activities took place, when last evening the members of the graduating classes of the High Schools of Fargo and Moorhead were delightfully entertained by the Sorority and the Alpha Mu Fraternity. At 6:30 about seventy high school seniors together with a number of our faculty assembled at the Gymnasium where they were met by the hosts and hostesses and escorted to supper where insignia of the two societies were found indicating their position. After the banquet they were escorted around the campus and thru the buildings until 8:30 when they again repaired to the Armory and indulged in dancing until 1:30, when they left for their respective homes.

Notice!

As has been customary in the past the last issue of the Spectrum will come out on Wednesday instead of Tuesday, so as to give the staff a chance to get the commencement news. Any subscribers wishing this issue sent to any address other than the one given in the catalogue should hand in their names and addresses to the office before that time.

Annual Commencement Exercises As Well As Twentieth Anniversary Will Be Celebrated Next Week

Next week will be commencement week. Even before this week is over some of the exercises will begin for next Friday will be given the Annual Commencement Concert, while Saturday evening will come the Inter Society Banquet. This is not a part of the exercises but is given in connection with them. The complete program is given below.

Friday June Second
8:15 P. M. College Armory, Commencement concert by the School of Music.

1. Overture-Romantic... Keler-Bela College Orchestra.
2. (a) My Ain Folk, Laura G. Lemon
(b) Twas in the lovely Month of May... Maud V. M. White Emma Mikkelsen
3. Violin Duet... Pleyel Op. 48 Messrs. Henrikson and Anderson
4. (a) Sonate Pathetique-Grave Allegro... Beethoven
(b) Rondoletto... Max Florian Faith Prindle
5. (a) Mignon... Beethoven
(b) Sweetheart Sigh No More... Lynes Esther Evans
6. Norwegian Dance No. 2... Grieg Op. 35 College Orchestra
7. Piano Quartette Overture Rosamunde... Shubert Lila Elliott, Jessie Peterson, Emma Mikkelsen, Hildur Sorenson.
8. Violin Solo Fantasia... Larson Olaf H. J. Hendrickson
9. "O Hall of Song" from Tannhauser... Wagner Edythe Herschmer Grasse
10. (a) Prelude Opus 3, No. 2... Rachmanioff
(b) The Butterfly... Grieg Lila Elliott
11. Cantata "The verdict of the Flowers"... Lewis Girl's Glee Club

Snowdrop... Beatrice Alm Violet... Esther Evans Heliotrope... Margaret Keene Daisy... Florence Hunt Convolvulus... Emma Mikkelsen Chorus

12. Ballet des Fleurs... Morse College Orchestra
Saturday June Third

7:00 P. M. College Literary Societies hold their annual banquets
Sunday June Fourth

3:00 P. M. College Armory, Baccalaureate Service.
Order of Exercises.

Prelude.
Doxology.
Invocation.

Anthem—"Great and Marvelous are Thy Works"... Gaul Chorus.

Class Reunions... College Campus—3 p. m. President's Reception... Ceres Hall—7 p. m. Alumni Ball and Banquet... College Armory—9

Chemistry Club Have Last Feed Of The Year

THOMAS ADVISES THEM TO EAT LESS—HUNT TELLS THEM TO DRINK MORE.

Last Saturday night the Chemical Club held their last meeting and banquet of the year. They had as their guests the student assistants and band-Dept. of Chemistry.

At 6 o'clock the party sat down to an elaborate repast after which President Sudro introduced the speakers of the evening who were Mr. Thomas and Mr. Hunt, both members of Prof. White's class in Physical Chemistry last winter. The subject was a review of Chittenden's work of "The Nutrition of Man," which was treated from two viewpoints by the gentlemen. Mr. Thomas reviewed the portion dealing with proteid metabolism and by means of a chart showed that the human organism requires far less protein food than the average individual consumes, also that the common fault with man is not under eating but over eat-

(Continued on Page Four)

The Agassiz Will Be Delivered Tomorrow

PROMISES TO BE BEST JUNIOR ANNUAL EVER PUBLISHED BY ANY CLASS AT A. C.

