PLANT VIRUS EXPERIMENT STATION

NORTH DAKOTA AGRICULTURAL  
EXPERIMENT STATION  
FARGO, NORTH DAKOTA

Here's one they won't replace. New land and new building plans at North Dakota Agricultural College call for a new sheep barn to replace an old sheep barn, a new poultry plant to replace the old, new swine, beef and dairy housing to replace the old. But in the state where mechanized farming has advanced farther than anywhere else in the world, one old building will not be replaced by a modern counterpart. That is the old horse barn, symbol of hay-burning horse power of the past.

## TABLE OF CONTENTS

Keeping Up-to-date on Oats by T. E. Stoa and C. M. Swallers.....	107
New or Noteworthy Vegetable Varieties by J. H. Schultz.....	116

Prices of North Dakota Farm Products by Perry V. Hemphill.....	129
Growing Soybeans in North Dakota by T. E. Stoa.....	131
Tuberculosis of Domestic Ducks by F. M. Bolin.....	138

*"The essential ingredient of democracy is not doctrine but intelligence, not cynicism but faith in man, faith in God. Our strength lies in the fearless pursuit of truth by the minds of men who are free."*

*—David Lilienthal.*
