NORTH DAKOTA AGRICULTURAL COLLEGE, TUESDAY, OCTOBER 20, 1908.

PRICE 5 CENTS.

A. C. Defeated at St. Paul by St. Thomas

A. C. Team, Crippled goes down to Defeat in Second Game of the Season.

GAME ROUGH AND HOTLY CONTESTED.

Saints Rush Ball Over Twice in 10 Minutes and then A. C. Play the Better Game.

The A. C. foot ball warriors went down to defeat upon the Lexington field in St. Paul at the hands of the St. Thomas team last Saturday by a score of 11-0 in a rough and hotly disputed game. The saints did their scoring in the first ten minutes of playing after which there was no more scoring on either side during the entire game.

That the game was rough and hardly fought is evidenced by the ball battle scars that were worn by the A. C. men on their return Sunday evening. McKinstry alone was without a scratch. No serious injuries were received except that Anderson and Murphy both have badly sprained ankles which may prevent their playing in the game this coming Friday.

The Saints' line was their weak point but they outclassed the Aggie's team upon speed. Our team was some what the heaviest but not as much so as reported. The St. Thomas team averaging well while our back field was very light. Broderick, Mourdant and Capwell were stars for the Saints and were always with the ball. For the Aggies, Darrow, Ewen and Walt. Haskins were the best players getting through the saints line and making downs with great success. The A. C. used the forward pass to good advantage and come near making a touch down upon this play. Darrow did the punting and did good work. Most of the A. C. gains however were made through the line. The feature of the saints playing was the kick from regular formation.

The Game.

Fargo won the toss and choose the south goal. Broderick kicked off and the Aggies were held for downs. The Saints, by a couple of forward passes and end runs, made a touch down in the first ten minutes of play. They failed at the goal.

The Saints again kicked off and Fargo fumbled on the ten yard line, Broderick falling on the ball. The Saints were held for downs. The Aggies rushed the ball to the middle of the field where they lost it. The Saints by a long forward pass and end run worked the ball until they pushed Griffin over for a touch down. The goal was kicked. The first half ended with the ball in Fargo's possession on her 45 yard line.

Second Half.

After ten minutes rest the teams again appeared. This time with the A. C. line up changed. Murphy at left and was out of the game with a twisted ankle and Sparling was in his place. McKinstry taking Sparling's place at right tackle. When the play started the Aggies received the kick off on their fifteen yard line and pushed the ball by line smashes to the Saints 20 yard line where they fumbled and Keavey fell heavy upon the ball.

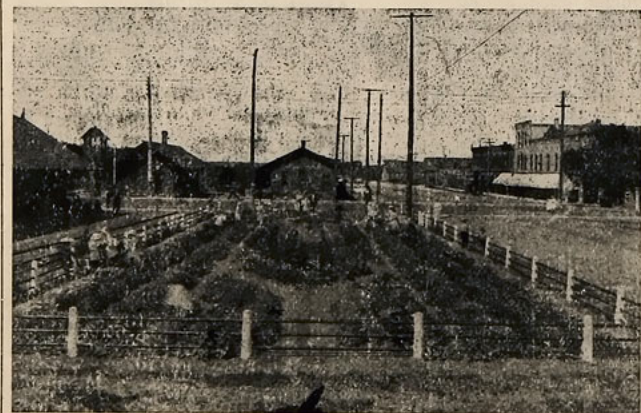

After this the ball went back and forth, the Aggies playing the

COMING EVENTS.

Dean Sheppard addresses Chapel Assembly .. Nov. 16

better game. After quarreling over a forward pass the point being settled by referring to the rule book the game continued. It might be said that a feature of game was the time lost by the officials who seemed to know very little about the rules. The last play of the game was characterized by a long run by Ewen half the length of the field as the result of a fake kick.

The lineup:
A. C. Position St. Thomas
Murphy-Sparling.....l. e.....J. Doyle
Haskins, B.....l. t.....McCusker
McDonald.....l. g.....Carr-Barry
McCurran.....e..... Pepin
Biersdorf.....r. g.....Cogan

Darrow.....q. b.....Griffin
Touchdowns—Griffin 2; goals, Broderick; referee, G. Capron, Minnesota; umpire, Sexton, Dartmouth; head lineman, P. Code, St. Thomas.

The Garden in August.

JAMESTOWN PUBLIC SCHOOL GARDEN IN AUGUST.

This is a photograph of the Jamestown public school garden in August. In the first issue of the Extension for this year there appears an article and a series of illustrations of a very successful experiment in the form of a public school garden in the city named above. The garden was fathered by the civic improvement league and fostered by Superintendent Crane. In spite of the discouragement and the voluntary nature of the work the school

CHAPEL SANGERFEST HIGHLY ENJOYED

Old College Songs, "The Yellow and the Green," and "Our Alma Mater" Made to Ring.

Singing of College songs, both local and national, was the feature of yesterday's Chapel hour. This innovation that will, in the future, be repeated thrice each term, was successful in every particular.

"I have always observed that the life of the A. C. was lacking in one thing and that is in the singing of those songs that are the favorites of students the world over. There is something about the hearty singing of these songs by a group of students that will be remembered in after years among the fondest recollections of college life," was the explanatory remarks of Prof. A. E. Minard as he opened the Chapel exercises.

All entered heartily into the songs and especially the "Yellow and the Green," and "Our Alma Mater."

Hours of this nature will be looked forward to with pleasure in the future.

BRYAN IS MADE AN HONORARY MEMBER

Lincoln, Neb., Oct. 15.—William Jennings Bryan has accepted an honorary membership in Phi Alpha Tau, a national university fraternity, having for its object the encouragement of oratory. The Nebraska university chapter today announced that Mr. Bryan would deliver his initiatory address after election.

Among other men that belong to this society are Robert La Follette, Leland Powers and many other prominent men in the field of oratory.

Professor Arvold was one of the chief organizers and pushers of this fraternity in the University of Wisconsin.

Who has got grit? Nemzek. He was out on the football field Monday and insisted upon trying a hand with the ball.

AMERICAN ASSN. OF AGR'L COLLEGE AND EXPERIMENT STATIONS

A. C. Men Will Attend National Convention.

The American Association of Agricultural Colleges and Experiment Stations will meet in Washington, D. C. Nov. 17. Pres. Worst and Prof. Sheppard will attend as delegates from the N. D. A. C. and Experiment Station. At the same time there will be held a convention of the American Association of Farmers' Institute Workers. Pres. Worst in an interview with the SPECTRUM said:—"Prof. Sheppard and myself will attend this convention but Supt. T. A. Hoverstad will in all probability be elected as a delegate from this state."

PROF. BOLLEY BEFORE POLYTECHS WED. EVE.

Prof. H. L. Bolley will deliver a lecture upon the subject of weed eradication by chemical sprays at their regular meeting in the Chemical Building tomorrow evening. The meeting is set for seven thirty sharp. All interested are invited.