Tomorrow will arrive the first consignment of the Junior Annuals when about a hundred copies will be ready for delivery. This will not be enough to go around to all the students but will probably be plenty so all the students can get a glimpse of it the first day. As the rest of the books will arrive Thursday no one needs to fear that they will not receive their books by the end of this term. If, the end of the term were not so near all the books would be held over until Thursday so as to let everybody have their annuals at the same time but as many students will be leaving school the last of this week it was necessary for the Junior Class to supply these students before they leave. Those who do not receive their books tomorrow should not be disappointed as the rest of the books will be ready for them the next day.

One advance copy was received the last of the week. This was shown to a few of the faculty whose opinion of the book appears below. They are disinterested parties whose opinions carry weight.

Mr. Edwin Evingson, College.
Dear Sir:—

I have critically examined the Agassiz prepared by the class of 1912. It certainly is a work of art. It would seem difficult to improve it in any particular. I hope every student will secure a copy. Every page of this Agassiz will remind him or her vividly of a

whole year's work at the college and all the pleasing associations that go with it. In a few years it will simply become precious. What we value lightly to-day becomes almost sacred a little later in life.

I wish to congratulate you and the Agassiz Committee for getting up a souvenir so complete and so near perfection. Personally I am proud of it.

Respectfully yours,
J. H. WORST,
President.

Agassiz Board:—

After careful and interesting examination of the 1912 Agassiz, I can truthfully say that it is by far the best annual ever published by any Junior Class of the Agricultural College. The mechanical, the artistic and the literary make up of the book is excellent. It is a splendid portrayal of college life as it really exists in the institution to-day. It is brim full (even running over) with original ideas and satirical humor, the kind that bites but doesn't hurt. No student should go home without one. The 1912 Agassiz is worth the price. It is a credit to the old A. C. and a lasting monument to the Junior Class.

ALFRED G. ARVOLD.
May 29, 1911

Mr. Edwin Evingson, College.
Dear Sir:—

The Agassiz just issued by the class of 1912 is a splendid type of Junior Annual.

The illustrations impress me as being unusually fine.

A Junior Annual is a combination of cartoons and data which records facts and fancies not covered by any other publication issue.

It will appeal to the students more and more as time passes and ten years

hence the A. C. student who attended in 1911 will enjoy a hearty laugh and largely renew his youth by picking up his copy and reviewing old times. I speak from experience as the Junior Annuals which I occasionally reread now are more than a score of years old.

I feel, sir, that your class has rendered a service to your schoolmates which merits their hearty support and that they will serve their own interests when they carry home the 1912 Junior Annual.

Yours truly,
J. H. SHEPHERD.

Bailey and Sanderson Leave for Detroit, Mich.

WILL MAKE EXHIBITS AT MILLERS CONVENTION.

Messrs Bailey and Sanderson of the Government Experimental Mill at this place leave this week for the Millers Convention at Detroit, Mich. They have prepared some elaborate exhibits which they are taking with them and which are certain to attract much attention when shown. They are of two kinds. One set depicts very clearly the result of some of the work on our demonstration farms. It shows graphically what has been accomplished in increasing the yield on these farms with a few years cultivation and with proper selection of seed. The other set of exhibits shows some of the work that has been done by the Dept. of Grain Standardization in the working out of the uniform grading of the different classes of grain.

Miss Donaldson is taking a good deal of interest in Prof. Ziefle's new residence lately. We wonder why?

Senior Class Play

GRADUATING CLASS WILL STAGE LIVELY COMEDY PROFESSORS LOVE STORY MONDAY, JUNE 5

SWING OUT AFTER PLAY

TWO HOURS OF DANCING WILL FOLLOW

THE PROFESSOR'S LOVE STORY, the popular English play from the pen of the noted playwright J. M. Barrie will be staged by the Senior Class on their class day, which occurs on June

of books and very rich. He unconsciously falls in love with his secretary during his maiden sister's absence, becomes very absent minded and shows symptoms of monomania. His anxious relatives and friends engage the services of two physicians to pass on his case, the younger, just out of school pronounces it *lumbago* without a doubt, while the older practitioner, and old family friends calls it a complication of absent mindedness and *cherchez la femme* with symptoms of spasmodic matrimonial tendencies. While out at Tullochmains on a short vacation, the Dowager Lady Gilding does her best to entrap him in matrimonial bonds, and the climax of the play hinges here, when the simple secretary Lucy White outgenerals the dowager, by skillfully fainting

The class has been very busy for some time in rehearsal. All the characters are well fitted for their respective parts, and the eagerness with which the work is being taken hold of, insures a successful presentation. Some special scenery is being made, and all steps taken to make the play a success.

