

## Keen Bidding Tags Success to WUS Drive

### Howard Schnell Chosen To Be Honored At Annual SC Hall Of Fame Banquet

kind in the central plains area.

An active civic worker with an interest in youth groups, Schnell was a former president of the North Dakota Junior Chamber of Commerce.

Schnell will be honored at the 1957 Hall of Fame Banquet Friday, Feb. 8 in the Student Union Ballroom.

Each year the Saddle and Sirloin Club selects the man they feel has made the most outstanding contributions to the agriculture of the state. This man is honored at the Hall of Fame Banquet, and a picture of him is placed in the Hall of Fame in the lobby of Sheppard Livestock Arena.

The banquet is set for 6:30 p.m. Feb. 6, and reservations can be made by contacting Merle Larson by phoning 2-3158.

### ISA Tryouts Slated

Tryouts for Bison Brevities acts by the ISA have been scheduled for 1:30 tomorrow in Conference Rooms 1, 2, and 3 in the Union.

All independent students have been urged to tryout for the acts which will represent ISA in Brevities next spring.

The regular meeting of ISA next Monday night will feature a speaker for Religious Emphasis Week after the business meeting.

Howard Schnell, former Dickinson, N. Dak. livestock auctioneer and business man who was killed in a plane crash in December, 1955, has been selected as the 1957 addition to the Saddle and Sirloin Club's Hall of Fame.

Schnell, who at the time of his death was recognized as one of the leading auctioneers in the nation, had crisscrossed sales from one end of the country to the other and from North Dakota to Texas.

Besides his work as an auctioneer, he was a partner with his father and brothers in the Schnell Dickinson Livestock Sales Co., one of the largest businesses of its

### Model Man Gets More Than a Trophy

(SPECTRUM Photo)

Shirlene Schnell, right, and Terry Ann Frank, left, bestow congratulations upon Charlie Hyde who was selected Model Man of the 1957 Interfraternity Ball last Friday night.

Hyde won the honor over eight other contestants as the SC frat men and their gals cavorted at the annual get-together.

Paul Hanson and his orchestra provided the music for the event which was held at the Crystal Ballroom.

### Blue Key Frat Begins Groundwork For Bison Brevities Production

The North Dakota State College chapter of Blue Key, National Honorary Fraternity, has begun its organizational work for this year's production of Bison Brevities.

Bison Brevities is an all college variety show produced by Blue Key. The money derived from the Brevities shows is used to help the students and campus of the college and to promote the good will of the college throughout the state.

Bison Brevities will be staged in the NDSC fieldhouse on April 25, 26 and 27. This Thursday, Friday, Saturday event will feature five 15 minute production acts and five smaller acts of 5 minutes duration.

The entire program is directed, produced, and participated in by students only. Fraternities, sororities, and independent organizations provide the entertainment.

Tryouts to select the acts which will be presented are scheduled for Festival Hall on February 19 and 20 according to Maynard Helgaas, Beltrami, Minnesota, this year's Brevities director.

The production staff from Blue Key to back Helgaas includes: Dale Nelson, Mandan, Ass't. Director; Don Schwartz, Jamestown, Producer; Kerry Murphy, Harvey, Business Manager; and Jack Larson, Fargo, Publicity;

Gaylord Olson, Buxton, Ticket Sales; Sylvan Melroe, Gwinner, Programs; Kent Sack, Reeder, Judging; Reggie Gorder, Bottineau, Technical Director; and Ron Brandvold, Bottineau, Art. Technicians for sound and lighting are yet to be selected.

### Ski Club Gleeful Over Winter's Chilly Grip; Slaloms Now In Order

By Red Sunseth

Well, winter is finally here. To most students on campus this means cold wind, overshoes and stalled cars; but to one small, energetic group this means the beginning of one of the year's most delightful seasons. This group is, of course, the NDSC Ski Club.

Because a large percentage of the student body doesn't ski the club is designed for the "snow bunny".

The club provides instructional movies at their weekly meetings and personal instruction on weekends at the slopes; but perhaps the most important single thing the club can give the individual is the fellowship of a group with a common interest.

Whether you are an expert in search of the advantages of a club, or have never skied before and would like to learn this thrilling, new sport, come on around.

The club meets every Wednesday night at 7 in the Union and, of course, visitors are more than welcome. See you there, huh?

### Spirited Bidding Keeps Cash Register Hot; Sizeable Sum Collected For WUS

Monday night's WUS drive proved a huge success. The night's festivities brought in a booming \$200.75, to which will be added the amount contributed by student organizations that went without meat at their meals on Monday.

Also to be added to NDSC's contribution will be a presently unknown amount which was obtained through solicitations by the students eating in the Union and Ceres and from the faculty. The final source of cash for the drive was an all-out canvassing of the married students to the north by the Alpha Gamma Rho pledge class.

### Ceres Girls Display Gracious Action Over WUS Auction Mix-Up

A tip of the hat is in order to the girls of Ceres Hall for the gracious way they responded to the mix-up over the sale of the Alpha Gamma Rho house Monday night.

When the AGR house came up for sale, the girls from Ceres led off the bidding and gave the sororities a run for their money. Actually the house was offered for sale to sororities only. But due to a misunderstanding somewhere along the line, the Ceres girls thought they were eligible to bid.

The girls from Ceres showed true spirit by quietly protesting and then allowing the house to be opened for bidding again. They then showed more unselfish color by being the first to offer a donation of \$30 to the WUS cause.

The Ceres Hal girls deserve due recognition from the entire campus for their splendid reaction.

### SAE's Reelect Prexy

Hank Trangsrud has been re-elected president of Sigma Alpha Epsilon for the next two school quarters. Others chosen for office are: Pete Gjertson, vice president, John Rude, treasurer, Gene Stockman, recorder, and Frank Hollands, correspondent.

Paul Swedland is chronicler, Parker Erickson, herald, Milton Berg, warden, Bruce Campbell, social chairman, and Kerry Helmeke is house manager. Roger Granland is kitchen steward and Larry Sack, chaplain.

The Monday night festivities began with a style show featuring seven prominent NDSC men-about-campus. The cheering and clapping crowd was treated to the sight of Jack Larson in a maroon knit dress and beautiful matching hat and handbag;

Gene Stockman in a lovely pink formal; Dale Nelson in an eye-catching skaters outfit; Don Schwartz in a ghastly shorty gown and robe; Jim Lowe in a stunning front street formal; Kerry Murphy in a graceful tennis get-up; and George Schwartz in a truly breathtaking bathing suit.

Following the style show was the much awaited auction, with Gene Harrington doing the calling. The ring men were Jerry Schnell and Bill Stewart.

The first article to be auctioned off was the AGR house for a night. In a close bidding duel between the Gamma Phi's and Kappa Kappa Gamma's, the Kappa's came out the victors—they got the house for \$47.25.

Then came the bidding on the four campus queens. The senior member of the group, Shirlene Schnell, went to Mike Hauge for \$7.00. Bob Cosh, ag soph, also bid \$7.00 for his winning bid on junior Karen Edinger. Next on the auction block was sophomore LaVonne Biel, who went to Arnie Haugeberg, again for \$7.00.

Freshman entry Sharon Elliot brought the high price of the evening as Jim Lowe refused to drop out of the bidding and paid a booming \$17.00 for that date.

The Kappa Psi's bid to \$60.50 for the services of Homecoming Queen Gloria Lloyd and Little International Queen Sonja Scott. The two queens will serve the Kappa Psi dinner tables one day in the near future.

Bargain of the night was a half-hour plane ride which went for only \$2.50.

Tau Kappa Epsilon took Mrs. Hultz's tempting chocolate cake home for \$6.75, but only after a bitter bidding episode with the AGR's.

Last on the evening's agenda was the sale of the right to toss a big, juicy lemon meringue pie in the face of student body president Tip Miller. Hank Trangsrud bought that one, but turned the privilege over to Tip's fiance, Pat Larson. The pie throwing episode brought \$45.75.

### Girls Hit Action Trail In Only A Few Hours

Tonight the first girl-ask-boy affair will be staged as Senior Staff sponsors their annual Spinster Skip.

The femmes will pick up the tab for the evening which will feature the lighting of cigarettes, opening of doors, and the usual services which are usually provided by the male gender.

Gus the XXII, a little late for Thanksgiving but here nonetheless, will be given to the holder of some lucky ticket.

Special, personality-fitting corsages will be the order of the evening. These will be provided by the gals as an additional service.

# Guest Editorial Emphasizes Need For Increased Facilities In N. D. Colleges

(This editorial was taken from the Richland County Farmer-Globe, printed in Wahpeton, N. Dak.)

North Dakota's already bulging colleges are facing a "Tidal Wave" of new enrollments. Since 1951-52, college freshman enrollment in North Dakota has increased 60.8%, and the increase will become greater as the so-called "War Babies" reach college age—which is next year. It has been estimated that 70 to 80% of all high school graduates will eventually go to college.

