

## Little International Ag Show Saturday Night

### Dr. Whitman, SC Botanist, Will Give Open Lecture In Union Ballroom Wed.

Dr. Warren C. Whitman has been chosen to be speaker at the first public faculty lecture to be held in the Union Ballroom on February 13 at 7:30 p.m. The event is being established to give merited attention to worthy faculty members in recognition of their achievements in research and education at NDSC.

Dr. Whitman is nationally recognized for the wealth of knowledge on prairie grasses he has accumulated during his twenty years of experience in that field. The lecture will deal with the extent and value of North Dakota grasslands, and will suggest a statewide program for maintaining productivity for grazing. Colored slides will be shown to illustrate the lecture.

Dr. Whitman is certainly not a stranger to NDSC, having graduated from here in the class of 1935 (B.S.) and 1936 (M.S.). He received his doctorate from the University of Wisconsin in 1939. He is now Botanist and Agrostologist at NDSC's Experiment Station.

Some of the honors already bestowed on Dr. Whitman are: membership in the North Dakota Academy of Science; fellowship in the American Association for the Advancement of Science; charter membership in the American Society of Range Management; and memberships in the Ecological Society of America, British Grassland Society, and the Grassland Research Foundation. He is also a member of Phi Kappa Phi and Sigma Psi, honor societies at NDSC.

The lecture will be open to all who are interested in education and research. There will be no charge.

### Bison Room May Be Enlarged; Plans Still Subject To Approval

How would you like to drink your coffee in a Bison Room twice as large?

If you are one who has had to stand and drink your coffee or had to wait for a table at which to drink it, you will welcome this news.

A much enlarged Bison Room is planned for the coming year by the Memorial Union Board. Architectural sketches have been drawn and a bill is being present to the state legislature requesting approval for an additional \$100,000 loan.

If the bill is approved and the loan is granted, the Bison Room will be double in size. Plans call for excavation and building on an area north of the present Bison Room and kitchen. The addition will be equipped similar to the present Bison Room and will be used for serving meals or for extra space during peak lunch periods.

Union Director Dale Brostrum, outlined the difficulty of keeping the tables and floor clean with the continuous flow of students throughout the day. The new addition would overcome this problem as sections could be roped off for cleaning without closing the room completely.

Present plans call for construction as soon as possible after legislative approval with completion of the project in time for school next fall.

### Schwartz Announces Student Senate Spots To Be Filled In March

Student Senate elections will be held March 11 and 12 according to Commissioner of Campus Affairs Don Schwartz. This announcement was made at the Senate meeting last Tuesday afternoon.

Students desiring to run for any of the senate positions or the student body presidency will be required to present a petition to the Commission of Campus Affairs two weeks prior to the general election.

The petitions will be available at the office of the Dean of Students Feb. 18 and must be turned in to the Commission by 5 p.m. Feb. 25.

Students qualified for candidacy will be expected to conduct their campaigns in an orderly manner. Campaign literature shall not be fastened to trees, poles, or walls of buildings and may only be posted inside of buildings by permission of the building custodian and then only in areas designated for that purpose.

The general elections will be held March 11 and 12 and if a presidential runoff is necessary it will be held March 15.

### Local Students Asked For Blood Donations

Red-blooded students—will you answer the call?

Lars Stenstad of Fargo, a patient at the Fargo Clinic, underwent surgery for a stomach disorder on January 29. During the operation he lost blood at the rate of 2000 cc's in two hours.

To date 53 pints of blood have been used for transfusions, drastically depleting the Blood Bank's supply.

The Clinic, open from 8 to 5 Monday through Friday, has issued a plea for voluntary donations of any blood type. Persons wishing to help may call 2-3261 for an appointment. Donors must be 21 or over, or have written parents consent. Eating for four hours previous to the appointment is prohibited.

A charitable act on your part, involving 15 minutes time and a pint of blood, will cancel \$40 from Stenstad's hospital bill.

### State Student Hurt By Airplane Prop

Richard Tetrault, an NDSC student, was seriously injured Saturday afternoon when he was hit by an airplane propeller. The accident occurred at Hector Airport.

Tetrault was cut deeply about the right arm and shoulder while he was placing wheels under the skis to taxi into the hanger at Hector Field. His right arm was fractured in the accident.

The plane is owned by his brother, Bob Tetrault, also an NDSC student, and they had been flying during the afternoon.

Dick is hospitalized at St. Luke's Hospital where he is doing well, according to doctors. He is a member of Alpha Gamma Rho fraternity.

### Ag Students Get Chance To Display Prowess At Exposition Tomorrow

(SPECTRUM Photo) Darrel Melby grooms and fits his heifer for the Little International Livestock Show and bossy seems to want to help. Darrel is one of the many students who are readying their animals for the show Saturday night.

### Gold Star Band To Tour Five Towns In State

NDSC Gold Star Band directed by Bill Euren will tour five North Dakota towns Feb. 10-14.

The 65-student band will present concerts at Garrison, Tioga, Stanley, Crosby and Williston. Special features include instrumental solos, trombone quartet, saxophone quintet, and a vocal quartet.

The soloists will be Joyce Van Wechel, piccolo, Bill Baillie, clarinet, and Ray Link, saxophone.

Playing in the trombone quartet are Dave Hendrickson, Art Lies, Dennis Schrimpf and Robert Borth. The saxophone quintet consists of Ray Link, Dave Thyer, Jack Larsen, Jerome Syler, and Ronald Jackson. The vocal quartet which will be accompanied by the band includes Eileen Seim, Art Lies, Bill Baillie and Dale Jackson.

Students will stay at the resident's homes in the towns visited. They will travel in chartered buses.

### Judging Team Cops Show Contest Honors

The NDSC Junior livestock judging team returned last week from the Southwest Fat Stock Show held at Fort Worth, Texas.

Robert Lewis, a member of the NDSC team, placed third among the 90 contestants in the contest.

The team was second in beef cattle judging and eighth out of 18 teams in overall judging. A team from Texas A & M placed first in the contest.

Other members of the NDSC team besides Lewis were Dallas Heidt, Howard Lahlum, Robert Cook, Howard Schmid, Lynn Howe, and Leroy Odegaard. The team was coached by Merle Light.

### Fortissimo Lovers Are Now Pianissimo Lovers Because Of Deans' Doctrine

Campus lovers have been cooled by a recent directive to girls living in dormitories.

Dean of Women, Miss Pearl Dinan, issued a letter to all girls living in Ceres Hall and Women's Residence Hall concerning conduct in the dormitory lounges.

Dean Dinan's letter states: "... there is to be no love making in the parlors or the vestibules of dormitories. If the couples wish to sit and hold hands that is all right; but beyond that nothing." The housemothers are to ask couples, or at least the boys, to leave the dormitory if they "do

not act like ladies and gentlemen."

Students have been warned that if their conduct is offensive they will subject themselves to discipline.

### Get Seven New Girls Alba Bales House To

Seven home economics seniors will take up residence in the Alba Bales Home Management House Feb. 10, according to Miss Eleanor Vergin, associate professor of home economics.

