---	---

COVER PICTURE—The picture on our cover shows one of the lots of steers used in the Dickinson Branch Station feeding trials, as told in this issue. It is the lot 2 steers, the stilbestrol fed lot, at the start of the trials, on Oct. 15, 1955. This lot had the lowest feed cost and netted \$10 per head more for the feeding period.

Please Note

Postal regulations require that the mailing list for free bulletins must be revised at reasonable intervals.

The mailing list for the **BIMONTHLY BULLETIN** is being revised with this issue.

Unless we have your request to continue sending you the **BIMONTHLY BULLETIN** this issue will be the last you will receive.

If you wish to receive future issues of this publication do not fail to notify us immediately. A request form is printed below for your convenience.

**IF YOU WANT THE BIMONTHLY BULLETIN
WE MUST HAVE YOUR REQUEST**

Editor, **BIMONTHLY BULLETIN**,
Agricultural Information Department,
North Dakota Agricultural Experiment Station,
NDAC, Fargo, North Dakota.

Send me the BIMONTHLY BULLETIN for another year.
