Nine Gradis Revealed By Annual As 1956-57 Senior Personalities

Nine graduating seniors have been named senior personalities for the 1956-57 school year. This was revealed as the Bison annuals were distributed this week.

The individuals were selected by a committee of students and faculty members, and selection was based on scholarship, personality, contributions to college life, and campus activities.

Shirlene Schnell is past president of Gamma Phi Beta sorority, and has been a member of Alpha Delta Phi, Kappa Delta Pi, Phi Upsilon Omicron, and Try-Theta. Gaylord Olson spent the last year as Commissioner of the Student Union and president of the Farmers Union Coop House. He was also a member of Alpha Zeta, Ag Econ Club, Blue Key, Student Senate, and the Honor Code Commission.

John Haas, varsity basketball player, student senator, and member of Alpha Gamma Rho. Besides these activities John has been a member of Alpha Zeta, Blue Key, Kappa Delta Pi, and president of the Collegiate FFA chapter. Dianne Swenson fills out the list as he completes his military duties for the regular army or regular marine corps. Nevada has also spent time singing with the choir.

Staff and Kappa Delta sorority. Besides these activities she has been a member of Women's Senate, Golden, Kappa Delta Pi, Phi Upsilon Omicron, and Try-Theta.

Gaylord Olson spent the last year as Commissioner of the Student Union and president of the Farmers Union Coop House. He was also a member of Alpha Zeta, Ag Econ Club, Blue Key, Student Senate, and the Honor Code Commission.

John Haas, varsity basketball player, student senator, and member of Alpha Gamma Rho. Besides these activities John has been a member of Alpha Zeta, Blue Key, Kappa Delta Pi, and president of the Collegiate FFA chapter. Dianne Swenson fills out the list as he completes his military duties for the regular army or regular marine corps.

Six Seniors Eligible for Army Commissions

Six seniors have been designated as distinguished military graduates for the school year ending this month. They are: Robert Burke Richard Eng, John Larson, Ronald Nelson, Gerald Stork, and Robert Thiel.

Cedeta designated distinguished military graduates are eligible to apply for a commission in the regular army or regular marine corps.

Bishop has applied for a regular army commission.

First Meat Judging Contest Successful

The first college meats judging contest held at Armour Packing Company May 23, was judged a success according to Dr. V. K. Johnson instructor of meats here at NDSC.

The contest was split in two parts. Four classes out at the Armour's plant included hog, beef and lamb carcasses and a class of fresh hams. Second part, an identification of cuts of meat, was at the Sheepherder Arena on campus.

Nine contestants took part in the contest, according to Johnson, and it is hoped that that number will be doubled and next contest winners were Jim Schumacher 1st, Laverne Krell second.

Johnson said the contest has many purposes, one is, it helps create interest in inter of college meats judging contests held at Kansas City and Chicago, students learn to work under contest pressures, and finally, Johnson said, is learning to identify good meat.
The May 28 meeting of the Student Senate was highlighted by the granting of the Debate Club's request to use the Senate building for a new senator, and a review of the allocation of the Student Activity fees.

John Pancratz and other members of the Senate Budget Committee were present before Senate to again state their case for the appeal for the poor state of the Finance Committee. The committee was formed to study the financial statements and allocate the money properly. The Senate voted to grant the students money for the coming year. The proposals of the debate squad proved successful they will take the matter of financing to the student body in an effort to receive a share of the activity fee. The funds that the $750 will be paid back to the Senate over a five year period.

A WS

Pat Turner, president of the Associated Women Students, heads a delegation from that group which sought additional backing from the Senate for its activities. It was brought out that the backing AWS has received from the Senate at present is on a year to year basis. They proposed to have it put on a permanent basis. It was stated that the funds were used to defray expenses. They were concerned whether or not it would be feasible to cut the present allocation to the Spectrum in order to finance other organizations.

New Senator

Charles M. Kimball, a senior recommended by President McLain to fill the Senate position vacated by Jim Fairre, is worshipped, marched the aisles of the Forum. The new senator is a tall, lean fellow in a dark suit. He has been a member of the debate squad and is respected by his peers.

A WS

The A series still is not entirely complete. There are at least 10,000 glass negatives to be processed, 10,000 more prints to be made. The films seem to cover all the important events the early college thought important. There are pictures of the early tests, the first cow was buried, many of the early professors, and athletic teams. The films are a valuable record of the college's history.

Necessary Virtue

"It is basically our job to represent the Student Body to the administration and to other students. It is not our job to give out money uncontrollably. It is money to be obtained from various organizations, and most of them certainly deserve it. It is Student Senate's duty to attempt to find means of obtaining it. I cannot simply give money to any group who asks for it."

