**NORTH DAKOTA AGRICULTURAL
EXPERIMENT STATION**
FARGO, NORTH DAKOTA

NORTH DAKOTA'S WATER CONSERVATION activity is not confined to the western parts of the state. Scarcely 30 miles from the Minnesota line is the Homme dam, at Park River, completed last fall and its reservoir filled to within 1½ feet of the top after this spring's melting and runoff. The reservoir is 75 feet deep in various places, 2,000 feet wide and extends two miles upstream. Photo from the Walsh County Record.

By O. A. Stevens	
Prices of North Dakota Farm Products	216
By Perry V. Hemphill	
Breeding for Rust Resistance in Tropical Africa.....	218
By L. R. Waldron	

The democratic system professed by our Constitution, as founded on Magna Carta, is the only method of organized government that leaves to the creative faculty of man, and his capacity for production, the necessary freedom to grow.

—Frank Lloyd Wright

TO ALL OUR READERS:

Our mailing list for this Bimonthly Bulletin has grown rapidly—while the budget for publishing it has shrunken. That means that our Bimonthly Bulletin mailing list

MUST BE CUT SHARPLY!

If you enjoy receiving this Bimonthly Bulletin, if you get value from the information in it, or have an agricultural, scientific or educational interest in it

FILL OUT AND RETURN THE ATTACHED COUPON

This is important: After allowing sufficient time for return of this coupon by all interested persons, the names of all others now receiving this bulletin

WILL BE REMOVED FROM THE MAILING LIST

So, if you wish to continue receiving the Bimonthly—

SEND IN THIS COUPON IMMEDIATELY

Editor, **BIMONTHLY BULLETIN**