Two hours of dancing will follow after the play.

Cast of Characters.
Professor Goodwillie, Chester Holkesvig
Lucy White, his secretary... Ruby Gibbens
Dr. Cosens... Charles Ruzicka
Effie, the Scotch maid... Elsie Pelissier
Dr. Yellowleaves... LeRoy Gifford
Sir George Gilding... Ray Towle
Lady Gilding, Sir George's wife... Anna Lamb

The cast in THE PROFESSOR'S LOVE STORY.

5. the play is a three act comedy of English life, and its high character is attested by the fact that Nat Goodwin and the great actor Willard both starred in it for several seasons, and that it has been put on by the senior classes of Harvard, the Universities of Minnesota, Wisconsin, Chicago, Indiana, and several others of our larger schools. The University of Washington graduating class is also producing it this year. The play possesses character and a certain depth, yet abounds with ludicrous and humorous situations and the liveliest interest. Wherever presented it has created much mirth, and won for itself the approval of the severest critics. The plot centers about a hard working professor, who is a great lover

in the professor's presence, who realizes suddenly that he is in love with her, while she is in his arms. The pompous Sir George and Lady Gilding are much chagrined over the match, since they are the heirs of the dowager Lady Gilding. In the third act the professor is himself again, the proposal occurs, and the play is ended. Much interest is added to the action by Effie and her two Scotch admirers, Pete the conservative one, who proposes and is accepted altho Henders stands in better favor, but is not quite so rich. Matrimonial blessedness works rather heavily on the same mind of Pete, so at the last moment, Effie is bartered in good Scotch brogue to the gallant Henders for the sum of a butterdish, a picture of Bobby Burns playing a concertina in a tree, and a fine spittoon.

Dowager Lady Gilding... Agnes Halland
Agnes Goodwillie, the Professor's sister... Isabelle Rose
Pete... Edwin Traynor
Henders... Horace Rueber
First Footman... Reginald Dynes
Scenes
Act I The Professor's Study in London.

We have noted in previous years that as soon as Commencement comes a large number of our students leave for home. If you are one of these, keep it in mind, that you are not showing the proper spirit toward your fellow-students, the Seniors. Your presence individually may not help much but collectively, it may mean a successful as compared with an unsuccessful commencement. In some of our neighboring institutions they have compulsory attendance during commencement week. And it is not unjust. If we would but bear in mind that we some day may also be Seniors we will readily see the obligation that we owe the Graduating Class and the School. As we are to celebrate our Twentieth Anniversary this year and as there will be a large number of visitors, as large a number of students should remain as possible so as not to leave a wrong impression with those who are perhaps visiting us for the first time and who will judge this institution by what they see here at this time.

After a long and anxious wait our students will have the pleasure of seeing the 1912 Agassiz to-morrow. Others, perhaps, who are very sensitive to jokes at their expense, will see it with less pleasure. However, keep it in mind, that the Junior Annual is for the purpose of portraying college life and activities. The closer it comes to fulfilling this purpose, the better the annual is. But the book is not intended to be taken seriously. It should be written in a humorous vein. If therefore, anything displeases you, bear this in mind and take things accordingly. This book is the result of an immense amount of work by the Agassiz Staff. Almost the entire year they have been neglecting other work in order that they might make it the best Agassiz ever published at this institution. How well they have succeeded is attested by some of the recommendations the staff has received and which are given on the first page. More money has been expended in the publishing of this book than any other previous annual and not only this, but we have a bad year also and since the Agassiz has never been a money-making proposition, more loyalty is due this year than ever. Anyone who does not subscribe for an Agassiz unless financially embarrassed, is not doing his or her due share in furthering College Activities. Help make the present annual a success and thereby encourage coming classes to make our Annuals as good as any in the country.

Editor Hennis was suddenly called away last Tuesday to take up a position with the Department of Farm Management of the United States Department of Agriculture where his presence was needed at once. That leaves the management of the Spectrum in the hands of the other members of the staff. The blunders in this issue should therefore not be charged to Mr. Hennis.

Judging from the number of letters already received by the secretary of the alumni association there will be a large attendance at this reunion. Many encouraging letters have been received expressive of much sentiment and enthusiasm for the college. The visiting alumni, many of whom are coming a long distance at the expense of considerable time and money, deserve a hearty welcome. The faculty and friends of the college should give them "the glad hand" and do everything in their power to entertain them and make their stay as pleasant as possible.

