National Students Association Conference To Campus This Week

Famous Stage Show Slated For Campus

Fieldhouse Tomorrow

Lee Grabel is bringing the world famous Illusion Stage Review to the stage of the NDSC Fieldhouse tomorrow under sponsorship of the Panhellenic five girls.

The show will be seen Saturday afternoon at 2:30 with the evening performance scheduled for 8 o'clock.

The Illusion Stage Review will be featured including the illusion of shooting a lady from a cannon, the comedy of fire and water, magic of a pin-up girl and many others.

Tickets are on sale at Daven's drug store and may also be purchased from any Kiwanian. Tickets are priced at $1.00 for adults and children under 10 are priced at 35c for children with proceeds going to the United States savings and loan association for new blood, while the girls are saying "Why is it being spent" and "What are we spending it on?"

The Washington team is made up of two girls and three alternates. The first team consists of Miss Thelma Bunnell, first speaker, and Jamn LaCaspe, second speaker. Miss Bunnell and LaCaspe have identical records, having been teammates all through a season. Both are seniors at Washington.

Student Debaters To Clash In Festival Hall Tonight

B.W. LaCaspe and Jamn LaCaspe have identical records, having been teammates all through a season. Both are seniors at Washington.

They have won the Inland Empire Championship three times, the Columbia Valley Tournament three times, National Pi Kappa Delta Tournament, National Women's Sweepsstakes Award and are a member of Pi Kappa Delta Tournament.

The two girls on team two are Miss Charlotte McQueen and Miss Darlene Picetti. The other alternates are Misses Smith and Smith. All three are seniors.

This will be the third in a series of debates sponsored by the Lincoln Club Debates.

National Officer Visits Kappa Delta

Mina Florence R. Tryon, of Pensacola, Florida, visited Sigma Chapter of Kappa Delta sorority from April 8 to 11. Miss Tryon is the National Counselor of Kappa Delta sorority.

During her visit Miss Tryon conferred with the sorority officers and attended a series of regular meetings for new blood. If you are interested in working on the Spectrum staff, you are welcome at any phase of journalism, there is your chance.

A meeting of all people interested in working on the Spectrum to Hold Meeting For Neophyte Journalists And Any Interested Commentators

With a new year of publication rapidly approaching, the present Spectrum staff is making plans to attend the National Pi Kappa Delta convention which will be held in St. Louis, Missouri, in September. The national historian for the K.D.'s, and is Convention Manager for the St. Louis National Convention will be held in the Spectrum office Monday afternoon at 4:00 p.m.

Anyone who is interested in working on the paper or who has any comments on the present handling of the publication is welcome to attend. This will be mainly an organizational meeting, and several more will be held during the quarter.

Topics such as copy writing and editing, photography, layout, reporting, and special feature writing will be discussed at these meetings.

This is the opportunity for those of you want experience in journalism, but don't know where to look, who want to try it out, but don't know those of you who have suggestions of how to make this newspaper more interesting, and those of you who want information about how to get in touch with the newspaper staff, you should attend.

Remember, Monday afternoon at 4:00.

Senior Staff To Fete Mortar Board

Senior Staff, honorary senior service group at NDSC, will entertain all Mortar Board members at a dinner at the Fargo-Moorhead area hotel at 5:00 p.m. in the Founders Room of the Home Economics Building.

All Mortar Board members who have not been contacted, please call Miss Dinan, Dean of Women.

Brake, Pancratz To Exchange Words With Washington Debate Team Tone

At 8:31 tonight in Festival Hall the Lincoln Club and the Washington Club will hold a debate between a visiting team from Washington University. The question to be debated is: Resolved, that the United States should discontinue all economic aid to foreign countries.

The subject is one which is currently in the news, and concerns every taxpayer in the country. Such questions as "Is our money being spent wisely abroad?" and "Why is it being spent?" will be discussed.

NDSC will be represented by John Pancratz, EE junior, and Bob Brake, AAS sophomore. Funds and Brake will take the negative stand and defend the economic aid, while the girls are saying "Should we continue economic aid?"

The Washington team is made up of two girls and three alternates. The first team consists of Miss Thelma Bunnell, first speaker, and Jamn LaCaspe, second speaker. Miss Bunnell and LaCaspe have identical records, having been teammates all through a season. Both are seniors at Washington.

