### PROJECT STATEMENT

**CROSSOVER TRAIL**

Crossover Trail Head is located in the heart of crosstown. Creating overlooks, plots for agriculture and recreational spaces, this once single use retention pond has now been transformed into a place to gather, educate, and interact. With the addition of bike lanes, community garden plots, and storm water management, this site is the most functional of the three.

**BISEON TRAIL**

Bison Trail Head is located directly south of the NDSU campus, at the very north end of Crosstown. Current conditions include soccer fields and stormwater storage. This space is transformed into an area that provides for students and community members.

### FRAMEWORK PLAN FOR FARGO-MOORHEAD

Reduces + Reuses: Recyclable Immediate

<table>
<thead>
<tr>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.6 million fewer miles driven</td>
</tr>
<tr>
<td>575 acres of open space conserved</td>
</tr>
<tr>
<td>$1.5 million in energy each year</td>
</tr>
<tr>
<td>$27.9 saved in infrastructure costs</td>
</tr>
<tr>
<td>6,100 tons of CO2 saved</td>
</tr>
</tbody>
</table>

### Designing for Alternative Modes of Transportation

Create a public transportation system throughout the city of Fargo that integrates streetcar, light rail, and bikeways.

### Designing for the Environment

Educate and encourage the public about the benefits of alternate transportation.

### Designing for the Community

Link spaces to enrich the dynamics within city neighborhoods.

### Typical Path

Typical bus stop

Typical path

An Urban Greenway Transformation
multi-function design alternatives for the Fargo community

---

**Catalyst Trail**

The trail head is named catalyst because of its high visibility to the community. Focusing on creating intentional pedestrian friendly spaces, automobiles and pedestrians alike must interact and work with each other to transform a once vacant lot into an active trail and community reminder that Fargo is moving forward ideologically, socially, and culturally.