The alumni are planning to "boost" the college but the incentive to do so must come from the institution itself. They will support the institution as they deem it deserving of support. Their estimate of what the institution deserves will be largely formulated by the impressions gained of the institution, its faculty and student body during the reunion.

Aside from the pleasure that it should give every member of the institution to add to the entertainment of our visiting alumni it is, therefore, so

firmly interwoven with the best interests of the institution as to make it almost obligatory to do so.

Last week an accident occurred in the gardens which was not unexpected to many who have been watching auto drivers spin thru the gardens. Several young auto drivers were trying to see which could go around some of the short curves on the drives in the gardens the fastest, one day last week. They were not at all mindful of the danger of running over women and children along the curves where they could only see a short distance ahead. One of these in trying to show off his skill as a speed maniac, received a lesson which will probably make him more careful hereafter and act as a warning to others. In trying to turn sharply the back end of his auto struck a large tree, completely demolishing one of the rear wheels and shaking up the machine generally. Luckily the tree was large enough so was not entirely destroyed but it did get some bruises which it will take some time to remedy as the bark was torn off of one side to the height of five feet. Mr. Hannan is busy trying to figure how the machine was able to bruise the tree as high as it did. The perpetrators got in another auto and left as quickly as possible and have not returned since, as a dray was sent to get the machine.

Funds Being Secured for Farmers' Institute

GOOD WORK IN PROGRESS IN SPITE OF HANDICAPS.

In spite of the big handicap caused by lack of funds the Farmer's Institutes are coming along nicely. The committee appointed by Pres. Hardy of the Commercial Club, at the big meeting of the state clubs about a month ago to collect funds for the institute work is composed of the following gentlemen: T. Twitchell of Mapleton J. Bacon of Grand Forks, C. L. Zimmerman of Mandan and Dave Clark Jr. of Kenmare. These gentlemen hope to be able to secure funds so that the Institute work may be carried on this year as formerly.

Material for the Farmers Institute Annual No. 11 is now being collected and it is hoped that funds will be available for its publication.

Seven June Institutes have already been scheduled. Mott and Hettinger are making special efforts to make the meetings successful. Several members of the college faculty have promised to be at these meetings.

Prospects Bright for the Engineering School

LARGE NUMBER OF PRACTICE ENGINES SECURED. A VERY EFFICIENT CORPS OF INSTRUCTORS TO TEACH.

Prospects are bright for a very successful term for the Traction Engineering School this summer. Many applications are coming in to Prof. Guinness every day. Indication are that the attendance will be even larger than that of former years. Prof. Guinness and Prof. Erickson will instruct the classes in Gas and Steam Engineering. Prof. Dolve will have charge of the work on Separators and Harvesting machinery. W. P. Lynch will be here to assist by handling the laboratory work in the field. This work will be quite extensive this year for already Prof. Guinness has secured twelve different kinds of Gasoline Tractors alone, to be used in the field. Besides these they will have the usual number of Steam Traction Engines. In addition to this field work, supplementary work will be given in the college laboratories. Many of the threshing machine companies will furnish men to take charge of their machines thus relieving the students and teaching force from the responsibility of caring for these machines. With the teaching force that will be here this course ought to be of immense value to anyone who contemplates running a traction engine of any kind.

NOTICE.

Tickets for the Senior Class Play may be had at the following places:

- The Postoffice
- Casselman's Drugstore, Broadway
- Irving Storland
- Reginald Colley
- Clarence Walter
- Any member of the Senior Class.

Pres. Worst will give the commencement address at Barnesville Minn. on June the 2nd. The next day he will deliver the commencement address at Thompson, N. Dak.

THIS COLLEGE

OFFERS to the young people of this state an education which is thoroughly in line with modern thought and demands. It spends no time on dead languages or such subjects as are of little practical value. It aims to fit young men and young women for responsible positions in life. The demand of the present is for men and women who can think and investigate for themselves; who can deal with the social, agricultural and industrial problems of the day. This demand the Agricultural College is attempting to supply.