Be Held On Jamestown

Student Delaters To Clash In Festival Hall Tomorrow

United States National Students Association Conference To Jamestown College, Jamestown, N. D., will be held at NDSC; and Gus Wanke and Associated Association is sponsoring a conference on Student Government at Swenson, Fargo, N. D., both students at Concordia College, Moorhead, Minn.

This year colleges in North and South Dakota are attending the conference.

Girls Elected President of the Members of Tau Beta Sigma, National Engineers Society, have elected Mary Jane Marschke, Jodeen Paris, and Evelyn Storms as officers for the coming year. Elected president of the chapter was Mary Jane Marschke.

Works of Communications and Information will include duties of former Public Relations Director Merle E. Nott, who will leave NDSC in May to take a new position in Arizona.

Cron, a native of Hampton, Iowa, came to NDSC in 1953 from Washington, D. C., where he has been a member of the Department of Agriculture in Radio and television broadcasting. Cron was also in radio broadcasting with station WMT in Cedar Rapids, Iowa and also in radio and television broadcasting with station KGLO in Mason City, Iowa.

Mr. Cron received his B.S. degree from Iowa State College, Ames, Iowa, in 1950 and his M.S. degree from NDSU in 1956.

He is a member of Sigma Delta Epsilon fraternity, the National Association of Radio Farm Directors, Blue Key, Rural Life, and a member of the Faith Methodist church. He is a veteran of W.W. II, having served in the U. S. Navy for two years.

Mr. Cron is married, has three children, and resides at 201 20th Avenue North in Fargo.
"From the Editor's Desk..."

By Gerry Bender

The time approaches when many of us will embark upon a new life. In the case of most of us, our college life, but rather we will find ourselves in a position where we have to get up in the morning and go to work.

I suppose there will be a few of us who remain in the state of North Dakota, but in the main, we will have to take up residence somewhere else.

This same day your next-door neighbor will walk up to you and say, "And why didn't you stay in North Dakota?" And you will more than likely say something like this: "I had enough of those damned North Dakota winters and heat summer with the wind blowing dust in my face all day."

And there you have it... right there. The reason that the mere mention of North Dakota causes people to flinch and start searching for places farther south, is because of the three states where the thermometer dips lower each winter than here in N. Dak. They are Minnesota, New York and Maine.

And while the thermometer may dip lower here than in many other states, the cold here is much easier to take than the humid cold that you will run into in any coastal state where the temperature gets as low as 20 degrees.

And then the wind and dust. Do you know of a state that could beat Texas when it comes to dust and windstorms? And any of us who have ever made fun of Texas in front of a Texan can vouch for the loyalty of Texans, as a group, to their state.

But it is true that if we have the state can do a lot toward promoting the state merely by saying the right thing when speaking about our old state. Don't be apologetic, but rather promote and things about it. When something is known to think about it, it isn't really such a bad place.

North Dakota has an illustrious history and the political side alone gives us all plenty of right to be proud of North Dakota. We have not even been a state for 100 years yet, and look at the progress we have made in so short a time.

And look at the rate that progress has taken place. Many of us can remember when we had no electricity or the farms where we grew up, the nature of other sections could not be named that have come into the state largely in the last 15 years.

In the space I have here I cannot hope to point out the things that you should be proud of concerning North Dakota. The important thing is that we should all remember to be publicity minded when taking of North Dakota. Remember our oil wells, our Garrison Dam, the cold and starters, and all other points that our state can boast over all others.

North Dakota has been good to us, let us be good to it!

Aesthetic Values
Cited in N.D.S.C. English Course

By Bev Pfeifer

"What is the symbolism in this passage?" asked one of the students in the second largest class taught at the university. The Eternal time and time again. (For the information of you who haven't taken the course on symbolism in the humanities No. 300, symbolism is utilized in the English professors ask you to study.)

For the benefit of all students in this class, and to try to interpret the author's use of color symbols this writer will try to explain some data on the symbolic background of color.

Red derives much of its import from life itself. A bright red means vitality, energy, warmth, cheer and gaiety.

Green is a color for renewal, stands for royalty, and all important documents are signed by the emperor with a red pen. It is a fact which may or may not parallel our use of red seals on important documents or the red pencil for various official purposes. In old Russia, red was the color of royalty and ceremony. The connotation of the color is well maintained for the century at least.

