ACTIVE LEARNING PEDAGOGY

Active learning pedagogy is defined as an instructional strategy that forces students to be engaged in the learning process. This means that students have to take on a more active role and assume more responsibility for their education. By defining the problem and the solution, students have a greater context of the learning experience and therefore a greater understanding of the material. Through a thorough research, I found that this pedagogy can create a more effective learning environment through spirality and focused class views.