College facilities have not developed as rapidly as have the enrollments. During the depression period, very little building was done. During the war years building was out completely.

Despite the building that has been going on the last few years, the schools still have lacked adequate facilities.

Now with the present press of students, our colleges must build and build rapidly to take care of those students who wish to enroll.

Higher education is no longer for the "Ivory Tower." It has become an essential on the farm, in the market place and in the laboratory. There are those who would limit the attendance at institutions of higher learning to only selected students. It is generally conceded that to educate the gifted and talented only, at the expense of a vast majority of children, would deny the American principle of equal educational opportunity for all. The constitution of North Dakota states that a college education should be offered to all who are willing and able to take advantage of the opportunity.

North Dakota must also compete with colleges in surrounding states and with industry in securing and holding good, talented persons for college and University faculties. No longer are men and women willing to go into the field of teaching for "The Love of Teaching." They, too, have felt the pinch of the rising cost of living.

In the past, our financial effort for higher education has been based too much on what we think we can afford rather than on what must be done.

Higher education in North Dakota is our problem.

If we plan to give our young people the advantage of a worthwhile college experience, we must see to it that the physical plants of our state colleges are built to our present and future needs and that our salaries are high enough to attract capable teachers to our colleges and our university.

By Art Lies

Does it look like a long, cold week-end ahead? You say that you didn't get an invitation to the Spinster Skip? The home work piling up? If you must answer in the affirmative to the above interrogations, do not yield to utter despair! Instead, solve both problems by staying home for a change and cuddling up with that companionable little radio tuned to the 750 spot, KDSC.

A few of us at Campus Radio have again decided to spurn all invitations to the Skip and sacrifice ourselves to the continuance of better broadcasting. With the cry, "The show MUST go on!" reverberating from our

## Most Valuable Course May Surprise You

What is the most valuable course to study in college, from the standpoint of both success in business and enjoyment of leisure time?

A survey by the General Electric Company among 13,000 of its college graduates produces this opinion: English.

Non-engineering graduates listed it first among courses contributing most to their success. Engineering graduates listed it second after mathematics.

Both groups voted English literature the most important as a background for pleasurable leisure-time activities.

(From U. S. News & World Report, Jan. 4, 1957).

trained tracheas, we continue our dreary duties.

It really isn't that bad, though. Just ask any of the happy staff of KDSC. They'll tell you what glorious good fun it is to be a member of the KDSC family. Although we have allowed the entrance of several neophytes into the fold, we still have room for more. Contact any member of the staff and he will help you arrange for an audition. No experience is necessary!

Just in case you don't know, KDSC has working arrangements with all of the major recording companies whereby we are kept supplied with all popular records released for a mere pittance. In addition to this, the station possesses many albums of highest quality such as the recorded sound track of the music from the motion picture "The King and I".

Thought for the week: Probably the nicest thing about your friends is the fact that they aren't your enemies. Cave canem!

# THE ACADEMY

Many students at this college are missing an excellent opportunity to beautify their post-school lives. They go through school taking a bare minimum of the arts and humanities while loading up on courses that they think will help them in their future work. It is both well and good to take practical courses, but it is a terrible mistake to avoid the classes that can make your long hours off the job more stimulating and yourself a more interesting person. One should also bear in mind that mere technical proficiency in one's work is not the only factor considered for advancement in this day and age.

Is education supposed to be just a means used to help one earn a living? If that is the case, education is a terrible waste of time and money because one can learn technical proficiency with intensive on-the-job training in a much shorter time and with greater ease than one can earn a degree in Engineering, Pharmacy, or Home Economics. Education does help to prepare a person for earning a living, but it also is supposed to help to prepare one for life. Education should make life a fuller, more beautiful, more worthwhile experience.

There are many students that receive college degrees and leave school with certain technical skills, but few outside interests. They become dull, plodding creatures that have to depend on sex, television, or liquor to try to liven the long weary hours between working and sleeping. Life can become just a dull matter of existing if you let it.

Life is so terribly short when you consider all of the wonders that the world offers for your enjoyment. No life is long enough to enjoy all that the literature, music, theater, and art that the world offers you. You have at your disposal inexhaustible sources of entertainment that offer such a variety of joys that you need never suffer boredom.

If you are tired of your surrounding you can escape to a tropical island paradise or to snow covered mountains by opening the covers of a book. If you are tired of your daily routine and the people you meet, you can meet new people and face new situations with them by flipping a few pages. If your nerves are on edge because of the crashing and banging of metal monsters you can relax yourself with soothing music. You can sit back and allow good music to form the background for your most exotic "day dreams" or to help you to relive pleasant memories.

A good painting can pull you out of yourself and away from your everyday cares and tell you strange secrets if you have learned how to look beyond the surface of it. You will be able to understand what is happening around you in the world if you have managed to learn how to analyze history in school instead of merely memorizing names and dates.

School should be expanding your capacity to enjoy life. Life offers so much to those who have learned where and how to look. Are you squandering all of your credit hours in attempting to learn technical skill? If so, your greatest battle in life will not be earning a living but trying to overcome boredom.

—GREGORIO OF THE ACADEMY

# Socially Speaking . . .

It's said in Mexico and Spain that it's easy to spot a guy from Brooklyn in the stands of the bullfight stadium. He's the one who roots for the bull. Or how about the one that tells about the panhandler who stopped a man on the street and asked for the proverbial dime. "I don't give money to people on the street," he was told. "What shall I do?" asked the panhandler, "open up an office?"

Elected outstanding pledge at the ATO house was freshman Jerry Schnell.

TEKE Alfred Hanson turned over his pin to St. John's nurse Dorothy Howe from Jamestown.

CANDIDATES for the Dream Girl of Theta Chi are Annette Erdman, Sue Barry, Shirley John, Linda Nelson, Sharon Elliott, Carol Hilling, Sharon Mische and Sally Davis. The honor will be bestowed at the term party February 8th.

KAPPA PSI actives now include Mickey Jordan, Ray Link, Kent Olson, Chuck Wilharm, Dick Gentile, Lynn Parkel, Tom Offerdahl, and Milo Haas.

PHI MU alum Cynara Remboldt recently passed candy honoring her pinning to Cy Stadsvold, Sigma Phi Delt alum.

A farmer was driving past the looney bin with a truck load of fertilizer. An inmate called out, "What are you hauling there?"

"Fertilizer", replied the farmer.  
"What are you going to do with it?"  
"Put it on my strawberries."  
"You ought to live here. We get sugar and cream on ours."

ENTERTAINING the KDs were the ATOs, the Taus by the Alpha Gams and the Theta Chis by the Gamma Phis.

MEALS Tuesdays and Thursdays at the home ec. building for 75c. Give the quantity cookery class a workout, kids. They're serving from 11:45 to 12:30.

GET WELL SOON greetings go to KD Marty Connelly who has been in the hospital with pneumonia.

FIRED UP Rahjah and Kappa Psi Joe Kobensky got pinned. Zita Norman, U of Minnesota student, is the wearer.

SERENADED were Grace Tveite, Phi Mu, by the Tekes, and Ruth Hoyman, Gamma Phi, by the Theta Chis.

ALUM of KD Kaye Bailey Kubas, recently returned from Alaska, was a guest of the chapter last week.

MARRIED are Kappa Psi Cliff Wallace and Betty Sipple of Minneapolis.

NEW PLEDGES at the Phi Mu house are Joan Osland and Carole Rorvig.

THE GHOSTS of Priscilla and John Alden were walking around one day, arguing. Seems that John wanted Priscilla to come with him that night to haunt a certain house.

But Priscilla was adamant. "I've got better things to do," she demurred. "Spook for yourself, John!"

PINNED are Kappa Psi Jim Carlson and Donna Seaburg of Fargo.

PHI MU has added a new active. Ilene Friend was recently initiated.

ENGAGED are IFC president, Kappa Psi Jerry Herman, and Betty Huber, who is teaching in Montana.

AND KAPPA PSI Chuck Phillips gave a diamond to Diane Davis of Macalester College in Minneapolis.

ABOUT the only golden opportunities some men can recognize are blondes.

KAPPA PSI pledges now include George Bergman, Lloyd Schmidt, Mike Kelly and Dick Sharp.

SPINSTER TONITE, and the gals treat, for a change. Hope all are taking advantage of the opportunity to date up the handsome fellas around. Doors, dinner, dancing, and flowers, with all tabs picked up by the opposite sex . . . Aahh . . . ain't college grand?

FOR SALE. Tonight only. All the windows in the Theta Chi house that face south. Reasonable rates. Guaranteed view.

## Cheesemaker Tells Of Experiences Under Russian, German Occupation

(SPECTRUM Photo)

Maureen Bear samples a bit of one of the cheeses made by Albert Jurjan, dairy plant operator and technician at the NDSC dairy department.