Secretary Nugent Resigned Wednesday

After Eight Years Service As Secretary of the College Hands Resignation to Board.

ENTER INTO PARTNERSHIP WITH MAGILL AND CO.

W. A. Yoder, Secretary of Fargo Commercial Club Will Fill the Vacancy.

C. E. Nugent who has been Secretary of the College for the past eight years has resigned his position to take up work with the Magill and Co. Seed and Grain House of Fargo, of which firm he is to become a partner. Mr. Nugent has made many friends during his stay at the College, both among faculty and students, all of whom are sorry to learn of his leaving but glad to hear of the good position which he has accepted. This does not mean that our general secretary is to sever his connections with the College entirely for he will still retain the office of treasurer which he has held for the past few years.

Former Student.

Mr. Nugent is a former student of the College, having taken work here till the spring of 1896 when he left in his Junior year to accept a position with the Magill and Co., which he held 'till eight years ago when he became Secretary of the College. While a student he took an active part in student activities and filled the position of right half back on the College foot ball team with credit for three years.

Yoder To Fill Vacancy.

W. A. Yoder, formerly of Omaha and for the past year secretary of the Commercial Club of Fargo, has been elected by the Board of Trustees to be secretary. Mr. Yoder comes to the College highly recommended by those connected with the Commercial Club. Although the people of the College regret the loss of Mr. Nugent they are fortunate in securing the services of a man of Mr. Yoder's ability.

Pennsylvanian Talks On Bleaching Flour

Eastern Food Commissioner Condemns Practice of Western Millers.

"BREAD IS STUFF OF LIFE."

"Those Who Rob it of its Life Giving Qualities With Poison are Public Enemies."

Speaking of bleached flour Mr. Frost Food Commissioner of Pennsylvania has the following to say:

"Because of the wide-spread public interest in the alleged practice of certain manufacturers of flour using bleaching processes to whiten their product, and because it is charged that this practice is giving an inferior quality of flour the appearance of a superior article, the bulletin prints this month the whole of the very able paper read at the Mackinac convention by Professor James H. Sheppard. The paper deals with nitrous acid as a bleaching agent and shows just how it affects the digestive processes, even when used in comparatively moderate quantities. We think the moral of Professor Sheppard's study of the matter is very clear. Bleached flour is very unhealthy article of food. The practice of whitening flour is not one to be recommended to conscientious millers. And it seems that the state should deal very severely with anyone who runs the risk of shortening human life for the sake of making poor flour look like the better quality. A manufacturer may add to his profit by this sort of conduct, but surely he cannot maintain his own peace of mind.

A Western Practice.

"In this connection it may be proper to say that the investigation recently made by the dairy and food bureau into the quality of flour sold in this state had reference to adulterants only and no effort was made to discover whether nitrous acid had been used for bleaching purposes. The investigation was not an extensive one and covered only western flours, as the bleaching process does not seem to be practiced to any extent—if at all—by the eastern millers. There is every reason to believe, however, that the health of the people will be much promoted and the interests of honest business served by elimination from the market of flour that have been treated with nitrous acid or any other bleaching agency. Here we have the same old struggle of the imitation to supersede the genuine article. The very fact that an article must be "doctored" and disguised and called by another than its own name is an evidence that the imitation cannot possibly be as good as the thing it was made to imitate. Bread is the staff of life. Those who rob it of its blood making, life-giving elements or who poison it in order to improve its appearance are public enemies. They may not have been conscientious of the fearful wrong they were inflicting upon human life, but if they will read Dr. Sheppard's paper they cannot plead ignorance hereafter."

The Engineering Department is now furnishing quarters for the Department of Publicity of which Mr. Hughes has charge.

Engineers Awake From Inaction

Make Plans to Furnish Room and Fit it up as Club Room.

PROGRAM THE TWENTY-SIXTH.

Challenge Any and All Departments and Second Team to Football Contest.

The Lyceum of Engineers have aroused themselves from their inaction and have gotten several enterprises under way. Of these one is the organization of a football team and the other is the furnishing and the equipment of their society room for the convenience of their members.

Club Room.

It is the plan of the society to fit their room in the Engineering Building up as a general club room for the Engineers with the view of making it a pleasant lounging place for the members, a place for study and relaxation during the day. Besides the securing of several necessary articles of furniture the walls of the room will be decorated in an appropriate manner with pictures of mechanical structures and the like. Several technical magazines will be placed upon file for the convenience of the members.

Letters have been sent out to the leading manufacturers asking for catalogues and descriptive matter. There is securable in this manner much detailed information of any line of engineering apparatus. These also will be placed upon the reading table.

Programs.

It is the plan of the program committee to have one man from the city at each meeting who is connected with some engineering enterprise, the same to address the meetings. The production of technical papers will be still required from the members as formerly. The following is the program as arranged for the regular meeting at the Lyceum upon Monday evening, October 26.

Dean Keene . . . Introductory Talk
Max Harrington . . . Areoplanes
Thomas Lough . . . Baltimore, Ohio Bridge Disaster.
Mr. McIntyre of the Union Light Heat and Power Co., . . . Address

Football.

Who isn't afraid to play the Engineers? This is the question that has been passed around by the Engineers as they went about the Campus all last week with a chip on their shoulders. So far, they say, none of the Departments have showed sufficient life to take up the challenge. The Pharmics have been talking but that is as far as it has gotten.

The Engineers have now reached the desperate stage where they are ready to meet the second team minus the subs or any other combination that doesn't look too dangerous.

LABORATORY BEING REFITTED

Professor Doneghue is installing considerable new apparatus for conducting of experiments in soil physics to determine the relation of the soil to air, water and temperature; and to study the physical composition of soil. The apparatus will be used this term by the Farm Husbandry students. Professor Doneghue is planning to have each student carry on experiments with soil from his home farm.

Many Chemists.

There are one hundred and sixty students enrolled in the Department of Chemistry and Pharmacy this fall term. This is much larger than ever before and is straining some of the laboratories to the utmost.

INTEREST IN ELEMENTARY AGRICULTURE IS AWAKENING.

Many Letters Are Received From Teachers Asking for Information upon the Subject.

The following is typical of the letters being continually received by the Department of Education which shows the awakening of interest in agriculture and practical education. The gentleman who writes is evidently a teacher that recognizes that something is lacking in the kind of education that is being given the children under the present methods.

"I am teaching a school in the village of . . . , a school mostly frequented by pupils who are raised upon the farm.

"I have charge of the four upper grades and feel that I ought to give the children something that could be termed 'practical knowledge.'

"As agriculture is that subject which would be the most useful for the students to study, I would like to introduce this into my school but lack the material. The board has failed to provide text books in this subject and I have no recourse to a library.

"Can and will you help me out in this matter? How can I receive the government reports of Agriculture? I would be pleased to receive reports from all departments of the government if they may be had."

