(Continued from Page 2)

And this had emotional appeal to the rest of Society.

By this time, Farmers had become so efficient, Society gave them a new title:

Unimportant Minority.

Because Society could not ever imagine a shortage of food

Laws were passed abolishing Pesticides, Fertilizers, and Food Preservatives.

Insects, Diseases, and Weeds flourished,

Crops and animals died.

Food became scarce.

To survive, Industrialists, Artists, and Doctors were forced to grow their own food.

They were not very efficient.

People and governments fought wars to gain more agricultural land.

Millions of people were exterminated.

The remaining few lived like animals.

Feeding themselves on creatures and plants around them.

And this was called IN BALANCE WITH NATURE.

**Correction:** We inadvertently omitted the Department of Botany from the listing of Experiment Station staff in the January-February issue of Farm Research. Here is the additional listing:

**BOTANY:** Warren Whitman, Ph.D., Prof.<sup>o</sup>; Murray Duysen, Ph.D., Assoc. Prof.<sup>o</sup>; Donald Galitz, Ph.D., Assoc. Prof.<sup>o</sup>; Harold Goetz, Ph.D., Assoc. Prof.<sup>o</sup>; Julian Dahl, Technician<sup>12</sup>.