Therefore, I suggest to any group who wishes to present an appeal for funds to refer to the Finance Commission. This may be the only way that a student organization can arrange and meet with the Commission. This Commission will then present your appeal in the Senate in a condensed form with a recommendation of one way or other.

I think, I will save much time which is lost when the appeal appears before the Senate. The Senate, in fact, is to handle just this kind of situation. I hope that some of the ideas and methods shown here may be applied to this campus.

We are getting to be quite a college of films. We operate as such. To do that, things must be brought over from the high school scale to the college scale. It is basic to thinking. It is basic to thinking about what we are doing. It is basic to thinking about what we are going to do. It is basic to thinking about what we are going to do before we do it.

I hope that some of the ideas and methods shown here may be applied to this campus. We are getting to be quite a college of films. We operate as such. To do that, things must be brought over from the high school scale to the college scale. It is basic to thinking. It is basic to thinking about what we are doing. It is basic to thinking about what we are going to do. It is basic to thinking about what we are going to do before we do it.

Respectfully yours, 

Neal Bjornson

Y Members Make Journey To Lake

Sixteen members of the YMCA and YWCA retreated to a sanatorium in Pine Lake last weekend to make a tour of their summer and fall programs.

Plans were laid for a cantata to be given at the College Y. The program will include some of the Y Henryau schedule for fall include the annual Big Little Sister party, sock hops, at all Y's, and the Winter party. Y's went hiking, boating and some brave souls even went swimming.

Socially Speaking...

By Jean Anderson

AND WITH the writing of this column I give you my farewells... seems like the end of the year is sad in so many ways, and especially where the goodbyes are concerned. I'm sure that those of you who are lucky enough to be staying here will not be left to wonder, however, and will return next year, but not to this department. It has, however, been real... fun and fortifying. *

Can't you just picture a sapphire sky, a golden sun, birds singing— AND the tantalizing smell of food being cooked outdoors! What could be more perfect? One thing—and that is to assemble your favorite people and have a party. So let's move the music.
Work Started On Gamma Phi Addition

Work started this week on the house for their addition to the Gamma Phi Beta house. The addition, which was made necessary due to the increase in student occupancy next fall, will include rooms for the housemother and an office for the house president.

In the basement to the new addition, the Gamma Phi will have a permanent dining room. This will allow them to use their present dining room for a recreation area.

The plans call for a private entrance, driveway, and living room for the housemother. Architect for the structure was Walter Johnson of Fargo.

FILMS - FINISHING CAMERAS

631 N. PAVENUE
By Corky

The sands of time flow swiftly, and then the year is gone. Melancholy descends on the campus and students accept the quarter's end with a quiet reluctance. Glad, yet sad. But weep ye not. Life must go on, and we must go with it.

By all standards, the college year has been a successful one. Athletic endeavors have given us a taste of success and failure. Student elections have created apathy and enthusiasm in the campus population. And lovers have won and lost.

A pendulum swinging to and fro in a restricted arc is a good simile of life itself. Each semester, and each year a part of the college is reborn, as freshmen converge upon the campus to fill it with a new vitality and life.

The pendulum will begin its slow swing back, gathering momentum. The college year of 1957-58 will bring another mark in the sands of time, not altogether like this one. And so on, ad infinitum.

I will not see the pendulum complete its arc next year. But I shall be back on this campus to spend part of the "swing" with you. No goodbye is necessary. Happy hunting and I hope you have enjoyed reading Did You Know as I have writing it. See you in the Autumn.

The pendulum will begin its slow swing back, gathering momentum. The college year of 1957-58 will bring another mark in the sands of time, not altogether like this one. And so on, ad infinitum.

New Coop House To Be Finished By Fall

The NDSU Farmers Union Co-op House now being built at 12th street and 12th avenue North will be home for 44 students who are full-time roomers and part-time home for another 20 students who will eat their meals there, according to house president Warner Johnson.

The building, which is still little more than a hole in the ground and concrete foundations will have three floors when it is finished in October. It will face south on 12th Avenue, but will have a one-floor "ell" on the west and extending toward 12th street.

The house will be frame construction with a Roman brick facing over the entire lower floor and vertical grained asbestos siding covering the outside of the building on the upper two floors. It will have a flat roof.

In the interior, all walls will be plastered and every floor will be surfaced with rubber tile. Every room will have at least one large "picture-type" window.