Jurjan tells of the experiences of the German and Russian occupation of his native Latvia and of the escape of his family and their subsequent trip to the United States.

During World War II the Germans and Russians had occupied the country, Latvia, periodically. In 1944, however, the Russians overcame the Germans and took possession of the territory.

Among the many people that this action concerned was the Albert Jurjan family. They were given only a few hours to evacuate and in so doing had to leave a small baby behind. Mr. and Mrs. Jurjan and their two older children, Astrida and Andres, escaped to Germany where they remained five years. A son, Valdis, was born to them there.

Before the Jurjan's flight from Latvia, Mr. Jurjan operated a co-operative creamery there for 17 years. He is a trained creamery operator and during his schooling served as an apprentice for six years. He then passed an examination qualifying him to

operate a creamery.

In December, 1949, the Jurjans were brought to the United States through the Lutheran Welfare Service. Mr. Jurjan operated a creamery in Park River, North Dakota before bringing his family to Fargo.

At the present time, Mr. Jurjan is dairy plant operator and technician at NDSC. He is lab instructor for students majoring in Dairy Technology and supervises milk, ice cream and cheese processing at the dairy. He introduced Bockstein cheese here and also makes American, Swiss and Edam cheeses.

Last year, Mr. and Mrs. Jurjan and Astrida became United States citizens. Mr. Jurjan passed the examination with a perfect score of 100%.

Astrida is a freshman Home Economics major at NDSC. Andres is a straight 'A' Fargo High School student and Valdis is a fifth grader at Roosevelt School.

Mr. Jurjan has learned recently that his brother and his family, who were deported ten years ago to Siberia at the time the Russians took over, have returned to Latvia.

## You Think You Got Misery! Listen To This Poor Writer Expound

I awoke, went to the window and threw up the shade. I knew I shouldn't have eaten it. My hands were sweating. They had to be. I had my sweater on, didn't I? It was a good thing I had it on, too or I might have froze. I never got close to the blankets that night. Shouldn't have gone to bed without taking my skis off. You think it is not too unusual to wear skis in bed? But this was in a submarine!

Yes, I picked it up for a song at a used car dealer. Guy there said it was nearly new, had only 20,000 leagues on it. I told him I thought maybe a little Dutch Cleanser would take them right off. He let me have it for \$10,000 down and \$10 a month for the next 40 years. Just wait, I'm going to quit paying in 25 years and let him repossess it. Hope to get one of those atom-powered jobs with power-steering, steam heating, padded dash, and color TV.

My head was throbbing. Why shouldn't it? Somehow, I had to get that bear trap off. It was ruining my part, and it did cause some peculiar things to happen. For instance a little girl came up to me and asked, "Say! Aren't you Elvis Presley?" I replied calmly, "No. I just don't seem to have a handkerchief."

So saying, I picked my nose, left ear, and teeth out of the gravy and looked for a duller knife. I couldn't find one so I hired a gun and sent him after my assailant. I'll get that kangaroo out of my medicine cabinet yet!

### LOST AND FOUND

A green Parker ball point pen lost at the door of the IFC ball. Call Vern Johnson at 2-6647.

A ladies white purse was found in the Crystal Ballroom after the LFC Ball last Friday night. Anyone wishing to claim the purse can call and identify it at the Crystal.

### FOR SALE

Expandable trailer house, reasonable. See or write Ken Duerre, No. 21, N. W. Trailer Court, Box 2553, NDSC.

## WHO WENT TO THE PROM ...AND WHY

"Hello," said the voice on the telephone. "This is Werther Sigafoos."

"Who?" said Anna Livia Plurabelle.

"Werther Sigafoos," said Werther Sigafoos. "I sit next to you in psych. I'm kind of dumpy and I always wear a sweatshirt."

"I'm afraid I don't remember you," said Anna Livia.

"I'm the one whose lecture notes you've been borrowing for two years," said Werther.

"Oh, yes!" she said. "What do you wish, Walter?"

"Werther," said Werther. "What I wish is to take you to the Junior Prom next April."

"That's months away, Westnor," said Anna Livia.

"Werther," said Werther. "Yes, I know, but you are so round and beautiful that I was afraid you might have a date already."

"As a matter of fact I do, Wingate," said Anna Livia.

"Werther," said Werther. "Oh, drat!"

"I'm kind of dumpy and I always wear a sweatshirt"

Anna Livia did not really have a date, but she was expecting to be asked by Stewart Stalwart, athlete and BMOC, handsome as Apollo, smooth as ivory, driver of a 2.9 litre Bugatti, wearer of faultless tweeds, smoker of Philip Morris Cigarettes, which, even without his other achievements, would by itself stamp him as a man of discrimination, as the possessor of a pleasure-oriented palate, as one who smoked for the pure joy of it, who had sought and found a cigarette brimming over with zest and zip and hearty good fellowship — Philip Morris!

Well sir, Anna Livia waited for Stewart to ask her, but two days before the Prom, to everybody's amazement, he asked Rose-of-Sharon Kinsolving, a nondescript girl with pavement colored hair and a briefcase.

Anna Livia sobbed for a spell and then, not wishing to miss the most gala event of the junior year, she phoned Werther Sigafoos.

"My Prom date has come down with a dread virus," she said, "and I'll accept your invitation, Waldrop."

"Werther," said Werther. "Oh, goody ganders!"

The next day Anna Livia received a phone call from Stewart Stalwart. "My Prom date has come down with a dread virus," he said. "Will you go with me?"

"Certainly," she said and immediately phoned Werther and said, "I have come down with a dread virus and cannot go to the Prom with you, Whipstitch."

"Werther," said Werther. "Oh, mice and rats!"

So Anna Livia went to the Prom with Stewart and who do you think they ran into? Rose-of-Sharon with Werther, that's who!

Stewart had felt obliged to ask Rose-of-Sharon because she always did his homework, but she had weaseled out because she really wanted to go with Werther with whom she felt a great oneness because they were both so dumpy. He fell wildly in love with her at the Prom, and today they are married and run a very successful five-minute auto-wash in New Bern, N. C.

Anna Livia and Stewart are happy too. They are still juniors and have not missed a Prom in six years.

©Max Shulman, 1957

All's well that ends well, say the makers of Philip Morris Cigarettes, who bring you this column each week through the school year. And, speaking of things that end well — and begin well too — try today's zestful new Philip Morris!

## Bridge, Movies Top SUAB Activities

Looking about the Student Union we find that there are several noteworthy events on tap in the next few weeks, and a few openings on the Student Union Activities Board.

Anyone interested in working on the publicity, personnel and finance, or creative arts committees should contact Dale Brostrum or Mrs. Tarbell.

The bridge instruction has started, and it will continue to meet every Tuesday night at 8:30 in Meinieke Lounge.

Chess is in the spotlight again as a tourney is being planned for Feb. 2. Anyone interested can sign up with Gordon Kepner. The tourney is open to both students and faculty members.

"The Fabulous Dorseys," Tommy and Jimmy will be teamed with Janet Blair and Paul Whitman in their movie of the same name. This will be here Feb. 6.

Feb. 14 is the date, 7:30 p.m. the time, and Meinieke Lounge is the place for all the hi-fi fans on campus, as Bernie's Record Shop presents a demonstration of the latest in music.

Charlie "Show Me a Shot I Can't Make" Peterson, a former Fargoan who really knows his way around the billiard table, will be on campus Feb. 21 for a few demonstrations with the billiard cue.

A whist tournament is slated for Feb. 26. Entry fee for the event will be \$1 per couple, and prizes will be given.

# Religion Stateside . . .

This week is a big one for the religious groups on campus. It is the week of the year that is devoted to the church and its work on campus.

Organizations on campus have been planning for this week for months and special credit should be given to the Inter-Religious Council for the extra hard work they've done. Let's show our appreciation by getting out and giving them our support this week!

### NEWMAN CLUB

Due to the numerous evening activities, the meeting night of the Newman Club has been changed from Thursday to Sunday evenings.

At the last meeting, Bishop Dworschak of the Fargo diocese gave a talk and showed slides on his trips to Europe.

The next meeting is scheduled for this Sunday and the speaker will be Father Henry Fehrenbacher who will speak on "The Search for God." He will also be one of the speakers for RE Week.

Students are reminded of the daily masses at 7 a.m. and daily rosary at 12:45 p.m. at the chapel.

### LSA

Tonight the LSA will take off for the ice rinks for an evening of skating. Better be there about 7:30 if you don't want to be left behind.

The Sunday schedule begins at 9:30 with Bible Study. Church services are at 11 a.m. and supper is at 5:30 p.m. with a program following. The LSA RE Week speaker, Rev. J. Elmo Agrimson, will begin his RE Week series with a talk, "When a Farm Boy Shook a City." Don't miss it.

