Convo, Suspended Classes, Bonfire, Game, Dance Add Up To Homecoming

A critique of the Homecoming festivities for 1957 finds its start with the Pep Convo in Festival Hall Friday a.m. The students crowded into the Hall to give vent to the high spirits that reigned supreme. Their noisy expression found favor with all contingents of the Convo program. The Gold Star band offered a musical background for the cheerleaders, freshman and varsity football teams and the capers of the M. C.

Dr. Hultz brought the students to their feet in an ovation of acceptance when he announced that classes would be suspended.

Friday evening found the traditional bonfire and snake dance. The freshmen treated their beanies to a fiery death and then swarmed downtown Broadway with a snake dance.

Saturday dawned bright and clear to offer a grand day for a parade. Governor and Mrs. Davis arrived by plane to lead the colorful units

in a two hour display. The torch arrived from Bismarck via runner and officially opened the Homecoming fete.

That afternoon saw the Bison Herd bravely tackle the UND team, but in vain. Spirits were not dampened, however, by the 9-0 score that favored the Sioux.

Jean Ann Nelson was crowned Homecoming Queen by the governor at a half time ceremony. Mrs. Davis was also crowned Alumni Queen by Maine Schafer, alumni president.

Following the game, the campus held open house for all visitors. Governor and Mrs. Davis were featured at a reception held at the Kappa Delta sorority house.

The festivities ended with a dance at the Fieldhouse with Les Anderson supplying the music.

Winning Floats

"Ship Them Home" and "Fire Up" were the themes for the winning floats in the NDSC homecoming parade Saturday.

Top awards were received by Phi Mu sorority and the Farmers' Union Coop House. Second place awards went to Gamma Phi Beta sorority and Tau Kappa Epsilon.

Toman Returns From England

Elgi Toman, a former NDSC student returned this week from Suffolk, England.

Elgi was on the Farm Youth Exchange sponsored by the National Farmers Union. He spent one year as a hired hand on a farm in Suffolk. His daily wage was \$3.30 and he had to pay his board and room as their own family has to do.

England's agricultural methods are similar to ours in the United States, but not as mechanized, Toman says.

The people dress plainer than the Americans and are more conservative. When a boy takes a girl out and they go to a movie she pays her share either at the movie or when they get home.

Elgi plans upon enrolling at NDSC the winter quarter to finish his education. He will be a Senior.

Newman Club To Hold Halloween Party Sun.

The SC Newmanites will stage a Halloween Party Sunday evening from 7:00 to 10:00 p.m. at Shanley High School. The party is for all Catholic students on campus.

Mickey Jordan will serve as master of ceremonies for the short program which will feature vocalizing by a trio composed of Kathy Barrett, Doris Folstrom and Mary Ann Van Sickle.

Tau Beta Pi Convention

Five members of the NDSC chapter of Tau Beta Pi attended the 52nd national convention of the group in Madison and Milwaukee, Wis., Oct. 9-12.

Delegates attending were: Anthony Hoffman, George Struchynski, David Duin, Harvey Fiala, and Eugene Linhart.

The local chapter was commended at the conclave for its large representation, one of the largest in the nation.

The meetings of the convention were held on the campus of the University of Wisconsin and Marquette University.

YM-YW Outing

The YM-YWCA District Conference will be held this Friday, Saturday, and Sunday at Camp Rokiwan.

The conference starts Friday evening and ends at 10:30 a.m. on Sunday. Dr. George Ball, of Hamline, will be the speaker.

Camp Rokiwan is located on Spiritwood Lake, near Jamestown.

Governor and Mrs. Davis inspect the Army ROTC Drill Team and Color Guard. The smartly dressed ROTC group met the Governor and his wife at the airport when they arrived for Homecoming festivities.

1958 Chevrolet To Be Shown On Campus

A premiere showing of the 1958 Chevrolet will be held on campus Oct. 30. Service Chevrolet will sponsor an initial display of the new car to college and high school students from the Fargo-Moorhead area in the NDSC Fieldhouse.

The showing will take place from 4:00 to 6:30 p.m. Paul Hanson and Francis Colby will hold a Battle of Bands and provide music for a dance. Free Pepsi Cola will be served as refreshments.

Students from MSC, Concordia, Fargo High, Moorhead High and Shanley High schools are invited to attend along with the NDSC students.

Bronk Donavic, of Service Chevrolet, stated that due to the cooperative spirit between his firm and the students of this area, he decided to give them the first glimpse of the 1958 Chevrolet.

The vehicles used in the torch marathon run from Bismarck to Fargo were donated by Service Chevrolet. This same situation occurred last year.