The second and third floors will be occupied largely by sleeping and study space. Each floor will have six double rooms and one eight-bed dormitory. A large bath room will serve each floor. Similarly, there will be closet space enough for each, roomer and space for a desk, bookcase and reading lamp for every student.

THE SOLUNAL WAS WIDELY USED BEFORE MODERN TIMES

Oklahoma Students Vote To OK Bermuda Shorts

Spring fever hit the University of Oklahoma campus in a legislative way last month. The student senate passed a resolution 23-5 asking university officials to allow the wearing of Bermuda shorts at certain meals in the women's quadrangle cafeteria.

The students asked that the shorts be allowed at breakfasts to Friday and Saturday suppers and Saturday lunches on non-football days.

They argued that shorts are accepted as proper wearing apparel for women, that the approach of warm weather increases the comfort problem for quad residents.

These classes offer a variety of subjects to students interested in technical writing.

This picture was taken by a student who had no previous experience with a camera. Other students get the same opportunities plus a chance to try their hand at layout, feature and news writing and advertising for publications.

Verne Nies, instructor for these courses, states that anyone can learn to be proficient at the various tasks involved in publications work simply by working at it.

These courses currently are being used as a training ground for present and future members of the Bison annual and Spectrum staffs.

Student Union Team Cops 1-M Playoff in 3-2 Win Over Theta Chi; KP's 3rd

Dakota Field will be the scene of the intramural track meet Friday. The competition is scheduled to get under way at 4 p.m. Intra-squad training for the meet will be scheduled as a two-day event. Due to the fact that only seven organizations submitted entries the meet will be completed in one afternoon. Scheduled events are 50, 75, and 100-yard dashes; 220 and 880-yard runs; 440-yard relay; shot put; discus; high jump and broad jump.

NDSC Co-op House Organizes Credit Union For Students

Have you ever needed credit and were unable to obtain it? This is the problem faced by needy students each spring quarter. As a solution to this problem, the NDSC Co-op House has organized a student credit union. The organization is open to all interested students.

During its first year of operation, the organization has loaned a total of $1800 to students needing money to meet their college expenses. These loans are granted primarily on a character alone with little or no collateral. It is the belief of the organization that college students should be of high enough standards to be trusted in their business dealings.

According to Jim Olsbun, president of the organization, who has had about 500 students each year, "We believe that the credit union can be expanded to a point where it will be useful to meet all the needs of the membership by next year."

Odds ‘n’ Ends

The time has come to throw away the books and class schedules and forget everything that has been exposed to you the past nine months in the field of sports during the 1956-57 school year.

Last fall to the surprise of everyone, including the most optimistic fan, the Bison won five and lost only four battles on the gridiron. The Herd ended with a tie for fourth in the North Central Conference.

Roger Gehlhart, Dick Tschider and John Campbell were named All-Conference.

The Bison basketball squad won and lost 14 during the season and finished third in the NCC. The Bison topped off the year by taking three wins against one loss in the annual Sioux-Bison series.

Ken Flynn was the backbone of the Bison five and was named All-Conference, most valuable player of the team and most valuable player of the University series.

The Baseball team could not find itself in the Steve Gorman League this year and finished last with one win and five losses.

The track team went to most of the meets but did not have the manpower to go far in the competition.

The intramural results are not so yet so have fun writing exams and be a Bison Booster.

Kay Wollan Named Outstanding ISA’er

Kay Wollan, Jr. in Chemistry, was elected outstanding ISA member for the spring quarter at the last meeting.

With this distinction she becomes a nominee for outstanding member next year. She also active in Chemisty Club, Gold Star Band, ISA, and Tau Beta Pi.

The award goes each quarter to the member who has contributed the most to the organization. The association then elects the outstanding member of the following year from these three nominees.

Wolls Wollan

Intramural season playoffs are scheduled for this week. The pairings pit Theta Chi No. 1 against Theta Chi No. 2 and Kappa Psi against ISA. Plans are to finish intramural playoffs on the final day of the fall quarter.

Four girls were selected for membership into Orchesis at tryouts held May 21. This award, given by the national headquarters of Kappa Psi, is given to the member who has contributed the most to the school in the field of pharmacy.

**McLain Names Homecoming Committees**

Reports from the various committees comprised the major activity at last Tuesday night's Student Senate meeting as the Senate held its final meeting of the year.

George Schwartz, Commissioner of Campus Affairs reported on the progress of plans for freshman orientation week next fall. The program will begin September 19 when the freshmen arrive for their pre-testing program.

**NSA**

Margaret Flat, NSA Commissioner, outlined a tentative plan to set up four sub-commissions under the NSA Commissioner. Each of these groups would cover some phase of the work of the national organization.

