

...significant and historic building is lost or destroyed in a community some of what is lost is irreversible, while other aspects are not.
This thesis explores a specific community's sense of loss when the material culture of industrial heritage is lost and works to find out how to restore
cultural awareness of irreplaceable industrial heritage. By looking at a historic building after its destruction, a autopsy-like, narrative can be created
Examining the tangible legacy, literal and theoretical elements of the building can start to replace that building.

SECOND
RESTORED

While the loss of the century old two story brick building was impactful on the community. At Swaney White Flour, the loss of locally produced goods. Freepart's passion for mill industry. The start of the craft beer revolution.

HISTORY OF BEER IN MINNESOTA

Historians speculate that Prehistoric nomads made beer before learning to make bread.

1862-1863: The amount of breweries at the state double from 30 to 60.

1878: Explosion at Washburn Mill in Minneapolis: the largest mill in the world at the time. Reducing Minnesota production by 1/3.

1891: Minnesota produces more beer than anywhere else in the world.