To the Chinese, yellow is the color of study. The yellow emperor may wear a pure yellow robe, as yellow is the marriage color. It is the color of gold, and it signifies purity, justice and wealth. To the Early Christians yellow was the color of faith, and to the Chinese of age, and the yellow gay also has come to mean wealth and immortality, and is a color which is instinctively loved by all.

Green is the color of life, faith, and hope. This is one color where there are fewer evil associations than with others.

Blue is the favorite color of the American people, is associated with peace, reflection, honor, dignity, and with above all, with nobleness, and truth. Blue eyes are sometimes called the eyes of the world. More beautiful than brown regard theennis. The color of water, blue is the color of the sea, and the color of the sky.

White, for most people means purity, truth, humility, light, innocence, and joy. It has represented virtue among many peoples, and the white horse is a symbol of knowledge and humility. White is also the color of the Lone Ranger Knows Everything. White may mean fidelity and excellence above all, and also, quite to the contrary, it may mean indolence and recognition of defeat.

Death is nearly always symbolized by black, and a black unity is totally black is the color of the center of the universe. Another is mystery and wisdom and can indicate science and thought.

The black color is the most popular ones that authors utilize. Black is often used when to use symbol and when not to have be debated through the years. The color black is not always significant, but to say when—if at any time you are using the color black, and to the students a little inside information on what the proffs already have from their experience.

You are prepared for the coming chaos of English 2001! Of all people interested in playing hedge.
Did You Know?  

By Corky  

Editor of the Spectrum are greatly concerned because they 
reporter departments. The editor is trying to gather news. 
for ALL news on campus, and it is not a news desk. They try to gather news. 
for getting news in the Spectrum: 
operation from, college departments, and campus organizations. 
makes sure that all organizations 
cover news releases to offer news to students. They offer these suggestions for getting news in the Spectrum: 
write. The editors offer one final suggestion: if you want to be a news paper, you should have a copy of this magazine. 
ne customer story. 

Spectrum editors are “silent” departments on campus trying to gather news. 
In the past, this practice has generally failed because reporters are “given the run-around” or told “come back next week.” Spectrum editors naturally are not “hard-boiled and persistent.” 
When they fail to pick up stories, they get discouraged and stop making calls, and the department is still “silent.” 
You can help by making notes of speakers, interesting courses and other news events for these reporters when they do call. If you have a story but no reporter shows, call the Spectrum office (5-0060) and leave a note for the editor telling about the topic. 

3. Each quarter between 25 and 58 students take the basic journalism class on campus. Students are continually seeking stories they can write. The better stories are offered to the Spectrum. So if you want to try that method and to help out a long-suffering student too, drop a note to Verne Nie, in Minard Hall. He can assign the story in class. 

4. You can usually find some member of the Spectrum staff in the publications office (second floor) holding a phone, trying to get a story. Drop up and tell your story. You may find three or four “publicity minded naturally first, but this works, too.” 

The editors offer one final suggestion: if you want to be a newspaper paper, you should have a copy of this magazine. There’s no better way we can think of for getting your news into print. 

Arnold Air Elects  
Reuber Commander  

Darrell Reuber, a junior in the School of Applied Arts and Sciences, was elected Commander of the Arnold Bennisson squadron of the Arnold Air Society. Reuber is a member of Alpha Gamma Rho fraternity, and was director of this year’s AFROTC Talent Show.

Other officers elected were: Don Peterson, Executive Officer; Jim Harmon, Operations Officer; Fred Flanders, Adjutant Recorder; Brian McDaniel, Commando; and Jim Meier, Information Services Officer.

Eugene Gleeson, a Junior in Engineering from Chicago, is the new President and President of Theta Chi Fraternity. Installations were held at the chapter house earlier this week.

Other new officers for the coming year are: Lynn Anderson, vice-president; Lee Dybing, secretary; John Gustafson, treasurer; James Conroy, pledge Marshall.

Skerik Named To Head  

ASCE’s For ’57-’58  

Richard Skerik, junior in CE, has been chosen president of the American Society of Civil Engineers for the coming year. Other officers for the ASCE are: Richard Peterson, vice president; Dave Dain, secretary; Earl Wilson, treasurer; Charles Kahl, engineering council representative; and Mr. B. C. Butler, faculty advisor.