CHAPEL ADDRESSES WHICH ARE COMING

It will be noticed by examination of the coming events column that the next four chapel addresses will be given by the members of the faculty. These addresses have been arranged in a series the subject having the same general theme. Dean E. F. Ladd will in the first point out the evils in our industrial system of treating the subject of citizenship from the negative phase.

The second by President Worst will follow up the same general theme of citizenship pointing out what a College should do to raise the ideals of the young man. Miss McCarty will follow treating the same subject from the view point of woman hood.

Dean Sheppard's address coming at the end of the series will be upon "Dominant Industry."

JOY IN THE M. A. C. CAMP.

Michigan Agricultural College rejoices over what was a virtual victory for them upon their gridiron a week ago Saturday when Yost's famous aggregation of the Michigan University invaded the M. A. C. camp with the intention of breaking what is the pride of every student of the College. Never has the M. A. C. been beaten upon their home grounds." The visitors were disappointed however. The "Varsity" was out played every minute of the game and although neither side scored the A. C. team made 120 yards through the "varsity" line to the 65 yards gained in the same manner by the University. Had it not been that the University had a better kicker the result would have been a victory for the College. Hurrah for the M. A. C.!

A Reunion.

Upon Thursday night of last week Mrs. Ash's residence was the scene of a merry party of ladies. The party was in honor of Mrs. Hill formerly familiarly known in the College circle as Ruth Ash. Most of the guests present were former students that were near friends of Mrs. Hill. A jolly evening was reported.

Agricultural Club Begins Operation

First Meeting in the College Chapel Next Saturday Evening.

ALL AGGIES ARE WELCOME.

The Organization is for Special Benefit of Farm Husbandry Students.

The Agricultural Club will hold its first meeting for the fall term in the College Chapel Saturday evening, Oct. 24th, at eight o'clock. All agricultural students are invited to attend. This club is organized for the special benefit of the Farm Husbandry students and to them an urgent invitation is extended. Last year witnessed a decided growth and improvement in the club. This year with the large increase in the number of agricultural students there is every hope of surpassing all previous records.

The following program has been arranged for next Saturday evening:

Music Selected
President's Address
. Edwin Traynor
Vocal Solo Carl Yerrington
"Get on the Raft with Taft."
Address Dean Sheppard
Summer's Experience
. John Dinwoodie
Criticisms Willam Mercer
Music Selected

NEW BOOKS AT THE LIBRARY.

The following is a list of new books that have been received at the college library during the last two weeks:

Brown—The Making of Our Middle Schools.
Holstein—Friesian Association of America — Holstein-Friesian Herdbook.
GoGodman—Mechanics Applied to Engineering.
Tratman—Railway Track Work.
Hard—The Mushroom, Edible and Otherwise.
Chief of Engineers—Engineering Field Manual.
Bartlett—Mechanical Drawing.
Hill—A Text Book on Shades and Shadows.
Wilson—Free Hand Perspective.
Jamieson—Advanced Mechanical Drawing.
Colidge—A Manual of Drawing.
Department of Agriculture—Year Book, 1907.
Punnett—Mendelism.
Lock—Recent Progress in the Study of the Variation Hereditary and Evolution.
Stern—Geschichten Von Rhein.
Heller—Studies in Modern German Literature.
Sweet—The Practical Study of Languages.
Nelson, Thomas—Encyclopedia.
Everybody's Book of Reference.

First Prof.—Why don't you have a wheel to run around upon?

Second Prof.—I would like to have one but I have a new type writer and other things to take care of now so I don't want to bother with one.

First Prof.—That's right. I have seen typewriters that would occupy all of a fellows time and then some.

The new machine house was freshly painted last week. It is white in color with green roof and is a pleasing addition to the group of the station frame buildings.

A couple of the senior engineers are in the habit of meeting the baker's wagon at the college corner and purchasing refreshments between classes.

FIRST BATTALION PARADE ON THE CAMPUS GREEN

Last Wednesday the cadets and the cadet band appeared upon parade for the first time this year. The ceremony was witnessed by a large number of College people any they were heard to remark that the company went through the ceremony with remarkable precision for this time of year. The marching was better than the manual of arms which was ragged in execution. About two-thirds of the cadets were in uniform, the remainder having not as yet arrived. The band was in full uniform and about thirty reported. The music sounded good in spite of the limited time in which the band has been together this year.

Parade will be a weekly feature hereafter and when it cannot be held in the open air it will be held in the spacious Armory.

Everybody works at the Chemical Building now that Oscar is sick.

Remember Bishop Quayle speaks at the Presbyterian Church tonight.

NEW BULLETIN.

The bulletin giving the results of extensive milling tests and chemical analysis of the commercial flours of the state is now about out of the hands of the printers and ready for distribution.

The faculty of the University of Idaho is considering a plan which if put into operation will mean that annually there will be published an honor roll based upon the scholarship of the students. This would seem to be a plan that would encourage students to work in the right direction.

The estimated corn crop for this year according to the Government crop reports is 2,565,298,000 bushels; the estimated wheat crop 659,030,000 bushels; the oat crop 759,161,000 bushels and the barley crop 167,242,000 bushels. This estimate is on a whole a little larger than last year; the yield of corn however is smaller.

The old Port Huron engine is busy nowadays. Some of the amateur engineers are getting practice in which way to turn the crank to see the old steam horse.

No More Lollygagging

**During Rooting Practice, Here-
After, Men and Women Will
Be Segregated.**

Wash. U. Oct. 1, 1908.—“There shall be no more lollygagging at rooting rehearsals,” is the edict of the official yell leader, Ki Ram Winn. “At the gathering this afternoon all coeds will be requested to seat themselves in the new grandstand, while male must confine themselves to the old. It is a sad but true fact that the boys won't root when the girls are within lollygagging distance.”

Winn announces that the rehearsal this afternoon he will select two or three assistants to lead in the singing, probably Glee Club men. In this way the duties that have devolved so heavily upon him during the first few games of the season will be distributed among others for the rest of the year. Those with good voices and leading ability will find here a change to take an active part in students affairs.

“Turn out tonight,” says Winn, “turn out and get there fifteen or twenty minutes before time to begin rooting so that you can get your proper places and understand what we are trying to do. We want the biggest aggregation on Deny Field tonight that was ever seen to begin training for the Whitworth game. And those long-haired poets and musical composers who have got something under their hat in the line of a new song or yell should break loose from it at once, by hanging same in at the Daily Wave office or to myself.”

The Department of Biology is sending a circular to the people of the state who have purchased spraying machines for the destruction of weeds. The Department desires that all such should enter into communication with them and with the view of giving information as to the results of their work.

Professor H. L. Bolley has a long illustrated article upon the destruction and control of weeds and cereal grain fields by means of chemical sprays, published in the late number of Farm Implements. The article is particularly well illustrated and is an exposition of the late methods used in controlling weeds upon a large scale.