During RE Week there will be breakfast at the house at 7:15 and devotions from 7:30 to 7:45 every morning. Rev. Agrimson will speak at 7:30 on Tuesday through Thursday night, and he will also be a speaker at High Noon Focus.

### WESLEY FOUNDATION

Everyone is invited to attend a Wesley-sponsored sleigh ride this evening. Meet in the Wesley Rooms of the College Y at 7:30. Refreshments will be served after the ride.

Sunday morning, cars will leave from the Y about 9:15 for Sunday School at the First Methodist Church. The class

meets in the dinette on the main floor of the church at 9:30.

At 6 p.m. on Sunday the group will meet at the church for supper, recreation, discussion, and worship. Jim Pomeroy will give a report on the United Student Christian Council's Conference held at DeKalb, Ill., during Christmas vacation. Rev. Ouradnick will lead the discussion on "What is God's Will?"

Next Wednesday members will meet with several other religious groups in the first of a series of weekly meetings at the College Y. This will start with supper at 5:45 p.m.

From Tuesday through Thursday this week, the foundation and 3-D groups will gather each noon in the Wesley Rooms for lunch and to hear a talk by Rev. Bernie Brown, the Foundation's guest speaker for the week.

### YMCA—YWCA

There will be an all-college party at the College Y sponsored by the YW-YMCA after the game Saturday night. Everyone is invited.

### GAMMA DELTA

Jim Weckert was elected by the Gamma Delta to replace treasurer Ken Mitchell who is leaving school. There will be a meeting of the Gamma Delta at Immanuel Lutheran Church this Tuesday night. Dr. Roland Timian, Presbyterian minister from Buffalo, N. D., and a graduate of Princeton will speak on the topic "Borderline Cases"—what really makes the things we do right or wrong.

The meeting will start at 7:30 and cars will be at the Union to take those who do not have rides. All Wisconsin-Missouri Synod students are invited to attend. Lunch and recreation will follow the meeting. Should be a very interesting evening.

# Fear Not, Fair Damsel . . . You Won't Be Shot Over Four Nights In A Row

"Ten Nights In A Bar-room," the second play to be sponsored by the SC Vets Club at NDSC, will open at the Little Country Theater next Wednesday evening at 8:15.

In the leading roles are Lorran Remmich as the town drunk and Monica Savageau as his wife.

Monica plays the part of the faithful wife who sticks by her husband even though his name is synonymous with that of a drunkard. Her attempts to give him coffee or tea only seem to frustrate his predicament.

Although "Ten Nights In A Bar-room" is a comedy, it might be considered a temperance play. It shows the life of the troubled drunkard and the effects of his drinking on his family life.

This poor fellow is also subject to delirium tremens during which he sees imaginary snakes entwining themselves around his body. He finally gives up drinking and becomes a respected person in the community.

The comedian of the play is Sample Swichel. He is a witty fel-

low, easy to get along with, and always ready with his answers to any problem. His affairs with Mehitable Cartright, local smalltown girl, help keep this play interesting.

A "meller-drammer" could not be complete without a villain. Such a person is Harvey Green.

Only the audience is allowed to observe the villainous nature of this character in all its "insidious manifestations". Those in the cast tolerate him except Sample Swichel who has him pegged from the beginning.

The entire cast including the ushers, the concessionaire, and the emcee are dressed in the style of the 1840's. The programs and the stage settings are also designed to create the atmosphere of this era.

## A Phi O Announces Founder's Day Banquet

Alpha Phi Omega will hold its annual Founders Day Banquet and initiation Tues., Jan. 29 in the Student Union.

Dr. Knoblack, president of MSTC will be the main speaker of the evening.

New actives of A Phi O are Don Moorhead, Jerome Eide, Morris Krahn, and Martin Olson.

# NDSC Religious Emphasis Week Proclaimed

January 27

SCHEDULE

January 31

### SUNDAY—27th

- 5:00 Gamma Delta Fellowship Supper, Immanuel Lutheran Church, 1306 Broadway. Speaker, Rev. Hanneman.
- 5:30 L.S.A. supper meeting, Lutheran Student House. Topic: "When a Farm Boy Shook a City," by Rev. J. Elmo Agrimson.
- 6:00 3-D supper meeting, 3-D Rooms, College Y. Topic: "Why Need I Look, Where Must I Search?" by Rev. William Sebring.
- 7:00 Newman Club Meeting at Newman Chapel. Father Fohrenbacher, speaker.
- 9:00 Orientation meeting for IRC, advisors and speakers. College Y.

### MONDAY—28th

- 7:00 a.m. Mass, Newman Chapel.
- 7:15 a.m. L.S.A. Breakfast and Bible study with Pastor Agrimson, L.S.A. House.
- 12:00 Wesley Foundation and 3-D Luncheon Discussion, Wesley Rooms, College Y. Bernard Brown, discussion leader.
- 12:30 p.m. L.S.A. Noon Chapel. The first of four discussions with Pastor Agrimson, "Unity With Myself."
- 12:45 Newman Club Rosary, Newman House.
- 4:00-5:00 Coffee Hour in College Y. Rev. Bernie Brown, Rev. Agrimson and Rev. J. O. Baker, discussion leaders. Everyone invited.
- 6:00-9:00 Religious speakers at fraternity and sorority houses and at ISA meetings.

### TUESDAY—29th

- 7:00 a.m. Mass, Newman Chapel.
- 7:15 L.S.A. Breakfast and Bible study with Pastor Agrimson.
- 9:40 All-campus convocation, Festival Hall. Speakers: Rev. Bernard Owen Brown and the Right Rev. Richard R. Emery. Topic: "Lest We Deceive Ourselves."
- 12:00 Wesley, 3-D Luncheon Discussion in Wesley Rooms, College Y. Rev. Brown, discussion leader.
- 12:30 p.m. L.S.A. Noon Chapel. "Unity With God," Pastor Agrimson.
- 12:45 Newman Club Rosary, Newman House.
- 4:00-5:00 Coffee Hour at College Y. Rev. William Sebring, Rev. J. O. Baker, and Father Fohrenbacher leading discussion. Everyone invited.
- 7:00 Coffee Hour at 3-D Rooms. Bill Sebring, and "What Will Find the Answer?"
- 7:30 Gamma Delta Fellowship Meeting. Discussion leader: Dr. Timian. Meet at Union for rides to Immanuel Lutheran at 7:30.
- 7:30 Discussion by Pastor Agrimson, "To Be or Not to Be." L.S.A. House.

### WEDNESDAY—30th

- 7:00 a.m. Corporate Communion at Gathsemine Cathedral sponsored by Canterbury Club. Rides from College Y at 6:45.
- 7:00 Mass at Newman Chapel.
- 7:15 L.S.A. breakfast and Bible study with Pastor Agrimson, L.S.A. House.
- 12:00 Wesley, 3-D, Y Luncheon Discussion with Rev. Bernard Brown. College Y.
- 12:30 p.m. L.S.A. Noon Chapel. "Unity With My Neighbor," Pastor Agrimson.
- 12:45 Newman Club Rosary, Newman House.
- 4:00-5:00 Coffee Hour at College Y. Speakers: Rev. Bill Sebring, Rev. Fred Davis, and Rev. Brown.
- 5:45 Wesley, 3-D, YM and YW, and Canterbury Club joint supper meeting with Religious Emphasis Week speakers panel. College Y.
- 7:00 Discussion meeting with Rev. Bill Sebring, 3-D Rooms, College Y.
- 7:30 L.S.A. House. "Losing and Finding Yourself", Pastor Agrimson.
- 9:00 Speakers will visit dorms for discussion meetings.

### THURSDAY—31st

- 7:00 a.m. Mass in Newman Chapel.
- 7:15 L.S.A. breakfast and Bible study. L.S.A. House.
- 12:30 p.m. L.S.A. Noon Chapel. "Unity With My Job," Pastor Agrimson. L.S.A. House.
- 12:45 Newman Club Rosary, Newman House.
- 4:00-5:00 Coffee Hour at College Y. Speakers: Rev. Agrimson, Father Fohrenbacher, Rev. Fred Davis.
- 6:30 Intersivity meeting. Faculty Lounge, Library.
- 7:00 3-D Coffee Hour. 3-D Rooms, College Y. Rev. Bill Sebring, discussion leader.
- 7:30 L.S.A. meeting. "The Garden of the Second Chance," Pastor Agrimson. L.S.A. House.

Rev. J. E. Agrimson

Rt. Rev. Richard Emery

NDSC's Annual Religious Emphasis Week is slated for January 27 to 31 this year and will feature meetings and discussions with a wide variety of special speakers.

Seven special speakers are slated to appear before campus religious groups in an all out drive to increase interest and participation in these groups.

Rev. J. Elmo Agrimson, Pastor of the First Lutheran Church, Tioga, N. Dak., is one of the speakers that will appear. Agrimson will be at the L.S.A. House several times a day next week and will also be at several other meetings.