UND Invites NDSC  
Students To Prom  

The UND Prom Committee has extended an invitation to the entire NDSC student body to attend their annual spring dance tonight in their Student Union Ballroom. Julieta Herman will furnish the music, dancing will be from 9 to 1 and the dance will be formal, but corsages are not in order.

THE PULSE-POUNDING SAGA OF  
DE WITT CLINTON, AMERICAN  

Let us today turn our eager young minds to the inspiring story of De Witt Clinton, one of the greatest figures in American history and — unaccountably — one of the most neglected.

De Witt Clinton (sometimes called Aaron Burr) first made himself known to fame in 1756 when Governor William Penn commissioned him to survey the forests of the Western Reserve. (One is inclined to wonder what in the world could Governor Penn have been thinking of, for De Witt Clinton was eighteen months old at the time.) However, the little chap did remarkably well. He surveyed as far west as Spokane, teaching phonetic English to more than twelve million Indians along the way, and then, tired but happy, he became Johnny Appleseed.

Later, he became a keelboat and sailed home to enter politics. He tried to join the Greenback Party, but his back wasn’t green enough, so he joined the Whigs.

He was offered the Whig nomination for the presidency, but declined with the celebrated statement: “If nominated I will not run; if elected I will not serve.” But the Whigs only nudged each other and said, “That old fox, he’s just playing hard to get.” So they nominated him anyhow, and sure enough he did run, but he was elected anyhow, and sure enough he did not serve. In fact, he was elected to a second term, which he also did not serve. However, only a few top Whigs knew there was nobody in the White House. The rest of the country thought that the President was confined to his room with a wrenchcd knee. For a while people sent “Get Well” cards, but soon everyone forgot and turned their attention to important matters like opening the west, inventing the buffalo, and the Black Tom Explosion.

After two terms as President, De Witt Clinton entered Yale and took up smoking. He tried several tobaccos, but kept telling his friends that he, for De Witt Clinton, must now be forever separated from his beloved Philip Morris!” (You knew I was going to say that, didn’t you? Well, of course you did, especially if you are a Philip Morris smoker. If you are, you know what a sweetheart of a smoke Philip Morris is — how full of rich, natural flavor, how natural and mellow, how long size and regular. And if you are not a Philip Morris smoker, you’ve got a treat coming. Light one soon. Light either end.)

Upon graduation from Yale, De Witt Clinton became commissioner of baseball and smoked and loved Philip Morris Cigarettes for the rest of his long and distinguished life, and when at last he was called to his reward, his friend Old Hickory (Daniel Webster) stood up in the Senate and said, “How sad that De Witt Clinton must now be forever separated from his beloved Philip Morris!”

“No!” cried Pitt, the Elder (Henry Clay), bounding to his feet. “We need not separate De Witt Clinton and Philip Morris. I know how to keep them together always!”

And, sure enough, if you will look at the blue federal tax stamp on your pack of Philip Morris, guess whose picture you’ll see. De Witt Clinton’s! That’s whiz.

Queen of the bestselling cigarette cards! De Witt Clinton’s was eighteen months old at the time.)
Education And Married Life Get Best Of Proud New Father

(ACP)—Mixing college and marriage can sometimes be too much for one's nervous system. Upon the arrival of his second child, a student at Northern Oklahoma Junior College—so says THE SPECTRUM—called friends with the news:

"It's a father. I'm a girl! I'm a girl!"

Art Exhibition Scheduled For May

An faculty and student art exhibit, including painting, graphics, ceramic, and textile design, is being planned for May and will be displayed in the library. Both faculty and students are urged to participate. Interested artists and craftsmen may contact Richard Lyons in the library for additional information. Ceramists and textile designers may also see Miss Weisner in related areas.

Guides Set Forth To Aid Students In Obtaining Proper Study Habits

Would you like to know how to study and like it? There is no royal road. Each student must develop his own study technique. However, certain principles will help if you understand and apply them.

