Urban Stadia: Integrating Stadium Design with Mixed-Use Building Tactics to Rejuvenate an Urban Neighborhood

The existing site is in a prime location between I-94, similar to the one on the bottom. 34 luxury suites have been added between the lower and upper decks on the east and west sides of the stadium.

Means, it was determined that the center and bottom iterations with more seats in the first bowl cost less to construct. The seating design in the final stadium is most

The stadium feels fully integrated into the site. The stadium design has spaces allocated for them as replacement.

Construction of this stadium would include demolition of many of the aging buildings in the area. This new stadium design has spaces allocated for them as replacement.