The seven are: Glorine Denich, Carolyn Pierce, LaRae Gendreau, Edna Teigen, Mrs. Mary Ann Armhurst, Janice Appeman, and Harriet Fark.

The girls will live there until the end of the quarter. For the past five weeks these girls have been student teaching at various schools.

The girls who have been living at the house will begin their teaching assignments next week.

Their names and the teaching assignments are: Mrs. Karen Sluka Mark, West Fargo; Barbara Harrison, Wahpeton; Margie Hill, Bismarck; Jo Ann Tomlinson, Bismarck; Janet Saba, Mandan; Janet Fagerland, Casselton; and Dolores Hollands, Valley City.

### Elk's Scholarship Plan Is Still Available To Interested Students

A reminder to all who plan to apply for the Elk's "Most Valuable Student" award. All applications must be in the office of Miss Matilda Thompson in Minard Hall no later than February 25. The awards total \$30,000, and last year saw NDSC students walk off with five of them, so get your applications in on time!

# From the Editor's Desk . . .

By Gerry Bender

Midterms gone, and oh, how I wish I could forget them. But (famous last words) they can't flunk a guy out when he has come this far.

Pharmics arise!! Your building plans are being squelched!

Seems that the Bison Room is not large enough for NDSC coffe lovers, rabble rousers, and mid-day lovers. The story is that \$100,000 will soon be coming our way, the purpose being to extend the Union TO THE NORTH.

Wow! A one hundred thousand dollar coffee shop. Doesn't that sound just peachy.

Rumor has it that the enrollment here at State is to really boom in the next few years. Might not have classrooms or dorm facilities for the prospectives, but boy, oh boy, won't we have coffee for them!

Somewhere in this edition there appears an article announcing the return of the TOAD to the campus. The editor of same showed me the plans for this years publication today, and it looks as if it will really be worth dropping a two-bit piece for.

As is stressed in the already mentioned article, this year's TOAD will not attempt to compete with Playboy, but will be a COLLEGE HUMOR MAGAZINE that none of us need be ashamed of. So a suggestion to anyone in search of a 'cause' over which to make noise: Let's not condemn the TOAD until we see it.

Got a phone call from an old friend of all of our today. Would like to take a little space to thank Hal Miller for his timely and inspiring contributions to The Spectrum last quarter. You will all remember him from his weekly column, "In My Opinion". Hal reached that point that everyone eventually reaches when he graduated and had to head up that long road that I'm sure will lead to success. Lots of luck to you, Hal.

Tomorrow sees another Little International staged on the NDSC campus. In case this paper is still lying around where some of the visitors might glance at it, I would like to welcome them all to our campus. Hope you all enjoy yourselves.

While sitting here in the office and seeing all of the copy that comes up here from all of the organizations around the campus I have come up with an opinion (Little Arnold has nothing on me). I believe that there are too many piddling little organizations on this campus. More to be said on this next week.

And a round of back-slapping for the Vets Club and LCT. Also a congratulation to the little bald head of George Poletes, so chuck full of original ideas. Rumor has it that "No Time For Sergeants" might be the Vet's presentation for next year.

And so to sleep again . . . . .

By Art Lies

Shed a tear for dear old KDSC. After nearly a week's silence, our station managed to struggle up to a sitting position long enough to bring you a few hours of broadcasting last week-end. Then it suffered a relapse and is quiet again. It is a recurrence of that

## American Way Is Reviewed By Coed

(ACP)—University of Akron BUCHELITE writer Jeanne Donovan criticizes "the American way" in her "observations" column.

"Mister Average Citizen," she says, "selects the easiest jobs and the easiest methods of doing these jobs. And he uses the same basis for the selection of his leisure activities.

"This very attitude of selecting the line of least resistance, the flower-strewn path, has literally metamorphosed 'the American way' from an estimable example of courage, inventiveness and the desire to succeed into a cipher in world culture.

"Unfortunately, all too often this view of Americans is that which people of other countries see. Their only contact is with the monied tourists who desire to become cultured by osmosis."

chronic ailment which has been plaguing our station lately—dislocated transmitteritis. Until a home is found for the transmitter, things will continue in a bad way for KDSC.

Thanks to the readers who are interested enough to comment (favorably or unfavorably) upon what is written here.

Move over, Gregorio. You have a friend. Your column last week (which will no doubt evoke many catty remarks from our female readers) was excellent. I have just one complaint. I think that in comparing the American female to a cat, you are being quite unfair to the cats.

It is true that a cat will give its affection to the person providing it with the finest of milk, but not even the best pedigreed Siamese would dare to complain of the "boredom" of having several persons saucing its milk, as some of the frustrated females hereabouts do. "Varium et mutabile semper femina!"

Until next week, here's hoping that KDSC will be able to cure its ills and resume broadcasting soon. In the meantime, just tune your dial to 750 and be patient. We may be back on any year now. And remember, the nicest thing about the future is that it comes just one day at a time.

## Former Student Looks For Action

In the absence of The Academy this week we have a guest column written by our old 'In My Opinion' man, Hal Miller. For retorts to Gregorio's column of last week see the bottom of this column. Gregorio will be back next week.

To the Editor:

Passing through these familiar halls, we learned of a letter written by the president; and after examining same wondered at the report that nothing had been done about it. It seems from this angle that when the unusual experience of a good idea is brought up on this campus, the least that could be done is a discussion of the proposal.

Probably on every campus there is a space—one difficult to cross—between the administrative officials and the student organizations. The fault lies with both parties, but when the students are handed a proposal as sound as Dr. Hultz' and are too lazy to act upon it, they have no more gripes coming on any issue. They have their chance.

Our suggestion is a direct one. If we were to ask the students in general to act on the president's suggestion, there wouldn't be any response. So, we'd like to ask Blue Key specifically to take the initiative in this matter. Since Blue Key contains in its membership a large number of the presidents of the male student organizations, a fair appraisal of beliefs on the proposal should be easily acquired.

If there were an agreement that the Council of Presidents would be a good idea, then one person should be delegated to contact all the proposed members of the Council and speak to Dr. Hultz concerning the first meeting.

Since no organization except for notification of meeting time would be necessary, there would be practically no work involved. One meeting in a quarter should not strain any campus leader either. Each president of an all-campus organization owes it to his organization to provide this contact with the school administration, and therefore should be happy to fulfil his responsibility in such a painless fashion.

The informal meeting the president suggests would be the finest one possible for discussing the problems arising between the administration and the student organizations. There would be, finally, the opportunity for understanding between the two entities that is so important for progress in student activities.

If the students lose this chance, they deserve no other.

Hopefully,  
HAL MILLER

The writer of last week's column is probably an incompetent, incapable and impotent man. Further, he obviously never owned a cat!

Jane Kanellos

For more comments on the work of Gregorio of the Academy see page 7, col. 1 and 2.

## THE SPECTRUM

Published every Friday at Fargo, Publications, State College Station, North Dakota by the NDSC Board of Fargo, North Dakota.