Student News Bureau Interested Only With News Of Students

There has been some confusion on the part of the faculty regarding the Student News Bureau. As the name Student News Bureau implies, the Bureau is interested primarily in student news. Anything the stu-

dent does in class or out is potential news material for the college.

But the News Bureau is concerned with student news only. Any faculty news or department news should be sent directly to the Communications Office as before, with the exception of the Agriculture Department. Their news is sent directly to Ag. Information for further release.

The response so far has been very good from both students and faculty members. It is heartening to see that everyone is interested in North Dakota State and wants the rest of the state and area to know what the "Affairs of State" are.

Case Speaks At ASAE Meeting October 17

E. H. Case, director of college and university relations for Deere & Co. was guest speaker at the ASAE meeting Oct. 17.

Case was at NDSC to interview engineers and other students for jobs with Deere & Co., commonly known as John Deere Farm Equipment Co.

He outlined the organization of Deere and Co. and explained some of their policies with engineers. He also presented some facts which interviewers look for in the placement of college students.

Case said, "The main ratings of a job interview are based on: leadership and academic record achieved in college, the faculties opinion, and the personal interview."

Senior Ring Day Meinecke Lounge

Ring Day at NDSC has been set for Friday, October 25. Anyone interested in purchasing a class ring or pin should come to Meinecke Lounge in the Student Union between 9 a.m. and 5 p.m.

The ring has a cut of "Old Main" on one side balanced by a Bison on the opposite side. Both of these symbols are representative of NDSC.

The price of the rings vary as to the type of stone used in its composition. A deposit of \$15 is required with each purchase.

Vets Sign Up

Vets must sign for their checks before Thursday, October 31, at the Office of Admissions and Records.

Fegley New Prexy Ceres Hall Council

Beva Fegley was elected president of the Ceres Hall Council at the group's organizational meeting week.

Other officers include: Virginia Anderson, vice president; Marianne Owens, secretary and Judy Jennings, treasurer. Council members include: Marlene Olson, Janice Wegge, LaVern Holback, Patty Maier, Kathy Kiefer and Lois Herman.

Ceres Parking Lot Nears Finish

The Ceres Hall parking lot will be completed in approximately thirty days.

SPD Holds Meet

Sigma Phi Delta fraternity held its annual Castle Day celebration at the Gardner Hotel last Sunday. Special guests at the banquet included Dean Mirgain of the School of Engineering and William Jermain, central province counselor of Sigma Phi Delta. Jermain was the guest speaker for the event. Robert Eggan served as master of ceremonies.

Located in the old Silver City housing area, the lot will provide parking facilities for 120 cars. Main entrance and exit to the hard surfaced parking lot will be on Twelfth street. The lot will be lighted, but as yet the type of lighting has not been determined.

Entrance and exit to the parking lot will be controlled by automatic gates. The entrance gate can be operated either by a coin or key. Charge for all day parking will be 25 cents. Keys to the parking lot will be sold on a quarterly basis. Each new quarter the lock mechanism will be changed and new keys

sold. Price of quarterly parking has not yet been decided.

A unique function of the gate is that it reserves parking places for all keys sold. The metering mechanism automatically adds and subtracts cars entering and leaving the lot. If 50 keys are sold and the lot holds 120 cars, only 70 cars will be allowed in the lot. When the 70 cars are in the lot, quarters will no longer operate the entrance gates allowing cars to come in.

Northern Improvement Co. of Fargo has the blacktopping contract and the college maintenance department will do the rest of the work.

Scouting Around

... Neal Bjornson

A nasty rumor is going around! Someone has said that the Asiatic Flu bug has arrived on campus. Any truth to it?

Homecoming is history, at least for this year, and a word of congratulations to everyone who worked with the various events. Everything looked sharp. Student Senate, the Rajahs, the Athletic department, and dozens of other groups deserve a pat on the back for the effort they put forth.

Seems as how the UND boosters succeeded in "carving" their initials on the turf at Dakota Field last week. It wasn't too noticeable though as the ground crew had spent a good deal of time covering it up. Leaves us about even on that score, I guess.

Right neighborly of the folks from up North to send us an invitation to help them celebrate their 75th anniversary. Also, a very unique way to send such a message.

The Spectrum office must be contaminated with the flu bug. Jean Anderson was under its spell last week, Corky has it now, and I'm getting it—I think. Just a one page paper next week maybe.

A note of congratulations to all the organizations for the floats and house decorations. For those who won, it was a bit of recognition for a job well done. For those who did not, the fact that they were the best in a long time should be reward for a job well done.

Wish someone would explain to me just what happened down on the field last Saturday when the officials had the little misunderstanding with everyone, themselves included, about that blocked punt. Looked like fun from the stands.

Roger Gebhart played his usual outstanding game in the SC line last Saturday. Got a little banged up at times, but that never served to keep him out of the game for any length of time.