- Keep yourself in good physical and mental condition. Get regular exercise. Eat simply and avoid too much starch and sugar. Get plenty of rest and don't let colds turn into something worse.
- Learn to relax—it is the secret of mental conditioning. Don't be a fiddler. Begin promptly and finish what you start.
- Attempt to see courses as a whole and the relation of each assignment to the whole. Understand the assignment before leaving the classroom and try to grasp the problem which is presented.

The idea that slow readers are not really slow is pure superstition. It pays to learn how to improve your reading speed by increasing your vocabulary, and increasing the number of words you see at a glance.

- Learn to use the library. Know how books are catalogued and practice using the card catalogue.
- Don't fight exams. Understand the questions and do your work carefully as you go along. Don't spend too much time on one question.
- Learn to concentrate and really know the secret of careful study. Learn to disregard distractions by persisting in spite of them. When you study—study, when you are through—quit.

Fredrick Named AGD President

Nancy Fredrick, junior in Home Economics was recently installed as president of the Alphard Sigma sorority at North Dakota State College. She succeeds Janet Ferdinand.

Nancy, a Fargo girl, is corresponding secretary for Phi Upsilon Omicron, a member of Kappa Delta Pi, Tryota, Guidon, Associated Women's Senate Executive Board and has held the offices of recording secretary, first vice president, and fourth president of the sorority. Other officers elected are:

1st vice president, Donna Bisau; 2nd vice president, Anna Mae Dye; recording secretary, Joyce Mier; corresponding sec.; Ellen Seim; treasurer, Lois Bursack; assistant treasurer, Karen Zelzidler; activities chairman, Judy Humston; rushing chairman, Joyce Yochum. Ch. of names, Marcia Judd.

Holbrook Plays Superb Performance As He Does Masterful Imitation Of Mark Twain

Holbrook, completing a picture of Mark with a white suit, white hair and mustache, and ever-present cigar, carries off the program in true Twain fashion. He gives liberal instructions on using books, lies, old firearms, and on maintaining high personal character. He rectifies a portion of "Huck Finn" and "Innocents Abroad" for us.

The whole act was filled with top-notch humor. Abundant The result? You lose five pounds! Sounds easy doesn't it? It is. Of course you don't care if you ever see cottage cheese again, but why worry? Next week you can try the Rockefeller diet.

The Rockefeller diet is a formula with every necessary ingredient to supplement a natural daily diet. This too is a simple diet. You drink only four glasses of milk spiked with fabulous formula every other day. So it says on the package anyway.

George (Allen) Redlin, a junior Civil Engineering, has been in­vited as president in the Tau Epsilon fraternity. Allen is from New Town, N. Dak.

Pleasingly Plump Individuals Now Have New Diet To Try

Most people find it difficult to get by a second glass. What is fabulous about this formula is that it upsets your system so completely you vow you'll give up everything—even food, if you only can stop taking this formula. Therefore in sticking to your resolution you lose weight!

It is a fact that overweight is a danger to health and shortens your life, but if you're a person who likes food, you'd rather be dead than hungry all the time or eating the unappetizing messes diet experts dream up.

As Navigator or Pilot

The flying U. S. Air Force is a team of men who command the aircraft and men who plan the attack. These are the pilots and navigators, both equally important to the defense of America.

Get on the Team That Defends America

You, as a young man of intelligence and sound physical health, may join this select group in the world's most exciting and rewarding adventure. Your training will stand you in good stead, whatever your future plans may be—and you'll be earning over $6,000 a year 18 months after training.*

If you are between 19 and 26½ years of age, investigate your opportunities as an Aviation Cadet in the U. S. Air Force. Priority consideration is now being given to college graduates. For details, write: Aviation Cadet Information, P. O. Box 7608, Washington 4, D. C.

Graduate—Then Fly... U. S. AIR FORCE AVIATION CADET PROGRAM
Bridge Players Meet

There will be a meeting in Meinecke Lounge Tuesday evening for everyone interested in playing a few hands of bridge. The play will begin at 7:00 p.m. and is open to all interested—either in beginning or advanced bridge. If you have questions contact Gordon Kepner or Donny Cunningham.

ISA Elects Trisko

"What's it like to be A SYSTEMS ANALYST at IBM?"

Two years ago, college senior Thomas Wheeler asked himself this question. Today, a Systems Analyst in IBM's Data Processing Division, Tom reviews his experience and gives some pointers that may be helpful to you in taking the first, most important step in your business career.