Rev. Agrimson is editor of the church paper, Rural Lutheran, and serves as president of the Tioga Kiwanis Club. He will concentrate on the Bible study portion of the meetings.

A graduate of Princeton Theological Seminary, Rev. William Sebring, Pastor of the First Presbyterian Church of Buffalo, N. Dak., will work with the 3-D's and other groups on the Religion in general.

Rev. J. T. Baker, Dean of Gathsemine Cathedral, Fargo, has attended the U. of Minn., Hamline University, and is a graduate of Seabury Western Theological Seminary. At present Baker is also working with youth programs. He will speak to the students on church symbolism.

Tuesday morning an all student convocation will feature the Rt. Rev. Richard R. Emery and Rev. Bernard Owen Brown.

Brown is Pastor of the Methodist Church at Earlville, Ill., and associate director and minister to students at the Wesley Foundation at the U. of Minn. He is politically active with the Democratic Farmer Labor party and a member of Sigma Chi fraternity. His topic will be, The Meaning of Christian Faith.

The Right Rev. Richard R. Emery is Bishop of the Episcopal Church in North Dakota, and he will speak to the convo audience on the subject, Lest We Deceive Ourselves.

Father Henry Fohrenbacher, Pastor of St. Donatus Church, Brooten, Minn., is a graduate of St. John's University. He has been assigned the subject of Christianity and Race Problems.

Chaplain to Episcopal college students in the Fargo-Moorhead area, Rev. Frederick Davis is Vicar of St. Stephan's Mission in North Fargo. In an effort to acquaint students with both clergy and lay work, Davis will speak on Christian Vocation.

As stated by the Inter Religious Council, sponsoring and coordinating organization for Religious Emphasis Week, the purpose of the week is:

"To bring together, with unified goal, all students, and chosen men from campus represented faiths who are experts in their fields.

This provides students with a green pasture for new ideas, a broader outlook and a better understanding of ourselves and those around us."

IRC officers working with the project are: Rodger Ness, pres.; Margaret Platt, v. pres.; Karen Ritchie, sec.; and Anthony Hoffman, treas.

Eleven other organizations are cooperating with IRC to bring this service to the students. They include: Baptist Youth Fellowship, Gamma Delta; Intersivity Christian Fellowship, Newman Club, Pilgrim Fellowship, Wesley Foundation, Westminster Foundation, YMCA, YWCA, Lutheran Student Association, and Canterbury Club.

BF

## Students Optimistic On College As Preparation For Future

Educators, politicians, parents and many other interested individuals have discussed the kind of a job colleges are doing in educating the youth of this nation for the future. Much of the argument concerns the perennial issue of liberal vs. narrow, intensified study. Methods of teaching also come in for praise and criticism.

In order to get the collegiate slant on this issue Associated Collegiate Press asked the following question of a representative national cross-section of college students:

**Do You Feel That Your College is Doing An Adequate Job of Preparing You For Your Future Life?**

The results:

	Men	Women	Total
Yes	72%	78%	74%
No	15%	15%	15%
Undecided	13%	7%	11%

In general, college students overwhelmingly support the kind of a job their present colleges are doing. When asked reasons for their decisions, most students reply in terms of their own individual situation, saying they are satisfied with their choice of program, etc. One comment however, is repeated a number of times, and a Wake Forest College (Winston-Salem, N. C.) senior coed expresses it quite well: "Adequate preparation depends more on the

person than the college." And a freshman at the University of Wyoming (Laramie) puts it this way: "What you put in is directly equal to what you get back."

A very satisfied sophomore attending Mississippi College (Clinton) has this to say: "I'm getting an all-around education and am growing mentally, spiritually, physically and socially." But a sophomore at Tyler Junior College (Tyler, Texas) states: "Scholastically yes; mentally and spiritually no."

A University of Denver sophomore qualifies his opinion by approving the overall job colleges are doing but comments that "some majors are sometimes too confining in scope," while a freshman at the same school can find nothing wrong: "The University of Denver is definitely a wonderful institution, and the instruction received here may be considered as excellent."

With students who feel their colleges are not doing an adequate job the major complaint is an overabundance of petty details and unrealistic academic approaches to ideas and problems. "They burden you with too many extra courses you don't need" is the way an Ohio University (Athens) junior expresses himself, and a Wake Forest College senior states: "I

think the college program is unrealistic because it is too concerned with details that will never make any difference."

A Maryland University (College Park) senior feels that colleges should offer more "chances for experience" and take more "interest in the students". And a senior at the Rochester Institute of Technology (Rochester, N. Y.) believes that in some instances the "caliber of instruction and the courses do not have many things in common with preparation for the future."

"Right now I don't feel as though I'm prepared for a thing" is the quizzical reply of a University of Maryland sophomore. And a freshman coed at Wake Forest College is worried because her institution doesn't "offer adequate preparation for married life."

Some students undecided on the issue feel the pros and cons equate each other or as a junior coed at Syracuse University (Syracuse, N. Y.) puts it: ". . . adequate in certain phases — not at all in others." But in general, undecided students believe they just don't have enough information available in order to make a decision. But when asked the question a sophomore at Juniata College (Huntingdon, Pa.) states: "I'll tell you in about 15 years."

## Age Old Scientific Truths Are Being Altered By Present Day Discoveries

Since the most basic scientific truths change from century to century sometimes quite suddenly, they cannot be considered as permanent truth. For example, there were no more basic truths in science than the conservation of energy and the constancy of mass, yet both of these "basic laws" are now rendered invalid by nuclear fission, in which mass is destroyed and energy is created. Newton's laws were considered the foundation of the universe until Einstein showed they were not a true statement of reality. These changes will continue in the future.

These rather startling facts are present in recent issues of "Mechanical Engineering" (April 53, March '56) in the "Bent" of Tau Beta Pi, in the "Journal of Engineering Education" and elsewhere. The author is Gilbert Doan of the Koppers Company, a former professor of engineering.

Scientific laws are imperfect because the minds of the scientists who frame them are imperfect, even the minds of Newton and Einstein. Thus, science is a constant approach to truth but one that never fully arrives. Belief in science is a kind of faith, just as

is the creed we recite in Church. You may not prefer a world founded on faith, but if that is the reality we ought to face it squarely and objectively, as this country has faced facts in the past.

"The fiduciary nature of science must be frankly admitted to students for only when a student realizes that science based on faith can be confidently accept the tenets of democracy and religion which are likewise based on faith." To teach men and women that science is verified truth which therefore renders faith superfluous, is not only to teach a falsehood; it teaches a falsehood which makes minds unwilling to accept religion and democracy. Students in America are thus confused by their teachers in the basic issues of life. Many of them can recall the blasting of their religious faith by science professor at college.

There is some evidence that the colleges are beginning to integrate science with democracy and religion. Science is finding its true position.

## Swenson, State Grad, Receives Air Force Award

Airman first class Dale J. Swenson, son of Mr. and Mrs. A. B. Swenson, Columbus, North Dakota, was selected as the Distinguished Airman of the Month, for December, at Wright-Patterson Air Force Base, near Dayton, Ohio.

In achieving this honor, Airman Swenson competed with more than 3,000 other airmen in matters of department, efficiency, capability, and military bearing.

Swenson is assigned with the Aeronautical Research Laboratory of the Wright Air Development Center, where he is a mathematician.

He is a graduate of North Dakota State College, class of '54; has been in the Air Force 27 months, and in his present assignment 24 months.

Mrs. Swenson is the former Faye Strandvold, whose parents, Mr. and Mrs. Oliver Strandvold, live at 119 Sixteenth Avenue, North Fargo, N. D.

Airman Swenson was honored at ceremonies in the office of Colonel Paul L. Barton, Commander, Wright-Patterson AF Base, December 31.

*any similarity to a sports car is purely intentional!*

THE '57 CHEVROLET . . . sweet, smooth and sassy!

It doesn't just look like it loves the road, clings to curves and laughs at hills. That's the way it goes. Come on in and see what it does for driving fun!

It's not just a coincidence that Chevy handles and acts like a sports car. Chevrolet engineers planned it that way.

They set out to build a car that would take to the road with crisp, solid steering and quicksilver responsiveness. A car with up to 245 h.p.\* Come try it!

\*Special high-performance 270-h.p. engine also available at extra cost.

## Poll Indicates Collegiates Prefer An Off-Campus Paper To College Paper

If forced to make a choice, college students would prefer to read (by a margin of almost 2-1) their favorite off-campus newspaper rather than their campus newspaper. College newspapers vary greatly in size, content, and frequency of publication. Some are published daily, others with varying frequency up to monthly. Most concern themselves solely with campus affairs. A few of the larger campus papers carry round-ups of national and international news.

