North Dakota Farm Prices

By Perry V. Hemphill Assistant Agricultural Economist

THE general trend of North Dakota farm prices was downward for the month ending June 15, 1944. The North Dakota general farm price index for June, 1944 was 175 which is 5 points lower than it was a month earlier. The June index was, however, 13 points higher than the June 1943 index.

The grain price index was 5 points lower on June 15, 1944 than that of a month earlier. The only grain to register a gain for the month was corn with an increase of 1 cent per bushel. Spring wheat was down 5 cents, durum down 8 cents and rye down 10 cents. Oats, barley and flaxseed prices were unchanged. All the grains were higher than a year earlier. The price of flaxseed was only one cent higher on June 15, 1944 than on June 15, 1943. For the same period the prices of all the other grains have increased considerably more, the increases ranging from 13 to 31 cents per bushel.

The farm price index for meat animals was 1 point higher for the month ending June 15, 1944. For the month beef cattle and veal calves were each 20 cents higher but lambs were 90 cents lower, sheep 50 cents lower and hogs 10 cents lower per hundredweight. The meat animal prices, with the exception of veal calves, were lower than the prices reported a year ago, the price decreases ranging from 30 to 70 cents. The farm price for veal calves was

10 cents higher than that of a year ago.

The price changes for dairy products for the month were not sufficient to change the price index for this group of commodities, the index remaining at 189. Butter was up 1 cent per month for the month and retail milk was up a fraction of a cent.

The price index for poultry and eggs was down 4 points due almost entirely to a 2 cent drop in turkey farm prices for the month ending June 15, 1944. The farm price of chickens was also down almost 1 cent but egg prices were up a strong fraction of a cent.

For the commodities included in the miscellaneous group the farm prices as reported were all either unchanged or lower. The prices for horses, milk cows and sweet clover seed were the same on June 15, 1944 as a month earlier. Wool was down 1 cent per pound, potatoes were 10 cents per bushel lower, alfalfa seed was 50 cents per bushel lower and hay was lower by 60 cents per ton.