THE LABORATORIES AND SHOPS ARE THOROUGHLY EQUIPPED
THE INSTRUCTORS ARE SPECIALISTS IN THEIR RESPECTIVE LINES
EXCEPTIONAL ADVANTAGES ARE OFFERED IN BIOLOGY, CHEMISTRY, DOMESTIC SCIENCE, LITERATURE, MATHEMATICS, ENGINEERING AND VETERINARY SCIENCE.

Graduates from approved High Schools are admitted to the Freshman classes of all courses. Credit is allowed in the Agricultural and Manual Training High Schools for all work done in the secondary schools.

TUITION FREE—Board and Room, \$3.75 to \$5.00 per Week.

THE expense of your clothes isn't what you pay for them, but what they do for you. Clothes that give you a dressed, up-to-date, prosperous appearance are the least expensive clothes you can buy. When you put on a

Hart Schaffner & Marx

suit of clothes, you put on with it the confidence that comes with knowing you are well dressed; as well dressed as anyone in any company. We carry a full line of these famous clothes in all styles and in many patterns and weaves; snappy stylish-durable, money's-worth clothes.

When you wear them, they'll show you why we talk about them as we do.

PERSONALS

Prof. Martin has been taking almost as much interest in Prof. Zieffle's new residence as Zieffle himself. We wonder why?

Prof. Doneghue during the past week was asked to recommend two men for assistants in the Department of Agronomy of other Agricultural Colleges at \$1,200 per year, the past week.

The west one half of the new addition to the college farm has been seeded to hay and pasture. This will help to keep down a large amount of foul weeds which are found on this farm and will help furnish the much needed pasture and feed for the stock. The East half was sowed to winter rye and is coming along fine.

Hugh Carr and Ole Neraal have been doing some very original investigational work lately. Their faith in the iron sulphate mixture has now become so strong that they believe it will work wonders with any lawn if applied in sufficient quantities. As a preliminary experiment a part of the campus south of Ceres Hall was thoroughly irrigated with the chemical last Saturday. This little patch will undoubtedly blossom forth in all the glory of the tropics in the near future.

The Misses Walker and Welo entertained the following at a six course dinner at Ceres Hall last Sunday eve, Misses Kohler, Porter, Magill, Sampson, Mikkelsen and Marian Walker.

Word has been received from Mr. Rafsky stating that he is enjoying his present work very much. The many students who took work under Mr. Rafsky while he was here will be pleased to hear of his success.

The seeding on the experimental farm is now entirely completed. It was finished yesterday when the last buckwheat was put beneath the surface of old mother earth. The planting on the Centenger work was also completed last week, as was the planting of the corn in the ear-row tests.

Prof. Zeifle has been making a series of pictures of the progress on his new dwelling on College St. Twenty-four hours was the maximum interval between snapshots and it is rumored that he is anxious to get the house completed, that if it were not for the fact that photographs could not be taken after dark, he would put on a night shift in addition to the regular day shift.

The Department of Botany has been engaged during the week planting its various garden tests. There is a neat fence placed about Science Hall garden to keep out dogs and other offensive characters, and this little garden is the pure seed test garden.

Peter Kulaas who has been doing postgraduate work here on cements off and on for the past three years, spent the first of last week at the college.

Harrison Bunt has been making some telescopes, rather larger than usual laboratory dimensions which will show very plainly how the different kinds of optical instruments work. He has made terrestrial, astronomical, Galileoian and reflecting telescopes. These are so constructed that any student can see very plainly how they work. With the other optical apparatus with which Physics Laboratory is equipped they will make this one of the best collections for demonstrating practical optics that is to be found anywhere.

The Veterinary department thru the good grace of Dr. Van Es has recently given all the students of Hygiene a complete set of typewritten notes covering the work of this term of school. This is a very good idea and if some of the other faculty members would present their lectures in typewritten form it would be a vast advantage to all concerned.

Prof. Stevens of the Seed laboratory and his assistant Mr. Campbell are taking advantage of the lull in seed inspection work to make up their annual report of the work done in the past year. This will require the tabulation and arrangement of the data gathered from the inspection of over five thousand samples so will mean an immense amount of work.

Prof. Sudro is now the proud possessor of a brand new chicken coop which was completed last week. Prof. Sudro expects to begin collecting specimens of the egg producing bird in a short time. Owners of chickens should take steps accordingly.

Decorators have begun work on Prof. Ladd's office in the New Chemical Building. This will be done in strictly chemical style and will be a thing of beauty. A frieze along the upper border, showing all kinds of chemical apparatus and chemical symbols new and old, is well under way.