Subscription rate \$1.00 per term. Entered as second class matter, December 10, 1945, at the Post Office at Fargo, North Dakota, under the act of March 3, 1879.

## Socially Speaking . . .

By Jean Anderson

WELL shades of H. L. Mencken . . . and this week a reply to the rabble of the Academy's last rumblings. Gregorio seems to be victim of an extremely closed mind and his ideas would lead one to believe that he has had more than one sad experience with a feline femme. You, my dear friend, seem a pathetic case. The writings of the Academy as a whole are amusing, to say the least, and if the intention is to make readers think, your purpose has been accomplished.

However, while your readers are thinking, let's say something worthwhile. This whole series is reminiscent of writings of the 1920's, and that isn't saying too much.

ENGINEERS now active in Sigma Phi Delta include Don Grimm, Gene Blazek, and Jack Little.

HONEYES nominated for the coveted title of Sweetheart of Sigma Chi (what other fraternity has a song like that??) are Margaret Benedict, Janice Fewell, Sue Barry, Sharon Elliott, Jan Christopher, Shirley Branstad, Jan Helt, Diane Askason and Jan Kearney.

ELOPEMENT!! Sol Goldfine and Marian Peterson, pharmics, took the fatal step last weekend. Such excitement!!

SLUMBERING tomorrow night will be the Gamma Phis. What some people won't do to stay up all night. Better be quiet, kids, you live next door to a preacher . . .

CONSCIENCE gets a lot of credit which should rightfully go to cold feet.

KAPPA PSIS serenaded at the Theta house Monday. Terry Ann Frank and Chuck Wilharm, recently pinned, were the honored pair.

ENTERTAINMENTS next week: ATOs will treat the Thetas to supper and the FarmHouse will Valentine with the Gamma Phis.

THAT TUNNEL between the Phi Mu and SPD house must really work wonders in the romance department. This time Bob Barrows hung his pin on Phi Mu Joyce Jacques.

JOKE: "You mean you gave that doctor five dollars and all he did was paint your throat?"  
"What did you expect? Wallpaper?"

INITIATED into Sigma Chi were Paul Haugland, James town, and Jim Nilles, Durbin.

AUGUSTANA Collegian Lorraine Dahlund is wearing the Kappa Psi pin of Don Schiefer, an old TGIFer from way back.

NEW PLEDGE at the Phi Mu house is Mary Pfeiffer.

ANOTHER JOKE: "Just because I have red eyes doesn't mean that I'm drunk. For all you know, I might be a white rabbit."

ALPHA GAMMA DELTA pins are now being worn by Joyce Idler, Judy Hunstad, Donna Risan, Carol Howitson, Janet Chirstopher, Eileen Seim and Marsha Judd.

FIRESIDE (if they can get a fire going in the fireplace) will be for Gamma Phis and their dates tonight at the house.

ROTC Officer: Why didn't you salute me yesterday?  
Frosh Cadet: I didn't see you, Sir.  
ROTC Officer: Thank heavens! I thought you were mad at me.

PHARMICS wearing the pledge pin of Kappa Psi now include Gerald Houle and Elroy Herbold.

"You're the first girl I've ever kissed", said the college man, shifting gears with his knee.

CLEVELAND, Ohio, is the home of Sigma Chi's latest pledge, Chuck Hawk.

THE TOAD has risen again!! A better than ever issue will b sold after the U Series Convo Friday, February 15th. Just you wait . . . oh! that campus humor!

### Army ROTC Offers 'Growling Course'; Get-Tough Policy For Bayonet Training

Do you want to learn how to growl?

A course offered on the campus this quarter may help teach you. So, if you notice men around campus growling and making weird motions, don't be too concerned. They are just Army ROTC cadets practicing for the course.

You see, the Army ROTC department has started a new plan for drill periods this winter. Part of this plan is to teach the cadets some principles and techniques of bayonet fighting.

According to the instructors, an important feature of bayonet fighting is the growl. You must growl fiercely every time you lunge at an opponent with your bayonet. A real ugly growl!

The instructors say this is just to show you have the killer instinct required in the soldier. Some cadets feel it is to scare the enemy to death in case you miss him with the bayonet.

In any event, it takes practice to master a really fierce growl.

Bayonet practice is only part of the "new look" in Army ROTC this year. Judo training, physical fitness tests, and obstacle courses are also planned for the cadets.

Every week two companies take this training while the other two companies watch a movie at Festival Hall. The groups alternate the next week. This program takes the place of close-order drill and manual of arms given to cadets last year.

### "What's it like to be A MANUFACTURING ENGINEER AT IBM?"

Four years ago, Yale senior Lee Baker asked himself this question. Today, as a Product Control Engineer in IBM Manufacturing Engineering, Lee reviews his experience and gives some pointers that may be helpful to you in taking the first, most important step in your engineering career.

"It's tough," Lee sympathizes, "for a college senior to feel confident about choosing a job. For four years he's been trained to be critical and deliberate about making decisions. Now, faced with the biggest decision of all, he has only a few months in which to attend job interviews, separate the facts from the propaganda, and select a company—not to mention passing exams and graduating at the same time."

Lee, with a B.S. in Industrial Administration, came to IBM in 1953. Starting as a Technical Engineer in Production Control, he was immediately assigned to the General Manufacturing Education program—a

Designing a paperwork system

10-month course with rotating assignments in all phases of the work—manufacturing, purchasing, production. In addition to four weeks of formal classroom study, he also spent two in the Boston Sales Office, calling on accounts with the IBM salesmen.

Lee's career was temporarily interrupted by a two-year hitch with the Air Force in Korea. Back at IBM in 1955, he has since been promoted to Production Control Engineer. His present job is to design paperwork systems to insure a smooth flow of work through the plant where the famous IBM electronic computers are manufactured. "It takes creative engineering ability to design these systems," says Lee, "and it takes administrative ability to 'sell' a system to higher management and make it stick."

#### How to select an employer

To the college senior faced with a job decision, Lee has this to say: "Pick your employer by this simple test: 'Is the company expanding fast enough to provide adequate scope for your talents and ambitions? Is it interested in your long-range management development? Will it treat

"Selling" the system

you as an individual and match your abilities with the most challenging assignments?"

For his part, Lee feels IBM has met this test. Since 1953, he has seen new plants open, dozens of new products evolve, hundreds of new management positions created. Greater authority, responsibility and reward have come his way. And he knows they will continue, for IBM sales

Recognition of individual merit

have been doubling on the average every five years since 1930. He likes the "small-team" engineering system that assures ready recognition of individual merit. And he appreciates the fact that IBM hired him despite his impending service hitch.

#### What's "life" like at IBM?

At IBM, Poughkeepsie, Lee lives a "full life." He belongs to a local sports car group, drives an Austin Healy. He skis at Bromley. He is a member of the IBM Footlighters and a local drama workshop. At present, he shares an apartment with two other engineers and a "medium-fi" set, but plans to marry "the girl next door" (in hometown Hamburg, Conn.), in the very near future. In this connection, Lee advises seniors to pay special attention to company benefits. "They may seem like a yawning matter when you're single, but they mean a lot when you assume responsibilities. IBM's are the best I know."