Tonight and tomorrow night are the last chances you'll have to see "Inherit the Wind," Little Country Theatre's first production of the year. If the flu doesn't catch the cast and the potential audience it should play to a full house.

McLain Announces Plan For Name Change

At the Council of Student President's meeting held Monday evening at Dr. Hultz' house, I announced plans to initiate proceedings to change the name of our school to North Dakota State University.

A considerable bit of research has been done concerning name changes other institutions have made and why. It is my belief that most of the people on campus, and many of our alumni, want the name change for one very valid reason—"to accommodate those students graduating in the fields of engineering, pharmacy, chemistry, and applied arts and sciences."

Many other reasons can be advanced... but whatever they are, I feel, as do many, many others, including students, and members of the faculty and administration, that a name change is desired by the majority.

Now, why to University and not College? Main because, I believe we are actually a University in that our curricular offering compares very favorably in breadth and quality to existing universities. I think we can express our desire to be called North Dakota State University on the grounds that we actually qualify for it and that by dropping the word "agriculture" from our name, we will not in any way minimize the importance of the

tremendous contributions this institution makes to the state of North Dakota through its research and extension work in the agricultural field.

After talking this situation over with many people, since I've been student body president, I feel the time is right to express our desire for a change.

I have, therefore, arrived at what I believe to be the proper procedure for going about it. First of all, I expect many comments both public and private and pro and con on the subject when this article is read. This is as it should be. Therefore, I will within the next few weeks, appoint a committee of seven people to act as a spokesman of the student body in matters pertaining to the name change. This committee will be selected with the approval of Student Senate and shall report its findings and activities to the senate at regular intervals. The members of this committee will be selected on the basis of their sincere desire to bring about the name change for the benefit of the majority.

The proper legal procedure is as follows: First an expression from the Student Body that the proposed name change to North Dakota State University is desired. Such expression could be presented in the form of a petition signed by stu-

dent desiring the change. This in turn would be presented to the administration which in turn would present it to the State Board of Higher Education. Upon its approval, the proposal would be reviewed by the Legislative Research Committee. The final step would consist of a member of the Legislature sponsoring the proposal as a Bill in the 1958 session of the State Legislature.

We expect some opposition to the proposed change but I believe that if enough people desire it and back us up in our efforts, we can present very valid reasons for the proposed change to our elected representatives.

Respectfully submitted,
Eldon R. McLain,
Student Body President

Civil Service Exams Will Be Given November 16th

The U. S. Civil Service Commission has announced that juniors as well as seniors may now apply for the Federal Service Entrance Examination. This examination will enable men and women with Bachelor's degrees to enter any one of more than 125 different positions in the Federal Service.

Eligible students currently enrolled will receive eligibility and employment offers effective upon graduation. Starting salaries range from \$306 to \$377 a month with excellent possibilities of advancement.

The positions are of the trainee type, and those appointed will receive training in such fields as administration, business analysis, personnel management, library science, budget management, electronic data processing, recreation, procurement, records management and tax collection.

In addition positions in agriculture and the natural sciences such as agricultural economics, fishery biology, market reporting, plant pest control, soil science (research) and wildlife biology are open.

The written test will be administered Saturday, November 16 and will require about four hours. Applications for this test must be received by the Director, 9th U. S. Civil Service Region, New Federal Building, St. Louis 1, Missouri before October 31, 1957.

Letter To Editor

TO WHOM IT MAY CONCERN:
OPEN LETTER TO THE
STUDENT BODY:

This is to appeal to those students who believe in wholesome competition in all activities between NDSC and the University of North Dakota.