FORMER PROFESSOR PRAISES BULLETIN TIN NO. 79.

Professor Ten Eyk, head of the division at the Kansas Agricultural College, writes that Bulletin No. 79, issued by the North Dakota Station, is the only bulletin of the kind that has been published in the country. He compliments the Agricultural College for being the first to issue so valuable a bulletin.

In bulletin No 79 are the names and addresses of all who have received pedigreed seed from the Agricultural College Experiment Station. It also contains the name and variety they received and the reports from the recipients as to their success with the seed.

This serves as a directory to the farmers of the state where they can obtain any of the different strains of seed that may be grown successfully.

WEIGHT AND MEASURE STANDARDS IN THE EN- GINEERING MUSEUM

The mechanical museum on the third floor of the Engineering Building has been made a depository for a complete set of the United States Standard Weights and measures for North Dakota. The standards of measure of length consist of a standard yard, and a standard meter; of weights, three systems, Avordupois, Troy, and Apothecaries are represented in denominations varying in weight from one grain to fifty pounds. There are numerous vessels which have the standard capacities of bushel, quart, pint, gill and also the various denominations of the metric system. These will be available to the students for demonstrating purposes.

Twelve Years Ago.

Twelve years ago upon October tenth the A. C. football team met the St. Cloud Normal upon the local field and played them to a tie game the score being 4 to 4. In those days a touch down counted four points. One of the interesting things about this game was the verification of the adage that his-gays the Richards family has been tory repeats itself. Saturday October tenth was the same day of the week and month that the normal went down to defeat at the hands of the A. C. this year.

Nearly a hundred have registered in the Farm Husbandry Course and more are coming.

Prof. Among Successful Wis. Graduates

W. B. Richards is Extolled by Wisconsin Paper Among those who honor Varisity.

In a series of articles on “Successful Wisconsin Graduates,” appearing in the “Wisconsin Farmer” we find one that might be of interest to the students and friends of the College in view of the fact that the subject of the article is Professor W. B. Richards of the Department of Animal Husbandry. We are taking the liberty here below to print an excerpt from that article.

“Of the University of Wisconsin graduates who are continuing their College training with inherent common sense that only comes from years spent on the farm, one who is realizing his ambition to become a factor in the agricultural field is W. B. Richards, a graduate of the long course in agriculture in 1903 and now Professor of animal husbandry at the North Dakota Agricultural College. Besides carrying on his state work at the College which is necessarily exacting and heavy, he is serving as secretary of the North Dakota Live Stock Breeders Association and gives considerable time and work to the Association which among other things issues a breeder's directory and an annual report of the work done.

By Merit Application.

“Professor Richards has gained his present important position in the agricultural world by his own merit and by his own steady application to a fixed purpose. He believes in building upon a solid foundation of real experience and training in a particular field. In his case the particular field is naturally that of breeding and the handling of live stock. He comes from a family of stockmen. His grand father and great grand father came to the territory of Wisconsin among the earliest pioneers and settled down in that portion of the state known as Racine county. Since those early days the Richards family has been closely associated with the business of breeding pure bred live stock.

“Excepting those years spent at the school and college all the years of Professor Richard's life have been spent upon his father's farm where he took particular interest in the Clydedale Stud. The

stables were known to the buyers who knew the farm quite as well as they had known the old Meadow Lawn Stock Farm years before, and they knew it was the place where genuine value could be had for the purchase price.”

Symphony Quartette Score Success

**First Number of the Y. M. C. A.
Lecture Course Well Attended**

The attendance of both students and town people was good at the musical by the Minneapolis Symphony Quartette which was the first number of the Y. M. C. A. Lecture Course. The numbers on the program were well chosen, being composers of the most eminent composers from 1732 up to the present time. The music was much appreciated as was shown by the numerous encores, especially were the solos by Mr. Fischer and Miss Pierce, well received.

Bishop Quayle To Night.

Bishop Quayle, second number in the course, will lecture in the First Presbyterian church tonight, Oct. 20. This is a lecture well worth hearing and many students are planning on attending.

Posts Green Once More.

The other night an inconiclastic bunch of students got busy and removed the yellow from the hitching posts leaving them green once more. Just what the object of this action was is more than we can see. The humor of this last action is not very apparent. It is rumored that the posts will again change color in the near future.

The explanation of the periodical visit of some of our students to the Power House is that it is the only safe place on the Campus to smoke.

The Spectrum wishes to announce that it is entirely non-partizan and that although we are much obliged for the abundant literature that the National Central Committees have supplied us with, we can make no use of it in our columns.

Last year it was agitated that there were too many student organizations in the College. Of that there were too many student organizations present as three of four have not yet awakened from their slumbers although the term is now well advanced.

The students of the University at Washington are planning to abolish the annual cane rush. One advantage we have over the University is that we have no objectionable feature of this nature to abolish.

Hurrah for the Engineers. They got busy and felt so good about it that they challenged every department of the College to a football game and then just for exercise carried a table from the top story of Science Hall to their room in the top of the Engineering Building. They carried it back Saturday for other reasons.

Who said "debate"? No body. There hasn't been a word whispered this year of an intercollegiate. Quite recently steps were taken for the organization of another technical society that will practically mean the death of the A. C. Debating Club. This only goes to prove that in a school that is wholly scientific as ours is that debate and oratory will find a smaller and smaller place.

The Weekly Spectrum is the official publication of the students of the College. Each and every true student should give it his most loyal support. It is not possible that everyone contribute to its columns, but one thing that every student can do is to subscribe for the paper and lend encouragement to the business manager by patronizing those who advertise in its columns.

NOT?

The second Student has come to our desk. Although it is reticent upon the subject of football it can be seen that the official organ of the University students is in favor of doing away with some insignificant quarrel, the beginning of which there isn't three students in either institution who have the vaguest idea. It is evident, however, that the Student is for some reason not speaking its whole mind upon the matter, as it has not yet made a direct statement of its attitude. It would appear that either the Student doesn't know its own mind or a censorship is being yielded to keep down public spirit.

Perhaps the University Students do not want a game. If so why do they not say so and end the talk. If they do want a game and mean it, as a large number of representative Students of the University have affirmed both with in the hearing of the writer and that of a score of students of the College, let us get busy at once and arrange a game to be played at the close of the season, say upon Thanksgiving day.

In an interview the other day with one who had spent some time at the University and had taken it upon himself to look into the matter is was revealed by this person, who was, by the way, a non partizan, that the majority of the students were in favor of the game, a few, only, not expressing any decided view. The real stumbling block, however, lay with a number of the faculty. The reason that they put forth was not eligibility, not a date on which to play—as some would have us believe—but the old suspicious cry of "professionalism" which as far as the A. C. is concerned is dead and gone. The popular belief of the Fargo fans that the University is afraid of getting beat. We, however, believe and know that the University Students are too good sportsman to be guilty of this charge but we can not see why in a matter that concerns primarily the students, that there should be so much difficulty in bringing about a meet that is desired by the majority of the same.

