ARCHITECTURAL EFFICIENCY: DESIGNING WITH USER PRODUCTIVITY IN MIND

Theoritical Abstract

Workplace productivity is important to the success and operation of any business. A seemingly small detail in the layout and design of an office can greatly affect the productivity of employees. By designing a workplace that maximizes productivity, businesses can ensure that their employees are working to the best of their ability. This can be achieved through careful planning and design, ensuring that all elements of the workplace are optimized for productivity. By prioritizing workplace productivity, businesses can increase their overall efficiency and success.

The site was chosen because of its close tie to the downtown area. Located just half a block off of Washington Street, the main street of Golden, the site offers easy access to the heart of the city. The site is also located near a large shopping center, providing employees with the necessary goods and services to complete their tasks and stay productive.