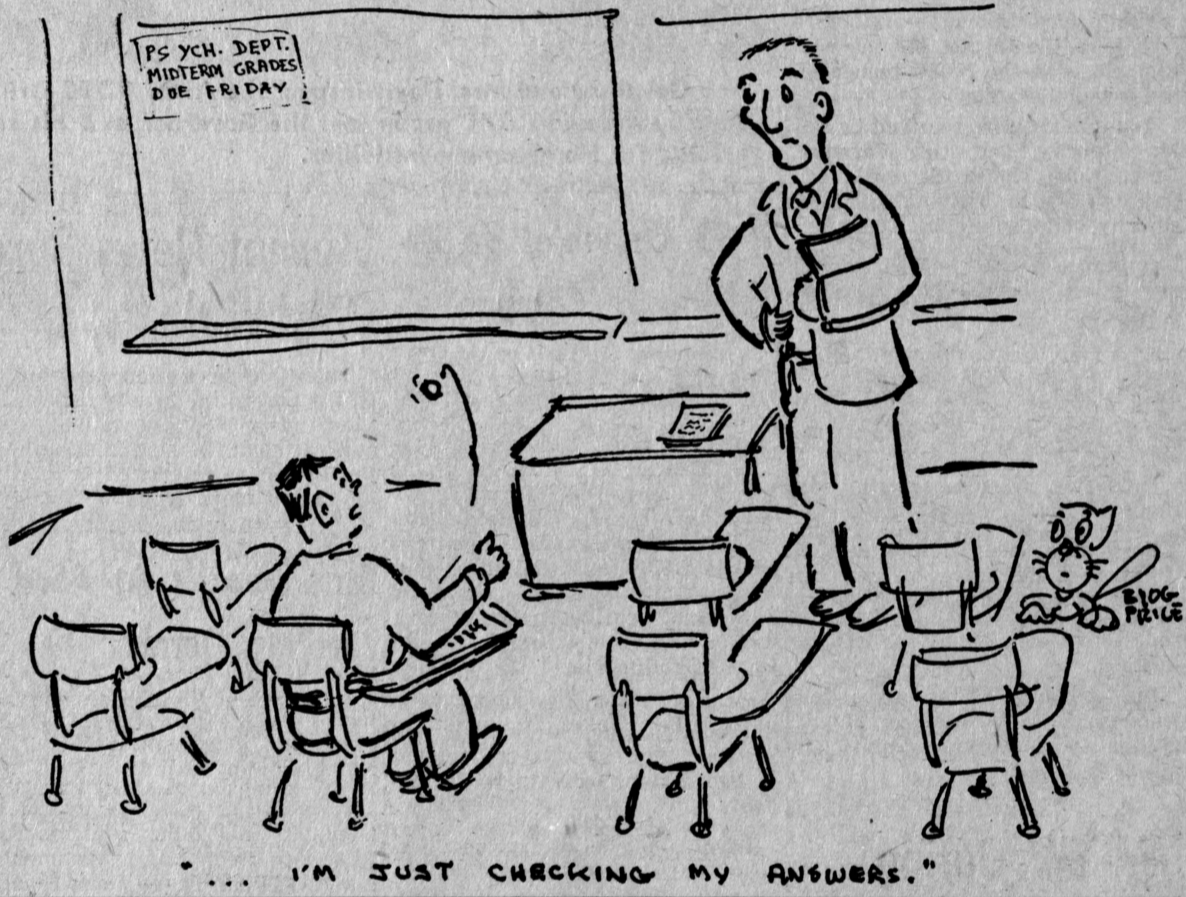

This letter is in reference to the incident which occurred the Thursday evening preceding Homecoming, concerning the University Vet's Club.

The University Vet's Club had approached our organization desiring our opinion on their intended trip to Fargo via covered wagon. We would like to state here that they had our whole-hearted approval which was in turn approved by the Parade Marshall.

It is unfortunate that the reputation of our college should be jeopardized by the thoughtless actions of a few. Fun is fun, but the perpetration of bodily harm and property damage is entirely uncalled for and below the expectations of mature people. The wagon which suffered extensive damage was one of the few of its type still remaining and cannot be replaced at any cost.

This college can be thankful that through mature thinking on the part of the people from the University, who were attacked, that reprisal action was not taken. We will leave it to your judgment to decide in what light this leaves the people of our campus.

Respectfully submitted,
The SC Vet's Club

Student Body Prexy Extends Thanks For Successful 1957 Homecoming

The Spectrum being the only way I have of thanking everyone who took part in our Homecoming without leaving anyone out, I would like to do so at this time.

I hesitate to mention the following groups for fear that I will overlook some of them, but certainly the members of Student Senate, the Alumni Association, the Athletic Department, Senior Staff, the Gold Star Band, the football team, the Communications Office, the Rajah Club, the groups who built the floats and house decorations, the merchants of Fargo, the newspapers, the radio and TV stations of Fargo and the Fargo Police Department deserves outstanding mention in making Homecoming the success that it was.

It is really quite a feat, when you stop to think of it, how hundreds of people can plan different phases of one operation and have the whole program roll out smoothly on schedule. As coordinator of

these activities, I was in a perfect position to appreciate the old adage that "when people work together, anything can be accomplished".

So once again, thank you all for making the 1957 Homecoming a success.

Sincerely yours,
Eldon R. McLain
Student Body President

NDSC Lutheran Married Students Club Organized

"How to Stay Married and Like It" is the theme for the NDSC Lutheran Married Students' Club which meets every third week on Friday evening at 5:30 p.m.

First meeting of the fall quarter was Friday, October 11th, at American Lutheran Church, 1011 12th Ave. N.

All Lutheran married couples are members and are invited to attend. The meetings include potluck supper, a speaker, and discussion. Parents are invited to bring their children, as they will be cared for by members of the Lutheran Student Association.