The student affairs sub-commission would handle the World University Service program, the leadership clinics, and a proposed student discount program. The government group would be in charge of maintaining the student government information file in the library, maintaining the proposed NSA Bulletin Board in the Union, and reviewing literature received from the national NSA group.

An educational affairs sub-committee would be in charge of an educational affairs conference on campus, which would be held sometime next winter quarter. The international affairs committee would be responsible for the NSA travel programs on campus, the foreign students attending NSC, and a proposed International Relations Club.

It was decided that NSC would extend an invitation to the regional executive committee to hold their regional conference on the campus next spring. The Senate also ruled that only three delegates would represent NSC at that conference in Ann Arbor, Michigan this summer because of the cost of sponsoring delegates.

Radio Commissioner, Don Grimm, outlined the proposed network service. A student system which is being planned be a network which would include the student, College, Concordia, and NSDCC. "If put into operation," he stated, "it will give us a greater variety of programs and stimulate cooperation between the schools." Grimm also said that there was a possibility that campus radio would install a teletype machine next fall.

**Elroy Wagner, Bob Myhre, and Charles Trangsrud.**

Freshman Orientation

In reporting on the counseling system, Fred Flanders, was chairman for the committee to work on the proposed network service. He reported that the counselors have been selected and a meeting with them was scheduled for next Wednesday. The meeting would be a dinner meeting. Senate approved the plan to pay for a banquet for these people.

In regard to freshman week it self, a banquet for all freshmen will be planned. Sue Wheeler raised the question as to whether Senate could bear the entire cost alone. It was decided that each freshman attending would be charged $2 for the meal and that senate would pay the remainder.

Homecoming

Committees for the 1957 homecoming were appointed by President McLain. They are: Parade marshall, George Schwartz; publicity directors, Gene Price and Don Grimm; Queen selection, Pat Wehbe; House decorations, floats, trophies, and judges, Bucky Haas and Mickey Jordan; Duncan and dance entertainment, Dick Monson and Karen Edlinger; Ticket sales, Bill Lastz, Beva Fedler, and Charles Torch; Torch run, Fred Flunders; King sales, Gerry Schnell and Sue McConce.

The plans for purchasing junior stickers for advertising homecoming were approved and the president was given power to make the purchases.

**All College Festival**

Fred Flanders was unanimously approved as chairman for the committee to work on the proposed network service. He reported that out such that an undertaking would involve a great deal of expense and work on the part of all concerned, both students and faculty.

Plans for the festival are not available at this time but it was proposed that movies of a similar program which is held at Iowa State be shown to the students early next fall.

Before adjourning for the year, Senate adjourned May first meeting next fall as September 17.

**THE SPECTRUM NORTH DAKOTA STATE COLLEGE FARGO, NORTH DAKOTA**

**Pye, Geologist, To Take Charge Of Geophysical Observation In This Area**

International Geophysical Year, (I.G.Y.) observers throughout the world have been alerted. Dr. Willard D. Pye, Department of Geology, is in charge of the I.G.Y. Aurora and Airflow Program in this area.

The I.G.Y. program is an effort of the United States and other countries over the world to study various geological and geophysical problems.

One of the programs is the study of the upper atmosphere. Part of this work is the earth satellite project in which the United States and other countries are each at attempting to develop a satellite which will circle the earth at high elevations. This satellite and rockets will furnish data on the structure of the atmosphere as well as information on radiation, particles, ionization, magnetism and other problems.

The aurora and airflow studies to be conducted at Fargo, Pye said, are another phase of the program to study phenomena which occur in the upper atmosphere and to determine what causes them.

It is thought that aurora originate as a result of particles disintegrated in the upper atmosphere by ionized charged electrical particles coming from the sun.

The aurora are the visible paths created as the bombarding particles travel through the upper atmosphere. These charged particles are thought to be mainly protons (heavy, positively charged particles) or the nuclei of hydrogen atoms which upon striking the atoms and molecules in the upper atmosphere of the earth cause them to radiate light.

Airflow is a general luminous phenomenon in the sky. It is thought to be the result of chemical reactions taking place in the upper atmosphere. The pattern is irregular and patchy. Spectral lines from oxygen, sulfur and other compounds are common coloring wavelengths.

Sky cameras will be used to photograph the entire sky at one minute or shorter intervals. These cameras are especially equipped with mirrors and lenses so that the entire sky from horizon to horizon will be recorded with each exposure.

These aurora and airflow studies are being made by the Fargo Geological Services.