Lee lives a full life

IBM hopes that this message will help to give you some idea of what it's like to work in Manufacturing Engineering at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists, mathematicians and Liberal Arts majors in IBM's many divisions—Research, Product Development, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, our Manager of Engineering Recruitment, Mr. R. A. Whitehorse, will be happy to answer your questions. Just write him at IBM, Room 8701, 590 Madison Avenue, New York 22, N. Y.

# NDSC STUDENTS PRESENT

## Livestock Show To Climax Exposition Tomorrow Night

The livestock showmanship contest of the 31st annual Little International Livestock Exposition will be unveiled by the members of the Saddle and Sirloin Club in Sheppard Arena at 7:30 p.m. tomorrow night.

The purpose of this show is to provide students with an opportunity to gain experience in the fitting and showing of livestock.

Entrants in this division and the other sections of the Little International will compete for trophies and other awards valued at over \$900. These are donated by area businessmen and the various livestock breed associations.

The show is managed and produced by members of the Saddle and Sirloin Club. The manager of this year's show is Merle Larson.

The various divisions will be judged solely on the job of fitting and showing done by the student, and the quality of the animal has no bearing on the decision of the judges.

Fred Boeshans flashes a smile as he accepts the trophy for the top showman in the dairy division of the 1956 Little International. Fred is manager of the dairy division this year.

Judges for this year's show include: Harry Earl, Larimore, N. Dak., overall showmanship judge; Don Baumgarten, Durbin, N. Dak., beef judge; Howard Alberts, Fargo, N. Dak., sheep; Melvin Holte, Gardner, N. Dak., swine; and Al-

len Meyers, West Fargo, N. Dak., dairy.

The profits from the show are used by the Saddle and Sirloin Club to support such activities as the meats and livestock judging teams, the senior day barbecue, and a spring judging contest.

Tickets for the show will be on sale all day tomorrow at the arena and at the door tomorrow night. They are priced at \$1.00 for adults and 50c for children.

## Coed Milking Contest To Headline Special Events At Stock Show

Coeds representing NDSC sororities and women's residence halls will engage in a unique contest during the 1957 Little International livestock show tomorrow night.

The Coed Cow Milking Contest is slated as one of the special events for the 31st annual Little International.

This event will be held during one of the intermissions of the show. Two girls will comprise a team, and the team with the most milk in their bucket at the end of the allotted time will be proclaimed the winner.

This is a revival of a former Cow Milking Contest which was held on campus. A traveling trophy will go to the winners of the contest.

Other special attractions of the show will include a trick roping demonstration by Curly Montana, a nationally known rope artist from West Fargo. Montana has appeared at major livestock shows throughout the country and has performed in Madison Square Garden.

The Fireside Four, a barbershop quartet from the Fargo-Moorhead area will provide the remainder of the special entertainment.

Attend The  
**LITTLE INTERNATIONAL**  
Tomorrow Night

The judge looks over one of the animals in a class of Columbia sheep during the 1955 show. This is one of the three breeds which will compose the sheep show at the 1957 show tomorrow night.

Pictured here are the men that are responsible for the Little International Livestock Exposition which will be presented to the NDSC campus and the people of North Dakota tomorrow.

Lahlum, assistant manager of the Little International.

In the rear are Richard Johnson, left, manager of the Farm Equipment Show, and Laverne Linnell, director of the Agronomy Show.

These men have been directing and coordinating the work on their respective divisions for the last few weeks, and tomorrow they will guide their shows through the final stages.

In the front row, left to right, are: Merle Larson, manager of the Little International; Merlyn Austin, president of the Saddle and Sirloin Club; and Howard

\* \* \* \*

During the early part of the fall quarter each year the Saddle and Sirloin Club elects the man they feel is best qualified to serve as manager of the show. An election for assistant manager of the show is held at this same time.

These men now select the staff members who will head the various segments of the show. It is customary for the showmen of the previous year to be named to head their respective divisions. Other staff positions are usually filled by men who have served as assistants in that department of the show.

The show itself is a business enterprise, and the staff must be certain that it shows a profit.

In the past years almost \$900 worth of trophies, scholarships, merchandise awards and other prizes have been presented to the winners of the various divisions. These awards are sponsored by businessmen, farmers and breed associations in Fargo-Moorhead and throughout the state.

Colleges and universities pride themselves on their all-campus variety shows, and student performers welcome the chance to display their talents in these vaudeville-type entertainments.

"Vaudeville of this type is fine," say the members of the NDSC Saddle and Sirloin Club, "but we believe we have a show of a more practical nature. One that gives the participants an opportunity to learn while they perform."

These men refer to the Little International Livestock Exposition.

Saddle and Sirloin members feel that this show has more color, tradition, and student support than any student-presented exposition in the area.

### Saddle and Sirloin Sponsors

The Little International is sponsored and produced entirely by the members of the Saddle and Sirloin Club. It is held on the campus during the winter quarter of each year.

Patterned after the famed International Livestock Exposition of Chicago, the show and the club which sponsors it were originated by Dr. John Sheppard, former chairman of the School of animal husbandry department. Dr. Sheppard first encouraged students to form the Saddle and Sirloin Club, which is a replica of the widely-known Saddle and Sirloin Club of Chicago. Sheppard next urged the Saddle and Sirloin members to set up the Little International, and the show of today is a result of these efforts.

Just as Chicago's Saddle and Sirloin organization honors a man for achievement in the field of animal husbandry each year, so the Saddle and Sirloin Club of North Dakota honors a North Dakotan for outstanding contributions to the agriculture of the state.

Since its initiation, the Hall of Fame has honored outstanding livestock breeders, veterinarians, agronomists, and other noted men. Dr. John Sheppard, for whom the arena is named looks down on this group from a lofty position over the entrance to the show-ring.

Shirley Branstad looks on as Elaine Willy gets in a little practice for her appearance in the cow milking contest of the Little International tomorrow night. Contestants from the sororities and women's dorms will compete with each other for top honors in the contest.

# LIVESTOCK, MACHINERY, CROPS

## 9th Annual Farm Equipment Show To Present New Developments In Agricultural Engineering Tomorrow

The 9th annual Farm Equipment Show will be presented tomorrow afternoon from 1:00 to 5:00 p.m. in the Agricultural Engineering Building.

This show is held in conjunction with the Little International and is sponsored by the NDSC branch of the American Society of Agricultural Engineers.

The show will feature demonstrations and displays of the latest developments in the field of ag engineering. These displays are prepared and presented by students majoring in ag engineering and mechanized agriculture.

There are four main divisions in this year's show. They are: farm structures, farm utilities, farm machinery, and soil and water.

An added attraction this year will be the demonstration of an actual working model of a steam engine of the type that was used in this area before the advent of the internal combustion engine.

This steamer is one-third actual size and measures 8 ft. long, 3 ft. wide, and 3 ft. high. It has all the features of the original steamer including the whistle. It is a replica of an old time steamer built by the J. I. Case Mfg. Co.