"What I probably like most about this job," says Tom, "is that you're never tied down to one desk and the same routine. There's always a new problem ... a new approach needed ... new people to meet and work with."

But first, what does a Systems Analyst do? "Briefly, we study a customer's present system—payroll, inventory control, billing or what have you—and convert it to a streamlined system using either conventional IBM business machines or IBM's high-speed electronic computers."

Tom works out of the IBM Baltimore Office with some of America's biggest companies as his customers. Graduated from John Hopkins in August, '55, with a B.S.E.E., he came immediately to IBM. During his training period, Tom studied IBM's Punched Card and Electronic Data Processing Machines. He learned their operation, their applications, and was instructed in the theories and methods of data processing.

Diversified Assignments

A leading aircraft company was Tom's first major assignment. "My job there," he explains, "was to analyze the application of IBM's latest electronic computer—the 705—to regulate the flow of materials and machines used to fill Government contracts." Then came a short, but highly satisfying assignment. At the Bellwood Quartermaster Corps, Tom set up a "SOAP" system (System for Optimum Automatic Programming) designed by Tom as "converting the flow of instructions and information into the most efficient operation for an IBM magnetic drum computer. Bellwood." Tom points out, "is the Inventory Control Center for all Quartermasters in the country. The new system will achieve balanced supply and demand of material throughout the entire U.S.—will save money for the Government—and relieve many men from the drudgery of details."

For the past six months, Tom has been working with the Statistical Services Division of Headquarters Air Research & Development Command.

Why Tom chose IBM

How does a senior like Tom, who was graduated by at least twenty companies while in college, select his future employer? "In my case," Tom says, "the choice was easy. IBM offered the best opportunities. I knew IBM sales were about doubling every five years—and when I considered the tremendous growth potential of the electronic computer field—I had no trouble making up my mind."

"Besides, I was impressed by the caliber of IBM personnel. They had a broader outlook and an approach to business which I can best describe as professional."

"My future? It looks good—very good. I've already received two generous raises in less than two years, and at the rate IBM and the electronic computer field are expanding, my future is both assured and rewarding!"

"IBM hopes this message will help to give some idea of what it means to be a Systems Analyst in the Data Processing Division. There are equal opportunities for E.E.'s, I.E.'s, M.E.'s, physicists, mathematicians, liberal arts majors, and even the Administration graduates in IBM's many divisions—Research, Product Development, Manufacturing Engineering, Sales and Sales Assistance."

"Why not drop in and discuss IBM with your Placement Director? He can supply our brochure and tell you when IBM will next interview on your campus. Meanwhile, our Manager of College Relations, F. H. Brown, will be happy to answer your questions. Just write him at IBM, 11300 Campus Drive, Madison Ave., New York 22, N. Y."

Michael D. Brandvik, former NDSC student from Fargo, N. D., is presently a Naval Aviation Cadet, and is attending Pre-Flight School at Pensacola, Fla. Brandvik at tends to his training before going in to the Navy, and was active in Alpha Gamma Rho, the Saddle and Sir Club. He majored in Animal Husbandry.

Brandvik

"I am for direct financial aid. I am in favor of because I like to watch a winner. And who doesn't?" How many times in the past few years have you heard "Why watch those guys play ball, they always lose anyway?" Why do we have pep rallies or alumni organizations always backing the team? Why? Because everybody wants a winning team.

"Why not drop in and discuss IBM with your Placement Director? He can supply our brochure and tell you when IBM will next interview on your campus. Meanwhile, our Manager of College Relations, F. H. Brown, will be happy to answer your questions. Just write him at IBM, 11300 Campus Drive, Madison Ave., New York 22, N. Y."

Former Campus Leader

Becomes Jet Pilot

Second Lieutenant Ray D. Hord, class of '55, recently received the silver wing of an Air Force jet pilot at Las Vegas, Nev., at the Los Angeles Air Force Base, Los Angeles, Calif. His graduation culminated four years of intense pilot training in both propeller and jet type aircraft.

Horne attended NDSC from 1951 to 1955, was active in Alpha Tau Omega fraternity, and in many other campus activities, and received his commission through the AFROTC program. He majored in Agriculture while a student here.

Mrs. Horne is the former Mrs. Earl Kraus of Fargo, also 1955 graduate here. They have one son, Bradley Ray.