LEND A HAND.

"I haven't time." How many times has this excuse or its equivalent, "I am too busy," been given when any of us have been asked to do something for any of the student activities. When we decline to do a thing which is going to help forward the interests of the organization, or whatever it may be that needs our help, we forget that we are forfeiting a chance to benefit ourselves as well, for anything that we can do that will help along a society or organization will be of even more benefit to us for having done the work. People are judged by what they do and not by what they are capable of doing for a person may have talent and ability but it is never cultivated and put to some use it is of little value to anybody.

It is true that some of us are too busy at times to perform any more work, but many of us could do a great deal more. If some people

The North Dakota Agricultural College

FOR COMPLETENESS OF EQUIPMENT AND FACILITIES FOR INSTRUCTION IS UNSURPASSED IN THE NORTHWEST

The College Department offers five full Courses viz:

**Pharmaceutical Chemistry,
Mechanical Engineering,
Civil Engineering,
General Science,
Agricultural.**

A Department of Education to train Teachers Has Been Organized.

These courses are available to those who have completed the equivalent of a good High School Training.

For those who have not had such a training

The Academic Department Offers:

| | |
|-----------------------------------|------------------------------------|
| TWO YEAR PREPARATORY | THREE YEAR DOMESTIC SCIENCE |
| TWO YEAR STEAM ENGINEERING | THREE YEAR PHARMACY |
| THREE YEAR FARM HUSBANDRY | THREE YEAR TEACHERS' |

A Complete Commercial Course

is offered all students and its work is so arranged that it may be carried in connection with the regular work of other courses.

THIS COLLEGE

OFFERS to the young people of this state an education which is thoroughly in line with modern thought and demands. It spends no time on dead languages or such subjects as are of little practical value. It aims to fit young men and young women for responsible positions in life. The demand of the present is for men and women who can think and investigate for themselves; who can deal with the social, agricultural and industrial problems of the day.

OFFERS five courses of study covering four years each, besides a short course of two years in common school branches. Military discipline throughout the courses.

THE LABORATORIES

ARE THOROUGHLY EQUIPPED, and the instructors are specialists in their respective lines. Exceptional advantages are offered in chemistry, physics, botany, zoology, literature, mathematics, and engineering subjects.

Graduates from approved High Schools are admitted to the Freshman Class. Tuition free. Board and Room \$3.75 to \$4.50 per week.

WRITE TO THE PRESIDENT FOR CIRCULARS AND CATALOGUE

COURSE IN GAS ENGINES BEGINS NOVEMBER 9, 1908.

would only realize that the busy people are the happiest people, they would seek to become busy at once. If a person has anything that must be done right away he usually takes it to a busy person and that person because he is busy will usually do it immediately in order to be done with it. So don't let any of us be too busy to lend a helping hand to the student activities, and in fact everything concerned with the College, and we will all be much the better for it.

SERIOUS BUSINESS.

Attending College is serious business. At least it should be considered. To skip a class except for unavoidable reasons is positively detrimental to the student's standing. Even then it works harm. To take any less serious view of one's college work lowers the student from the high rank all good students should strive to maintain.

Naturally students gravitate into grades good, passable, indifferent, poor. Which grade are you striving for?

A student's punctuality in attending classes, drills and laboratory work, his preparation for recitations, and his general deportment about the College and at his boarding place settles him firmly into these classes. Which ever class he gravitates into soon becomes known to the faculty and to the better grade of students, and the student may not fully realize that his measure is thus accurately taken, yet he is not fooling anybody except himself.

The same law holds good on a College Campus that sorts out the best citizens of the state for the responsible positions and for the best honors. It is even more important here because loose habits whether of conduct or of preparation for the class room, will cling about a student's neck like a mill-stone discrediting him in

after life as it underrates him among College men.

Loose habits and careless methods never won a victory, never fired a soul with high purpose and never exalted a man. Shun careless habits as you would shun the microbe of a malignant disease.

The A. C. offers excellent educational advantages at the minimum of cost and every student should be ashamed to do anything less than his level best. He should be too proud to be rated below "good," either in conduct or effort—and too dignified to be classed among the "quitters" or the "knockers." Rules are not made for good students—they never affect them; only inferior students complain about rules.

New uniforms are in evidence upon the Campus, and the cadets walk erect and awkward inside of them.

Y. M. C. A.

The Young Men's Christian Association is at present making a systematic canvass for members. Every male member of the College will be given a chance to join. So far as the canvass has progressed it has proved satisfactory, and large numbers have expressed their interest in the organization.

The association began the season somewhat hampered by the absence of many of the officers including the president, Norman Powell, who upon his return, was taken sick with typhoid. However, plans are now well under way and the prospects of the association are looking good.

Bible Study.

Bible Study classes are being started. Among the leaders of the classes are Prof. Chambers and Mr. Dynes. After these classes have been organized a number of student leaders are planning to take up the work of conducting classes. Every man in the College should be a member of one of these classes.

Meetings Wednesdays.

Tomorrow afternoon at 4:30 will be held in Chapel the first meeting of the Y. M. C. A. for this term. All men of the College are invited to be present at these weekly meetings. It will be the aim of the association to make these meetings of direct value to all who attend. It will begin promptly at 4:30 and will end at 5:30 on Wednesday.

PHILO DANCE.

The first dance of the year was given in the Armory last Saturday evening by the Philos. About forty couples enjoyed the evening's dancing. The music was furnished by Dr. Putnam's orchestra of five pieces. Grape frappe was served to the guests during the evening. Dr. and Mrs. Brown acted as the official chaperones.

Y. W. C. A.

"Bound in a bundle of life with Christ," was the subject which Miss Fishback chose for the devotional meeting Wednesday evening, Oct. 14. She spoke of the "womanly woman," and the possibilities of the college girl over other girls.

About forty girls were present and Miss Fishback seemed to reach the heart of every girl and bring home to her some of her opportunities.

Bible Study.

The first year Bible study class was organized on Thursday, Oct. 17. Miss Matilda Thompson will be the teacher and "The Life of Christ," from Mark, will be studied. About eighteen girls were enrolled and another class will be organized next week.

Y. W. C. A. Party.

The girls of the College were invited to Francis Hall Wednesday afternoon to meet Miss Fishback. A very pleasant social hour was spent in getting acquainted with Miss Fishback, and with the new girls. Refreshments of tea and cake were served. Many of the girls expressed the wish to come to the devotional meeting in the evening to hear Miss Fishback speak.

ATHENIAN LITERARY SOCIETY.

The Athenian Literary Society met in the society room on Friday evening, Oct. 16.

There was a large attendance, both of members and visitors. The following program was rendered: Vocal Solo—Gerald Evans. Camp Life in the West—Mark Keeney.