This is not a membership club, couples who cannot come to the first meeting are invited to attend any or all of the following meetings.

U Of Louisville Sets Codifying Policy

One of the most productive and essential groups set up by the University of Louisville Student Senate this year is the Policy Codifying Committee.

The group was constituted to formulate and codify the rules governing various student activities. Because the arrangements for certain events are handled by the Commissions of USS, the Committee has concentrated on supplying a flexible pattern for each commission to follow yearly.

It is hoped that the systemization of procedure will eliminate the confusion that has resulted in the past from the many unwritten tenets that govern the arrangements of student activities on this campus.

one penny
will run an electric clock for a week*

Electricity is penny cheap from NSP

*Based on 3¢ per kilowatt hour

POWER COMPANY NORTHERN STATES

Socially Speaking . . . By Jean Anderson

MANY THANKS to Corky for taking over in this department last week. Nobly done, my dear fellow journalist. With the flu bug around and about this week, wonder how many readers are left . . . It ain't no fun, folks!

Sig: "Your girl is spoiled, isn't she?"
ATO: "Nah, that's just the perfume she's wearing."

ENGAGED are KD alum Maureen Bear and Jim Harmon, News Bureau Ed. All this as of Homecoming weekend.

DINAN HALL was serenaded recently when the SAE's sang to Arlene Holmquist and Stan Lundine, now pinned.

PLEDGES at Sigma Phi Delta now include Allen Graven, Thomas Beatty, Clifton Anderson and Richard Thompson. William Nelson and James Lavold are now back in the pledge class after a year's interruption.

HALLOWEEN parties were held last night between the Thetas and the Kappa Psi's and the Alpha Gams and the AGR's.

NEW ACTIVES at the Kappa house are Sally Davis and Mary Eresman.

A DIAMOND on the third finger, left hand of Gamma Phi Margie Cobb was presented by Theta Chi Duane Paulson at Homecoming.

KD Karen Holden passed candy Monday night in honor of her engagement to Harold Schultz of Bismarck.

GUESTS at the SAE house Monday night were the Cambridge Debaters, David Fairborn and James Crichton-Miller. All had a ball with the English accents and what not.

OFFICERS for the pledge class at the SPD house are: President, Arvid Gafkjen; Secretary, Spencer Annear; and Treasurer, Robert Burris.

DINNER at the Theta house Tuesday night for pledges, actives, alums and mothers.

ALPHA GAMS had a big coffee hour Tuesday.

PLEDGED to Kappa Kappa Gamma is Margaret Owens of Fargo.

YOIKS! St. Luke's nurses entertained the Theta Chis last night. A ball was had by all.

SERENADES Monday night . . . SAEs visited the Kappas and the Gamma Phis and met the pledges. Theta Chis also made the rounds.

The parents of a solemn little boy were perturbed at his morbid outlook on life and hoped a change of scene might help him. They were sending him off by train to relatives and told him to write his name and address on a card and put it in his pocket.

The boy did so, beginning, "In case of accident, this was Johnny Smith."

AND PLEDGE officers at the Alpha Gam house include: President, Bev Lloyd; vice-president, Yvonne Wittmer; Secretary, Muriel Blume; and Treasurer, Francis Ricketts.

AGR pledges skipped Monday night with the Tri-Delts from UND.

KAPPAS celebrated Founder's Day October 14.

PLEDGED to Kappa Delta is Phyllis Garaas of Grenora.

Have fun and stay healthy, sports! Bye now . . .

P.S. Just heard Corky's got the flu, too! Sounds like the common ailment of Spectrum writers.

Dean Of Women Likes New Job

By Donna Holcomb

Miss Matilda Thompson, new dean of women, finds her new job a challenge. Before taking this position she was an associate professor in the math department at NDSC and her problems had definite answers which could be worked out on paper.

Now Miss Thompson says, "everytime someone walks into my office it is something new." She said each person has a different problem which must be treated individually.

Miss Thompson always has been active in committee work and as an advisor for student activities on campus. She continues active in this work only now she does more of it and in an official capacity. Her primary duties include guiding women's activities, housing, co-educational social programs, counseling, and regular committee work.

Many students do take advantage of the counseling but she says there may be others who would like to do so. She would like to have all students feel free to drop into her office in Old Main at any time. They may visit to work out a problem, to talk about something that is bothering them, or just to chat and become better acquainted.

Miss Thompson says that students can best help her by studying their handbooks and knowing what to do. She finds students are usually cooperative and says of her job, "this little taste of it in six weeks has made me think I'll enjoy it very much."

Weesner Visits Paris; Sees Dior's Fashions

What is the first thing that pops into your mind when someone mentions the word "Paris"? Some think of gay lights and sidewalk cafes, but most girls think of fashion.