This model steam engine will be on display at the 1957 Farm Equipment Show in the Ag Engineering Building tomorrow afternoon. The steamer was built by N. B. Nelson of Rollog, Minn., who will be at the show tomorrow to give a demonstration of the machine.

and was built by N. B. Nelson of Rollog, Minn.

The farm structures division is under the direction of Ron

Brandvold and will include displays of new and different types of farm building construction, materials and plans.

The farm utilities portion of the show will center around the use of electricity on the farm and will feature demonstrations of farm water systems and other new developments. This division is being supervised by Don Berge.

Irrigation systems and new methods of drainage will be the main theme of the soil and water division which is directed by Marvin Werner.

Pete Breuer heads the farm machinery division of the show which will consist of demonstrations of some of the new designs and models of farm equipment which are now available to farmers.

Richard Johnson is manager of the Farm Equipment Show, and Dennis Lindemann is serving as his assistant.

This exhibition is supported by machine and building materials dealers in the F-M area. These business men provide the equipment and materials for the student's demonstrations and also furnish literature on the material being shown.

Floyd Larson, third from left, is shown discussing various phases of irrigation with several of the visitors to the Farm Equipment Show last year.

Displays and demonstrations such as this one will be featured in the 9th annual Farm Equipment Show tomorrow.

## Agronomy Club Holds Crops Contest, Show

The NDSC chapter of the American Agronomy Society will sponsor its annual grain judging contest and crops show in conjunction with the Little International Livestock Exposition tomorrow.

The crops judging contest is open to FFA and college contestants. It will be held in the Student Union Ballroom from 8:30 to 11:00 tomorrow morning.

The crops show will feature divisions in grasses and legumes, horticulture, and grain crops. The exhibitor compiling the best record in the show will receive the sweepstakes trophy.

The show is under the direction of Laverne Linnel, and will be held in the north wing of Sheppard Arena. There will be no admission price, and the public is welcome.

Laverne Linnel, left, and Adam Koble inspect some of the wheat samples which will be used in the crops judging contest tomorrow morning.

This honor is bestowed at the Hall of Fame banquet held the Friday evening before the Little International. Afterwards the portrait of the leader so honored is placed beside the others hanging in the Saddle and Sirloin Hall of Fame in the lobby of Sheppard Livestock Arena.

After the Hall of Fame banquet members of Saddle and Sirloin put in a night of hard work washing, clipping, carding, and combing the animals they will enter into the competition on the following day.

Saturday morning the scene shifts to the Student Union ballroom where 4-H, FFA, and college contestants match skills in the annual crops judging contest. This is sponsored by the NDSC chapter of the American Society of Agronomy.

### Show Offers Variety

The show isn't confined to the Arena and Union however, and a visit to the Ag Engineering Building Saturday morning or afternoon will find the ag engineers showing the latest developments in soil and water conservation, farm structures, farm utilities, and farm machinery at the Farm Equipment Show. The NDSC branch of the American Society of Agricultural Engineers sponsors this part of the Little International.

Early in the afternoon you can visit Sheppard Arena and inspect the exhibits and the Agronomy Club's crops show there before the preliminary livestock judging begins in the spacious show-ring of the Arena.

The livestock show is strictly a showmanship contest, so the contestant with a poor animal has as good a chance to walk off with top honors as has the showman with the superior animal. It all depends on the job the student does.

But the big show comes in the evening when the spectators view an entire livestock show, including classes in dairy, beef, swine, and sheep.

The show starts with the presentation of the colors and the seating of the Queen of the Little International and her attendants. The lights are dimmed, the master of ceremonies announces the first act, and the animals pace into the ring. The show is on.

A few excitement-filled hours later the show ends as the judge points out the grand champion showman of the year. This is the capping event of the evening.

With this final act, the program ends, and the tired staff members put the wraps on another show. But they can't stop now. Another Little International is ahead of them. A new show means new attractions, new contestants, new animals. It means solving a lot of the old problems again and facing some new ones which arise each year. Every year the Little International must keep all the improvements it has gained and strive for still more color and more excitement than ever before while retaining the tradition, the spirit, and the cooperation which have marked all the shows since 1924.

Reg Gorder feints a swing at Don Schwartz as they argue over who will handle the lion's share of the master of ceremonies chores at the Little International livestock showmanship contest tomorrow night.

Apparently it was settled because they will handle the MC'ing together. Judging from that sleepy look on Don's face he must have already caught one of Reggie's left hooks.

# Lotsa Teeth Plus High Bid Equals One Date *Did You Know?* By Corky

Last Sunday was the day that these fellows collected on their purchases of the recent WUS auction. The gals were auctioned off to the highest bidder in conjunction with the WUS drive.

The guys and their purchases are, from left to right: Mike Haugse and Shirlene Schnell, Jim Lowe and Sharon Elliott, Arnie Haugenberg and LaVonne Beil, and Bob Cosh and Karen Edinger.

Just one comment on the Academy piece in last week's Spectrum. It might well be that women can be compared to cats. And cats like to sit out on the fence and howl. And it might well be that men can be compared to dogs. But don't dogs like to sit under the fence and bark at those cats? You can't beat nature no how.

A subject worth noticing about the campus is the intramural sports program. Unless a person sits down and takes notice, you might never realize just how big this program is.

There are 45 basketball teams. There are 40 bowling teams. Now add to this the volleyball teams, the pingpong teams, and our fall and spring sports, the touch football and softball teams. That adds up to a lot of manpower. It's really

quite a good sized enterprise.

A tip of the hat to little George (Kraut) Schwartz for presiding this business to success for all. Not to be left out of the congrats is Irv Kaiser and all the participants who make the program go and competition keen.

When a person stands on the sidelines and watches these games in action, you get sort of a confident feeling. The people in this world who think the nation is being taken over by a bunch of scatter-brained kids should see these teams once.

That's democracy at work in the bowling lanes or on the basketball courts. The future of this nation rests in the hands of a level headed group of young citizens. I'll stake my column space on the bet that this country does better in coming years than it ever has before. It certainly can't do any worse!!!

## This Year's 'Toad' To Be New And Different; Available Feb. 15-16

It has just been announced that the college humor magazine, "the TOAD", will again make an appearance on the NDSC campus during the NDS-NDU series. The editors report that it has been decided not to compete with Playboy and other magazines of that type, and feel they have something that all college students will feel is "wel wart a quarter".

In order to meet the expected demand last year 1000 copies were sold in the first hour) the Toad staff will send the magazine anywhere in the U. S. for just \$30, or four copies for \$1.

Just mail money, as indicated above, with addresses enclosed to 'The TOAD', Box 2433, NDSC, and copies will be set aside to handle these requests.

## Campus FFA Elects Mehrer '57 Prexy

NDSC's Collegiate Chapter of FFA elected new officers at their meeting of January 31.

Newly elected president of the organization is Ronald Mehrer of Moffit, N. Dak. Ron is a junior majoring in agricultural education, is a member of Alpha Gamma Rho, and is presently serving as assistant pledge trainer of that fraternity.

