

# CALIFORNIA DROUGHT

SCIENTIFIC IMPROVEMENT SOLUTIONS

The Hydro-Hive is a self efficient one of a kind desalination center. This design will by itself provide enough water for the state of California. Each center can be sized for population need of region. The use of Capillary Action and Solar Desalination allows this unique design to run free of any outside resources.

CAPILLARY ACTION

SOLAR DESALINATION

=

200,000 GALLONS  
FRESH WATER DAILY

# HYDRO\*HIVE