In effect then, the following question was designed to force students to choose between a campus newspaper of local interest and an off-campus newspaper focused on national and world-wide events. To get this information Associated Collegiate Press asked the following question of a representative national cross-section of college students:

**If While Attending College You Had to Choose Between Reading Your College Newspaper and the Off-Campus Newspaper You Usually Read, Which Would You Select? Why?**

The results:

	Men	Women	Total
College Newspaper	29%	39%	33%
Off-Campus Newspaper	62%	54%	59%
Undecided	9%	7%	8%

The figures indicate that a good majority of students prefer world-wide news to local, with college men showing somewhat more interest in world-wide events than coeds.

Student comments support this generalization. Almost without exception, students preferring their college newspaper justify their choice by saying that it gives them news of their friends and let's them know what's going on on campus. Or, as a freshman coed at Columbia College (Columbia, S. C.) puts it: "It's more concerned with things right around you."

This college paper is about people you know and the off-campus news is about people you lose interest in," is the way a freshman coed at Alabama College (Montevallo, Ala.) feels. A Lynchburg College (Lynchburg, Va.) sophomore likes his college paper because it is concerned with things and people I am familiar with.

At some of the larger schools the college newspapers contain both local and world-wide news. This situation is reflected in a good number of comments from students preferring their college paper. "My college paper more directly concerns me and also includes brief 'run-downs' on prominent world affairs" is the way a junior at the University of Nebraska (Lincoln) feels. A Michigan State University (East Lansing) senior also states that his college paper "gives good coverage both nationally and locally." And a freshman attending Villanova University (Villanova, Pa.) prefers his college newspaper because it "includes both national and college news."

A freshman coed at the Henry Ford Community College (Dearborn, Mich.) has a totally different reason for preferring her college newspaper. She says: "It comes out so seldom that when it does, I am anxious to read it."

Students preferring an off-campus newspaper have one main reason for their preference, world-wide news. In addition, they feel the off-campus paper has more variety, is larger, and is timely. "I believe that it is more important

to know what is going on in the outside world rather than on campus" is the feeling of a freshman at Long Beach City College (Long Beach, Calif.). "The college paper is too narrow, it deals only with the campus. I want to read about happenings in the world" is the way a junior coed at Villanova University puts it.

A Southern Oregon College (Ashland, Oregon) junior says: "It's a bigger paper and carries news in more detail, has a better variety, etc." And a sophomore at Wesleyan University (Middletown, Conn.) gives his reason thus: "I have a fairly good idea of what goes on at college, but not of what goes on on the outside." But a Michigan State University senior puts it like this: "The college paper lacks funds and staff experience to give a complete coverage of news."

Most students undecided on the question just could not make up their minds as to which paper they would prefer if forced to the choice. A few students, such as the graduate student at Louisiana State University (Baton Rouge) who says, "both papers are needed, one is not a substitute for the other," while basically correct in their position that both local and world-side news is essential, fail to realize that one kind of news can be and is preferred over the other.

## Fashion Magazine Gives Beauty Tips For Current Year

**What can women do to be more attractive this year?** Here are a few hints Glamour magazine has suggested:

For this year the fashion is to look pretty—not chic, not dramatic or handsome or striking—just irresistibly pretty.

The first step is to smooth liquid foundation over your face and throat; then blend it carefully with a tissue. Next apply rouge in dots along cheek bones. Then blend with the fingertips. Next puff face powder over face and throat.

For romantic eyes smooth on eyeshadow close to upper lashes and blend all the way up to the brows. Darken lashes next. For those straight eye lashes use an eyelash curler. Then slightly darken eyebrows using light feathery strokes. You should always aim for a soft natural look.

If you prefer rosy highlights dust a little rouge on each ear lobe.

Now you are ready to apply lipstick, first outline the lips with a brush and then fill in the rest with lipstick.

Glamour suggests you get a becoming hairstyle and to keep your hair well groomed.

Above all, it is important to carry your body properly. Practice proper posture. You'll then have the carriage this new look deserves and will make you a big hit at any time.

## Ford Motors Offers Training Programs For Management Jobs To College Men

The Purchasing organization of the Ford Motor Company offers a training program designed to develop college graduates for future management responsibilities in an expanding company.

The trainee is placed in a job rotational program lasting one year. This program is planned to give the trainee practical experience in both line and staff positions and a broad understanding of the purchasing function.

The first six months of the program is devoted to training in the three staff functions: purchasing administration, purchasing research and procurement planning. During the second six months of the program, the trainee is assigned to a purchasing department for training in the buying function. All training assignments are in the Central Purchasing Office and in the purchasing offices of the various vehicle and manufacturing divisions in the Detroit area.

Supplementing the "on-the-job" program, each trainee will participate in the Company-wide or orientation program for col-

lege graduates and is urged to take advantage of the selected courses offered by the Henry Ford Community College and by universities in the Detroit area.

The performance of each trainee will be reviewed regularly by the supervisor to whom he is currently assigned. A review is also made by the Central Purchasing Office, which schedules and controls assignments of all trainees in Company purchasing activities.

Upon completion of one year's training, the trainee is given a regular assignment in one of the staff or buying functions. The preference of the trainee, his progress, and the need of the various purchasing activities are factors considered in placement.

Candidates should have a Bachelor's Degree, preferably in Business Administration, or in Engineering. A Master's Degree in Business Administration is not required, but is most useful. A candidate should have a "B" average or better in his academic work and have some mechanical aptitude. For further information, see the Placement Service, Memorial Union Building.

All Collegians meet at the

## ENGINEERING GRADUATES

Lockheed representatives will be on campus Monday, January 28 to discuss how the company's diversified development program can advance your career

For interview see your Placement Officer.

Seventeen commercial and military models of aircraft are in production at Lockheed. Development projects are even more diversified, include jet and propjet transports, fighters and bombers far exceeding present-day planes in performance, radar search planes, nuclear applications to aircraft and a number of significant classified activities.

This capacity to develop and produce such a wide range of aircraft is important to career-conscious engineers. It means more scope for your ability, more opportunity for promotion with so many projects in motion. It means more security — because your career is not restricted to one type of plane.

California Division

**Lockheed**  
 AIRCRAFT CORPORATION  
 BURBANK  
**California**

### Master's Degree Work-Study Program

The program enables graduates in Engineering, Mathematics and Physics to attain a Master's Degree at the University of California at Los Angeles or University of Southern California while gaining important practical experience on the engineering staff of Lockheed Aircraft Corporation in Burbank, California.

Additional information may be obtained from Lockheed interviewers or by writing E. W. Des Lauriers at Lockheed's Burbank facility.

Follow the lead of Ralph Posch,  
B.M.E., Class of '51

## *Advance while you're young... as a Chance Vought Engineer*

As a lead engineer in Vought's Propulsion Group, Ralph supervises development of power, fuel, starting and cooling systems for supersonic fighters and missiles.

Ralph consults on engine accessibility problems in fighters like this 1,000-plus-mph Crusader.

Pilot comments on aircraft performance prove especially interesting to power plant specialists like Ralph.

Ralph Posch already is making his mark in the aviation world. Ralph's only 31, but he's advanced to lead engineer in a career field he's liked from the start. Ralph's progress was speeded by Chance Vought's own growth and by keen company interest in his development. These same career aids are working today for every young engineer who's entered missile and fighter development at Vought. Symposiums on creative engineering, for example, encourage the brand of technical free thinking Ralph has displayed. Company-paid tuition for postgraduate study allows any recent graduate to take immediate steps toward advanced degrees. For an increasing number of junior engineers, Vought offers a nine-month program of job rotation which prepares young men like Ralph for key responsibilities. And in every unit of Vought's engineering sections the young professional is given variety that's both refreshing and broadening. Let our campus representative explain how Chance Vought will do its utmost to help you find and advance in the field that best suits you. Ask your placement office to arrange your appointment, or write directly for immediate information to:

Mr. C. A. Besio, Supervisor, Engineering Personnel Section  
CHANCE VOUGHT AIRCRAFT, Incorporated, Dallas, Texas

Our representative will be in your Placement Office Monday and Tuesday, January 28 and 29, to describe first hand Chance Vought's program for young engineers. Reserve time for your own interview by making your appointment today.

CHANCE

INCORPORATED · DALLAS, TEXAS

NDSC FALL TERM HONOR RATINGS

Table of NDSC Fall Term Honor Ratings. Columns include General Institutional Average, General Average (All regular undergraduates), and Average by Schools and Classes (Fresh, Soph, Junior, Senior).

Table listing various student organizations and their average ratings. Organizations include Rho Chi, Senior Staff, Alpha Zeta, Sigma Alpha Iota, etc.

HONOR ROLL—Regular Undergraduates

Comprehensive list of students with their names and corresponding honor roll ratings. Includes names like Rodney A. Anderson, James W. Barrett, Harold E. Bergeson, etc.

“What really sold me,” says Jerry, “was the way they conducted engineering. I’d expected rooms full of engineers at desks. Instead, I found all the informal friendliness of my college lab.”

