UNIFIED IDEA

By defining the living environment better and increasing the amount of accessible facilities and assisting resources to help older people related to the modern society to be independent.

THE SITE

The specific location of this project is at 5th Ave., an 80th period close to 5th Road. Due to the expansion of the population of the elderly in the area, the area of the living center to meet the needs of the elderly population is close to the river and has a pleasant view. In addition, the project is located close to University and 2nd Avenue, walking distance from both 25 minutes less than 10 minutes. Near the location, there are universities, and courses, sunset memorial gardens, and a park surrounding this area. This area is away from the noisy downtown area, so it is very suitable for the elderly people to live.

QUALITY OF DAYLIGHT

Daylight is an ideal light source because it provides high-quality natural light that can stimulate visual systems. This makes the building's safety similar to the enterprise aspect. The floor plan also allows one to get natural light from the ground floor to the high floor. Each room includes outdoor space, even if the elderly are not allowed to sit in sunlight, but they can enjoy the sunshine.