Miss Kathryn Weesner, chairman of related art at NDSC, was one of those lucky enough to attend a showing of Christian Dior, famous fashion designer. There are about 10 such fashion houses, all in an exclusive part of Paris.

Christian Dior's shop is a two-story building containing a small retail shop, called a boutique, and a reception room on the first floor. The retail shop features less expensive originals, perfumes, shoes, gloves, men's wear and accessories produced by Dior.

On the second floor is the showroom in dove grey and white. It is not large, furnished like a salon with carpeting, fireplace and French windows. Around the room are raised platforms with chairs for the visitors.

Each designer employs many saleswomen, seamstresses and six or more manikins. The manikins are of distinctly different types and clothes are designed especially for them.

Tickets for these showings are hard to get at the beginning of a new season, but later on may be gotten from travel agencies, hotels or friends with influence.

When Miss Weesner arrived, she was referred to a saleswoman who seated her. There is one saleswoman for every two or three people. She was given a paper on which to make notes. The manikins move swiftly. This is to prevent copying of details by competitors. Also nearly 100 styles are shown by six girls in an hour and a half to two hours, so changes must be quick. As each model comes, a head saleswoman calls off in French the number of model and price in francs and dollars.

Miss Weesner commented especially on the variety of people at the showings and the beauty of the French models' figures.

Regional Officer Visiting Kappa Delta Sorority

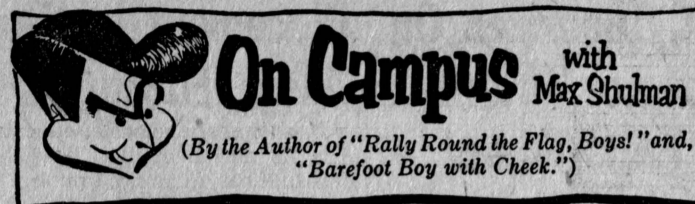

Mrs. John W. McReavy of Hastings, Minnesota, Eta Province president of Kappa Delta sorority, arrived in Fargo Wednesday, Oct. 23 to visit the Sigma Psi chapter of Kappa Delta at the NDSC campus.

As province president she supervises the activities of the college chapters at Iowa State College, Coe College, University of Minnesota, Lawrence College, University of Wisconsin, Beloit College and NDSC.

Mrs. McReavy holds a B.S. degree from the University of Minnesota and was a home economics teacher and consultant prior to her marriage.

She has been active in sorority affairs having served her college chapter as vice president and rushing chairman, as alumnae advisor to Beta Sigma chapter at the University of Minnesota and as president and vice president of the Twin Cities Alumnae Association.

She is a member of the American Home Economics Association, American Home Economist in Business, PTA, Cana Club, Newcomers Club, Junior Chamber of Commerce, and Guardian Angels Church Women's Club.

SCIENCE MADE SIMPLE: No. 1

Though this column is intended to be a source of innocent merriment for all sexes and not to concern itself with weighty matters, I have asked my sponsors, the makers of Marlboro, whether I might not, from time to time, use this space for a short lesson in science. "Makers," I said to them, "might I not, from time to time, use this space for a short lesson in science?"

They agreed with many a kindly smile, the makers of Marlboro, for they are the most agreeable of men. Their benevolence is due in no small measure to the cigarettes they smoke, for Marlboro is a cigarette to soothe the most savage of breasts. I refer not only to the flavor which, as everyone knows, is a delight to the palate, but also to the Marlboro container. Here is no fiendishly contrived device to fray the fingernails and rasp the nerves; here, instead, is a flip-top box that opens like a charm, and inside you find a handy red tape to lift out the cigarettes with ease and dispatch. Add to all this the best filter ever made, and you can see that you get a lot to like.

Let us begin our series of science lessons with chemistry. It is fitting that chemistry should be the first, for it is the oldest of sciences, having been discovered by Benjamin Franklin in 468 B.C. when an apple fell on his head while he was shooting the breeze with Pythagoras one day outside the Acropolis. (The reason they were outside the Acropolis and not inside was that Pythagoras had been thrown out for drawing right triangles all over the walls.)

Benjamin Franklin was shooting the breeze with Pythagoras...

They had several meetings outside the Acropolis, but finally Franklin said, "Look, Pythagoras, this is nothing against you, see, but I'm no youngster anymore and if I keep laying around on this wet grass with you, I'm liable to get the breakbone fever. I'm going inside." Pythagoras, friendless now, moped around Athens for awhile, then drifted off to Monaco where he married a girl named Harriet Sigafos and went into the chuck-a-luck business. (He would certainly be forgotten today had not Shakespeare written "You Know Me, Al.")