Gerald, an E.E., came directly to IBM from the University of Buffalo, in 1953. Starting as a Technical Engineer, he was immediately assigned to work, with two others, on designing a small calculator.

Assigns problems to his group

duction. As Jerry says, “It makes an engineer feel good to see his project reach the production stage—and to be able to follow it through.”

Promoted to Associate Engineer after 16 months, Jerry is now the leader of a nine-man team. He assigns problems to his group for solution, approves their block diagrams and the models they build.

Why Jerry chose IBM

Of course, there were other reasons why Jerry selected IBM. He was vitally interested in computers, and IBM was obviously a leader in the field. He comes from a scientific family

Cat Representative Addresses ASAE

Steven Clark, representative and interviewer from Caterpillar Co., was the main speaker at the regular meeting of the ASAE Jan. 17. Clark emphasized that the major fields in his industry that are open to ag engineers are those of sales development and technical writing.

Stressing competition, Clark said, “Competition is one of our greatest assets for the development of better methods which lead to better living for everyone.” A film on the work at the Caterpillar Tractor Co. was shown during the meeting.

St. Luke’s Nurses, Cobbers Attend SC Short Course Party

Students from NDSC, Concordia and St. Lukes turned out in numbers for the annual short course party sponsored by the College 4-H Club.

Chaperones for the affair included Mr. and Mrs. Peder Ny-stuen, and Mr. and Mrs. Clarence Olson.

At the regular meeting next week, Kenny Olson will conduct a leadership training school, and assist the members with plans for a forthcoming TV show.

“What’s it like to be

A PRODUCT DEVELOPMENT ENGINEER AT IBM?”

Three years ago, college senior Gerald Maley asked himself this question. Today, an Associate Engineer and leader of a nine-man team, Jerry reviews his experience at IBM and gives some pointers that may be helpful to you in taking the first, most important step in your engineering career.

(his brother is a mathematician) and is fascinated by these mathematical marvels which are revolutionizing man’s ways of doing things in so many fields. He enjoys working on large equipment . . . and on “pulses.” “It’s more logical,” he says. “In computer

This field is so new

work, you can actually see things happening, which is not the case with all electronic equipment today. And it’s not all solid math, either. What’s more, this field is so new, that pretty soon you’re up with everybody else.”

Gerald has done recruiting work himself for IBM and believes he understands some of the college senior’s problems. “I usually begin an interview by determining a man’s inter-

plays. The latter is his own interest, which is why he is in advanced machine design. He points out that IBM is careful to take these factors into consideration—another reason, perhaps, why turnover at IBM is less than one-sixth the national average.

What about promotions?

When asked about advancement opportunities at IBM, Jerry says, “You can hardly miss in this field and in this company. They tell me sales about double every five years—which in itself makes promotion almost axiomatic.” He endorses the IBM policy of promoting from within, with merit the sole criterion. The salary factor, he remembers, was not his first consideration. While excellent, the tremendous advancement potential was of far greater importance.

Promotion almost axiomatic

Reviewing technical publications

est,” he reports. “Then the diversity of work at IBM enables me to offer him a job which will challenge that interest.” Gerald distinguishes between two kinds of engineers—those who like to work on components, such as circuit designs, and those who are interested in the part the component

IBM hopes this message will give you some idea of what it’s like to be an E.E. in Product Development at IBM. There are equal opportunities for I.E.’s, M.E.’s, physicists, mathematicians, and liberal arts majors in IBM’s many divisions—Research, Manufacturing Engineering, Sales and Technical Service. Why not drop in and discuss IBM with your Placement Director? He can supply our brochure and tell you when IBM will interview on your campus. Meanwhile, our Manager of Engineering Recruitment, R. A. Whitehorne, will be happy to answer your questions. Just write him at IBM, Room 0000, 590 Madison Ave., New York 22, N. Y.

# UND Bowling Team Leads Play In Strack League

The Louis Strack college bowling league has announced its latest standings. The University of North Dakota team heads the standings with an 8-1 record. Cliff Bender, UND pin ace, leads all individual averages with 187.

**Games Played Jan. 14-19**

Jamestown College	2203
Minot T. C.	2519

Dickinson T. C.	2358
NDSC	2556

Wahpeton S. of S.	2525
N. D. U.	2643

Bismarck	2374
Valley City T. C.	2488

**STANDINGS**

Team	W	L
N. D. U.	8	1
Minot T. C.	6	3
Valley City T. C.	5	4
Bismarck J. C.	5	4
Wahpeton S. of S.	4	5
NDSC	4	5
Dickinson T. C.	3	6
Jamestown College	1	8

**HIGH AVERAGES (9 Games)**

Cliff Bender—NDU	187
Don Tang—NDU	179
Joe Fritz—Minot	178
LeRoy Mayer—Minot	178
Ed Jerde—NDU	175
Buck Buchholz—Valley City	175
Chuck Thurm—NDSC	173

**John Foss**

(SPECTRUM Photos)

John Foss stands at 6'3" and forms the other half of the terrific guard combination of the Bison. He is a hustling scorer and fine-skilled ball-handler.

**John is now a sophomore and majoring in Mechanical Engineering.**

Foss was previously rated by Coach Bentson as top material for the Varsity squad. He stepped right into a starting position and has filled the vacancy handily.

A star mainstay from the NDSC Freshman team, he played every position on the squad while playing for Moorhead High School.

**Ken Flynn**

Kenneth Flynn is considered by many as one of the finest guards in the North Central Conference. Kenny combines his 6'1" frame with superb ballhandling and set shot prowess. He started at forward as a sophomore and was very effective despite a previous arm injury.

Hailing from Minot, Ken is married and has two children. He is a senior in Engineering, an excellent scholar and a known leader.

Ken was an all-stater while playing for the perennial powerhouse teams at Minot High School. He has lived up to all expectations by filling the big hole left by graduating seniors. At the present this sparkplug is the leading scorer for the Bison.

**Warren Arman**

Warren Arman is a relative newcomer to the Bison team. He has served for Uncle Sam and starred for the Bismarck Junior College basketball team. His basketball career began at St. Mary's High School at Bismarck.

Moving to the center position, Arman hits between 20-30 points many times and has a season high of 28 thus far. He is a great shot and uses his 6'5" to control the board. Warren transferred as a Junior and is majoring in Education.

Terrific playing can be expected in the future from this standout team player.

## SUAB To Show World Series Films

The Student Union Activities board has announced that there will be movies of the 1956 World Series shown in the Union Ballroom Wednesday, January 30, at 8:00 p.m. Kenneth Blackman, Fargo-Moorhead Twins General Manager, will present the film featuring the New York Yankees and Brooklyn Dodgers.

## ATO'S Cop V-B Title

The ATO's won the Intramural volley-ball championship by defeating the Kappa Psi's in a best of three play-off series Wednesday.

FINAL STANDINGS	
ATO No. 2	CHAMPS
Kappa Psi No. 2	SECOND
AGR No. 2	THIRD
SPD No. 1	FOURTH
Sigma Chi No. 1	FIFTH

## ENGINEERS...PHYSICISTS...

Here are brief descriptions of the important work performed in the five separate divisions of the Hughes Field Engineering Department. Each of the engineers engaged in these activities holds a degree in electrical engineering or physics. All divisions form a highly trained organization to support the armed services and others using Hughes fire control systems and guided missiles.

How do you check out here?

Check one or more divisions for which you qualify by education and experience . . .

**ENGINEERING WRITING**—Engineers in this division work with research and development engineers during formation stages of new equipment to produce clear, concise technical manuals, for use in maintenance and training, as well as specialized handbooks for USAF aircrews.

**TECHNICAL TRAINING**—A completely equipped and staffed school is operated to train qualified military and company personnel in classroom and laboratory programs on advanced systems work in the fields of radar fire control, electronic computers, guided missiles. Instructors are graduate engineers or physicists with backgrounds in development work or university instruction.

**FIELD ENGINEERS**—Hughes technical advisors are required in the field wherever operational bases are located. They

serve military agencies employing Hughes highly complex radar fire control systems for all-weather interceptor aircraft, at home and abroad.

**AIRCRAFT MANUFACTURER LIAISON**—Engineers are assigned to all-weather interceptor manufacturers whose aircraft employ Hughes fire control systems, and are responsible for pre-installation testing of the systems. They work with airframe designers in cases where their operational knowledge bears on equipment installation problems.

**FIELD MODIFICATION**—Hughes policy is not only to get reliable equipment into the field promptly and in sufficient amount, but to modify and develop this as soon as field information and test data become available. Engineers correlate information from the field and indicate changes to the Research and Development Divisions. Write . . .

IT'S FOR REAL! by Chester Field

I'M THE WORLD'S GREATEST POET  
IT'S EASY TO SEE . . .

