Nitrogen and 2,4-D Increase Crested Wheat Production .....	13
Low Mortality in Some Auction Calves .....	17
Swine Building Plans .....	19

---

## “FARM RESEARCH”

TO BE LARGER

HAVE MORE ILLUSTRATIONS

This is the last issue of “Farm Research” in its present form.

Beginning with the next issue, the size will be enlarged to 8½ by 11 inches. This is the size of most Experiment Station periodicals of this type.

It is hoped that the new size will permit better use of illustrations, and that it will be more attractive and easier to read.

We will continue to publish six issues per year.

---

---

**COVER:** Cattle graze on good range land in western North Dakota.

---

**INSIDE COVER:** In a few hours, the old seed house is demolished to make way for the new NDSU biological sciences building.