Word has been received from Lloyd Worst stating he is now employed with the N. P. land examiners at Terry Montana. There is a possibility that Lloyd will return and take up his studies here again next fall.

Miss Matthews of the Biology department has been indisposed for the past week and has been unable to perform her duties in that department.

The authorities have recently granted the Ceres Hall girls leave to enjoy life in the open air until 8:00 every evening of the school days instead of 7:30 as before. Needless to say the girls are taking advantage of every extra minute granted to them and are making use of their time playing baseball, tennis and other games of a strenuous nature while those who are lovers of nature spend their time keeping close watch of the progress in the gardens and other shady spots on the campus.

Prof. Arvold contemplates visiting twelve or fifteen of the large eastern universities this coming summer with a view of studying student activities and methods of teaching in some of these large schools.

Pres. Worst delivered the commencement address at Mapleton, N. D. last Friday evening.

Prof. Waldron delivered the commencement address at Hampden N. Dakota last Friday evening. Owing to his absence his classes did not meet on Friday.

The classes in High School Chemistry under Prof. Ince and the class in Household Chemistry under Prof. Remington spent their laboratory periods last Tuesday afternoon in inspecting the gas works and the Manchester Biscuit Co's factory down town. Crackers and cookies were presented to the hungry students in great abundance, so much so that several of them were satisfied to skip several meals the next day.

News was received at the college last week of the death of Walter Holt's father at Larimore N. D. Walter Holt will be remembered as one of our Freshmen who was particularly active in musical lines. The Spectrum extends the sympathy of the entire student body to Mr. Holt in his bereavement.

Ruby Hicks, of the Class of '09, has recently been granted a certificate permitting her to teach in the Common and High Schools of Colorado, for the rest of her life. This is a recognition of her training at the Agricultural College and was given without an examination of any kind.

Many of the students in Bacteriology are making bacteriological tests of the water from their homes, to determine whether contamination is present or not. A count is made of the number of bacteria present per cubic centimeter of water and then tests are made to determine whether any of these are disease producers before the water is pronounced safe for use.

Adolph was seen at the helm of his new "bubble" for the first time last Thursday. The machine seems to be doing all the work expected of it and is doing much to remove the congestion of the delivery work. No fatalities have been reported yet and Adolph is now handling his machine like a veteran.

Diplomas for the twenty-nine fortunate ones are approaching completion in the hands of Prof. Keene. These are being lettered in the customary artistic manner which only Prof. Keene can do.

Clarence Waldron has begun a systematic study with the view of classifying the coleoptera of this state. This class of insects has thousands of species in this state so their classification will be no small task and one which would not be attempted by a man who has not got the perseverance, ability and training of Mr. Waldron.

Prof. Erickson is arranging some stands, for exhibition purposes, showing work done by students in the machine shop. This work is being grouped in a very effective manner and should attract considerable attention where exhibited.

The solid gold watch charms that are given to the Intercollegiate Debators arrived last week and were given to the lucky students that had taken part in intercollegiate debate this year.

Professor Bolley finds from the daily written time reports made by various students who are spraying dandelions that a closer study of dandelions would be desirable. He comes to this conclusion from a consideration of the different methods used in spelling the word "dandelion". We have various spellings the most finished being perhaps "dandieline". If the dandelions could appreciate the spelling no doubt they would disappear.

School of Traction Engineering

A school of Traction Engineering giving instructions in the care and operation of steam and gasoline engines will be given at the North Dakota Agricultural College beginning June 6th and closing July 1st 1911.

Lectures on the construction and the operation of steam and gasoline engines will be delivered in the forenoon and practical work in the field and in the laboratory will be given in the afternoon. A large number of gas and steam tractors will at hand for the use of the students in actual field running. Such practical exercises as setting valves, babbitting, lacing belts, and setting tubes will be given in the laboratory. The laboratory work will also include exercises on a number of stationary gasoline engines. For further particulars address,

Eight June Brides Make Heartbreaking Discovery
 The eight June brides mentioned in last week's Spectrum are now seen going about the campus wearing deepest mourning. Their hopes are blasted. The rosy dreams of a week ago are dead. At that time each believed themselves to be the happiest of mortals and wishing to share their bliss with others they planned a sumptuous repast to celebrate the coming event. Each was ignorant of the object of the others' affections. Everything went smoothly until the most impulsive of the number mentioned the name of the all important individual. Consternation reigned supreme! Each discovered that seven others believed that they held the same place in the heart of one unworthy editor. The result of this heartbreaking discovery are 1st, the sad looks on the faces of eight of our popular coeds, 2nd, the cause of all this misery is hiding in the Wisconsin woods. He waits in fear and trembling for the summons calling him to the bar (of Justice) to answer to the charge of breach of promises.