The Best Modern Writers—Cecelia Eyclfson. Vocal Duet—Ross Babcock, Katherine Grest.

Original Story—"The Double Wedding," Alma Erickson. Locals—LeRoy Gifford. Chitichisms—Prof. A. E. Minard. Football, Past, Present and Future—Mr. Oliver Dynes.

Piano Duet—Misses Peterson. Prof. Minard's criticisms were especially good, and he gave the suggestion that perhaps the critic might be dispensed with, also that more chorus singing might be acceptable. The program as a whole was well rendered.

Senior Class Meeting.

The Senior Class held a business meeting Tuesday evening, Oct. 13, in the Chapel. A complete financial report from the managers of the Agassiz was given; also reports from the committees on securing caps and gowns and pins.

Juniors Meet.

On Tuesday evening, Oct. 13, the Junior Class held a business meeting in the Athenian room. Committees were appointed and plans for the year laid out.

BOARD DINNER.

The first board dinner of this school year was served at Francis Hall Wednesday, Oct. 14. The following was the menu:

- Fruit Cocktail
- Cream Potato Soup
- Olives
- Chicken Croquettes
- French Peas
- Sweet Potatoes
- Mashed Potatoes
- Creamed Potatoes
- Biscuit
- Nut Salad
- Philadelphia Ice Cream
- Gold and Silver Cakes
- Cheese
- Cheese Straws
- Wafers
- Coffee

The color scheme was green and yellow. A bouquet of yellow chrysanthemums decorated the center of the table.

The dinner was prepared and served by the second year cooking class and was a success in every way.

PERSONAL

Alfred Lee, one of the third year Farm Husbandry men, returned to school the first of the week.

Professor Willard returned to the College the first of the week, after an absence of a few days.

Clara Gunness had a pleasant visit at her home in Abercrombie Saturday.
 Charles Murphy, one of our agricultural students of last year, has returned to continue his work.

Word has been received from John Thysell of last year's senior class. He speaks highly of The Spectrum and encloses subscription.
 Some Few Escaped.
 "Oh, John," whispered the wife as she seized the morning paper, "see what that editor has done with the account of our musicale. He has placed it alongside the column of death notices. It's a shame. And we had such prominent people as guests, too."
 "I suppose," said the husband wearily, "that the editor wishes to call attention to the fact that some people are more fortunate than others."

The One He Liked.
 A country clergyman on his round of visits interviewed a youngster as to his acquaintance with Bible stories. "My lad," he said, "you have, of course, heard of the parables?"
 "Yes, sir," sharply answered the boy, whose mother had inducted him in sacred history. "Yes, sir."
 "Good!" said the clergyman. "Now, which of them do you like best of all?"
 The boy squirmed, but at last, heeding his mother's frowns, he replied: "I like it at one where somebody loafs and fishes."
Plenty of Cries.
 "I cry for justice!" exclaimed the citizen.
 "Come over and join the chorus," said the cynic.

Sophs. Are Late For Refreshments

Turn out Lights and Leave Juniors in the Dark.

That Was a Joke But the Broken Window Was Not.

The Sophomores got busy at the Junior class meeting last Tuesday evening and made things rather interesting for the '10s. It seems that the Juniors were holding their class meeting in the Athenian Society room and had a few refreshments. The Sophs decided that they would like to share the refreshments, but their attempts proved in vain so they did the next best thing and turned out the lights so the Juniors had to go home, but they also took the refreshments home with them for the Sophomores went hungry to bed. The way in which the lights were turned out was rather an ingenious one and must have been done by some of the students of flag pole fame, for the pole on which the transformers is situated was sealed and one of the fuses removed. Another thing which happened was not so ingenious for nobody knew anything about it and did not care to talk on the subject, but a few days later the janitor was seen replacing a broken window in the Athenian room and it was rumored that the Sophs footed the bill.

SECOND PLATOON SHOOT BETTER

Friday from eight A. M. to about one P. M. the second platoon of Company A. worried the back stop in the big slough west of the College with a fusillade of bullets. The shooting showed a marked improvement over that of the first platoon the week before and although nophenomenal score were made the average was high. Adjutant Neil was out again and succeeded in keeping the lead being tied, however, by Private Goodhart.

Some of the engineers are getting the McVicker automatic gas engine, which was secured last summer, in good running order for the efficiency test.

BOARD OF TRUSTEES IN MONTHLY SESSION ON WEDNESDAY

The Board of Trustees of the College held their regular monthly meeting last Wednesday. The resignation of Sec. Nugent from the office of secretary of the College was accepted and Sec. W. A. Yoder of the Commercial Club was elected to fill the vacancy. The contract was let to the Klinsman Company of Fargo for the heating plant in the residence at the Langdon sub-station. The members of the board present were Clark W. Kelly, B. N. Stone, H. R. Hartman, J. B. Radford, L. N. Wallen, F. W. McLain, and G. H. Hollister.

The young ladies of the Domestic Science Department, under the direction of Miss McCarty, Professor of Domestic Science, served a seven course dinner to the members of the board in the dining room of Francis Hall.

NUGENT AND HARTMAN IN THE TWIN CITIES

Sec. Nugent and H. R. Hartman of the board of trustees, spent the latter part of last week in the Twin Cities looking over the horse market with a view of purchasing a draft team for the College. Mr. Nugent states that the market is rather quiet at the present time, it being just between the harvest and lumber woods demands. Two good teams are in sight but no purchases have been made as yet.

WILLARD GOES TO BROWNSVILLE

About Nov. 10th, Rex E. Willard, '08, will leave North Dakota for Brownsville, Texas, where he will assist in a Reconnaissance Survey of the southern part of that state. He has been transferred from the detailed work of the Bureau of Soils to the more extended work of the Reconnaissance Survey.

The survey work of the Richland area is practically completed and the report of the work will appear in about nine months from Mr. Frank Bennett, of the Department of Agriculture.

Wonder if we could have better rooting if lollygagging was prohibited at our foot ball games.

Legal Battle Begins In State Court Sat.

The Famous "Bleached Flour Case" Will Soon Come Before Judge Pollock.

DEAN LADD IN WINDY CITY

Secure Depositions From Well Known Authorities in Chicago & St. Paul.

Professor Ladd left Tuesday morning for Chicago and St. Paul where he will consult and obtain depositions from men who are authorities upon the bleached flour question. These depositions are to be used in the states defense in the long postponed bleached flour case that will come up before the district court next Saturday.

While in Chicago Dean Ladd will consult Dr. Winston an eminent authority upon the question of bleached flour and will obtain an affidavit from the same.

Upon his return he will stop over in St. Paul and there interview Professor Mitchell with the same purpose in view.

The Case.