Those elected to fill other offices were: Carl Haas, vice president; Arnie Haugeberg, secretary; Tom Hassett, treasurer; Clarence Anderson, reporter; Charles Rust, sentinel; and Curt Nelson, Richard D. Johnson and Denis Gross, officers-at-large.

## What a MATHEMATICIAN can do at IBM

Mathematics is an ancient but ever-advancing science that contains many forms. It shouldn't surprise you then that it took some time before John Jackson discovered the one brand of mathematics that seemed custom-tailored to his ability and temperament. John is an Applied Science Representative, working out of the IBM office at 122 East 42nd Street, N. Y. C.

First of all, what's it all about? What does a fellow like John Jackson do all day? In his own words, "I keep in touch with the executives of many different companies—advising them on the use of their IBM electronic data processing computers. I personally consult with these customers, and analyze their scientific and technical problems for solution by IBM. Occasionally, I'm asked to write papers, and give talks and demonstrations on electronic computing. All in all, it's pretty fascinating . . . something new pops up every day." In other words, John is a full-fledged computing expert, a consultant . . . and a very important person in this

The aircraft people decided that they couldn't afford to wait that long, so they called in IBM. After discussion with top executives, John helped to map out a computer program that saved the organization over 100 days

Mapping out a computer program

of pencil-chewing, nail-biting arithmetic. Later, for this same company, John organized the establishment of computer systems for aircraft performance predictions . . . for data reduction of wind tunnel tests . . . and for wing stress analysis. At the same time, he worked with this company's own employees, training them in the use of IBM equipment. John still drops around to see that everything is running smoothly.

Another service that John performs is the constant reappraisal of each customer's IBM operation. Occasionally, a customer may tie himself in knots over a procedural "stickler." Periodically, in fact, John brings IBM customers together . . . just to talk over what's happening in each other's business—how everybody else handled that old bugaboo in any industry . . . details.

### New field for Mathematicians

John is exercising his mathematical know-how in a field that was practically unheard of ten years ago. Even now, this kind of work may be news to you. It was to John Jackson a few years back when he was an undergraduate at the University of Colorado. At that time, he was considering actuarial work or mathematical research. But John liked the excitement and diversification of science and industry and he wanted to use his

mathematical background in both of those areas. It was not until he was interviewed by IBM that field computing whetted his scientific appetite. A few months later, John launched his own IBM career as an Applied Science trainee.

Promotionwise, John has come a long way since that time. He's now an Applied Science Representative in one of the busiest, most responsible offices in the IBM organization . . . mid-town Manhattan.

With his wife, Katherine, and daughter, Lisa, 20 months, and John,

Discussing a problem with colleagues

Jr., 6 weeks, he enjoys his suburban Port Washington home. He's happy and he's satisfied. And then, too, John knows a few vital statistics about IBM . . . such as the fact that the Applied Science Division has quadrupled during the past three years, and that in 1956 alone, over 70 promotions were conferred. If ever a future held promise, here is one.

IBM hopes that this message will help to give you some idea of what a mathematician can do at IBM. There are equal opportunities for E.E.'s, M.E.'s, physicists and Liberal Arts majors in IBM's many divisions—Research, Product Development, Manufacturing Engineering, Sales and Technical Services. Why not drop in and discuss IBM with your Placement Director? He can supply our latest brochure and tell you when IBM will next interview on your campus. Meanwhile, IBM will be happy to answer your questions. Just write to Mr. P. H. Bradley, IBM, Room 8701, 590 Madison Avenue, New York 22, N. Y.

Calling on a customer

coming age of automation through electronics.

Since the IBM laboratories are always devising easier and faster ways to solve the problems of science, government, and industry, an Applied Science Representative can never say he's learned his job and that's the end of it. At least once every two months, he attends seminars to be updated on the latest developments in engineering and operations research.

### Introduces new methods

During the two years that John has spent with IBM in Applied Science, he has guided innumerable IBM customers to new and better ways of doing things electronically. For example: about a year ago, a leading aircraft manufacturer wanted to experiment with a radically different design for a nuclear reactor. Although the basic format had been established, the project still required many months of toil with mathematical equations.

# Students Reply To The Academy; Writer Believed To Have Wrong View

Gregorio of the Academy had quite a pessimistic outlook on women. By browsing through old papers I found the right answer to his column.

In 1947 Ernie Gullerud, who was at that time a member of the Bobcat Echo staff at the Benson County Agricultural and Training School, Maddock, N. Dak. wrote the following article.

"Men are what women marry. They have two feet, two hands and sometimes two wives, but never more than one dollar or one idea at a time.

Like Turkish cigarettes, men are all made of the same material. The only difference is that some are a little better disguised than others.

Generally speaking, they may be divided into two classes; bachelors and husbands. An eligible bachelor is a mass of obstinacy entirely surrounded by suspicion. Husbands are of three varieties: prizes, surprises, and consolation prizes.

Making a husband out of a man is one of the highest plastic arts known to civilization. It requires science, sculpture, common sense, hope, faith, and charity—especially charity.

It is a psychological marvel that soft, fluffy, tender violet scented thing like a woman should enjoy kissing a big, awkward, stubby-ninned, tobacco and bay rum scented thing like a man.

If you flatter a man it frightens him to death, and if you don't flatter him you bore him to death. If you permit him to make love to you he gets tired of you in the end; and if you don't, he gets tired of you in the beginning.

If you believe him in everything, you soon cease to interest him; and if you argue with him in everything you soon cease to charm him. If you believe all he tells you, he thinks you are a fool, and if you don't he thinks you are a cynic.

If you wear gay colors, rouge and a startling hat, he hesitates to take you out. If you wear a little brown beret and a tailored suit, he takes you out and stares at the woman in gay colors, rouge, and a startling hat all evening.

If you join him in the gaities of life and approve of his smoking he says that you are driving him crazy. If you don't, he vows you are snobbish and too nice.

If you are the clinging vine type, he doubts whether you have any brains; and if you are a modern, advanced, independent woman, he doubts whether you have a heart. If you are silly he longs for a bright person, and if you are brilliant and intellectual he longs for a playmate.

A man is just a worm of the dust; he comes along, wiggles about for a while, and finally

some chicken gets him."

Watch out, Big Boy!

ELAINE WILLY

Mr. Gregorio:

I had high hopes after reading the earlier articles by the Academy, that here at last we have an intelligent thinking group of students who have worthwhile thoughts and express them. However, the latest article proved to be a little more than a rable rousing oratorio which displayed an obvious lack of knowledge about human nature.

Your attack on women makes me wonder who the girl was. Really, I didn't know you cared!!

In future articles, please use the stiletto, not the bludgeon.

Name withheld by request.

Dere Editur:

Ever now and then I see one of those there Spectrums you fellers print up there. My niece uses it to wrap around bundles of the Fargo Forum she sends down to Mirandy and me.

I see that you have a sharp feller called Gregorio writin' comment on life and women and such like interestin matters. That's good. You fellers need something stimulating to offset all that guff you get in class. But me and the boys down here at the Punkin Junction pool hall have a couple of complaints to make.