"CHEMISTRY CLUB HAVE LAST FEED OF THE YEAR"
 (Continued from Front Page)
 ing. Mr. Hunt spoke of the influence of water and inorganic salts on metabolism, mentioning that water was an aid and stimulant to digestion. After these papers were delivered, Prof. Ladd was called upon and also Mr. Bailey, to give a few remarks. Mr. Bailey gave his thanks to the club for their many kindnesses and wished them all good luck and prosperity. He is to leave this institution during the summer to take charge of the Experimental Mill in Minneapolis. Mr. Sanderson responded for the club and he said he regretted that Mr. Bailey was to leave but he congratulated him upon his advance. After a short business session the meeting adjourned.

Even Hall to be Asst. Supt. of Demonstration Farms
 WILL FILL VACANCY LET BY RESIGNATION OF M. B. JOHNSON.
 Even Hall of the class of '09 has been selected to fill the vacancy caused by the resignation of M. B. Johnson Assistant Superintendent of Demonstration Farms. Mr. Hall has had three years of experience as expert farmer at Elbowwoods on the Fort Berthold Indian Reservation so is particularly fitted for the position which has been offered him. He arrived the later part of last week. Mrs. Hall accompanied him and they will make their home in this city.

Prof. Keene Addresses Engineering Society
 But one thing marred the success of the last meeting of the Lyceum of Engineers of this school year. A part of the program was to have been devoted to a tire vulcanizing demonstration by Harold Dodge. The vulcanizer met with an accident and could not be made to work so an ordinary flat iron was tried but as "Household Mechanics" had not been thoroughly mastered the temperature of the iron could not be guessed at close enough for vulcanization purposes and so it was impossible to make a successful job. However, the method of going about the operation was made clear.
 Prof. Keene's illustrated lecture, however, was a success. He talked on the rubber industry, its rise due to the discovery of the vulcanizing process by Charles Goodyear in 1839 and also went into some details as to the methods of collecting the sap and the many processes it goes thru before it appears as a finished auto tire and other many useful rubber articles. A set of fifteen slides which the society obtained from the Goodrich Rubber Company of Akron Ohio was used to illustrate the lecture the lantern being operated by Roy Corbett.
 Officers for next year were elected and installed at this meeting. They are:
 President Roy Corbett
 Vice President Frank Peters
 Sec. and Treas. Ira Nelson

The Polytechnic Society Banquets at Pirie's Hall
 DR. BATT GIVES RESUME OF YEAR'S WORK — OFFICERS ELECTED.
 The Polytechnic Society ended a successful year's work very fittingly last Wednesday evening when they banqueted at Pirie's Hall. Forty-eight members were present. After a bountiful repast they were favored with a paper by Dr. Batt which summarized in an interesting manner the gist of all the addresses for the year. This paper was decidedly humorous to anyone who had been so fortunate as to hear the addresses discussed in the paper. Due credit could not be given to it here. It created considerable discussion among those present. Prof. Waldron could not help but say a few words to defend his department. Prof. Keene talked from an engineering standpoint and Prof. Bolley from a biological standpoint while Prof. Ladd further informed the members on things dealing with chemistry.
 Prof. White presided in the absence of Prof. Van Es, who was out of town. The election of officers for next year closed the program for the evening. The officers elected were:
 Prof. White, President.
 Prof. Beckwith, First Vice President.
 Prof. Richards, Second Vice President.
 Prof. Bergman, Secretary.
 Dr. Bat and Dr. Schalk were elected for the program committee.

Track team and baseball team will both be in Grand Forks Saturday.
 The baseball team will play in the morning while the track team will do their work in the afternoon.
 Cards have been received announcing the coming marriage of Florence Kerrmott one of our most popular students during the fall and winter terms to Frederick Haines at her home in Rugby the 15th of this month. The lucky bridegroom has the congratulations of the student body.