This bleached flour case, Russell Miller Milling Co., and others vs. E. F. Ladd, began over a year ago when the millers secured from Judge Pollock a temporary restraining order enjoining the Pure Food Commissioner from publishing bulletins concerning bleached flour or enforcing the pure food law in regard to the same. Upon the twenty-fourth the hearing of this long delayed case will begin and will be watched with interest by the entire country.

Of National Importance.

The outcome of this case is of national importance. The three points that will be decided by the courts during the week or more that the case will be pounded over by the court are: firstly, Are the millers of the state to be prevented from making and selling flour without giving the formula; secondly, shall the millers label their products "Chemically Bleached," or "Bleached With Nitric Oxide"; and thirdly if it is proved that the flour contain harmful ingredients shall the sale be prohibited.

Experts Will Testify.

It is claimed that the millers will bring a large number of experts to give testimony upon their side. Dean Ladd will undoubtedly have several witnesses from among men of national reputation and it is well known that Professor Sheppard of the South Dakota Station will appear in person.

GIRLS WORKING FOR A WINNING BASKET TEAM THIS YEAR

About twelve of the girls are reporting regularly for practice in the Armory twice a week to get in trim for the coming Basket ball season. So far the work has been with a good coach but they are going after it with all the vim and enthusiasm that is in them and of this there is abundant evidence.

Two of last years regulars have reported, Miss Magill is expected out soon and one or two more of the old squad are likely to be out later.

The girls are working hard but it is too early to make any prophecies as yet. As a whole the outlook is good for a winning girls team this year. Formerly it was difficult to get two whole teams out for practice regularly while this year there is evidence that there will be material for a third and perhaps a fourth.

dows of the Spectrum office last week. Apparently this was the first time in the history of the Weekly Spectrum.

GERMAN LITERATURE.

German Poet's Memorial Foundation Working Successfully.

Last spring the Spectrum announced that a local chapter of the German Poet's Memorial Foundation was to be formed in the city of Fargo for the purpose of bringing the best German literature to the reach of the masses.

Since that time fifteen have joined in Fargo and a number of people of Leonard, North Dakota. The result has been to the satisfaction of all.

The working of this organization is about as follows. The membership fee is fifty cents and this entitles the candidate to one neatly bound and substantial volume of German verse. After the once joining the member can secure the twenty five or thirty volumes of the same nature at the rate of twenty five cents a piece.

The formation of the Fargo chapter entitles the Public Library to a collection of thirty volumes to be placed upon the shelves for the convenience of the public.

Should any German student or any one interested in German literature wish to join the local chapter they should communicate with Professor Max Batt of the Agricultural College within the next few days.

N. D. LIBRARY ASSOCIATION TO MEET IN FARGO

The North Dakota Library Association will hold their third annual meeting in Fargo upon November the sixth and seventh. The arrangement of the Convention is in the hands of Frank J. Thomson, president of the Association, and Miss Elizabeth Abbott, secretary. Dr. Batt is a member of the executive committee and will deliver an address before the association upon one of these dates.

Will He Ever Learn Anything?

Reddy:—"I guess I'll come over and visit your chemistry class next hour."

Eddy:—"Well you won't learn anything over there."

Reddy:—"Oh, tat's all right. trying to paint their class number didn't learn anything."

J. Clayton Russel of Bottineau a student of two years ago is back once more. Last year he attended the Bottineau School of Forestry taking such work as would aid him in completing his course here. He expects to be with the '09 Farm Husbandry men next spring. Russel accidentally broke his leg about a month ago and is still on crutches but expects to retire the sticks from service soon.

PERSONAL

Professor Beckwith is taking lessons in piano and voice.

Burke Critchfield was called home Thursday but is back again.

Norman Powell is said to be improving at the St. Luke's Hospital.

Paul Heath is contemplating a visit to the Alaskan gold fields next spring.

Miss Barrett is so as to be about once more, but will not return to school for the present.

We are sorry to hear that Lawrence Tibert is soon to leave for Idaho for his health.

Charles Dillon of Chicago registered last week in the Farm Husbandry course.

C. M. Yerrington is back and Earl is expected soon as is their sister also.

Secretary Nugent was in the Twin Cities on business the latter part of last week.

Elsa Pelzer dislocated her arm as the result of strenuous gymnastics last week.

The Engineers welcomed Scott Drummond back Thursday. He is a '10 Civil Engineer.

Frank Darrow, McKinstry, Strand and McFee were the lucky subs that accompanied the team to St. Paul.

Gerald Evans of the city favored the Athenians with a vocal solo at their last meeting.

Paul Funderhide has completed the topographic map of the drainage survey made by his party this summer.

Mr. Meller, superintendent of the city parks, was a visitor at the greenhouse last Wednesday.

Esther Evans was the victim of a slight accident on the basketball floor a week ago Monday.

Miss Preston, Dr. Bell's cousin, entered the freshman class at the A. C. on the 14th.

We are glad to hear that Oscar Dahlgren has had only a slight attack of the typhoid and is improving nicely.

James Smith, another of the prominent members of the Agricultural Club put in his appearance last week with the other farm boys.

Alfred Anderson is absent from his classes because of illness. He is suffering from typhoid fever.

We were pleased to see Rex Willard, '08, about his accustomed haunts once more upon Friday and Saturday.

Stambaugh's eye got the worst of it in the football practice of the scrubs last Friday. It is now recuperating.

Professor Ladd surprised his family by returning from Chicago Sunday. He went back to St. Paul for more "depositions" Monday.

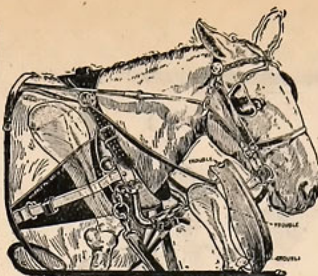

Charles Clark, '08, who is teaching about twenty-five miles north of the city, was a visitor at the Philo Friday evening.

Professors Minard, Batt and Slocum were visitors at the Athenian Literary Society Friday evening.

Velma Cross, a former student of the College, was a visitor at the Athenian society Friday evening and the Philo dance Saturday.

John A. Swenson, '06, writes from Aneta to send the Spectrum, that he can't do without it. John was for years the center upon the College team.

Leo Thien has received the commission of Second Lieutenant and will act as Captain of Company B. for the coming term.

Soil Conditions Vary.

W. R. Porter returned Friday night from a trip to the demonstration farms at Page, Bathgate, and Larimore where he had gone to secure soil samples for moisture determinations. Mr. Porter says that he found considerable variation in the moisture content of the different farms. At Page the soil was quite dry with the exception of the corn ground where it was fairly moist; at Bathgate there was considerable moisture the ground being in good condition for another plowing. The soil at the Larimore farm was exceptionally dry.

The class in stock judging paid several visits at Burgess' and Lukyn's barn last week. Several rings of draft horses were judged and placed.

The teachers class in nature study had a jolly pleasure trip last week when they visited the river woods and other points of interest in a hay rack. Many class periods of this nature would make going to college a real picnic.

