TABLE OF CONTENTS

	Page
Tests Show Flax Straw Won't Keep Silo From Freezing.....	3
By Arthur H. Schulz and George L. Pratt	
Improving Turkey Egg Fertility With Vitamin E In Diet.....	7
By Reece L. Bryant and Robert E. Moreng	
Winter Wheat Doesn't Succeed in Dickinson Area.....	11
By Thomas J. Conlon and Raymond J. Douglas	
Molasses-Vitamin A Dairy Ration Tested.....	18
By J. B. Williams	
Flax Research In North Dakota.....	20
By H. L. Walster	
Piperazine Compounds Successful Worm-Destroying Agents.....	25
By R. F. Shumard, D. J. Hanson and D. F. Eveleth	
Lee, Rushmore Forge Ahead in N.D. Wheat Acreage.....	27
By C. J. Heltemes, L. W. Orvold and Burton B. Barr	
North Dakota Farm Prices.....	30
By Perry V. Hemphill	

On our Cover --

"Research for Export" might well be the title for these two views, taken early in August as a member of a visiting Russian farm delegation came to the North Dakota Experiment Station to learn about work done with corn and wheat at this location, which is comparable to the small grain areas of the Russian Ukraine. Above, left, in the wheat breeding nursery at Fargo is Prof. Boris Sokolov, head of the corn breeding laboratory of the Ukrainian Research Institute of Grain Agriculture at Dnepropetrovsk. At his right is T. E. Stoa, agronomist and chief, division of plant industry, at the North Dakota Station. Next to him is Dr. Glenn S. Smith, principal plant breeder at the North Dakota Station. On the extreme right is Michael Lopuhin, Tass News Agency correspondent and interpreter for Prof. Sokolov. In the picture below Prof. Sokolov discusses corn inbreds in the corn breeding nursery at Fargo with William Wuidakas, corn breeder at the North Dakota Station.