But I digress. We were beginning a discussion of chemistry, and the best way to begin is with fundamentals. Chemicals are divided into elements. There are four: air, earth, fire, and water. Any number of delightful combinations can be made from these elements, such as firewater, dacron, and chef's salad.

Chemicals can be further divided into the classes of explosive and non-explosive. A wise chemist always touches a match to his chemicals before he begins an experiment.

A variety of vessels of different sizes and shapes are used in a chemistry lab. There are tubes, vials, beakers, flasks, pipettes, and retorts. A retort is also a snappy comeback, such as "Oh, yeah?" and "So's your Uncle Oscar."

I have now told you the most important aspects of chemistry, but there are many more—far too many to cover in the space remaining here. However, I am sure there is a fine chemistry lab on your very own campus. Why don't you go up some afternoon and poke around? Make a fun day out of it. Bring ukeleles. Wear humorous hats. Toast frankfurters on the Bunsen burners. Be gay. Be merry. Be loose . . . For chemistry is your friend!

© Max Shulman, 1957

The makers of Marlboro, who bring you this column regularly, are tobacconists, not scientists. But here's an equation we do know: Marlboro plus you equals pleasure.

USC Theorizes On Plan For Grants To Frat Alumni

(I. P.)—A plan to provide fellowships for graduate students who are alumni of fraternities and who would act as advisers to their fraternities has been announced by the University of Southern California.

Essentially, these graduate students would serve their fraternities as academic advisers and personal counsellors. This would not mean that the adviser would assume the responsibility of the president or the alumni adviser. It would merely add a qualified person to aid with immediate house problems.

Graduate student advisers are to be first nominated by the fraternity alumni association in cooperation with the undergraduate members.

The selected adviser will receive a fellowship from the University amounting to eight tuition-free units for two semesters or \$400 for a full year.

Placement Institute Issues Directory To Assist Educators In Advance Degrees

To answer the needs of educators, The Advancement and Placement Institute has announced publication of their first annual World-Wide Graduate Award Directory.

This new Directory has been prepared as an aid for American teachers, administrators, scientists and social scientists who wish to subsidize the continuation of their education to obtain their master's or doctorate degrees or to do post-doctorate or independent research.

The award guide includes information about the field of study, the duration of the awards, the amount of stipends, the number available, where the awards are tenable, the specific conditions and to whom and when to apply.

Over 350 universities and foundations in 45 states and 30 foreign countries have cooperated by submitting information about their awards which range in amount from \$150 to \$10,000.

The Directory covers a very wide geographical range from research

in the Arctic to study in Ceylon. It includes new types of educational programs, such as educational internships and student deanships, as well as assistantships, graduate scholarships and fellowships.

It includes awards in the arts, business, education, child development, English, health and physical education, home economics, industrial arts, the languages, library service, mathematics, psychology, recreation, the field of special education, speech, social casework and groupwork, vocational education as well as all the various fields of teacher education and the sciences.

The Graduate Award Directory will be the first guide devoted entirely to advanced graduate opportunities available to educators of the United States. It fills a specific need for an up-to-date central reference source of graduate awards.

This directory is the result of several years of research by the staff of The Advancement and Placement Institute, a non-commercial professional information and advisory service for the field of education since 1952.

Copies may be examined at graduate schools, university placement or dean's offices, public and college libraries, or may be ordered from The Institute at Box 99E, Greenpoint Station, Brooklyn 22, New York for \$2.00 a copy.

An expression of anguish is struck by a cast member of "Inherit The Wind". This scene was captured from a dress rehearsal of the first play to be staged by the Little Country Theatre group this year.

NORTHERN SCHOOL SUPPLY—FARGO

EVERYTHING for Schools

Visit our Store!

Come in now for a peek at the '58 Chevrolet!

Just ask your Chevrolet dealer to show you the booklet containing advance information about the '58 Chevrolet.

You can expect the 1958 Chevrolet to be new all over. Lines will sweep rakishly longer, lower and wider.

There will be a completely new V8 engine—radically different in design.

There will be Full Coil suspension and, for the first time in Chevrolet's

field, incredibly smooth air ride.

Chevrolet will introduce two new luxury models of outstanding style and distinction.

You'll learn more at your Chevrolet dealer's. And you can see about an early delivery that will make you a '58 Chevrolet-Firster!

'58 Chevrolet, Thursday, October 31

Chinese Girl Works On Masters Degree Feels At Home In School Of Chemistry

"I like liberty and freedom," said Lu Lin Chen, NDSC student, when asked why she came to America to school.

Lu Lin is a native of Shanghai, China, but moved to Taipei, Taiwan, China, shortly before the communists entered Shanghai. Her family left all possessions for freedom and a new home in Taipei.