There is a promise of new song books in the chapel. Books that contain a good collection of college songs.

The student papers on the west coast are loud in their condemnation of the secret practice in football. It was introduced into the Washington University by Gilmore Dobie. The plea against it is that it stifles student interest in the all college game. There is something in this.

At the University of Washington the girls have exclusive management of the Dormitory.

Several students were seriously injured by a fall of seventy feet through the inside of a smoke stack upon which they were trying to paint their class number als.—W. S. C. Evergreen.

The work upon the Green House is progressing rapidly. The laying in the glass began last Thursday.

G. B. Gunlogson has again taken up his studies in Engineering. Better late than never.

Captain Nemzek in spite of his broken arm was a constant attendant at the evening practice and accompanied the team to St. Paul.

Professor Willard conducted a Geological excursion of Barnes County teachers to Stutsman County and Spiritwood Lake last Sunday.

Miss Williams, Mr. Hughes half sister was a visitor at the College last week. She expects to attend the College in the near future.

A jolly birthday was held at the Grests in honor of Katharine Grest a week ago Sunday. It was attended wholly by College Girls.

Lloyd Worst '10 is back to the College since Thursday, having just returned from his summer work upon the N. P. lands in the western part of the state.

Philip Moun came back to finish his Farm Husbandry course last week. It was reported that he could go to Wisconsin to work but this was a mistake.

Hopstrand, C. M. Johnson, Ladbury, Maxwell, Sampson, and Dinwoodie were among the advanced farm husbandry students to appear upon the Campus last week.

Professor Arvold took a trip up the Great Northern last Saturday where he will make some political speeches. He is said to be a popular spellbinder.

Paul Heath was seen with a bottle of sand last week. He says he is going to analyze it to find how well it will pan out. There was something shining mixed in the dirt which some one suggested was gilt paper.

Carl Myhre '08 was in Fargo and casually visited the College last week. He was taking civil service examination and completed his work Thursday leaving for home upon Friday.

Articles descriptive of the western part of the state are appearing in a number of the farm papers, being written by H. J. Hughes, who believes in sharing his summer experiences with others.

William Mercer's article "Some Things About Flax," in a recent number of "Farm Stock and Home" is written well and deserves the attention of those interested in Agriculture.

Miller, Pease and Phelps of the second team constituted the enthusiastic bunch of rooters that upheld the A. C. honor upon the side lines in the St. Thomas camp last Saturday.

Big Ed McDonald formerly one of our football stars and later a member of the Champion Medical team of Chicago was a visitor at the College last week. He is practicing Veterinary at Hankinson, N. Dak.

Bad luck has struck Prof. Richards again. His handsome driver which was on the hospital list for some time broke its leg as the result of a fall when hampered with splints designed to protect a strained tendon. It was necessary to shoot the animal.

The engineers are making plans to furnish their Lyceum room, and are putting their plan in operation by carrying desks from other rooms and buildings. They will probably have the pleasure of carrying them back later.

BAND BEGINS WORK

Last Friday at 4:30 Dr. Putnam met the candidates for the second Band in the Music Hall. About twenty reported most of them new students and beginners. This makes about fifty taking band instructions this fall.

COMPANY B ORGANIZED.

Will Drill Mondays and Tuesdays
—Co. A to Drill Wednesdays
and Thursdays.

The Military Department has organized Company B, which will consist of all Farm Husbandry men not exempt from drill; it will drill Mondays and Tuesdays of each week. Company A will drill Wednesdays and Thursdays after this.

THE FEATURE OF SATURDAY'S GAME

Captain Nemzek was on the sidelines at Saturday's game and that which occupied the attention of many of the spectators was our big fulback with his arm in a sling as he watched the game with an eagle eye, following the play as the team went back and forth across the field.

"Nemzek played the whole game," was the way one of the boys put it.

"If he had been on the field with us we couldn't have lost," was the words of another. Here is to hopes that the captain will be on the field when St. Thomas comes to Fargo.

Teachers' Club.

The following is the program for the Teachers' Club, to be rendered Friday evening, Oct. 24:

- Roll call.
- Piano Solo—Esther Evans.
- Reading—Bessie McKee.
- True Story—Mr. Nervaal.
- Solo—Mabel Piers.
- Speech—"Shakespeare and the Devil," Prof. Arvold.
- Violin Solo—Mr. Hendrickson.
- Meeting 7:30 p. m., at the Music Hall.

WORK IN JOURNALISM PROGRESSING NICELY

H. J. Hughes, who is in charge of the department of journalism, reports that the work is going nicely and that fifty-two papers are now on the list. All the papers which correspondence was sent last year have requested that the correspondence be continued this year. This shows that the department is turning out good articles and that the people read them.

Mr. Hughes is planning on sending special articles to the North Dakota News Paper Union so that they will appear in all the smaller papers of the state and some papers of the adjoining states. He has a room on the second floor of the Engineering Building fitted nicely for the work and is well pleased with the prospects for the year's work in journalism.

WILL MEET CANDIDATES.

While in Chicago and St. Paul Dean Ladd expects to meet men who are applicants for the position made vacant by the death of Professor Wood. As extra work has devolved upon other men of the staff it will be desirable to fill this position as soon as possible.

Green But Not As Grass.

Misses Briscoe, Peterson, and a couple of other young A. C. ladies were taking a stroll the other day near the College Campus when a woman driving two or three cows came up on the road. At sight of the cows the young ladies became somewhat alarmed but were reassured when the woman said:—"Well yer needn't be afraid. Ye'r perty green but I don't think they'll eat yer."

THE HUB RESTAURANT

65 Broadway Fargo, N. D.

Some one was heard to remark that the power house whistle was welcome when it announced the dinner hour. In our opinion the only person that would welcome anything of this nature must be deaf and have a chronic grudge against everybody within hearing distance.

Dr. Van Es: What is the color of bone?
Haskins: I think bone must be purple.

The Department of cooking boasts new desks that will accommodate eight more girls. This enlargement of the laboratory has been necessitated by the increase in number of students in the Department.

Rooters stick together at the games and then yell together.

There are ninety men cut for foot ball practice at the A. C. O.

A cooperative store has been started at the W. S. C.

Little Girl, meeting Guinness on the sidewalk, "Is that Mr. Taft?"

The Wake of a Bullet.
Experiments have recently been made with an inflammable paste on bullets. When the bullet leaves the muzzle the paste ignites, leaving a stream of smoke behind it, enabling the marksman to watch its course, and, if necessary, correct his aim for the next shot.

Couldn't Fool Him.
A man somewhat the worse for wear came into a dance in Texas. The floor manager saw him and led him out. He came back. Finally, the floor manager kicked him out, and he rolled down a flight of stairs. At the bottom of the stairs he considered the matter.
"I know what it means," he said. "They can't fool me. Those people in there don't want me to attend that dance."