From my tie to my toes, I reek poetry!  
Most poets praise one lousy moon at a time  
But me, I get dozens of moons in a rhyme.  
If one moon's poetic, why you can just bet  
A sky full of moons is poetic-er yet!

**MORAL:** Like a sky full of moons  
a Chesterfield King is out of this  
world, 'cause it's got everything . . .  
big length, big flavor, the smoothest  
smoke today because it's packed  
more smoothly by Accu-Ray.

Like your pleasure BIG?  
A Chesterfield King has Everything!

\$50 for every philosophical verse accepted for publication. Chesterfield, P.O. Box 21, New York 46, N.Y.

Sport Shorts

by Mac

Well, another week, another Friday, and another afternoon at the B. T.

In spite of two losses on last week's roadtrip the Bison are still ahead of UND in the NCC standings. Will everybody please take a look at the standings.

That should get some comment out of the scribe at the Grand Forks institution, who has been surprisingly silent the last couple of weeks.

The Bison are going to run into trouble tomorrow when they entertain the men of SDU at the NDSC fieldhouse. We hate to be pessimistic, but we see a dark future for Bentonson and his squad. This isn't our year for basketball. SDU is currently tied with SDS for first place in the NCC with one win and no losses. SDU is using the services of guards Eddie and Cliff Daniels to very good advantage.

SDU will have a definite height advantage over the Bison, and from past experience we know that height can make the difference between winning and losing.

We like to win and we hate to lose...

We hope the readers of the Spectrum will notice the intramural standings. The intramural program on campus is more important than many people realize.

Approximately 800 students are taking part in intramural sports

of some kind. The present setup consists of volley ball, basketball, ping pong and bowling.

The I-M basketball program is the largest in the history of the school. There are five leagues and 43 teams.

The intramural program is sponsored by the Athletic department and controlled by the student Intramural Council.

George Schwartz is president of the Council and the group is advised by Erv Kaiser, Director of Physical Education.

An addition to the intramural program this year is a traveling trophy to be given to the organization scoring the most total points in a year. All intramural activities will be counted, with points being awarded to organizations in the order that they finish in competition. This trophy is in addition to the regular first and second place trophies.

Around Campus . . .

Look for the Bison to take three out of four from the Soox in the U series.

Look for colder weather.

Comment heard about last Monday's snow storm and we quote, !!!★XX●@!★XX●! Unquote.

Sidelights: While rummaging around in my desk the other day I happened to find a copy of the Jan., 1904 Spectrum.

On Dec. 12, 1903 the annual basketball game between the A.C. and Valley City Normal girls team was played at Fargo.

The game was probably as good an exhibition of basketball as will be seen in the Fargo Area this year.

The Valley City girls were a little too strong in basket shooting department as they downed the A.C. girls 17-9.

What's wrong with the girls of today. I'll bet they would add a lot to our athletic programs. Maybe the girls would even play football.

Kappa Tau Delta Initiates Six Men

Kappa Tau Delta, honorary architecture and architectural engineering fraternity, initiated six men Thursday, Jan. 17, at a dinner held at the Graver Hotel.

The new members are: Stan Bednar, Bob Brown, Charles Huntley, George Pittard, Dale Ruff, and Seth Twichell.

Ping-Pong Fees Due

All rosters and fees for intramural ping pong will be due at the Jan. 28, meeting of the intramural association according to intramural president George Schwartz.

The meetings are held at the fieldhouse every Monday at 4:15.

Bison Drop Two On Southern Swing; Now Hold 2-5 Conference Record

The SDU Coyotes continued their bid for the North Central Conference lead by defeating the NDSC Bison, 88-72.

The Coyotes led by as much as 18 points and were never seriously threatened. Superior height and rebound control contributed heavily to the Coyote's victory.

Truelson dunked in 18 points for the Coyotes while Foss paced the losers with 14 counters.

ISTC

The Iowa State Teachers College Panthers defeated the invading NDSC Bison with a 71-65 victory at Cedar Rapids Monday night. It was the second meeting of the two in NCC competition.

The Herd came within one point of the lowans in the first period and threatened all the way, but the Panthers sparked a last-period rally to wrap up the

game. Iowa's last nine points were made from the gift line.

John Foss led the Bison scoring with 16 points while all of Iowa's starters hit the double figure mark. Arman and Flynn, who have been the backbone of the Bison scoring attack, were held to three and five points respectively.

The NDSC Bison now have a 2-won 5-lost record, fifth highest in the North Central Conference.

SC Bearded Beauties To Match UND Ugliest

Attention Lord and Lady Sunbeams; Arise Ye of the Furry Face! The beard is back in style!

Latest report on the Beard Blast states that the winners of the Whisker Derby on the State Campus will have the opportunity of matching hedges with those up north come Bison-Sioux Mating Time.

The contest here at State is being sponsored this year by the Vet's Club, Blue Key, and the Rahjah Club, and Shaver's Permits entitling the wearer to a clean slate throughout the festivities are being sold for four bits.

Proceeds from this worthy venture are being donated to the Hungarian Relief fund in hopes of sponsoring a Hungarian student here at NDSC.

Lettermen To Honor

Former Athletes Feb. 1

The Lettermen's Club of NDSC is sponsoring its fifth annual Bison Day to honor all former NDSC athletes.

Festivities include a conference game between NDSC and SDU. A Dutch lunch and informal program will follow the game at the Elk's club.

All former athletes will be introduced to the spectators prior to the game. Registration is also required and can be done at the Athletic Office.

Head of the Athletic Committee is H. Dean Stallings.

### Placement Service

**Monday, January 28, 1957**  
Lockheed Aircraft, California Division is interested in Aeronautical, Mechanical, Electrical and Civil Engineers, also Mathematics and Physics graduates.

**Monday, January 28, 1957**  
Hughes Research Laboratory, Culver City, California, will be represented by Mr. J. Vukovich to interview men with advanced degrees in Electrical and Mechanical Engineering, and Physics. They are also interested in Bachelor degree candidates in Electrical Engineering and Physics.

**Monday and Tuesday, January 28 and 29, 1957**  
Chance Vought Aircraft, Incorporated, Dallas, Texas, are searching for Engineers, Mathematicians, and Physicists.

**Tuesday and Wednesday, January 29 & 30, 1957**  
The Sherwin-William Company will be on the campus to interview chemists with B.S. or M.S. Degrees. Interviews will be conducted in the School of Chemistry Building. Contact Dean Dunbar for further

### Elks Again Offer Award; Total \$30,000 "Valuable Student"

The Elks National Foundation Trustees announce that they are again offering their "Most Valuable Student" awards.

These awards, totaling thirty thousand dollars, will be available to graduating students of any high or college prep school, or any under graduate of a recognized college.

Applicants will be judged on the basis of scholarship, leadership, personality, resourcefulness, and other merits.

Applicants must also be a citizen of the United States and within the jurisdiction of the Order of Elks.

Complete information can be obtained from Miss Matilda Thompson in Minard Hall. Application blanks are also available from Miss Thompson. The deadline for applications is March 1, 1957, but applications must be in Miss Thompson's office not later than Feb. 25.

Students from NDSC have been awarded several of the Elk Scholarships in the past years. Last year there were five awards made to students who filled the requirements.

### Naval Reserve Program Offered

A new Naval Reserve Officer Candidate program is being offered by the Naval Reserve Center on the NDSC campus, 1511, 12th Avenue North.

Information may be obtained at the Naval Reserve Office at no obligation. If accepted as a reserve officer candidate, you will join the naval reserve as a seaman recruit for a 6 year hitch.

There is an 8 week summer training period at the ROC school, Newport, Rhode Island.

Applicants for this program must be college students between 17 and an age which would not exceed 27½ by the completion of the course. They must be between their freshman and junior years in college, have 20/20 vision and good health.

Feb. 8, 1957 has been set as the deadline for examinations in this program.

information.

**Wednesday, January 30, 1957**  
Kirkham, Michael & Associates, Consulting Engineers, are interested in Civil, Structural, Mechanical and Electrical Engineers.

**Wednesday and Thursday, January 30 and 31, 1957**  
North American Aviation, Missile Development Division, Autometrics Division, Downey, California, and Rocketdyne Division, Atomics International Division, Canoga Park, California, will interview all Engineers.

**Friday, February 1, 1957**  
Engineering Recruiting Service, Los Angeles County Civil Service Commission will be on the campus to interview Engineering graduates. Mr. Curtis will be the interviewer.

### AFROTC Graduates To Begin Active Duty

Two recently commissioned Second Lieutenants from NDSC have received orders to report for active duty with the Air Force.

Lt. William J. Chamberlain of Minot will report to Lackland Air Force Base, and Lt. Melvin G. Duerre will report to Air Material Command at Wright-Patterson Air Force Base, Ohio. Lt. Chamberlain will be further assigned to the first available flight training class at Lackland.

Both men are to report to their first active duty station this month.