Lots of what this Gregorio chap says is purest gospel, but he shouldn't ought to use some of the words he does. This "perverted" one that he used when he referred to women being like cats, I went down to the bookstore and looked it up in a dictionary and the way this Gregorio used it don't make real sense.

Nobody denies women are much like cats. It's a sure thing the Good Lord made them that way, and you might call their ways "natural". Any anybody that has had at least one mother-in-law knows that men and dogs have much in common. If it hadn't been for Gregorio's consideration of the ladies, I expect he could have said what he really meant. But, what we pool hoppers think is that Gregorio should have called men "perverted" too, if he said the girls were.

All of us "English and Banking" students down here at Punkin Junction admire that you can get ideas like Gregorio has presented to you. It shows us that you college kids are up to something besides fuzz growing and fighting' over cowbells. Next to Ann Landers, Gregorio's our favorite.

ZEKE

# Religion Stateside By Kay Wollan

With Religious Emphasis Week over for another year, I suppose everything will settle back to normal again. That's not the way it should really be, though. Perhaps we should put a little more emphasis on religion fifty-two weeks out of the year. There are lots of us who don't make it to church even once some weeks. Is a New Year's resolution in order, or would it be broken like all the rest we've made?

### YMCA-YWCA

The College Y is sponsoring an all-college party tonight at 8 p.m. There will be dancing, games and refreshments for all, so try to reserve some time to spend at the College Y tonight.

### WESLEY FOUNDATION

"Why Does God Allow Suffering and Death?" is the topic for discussion this coming Sunday evening at the Wesley Foundation meeting at the First Methodist Church. Rev. C. Maxwell Brown will lead the discussion. The meeting starts at 6 p.m. with supper.

Wednesday, Feb. 13, the group will meet with other Protestant groups for the United Christian Student Fellowship program which is being held every Wednesday throughout the quarter. Supper is at 5:45 in the College Y and the Social Forum will be on the program. Prayer group meets every morning at 7:40 in the Wesley Rooms.

### NEWMAN CLUB

Last Sunday evening the NDAC and MSTC Newman Clubs had a social gathering at the KC Hall. It was a big success and so more of these are being planned.

The next meeting will be held on Feb. 17 when new members will be initiated and pictures for the Bison annual will be taken. All members are urged to attend.

Those who signed up for the ping pong tournament at the house are asked to check there or with Harvey Fiala as to when and whom they play.

# Sigma Alpha Iota Initiates Nine

Nine girls were recently initiated into Sigma Alpha Iota active chapter. They are: Diane Aslakson, Dorothy Eloffson, Mary Louise Gludt, Harriet Godhes, Ellen Pflugrath, Betty Snyder and Kay Sunderland.

Sigma Alpha Iota will hold its monthly musicale Feb. 13, at 8 p.m. on the MSTC Campus.

Those participating in the program will be: Betty Shipley, Mary Louise Gludt, Nancy Blinkenberg, Bonnie Short, Mildred Holstad and Mrs. Marion Adams.

# SC Coed Named To Staff Of Women's Magazine

Mitzi Mallarian, a pledge of Kappa Alpha Theta, and a freshman English major at NDSC, has recently been chosen a member of the Mademoiselle 1957 College Board.

In competition with 650 college students Mitzi wrote an essay, a short story poem and a fashion article to win a cash award and third place on the board.

She is the NDSC reporter for Mademoiselle on college life and campus activities. Now vying for the job of one of the Mademoiselle 20 guest editorships, Mitzi must complete two assignments. The first of these is an article on the campus bookstore.

Next June the guest editors will be brought to New York for four weeks to help write, edit and illustrate the August 1957 issue of Mademoiselle. During their stay in New York, these girls will receive a \$250 wardrobe and will tour the city.

## HERE IS THE THIRD TIE-BREAKER IN OLD GOLD'S

# TANGLE SCHOOLS

### PUZZLES

#### TIE-BREAKING PUZZLE NO. 3

CLUE: This West Coast state university, chartered in 1868, has campuses at various locations throughout the state. Degrees in oceanography are among those conferred by this institution.

CLUE: Named for its founder, who also founded the Western Union Telegraph Company, this eastern university has many schools, among which is one for hotel administration.

ANSWER 1 \_\_\_\_\_  
ANSWER 2 \_\_\_\_\_  
Name \_\_\_\_\_  
Address \_\_\_\_\_  
City \_\_\_\_\_ State \_\_\_\_\_  
College \_\_\_\_\_

Note: Above puzzle requires 2 answers. Hold answers for mailing instructions.

All participants who completed the initial set of twenty-four puzzles correctly are required to solve a series of eight tie-breakers, in order to compete for the prizes in the tie.

Remember—first prize is a tour for two around the world and there are 85 other valuable prizes.

(SPECTRUM Photo)

**Howard Heil**

Howard Heil is one of coach Bentson's first line replacements. Howie stands at 6' even and plays a fiery forward. Rebounding and clutch scoring are his specialties.

He has played in all but one of the Bison games so far and can always be counted on for needed spark.

Heil, a transfer from Moorhead State Teachers, is a senior and a member of Sigma Phi Delta Fraternity. His home is at Hancock, Minn. and is a better than average student scholastically.

(SPECTRUM Photo)

**Hib Hill**

Hibbert Hill, known best as "Hib", is a junior in Civil Engineering and is one of the two married members of the Bison squad. He transferred from Bismarck Junior College last year and became eligible just this quarter.

Hib won all-state honors for basketball while toiling at Valley City High School and played all of last year on the Bison Freshman team.

As speculated earlier, he is rapidly improving to the point of excellent playmaking. Look for great things from Hib Hill in the future.

**Students Express Varied Opinions On Aid To Hungarian Freedom Fighters**

The inspired Hungarian revolt for freedom proved to the world there is still a desire for liberty and independence behind the Iron Curtain. But heartbreaking to freedom-loving nations of the world was their inability to give Hungarian freedom fighters anything but moral encouragement, lest other action precipitate a general war between the East and the West.

Associated Collegiate Press sought to gain collegiate opinion on this issue by asking the following question of a representative national cross-section of college students:

"Do you feel there is any way, short of war, in which the United Nations can help Hungary regain its freedom?"

The results:

	Men	Women	Total
Yes, in a way	51%	44%	48%
No, is no way	30%	24%	27%
Undecided	19%	32%	25%

Roughly half of the students feel there are ways to aid Hungary in its attempt to regain freedom. The most common feeling seems to be that the free world, and especially the United Nations, should exert pressure of various sorts upon the Soviet Union, such as economic boycotts. Others feel diplomatic maneuvers are the answer while some believe another summit conference is necessary. And a few students feel we should go as far as to threaten Russia with war. Here are a few typical

responses:

"We should insist that communist satellites be allowed political independence by freedom of choice at the ballot boxes," is the opinion of a sophomore at the Rochester Institute of Technology (Rochester, N. Y.). A sophomore coed at the University of Nebraska feels this way: "I think Russia is too afraid to start a war and we could do almost anything to free Hungary."