Ken Flynn Named To All-Opponent Team By SDU

Ken Flynn, all-conference Bison center, was named to the all-opponent team picked by South Dakota University. Jim Sutton of Dakota. He will return Monday.

Kaiser Attending HPER Convention

Kay Kaiser, NDSC physical education director, left last Monday to attend the Central District Physical Education and Recreation convention in session at St. Louis. Kaiser is chairman of the SDSU represented the NCC in the National small college basketball tournament this season and is defeated by Wheaton in the semi-final round.

Lost and Found

Lost—an all-conference Bison last season is back. Won is blind but we need to get outside before the squad can shape up defined.

"Our number one weakness will be lack of a long ball hitter, so we'll have to depend on sharp base running and timely hitting for our offensive strength."

Bentson reports: "We can field veteran team in almost all positions. Our main lack of depth will be pitching but we should be bolstered by the addition of Jim Lave, whom we know can win in this league."

"Don Wonner, a relief specialist last season is back. Wonner is bailed for a starting role."

"Another pitching prospect is Doug Melles. Still his capabilities are unrated because of limited experience. Bill Burtess, up from last year's freshman team, should pan out."

"However," Bentson continued, "our main hurling weakness will be lack of any left-handed pitching."

"20.00 Premium, vice president; Caroline Kaiser is chairman of the SDSU HPER board in North Dakota. He will return Monday.

Bowling Tourney Starts May 10

All bowling fans are reminded that the Strikes and Spares tourney coming up the tenth of May. This tourney is sponsored by the Student Union Activities Board.

The tournament is open to all students and the only expense involved is that of the bowling which is $3.00 per line.

Trophies for the event will be on display in the windows of the lower lobby in the Union soon. Also on display will be the trophies which will be given for the high individual games—both men's and women's.

LAB STUDENTS (and most folks with a flair for the scientific) know that one Lucky is an Ample Sample—conclusive evidence that Luckies are the finest smoking anywhere! Check this yourself. Try a couple—or a carton. You'll find that every Lucky tastes as good as the first one. You see, every Lucky is made of fine tobacco... mild, good-tasting tobacco that's TOASTED to taste even better. Light up a Lucky right now. You'll agree Luckies are the best-tasting cigarette you ever smoked!
Engineers Rated As Poor Job Hunters

Engineering graduates were challenged as " sloppy job hunters" by R. K. Backlund, interviewer for Minnesota Mining and Manufacturing Co., at the Pi Tau Sigma winter initiation banquet held Thursday evening, March 7, in the Union Ballroom.

Speaking on "The Art of Getting a Job," Backlund said, "Students seeking employment, especially engineers, are taking advantage of the buyer's market that exists. Too many interviews are a waste of time. A little careful preliminary investigation will often permit a job selection on the basis of opportunity instead of the dollar sign."

"When the winning and dining is over," he continued, "The everyday routine may become drudgery. Long range planning is an important consideration that is often overlooked."

"Engineering as a profession," he concluded, "involves the solemn responsibility to work for the benefit of mankind."

Prof. E. G. Hosted was initiated into the local chapter as an honorary member. James Bauer, Milton Berg, Dave Hilling, J. K. Peterson, Glenn Nermeyer, and Richard Wilson were admitted as undergraduate members at the initiation ceremony held before the banquet.

Long range planning is an important consideration that is often overlooked.

Who rates what for performance and smoother riding in the low-priced three? Chevrolet has had the answer and the proof on the line!

First, Chevrolet won the Auto Decathlon over every car in its field, and over the higher priced cars that were tested, too. This rugged ten-way test (right, below) showed Chevrolet was the champ in handling ease, braking, acceleration, passing ability, smoothness of ride and other driving qualities you want in a car.

Then, Chevy won the Pure Oil Performance Trophy at Daytona (left, below) as "best performing U. S. automobile."

It's quite a feeling to know that you are driving a car that performs so well, responds so beautifully and is so finely built. You feel proud, of course. But you also enjoy a surer, smoother, steadier way of going, a keen cat-quick response of power, and the easiest handling you've ever experienced behind a wheel. Just try this Chevrolet (V8 or Six) and see!

Chevy showed it's still the champ... at Daytona... and in the Decathlon!