A freshman coed at Jacksonville University (Jacksonville, Florida) believes the answer is "moral support and encouragement by the free nations," while a junior attending the Bernard Baruch School of Business, City College of New York, gives this observation: "We should place embargoes on Russian trade and send UN observers into Hungary." And a junior attending the Newark College of Engineering (Newark, N. J.), puts it this way: "Exert more propaganda pressure; Russia is highly sensitive to world opinion."

Students who believe that there is no way short of war to help Hungary regain its freedom either feel that Russia is too strong to bully or that the UN is ineffective. A sophomore attending Georgetown University (Washington, D. C.) exemplifies this latter position as he says: "The UN is not able to enforce any decision it may make because of its internal organization." Here are several comments typical of other points of view:

"Unless Russia would relax there seems to be no alternative other than war — much as we would hate to witness it," is the feeling of a sophomore coed at Villanova University (Villanova, Pa.) An Ohio University (Athens, Ohio) senior has this to say: "As one of the two most powerful nations in the world today the USSR will not allow outsiders to change its basic policy."

"You just can't talk with Russia and get anything done," is the opinion of a Yakima Valley Junior College (Yakima, Wash.) freshman, and a freshman coed at Moorhead State Teachers College (Moorhead, Minn.) states bluntly: "Russia has already stated that there will be an all-out war if anyone interferes."

Students finding themselves undecided on this issue generally have the same reason, which is typified by the response of sophomore coed at Christian College (Columbus, Mo.): "I just don't know enough about the situation to make a valid decision."

**Bison Drop Early Lead, Lose To Dragons 73-63**

The MSTC Dragons fought back from an early 13 point deficit to hand the Bison a 73-63 defeat on the NDSC court Wednesday night. The Dragons took their first lead of the game early in the second half, and held down continued Bison efforts to recapture the lead.

Sherman Moe and Ken Reitan led Dragon scoring with 28 and 21 points, respectively, and Dennis Anderson chipped in with 10.

Bison scoring was again led by Ken Flynn, as he combined nine field goals and seven free tosses for 25 counters. John Foss and John Campagna added 13 and 12 for the Herd, respectively.

## Herd Drops One, Wins One In SDU-Morningside Tilts

The North Dakota State Bison moved to a 3-7 North Central Conference mark by defeating Morningside, 90-73, after losing to undefeated South Dakota, 77-66, in a pair of basketball games here last Friday and Saturday.

Jim Truelson and Jim Daniels teamed up to lead the South Dakota invasion by scoring 21 and 26 respectively.

The Bison scoring was headed by Ken Flynn with 16 and John Foss with 15. John Campagna added 12 for the Herd.

Five men scored in double against Morningside. Ken Flynn rattled the laces for 28 and John Foss followed with 22. John Campagna had 12, Hib Hill 11 and Warren Arman scored 10.

Don Poppen scored 28 and Gary Erwin had 10 for the Maroons.

Flynn and Foss run first and second in Bison scoring. Flynn has score 265 points in 18 games for an average of 14.7 and Foss has a total of 248 in 18 games giving him an average of 13.8 points per game.

## Sport Shorts . . . by Mac

NOTICE—There is a crying need for two or three reporters to work in the Sports Dept. of the Spectrum. Qualifications: must be neat, aggressive, ambitious, hard working, industrious, intelligent, above average, inspired, modest young man. No experience is necessary.

Anyone interested should contact Don McKenzie at the Spectrum office or call 5-4148 or 2-3158. BT membership is included with privileges if selected.

Let's take a look at the coming U series. As I see it the Bison should win three of the four games in the series.

All year the Sioux have tried to play with only two men, center (Haaven) and (guard) Larson. In last week's game against South Dakota the Soox scored 18 field goals. Haaven scored 8 and Larson scored 7. This adds up to 15. Three other men scored one field goal each. Isn't that terrific? SDU had five men in double figures.

I have to agree that Haaven is one of the best pivot men I have seen for many moons but the inexperience of the rest of the squad hurts him tremendously. I think that maybe Larson spends too much time feeding Haaven. While this may be great for big Haaven it isn't showing up too well for the team.

The Bison show much more balance in the front line and in the back court than the Soox. The continued improvement of Hib Hill at center and the rebounding of John Campagna are going to spell big troubles for Haaven.

Flynn and Foss are a match for any pair of guards in the NCC and a lot is expected from these two in the series.

There is the possibility of a scoring duel developing between Flynn and Haaven, but this remains to be seen. I feel the Herd will make the Soox eat their own feathers by a team effort.

The Soox of upland abnormal have stooped to a new low. They have a picture of their nice big fieldhouse showing a large group of people watching a basketball game. The picture was taken during the Class A State basketball tournament. Was this picture just handy or don't people go to see the U play ball?

Some nasty comments for the NDSC Frosh team.

It seems that coach Cliff Hendrickson just doesn't have the material to work with, this is the worst frosh team we have seen for a long, long time.

The way the I-M All-Stars ran away with the Frosh last week only shows this a little clearer. Right now it does not look as if any of our frosh with the exception of one will ever make the grade to NCC standard of ball.

A feature on the Team-makers organization was planned for this week but I made an appointment to interview the head of the Team-makers on Friday and never got past the BT.

All loyal Bison Fans meet at the BT today to get primed in good fashion for next week . . . glurfff.

## SDU-SDS Continue To Lead NCC Play

NCC Basketball Standings South Dakota State and S. D. University continue to pace the North Central Conference with its perfect record. Both teams have won eight games while losing none. NDSC Bison held steady at fifth place over the week while North Dakota University replaced Augustana in the cellar.

STANDINGS		
SD State	8	0 1.000
SD Univ.	8	0 1.000
Iowa Teachers	3	4 .429
Morningside	3	4 .429
NDSC	3	7 .300
Augustana	2	6 .250
ND Univ.	1	7 .125

## Seek Sports Writers

The sports department of The Spectrum is in dire need of a couple more sports writers. Anyone interested in such a position is urged to contact Sports Editor Don McKenzie or anyone on the Spectrum staff. No experience is required, only interest.

# Sticklers!

**YOU'RE STRANDED** high on a peak in the Andes. Wind's rising. Thermometer's dropping. And the next llama for Lima leaves in 7 days. You reach for a Lucky... try every pocket... but you're fresh out. Brother, you're in for a *Bleak Week!* No cigarette anywhere can match the taste of a Lucky. A Lucky is all cigarette... nothing but fine, mild, good-tasting tobacco that's **TOASTED** to taste even better. Try one right now. You'll say it's the best-tasting cigarette you ever smoked!

**DON'T JUST STAND THERE... STICKLE! MAKE \$25**

Sticklers are simple riddles with two-word rhyming answers. Both words must have the same number of syllables. (No drawings, please!) We'll shell out \$25 for all we use —and for hundreds that never see print. So send stacks of 'em with your name, address, college and class to Happy-Joe-Lucky, Box 67A, Mount Vernon, N. Y.