Miss Chen, interested in study abroad but not knowing anyone in the United States, chose North Dakota State College because of its school of chemical technology. She then applied and received her ac-

ceptance almost immediately. She is a graduate student at NDSC in the school of chemical technology.

After high school, she graduated from Normal University in Taipei where she received her degree in chemistry. Upon obtaining her master's degree, Lu Lin plans on furthering her education and returning to China to do research work. She is unsure, yet how long she will stay in the United States.

Asked her opinion of NDSC, she said, "Because I have been here for such a short time, I know nothing about the other schools on campus, but the school of chemical technology is much the same as home, except in China, we have no special fields of chemistry such as biological, physical and organic. A designated amount of each one is required." Lu Lin has been in the United States since Sept. 20, 1957.

She has studied the English language seven years, six of which were in high school and one at the university.

She says, "I'm interested in campus organizations, but not yet—until I can speak the language more fluently. Lu Lin belongs to the Chemistry Club.

1957 HOMECOMING REVIEW

Above, the Theta Chi Joy Boys toil and labor to complete their float before the ever nearing deadline. To the right and below, we again see the Theta Chis with their first place house decorations. Soap manufacturers, please note. Below to the left, we see the musical portrayal of a well known pop tune that copped second place for the Sigma Chis in the house decorations.

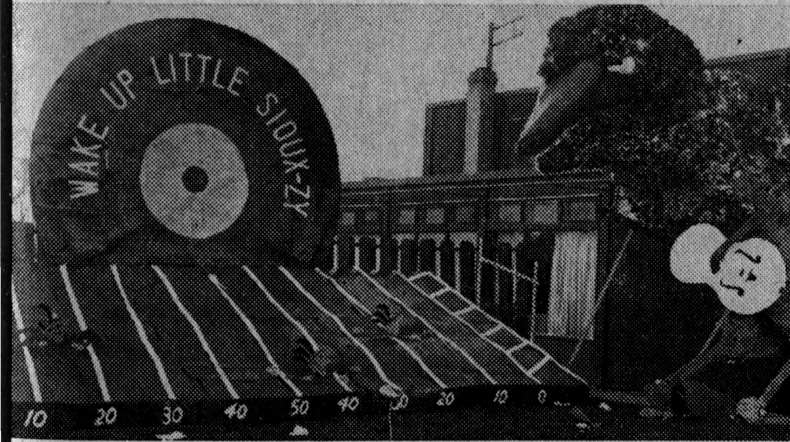

The torch comes home. Amidst traffic along Hiway 10 on the outskirts of Fargo, the torch changes hands and begins the final lap of the marathon.

Beetle Baillie, boy raccoon, struts fancy antics at the Pep Rally in Festival Hall. The Friday morning convo saw a capacity crowd exhibit high spirits and an uproar of response to Pres. Hultz's suspension of classes.

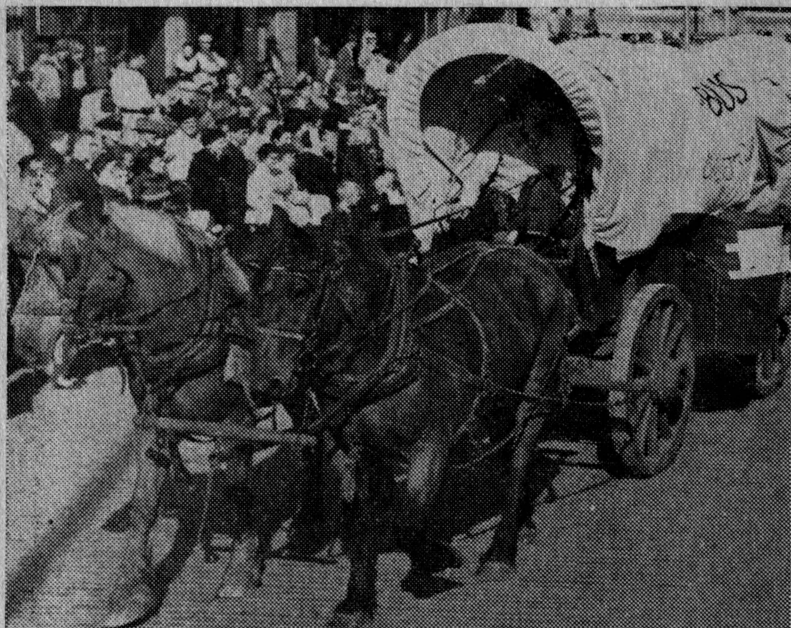

Left and below are Governor and Mrs. Davis in the parade. To the right Governor Davis has his Bison Booster button straightened by Bill Euren. Mrs. Davis stands in the center.

The Parade

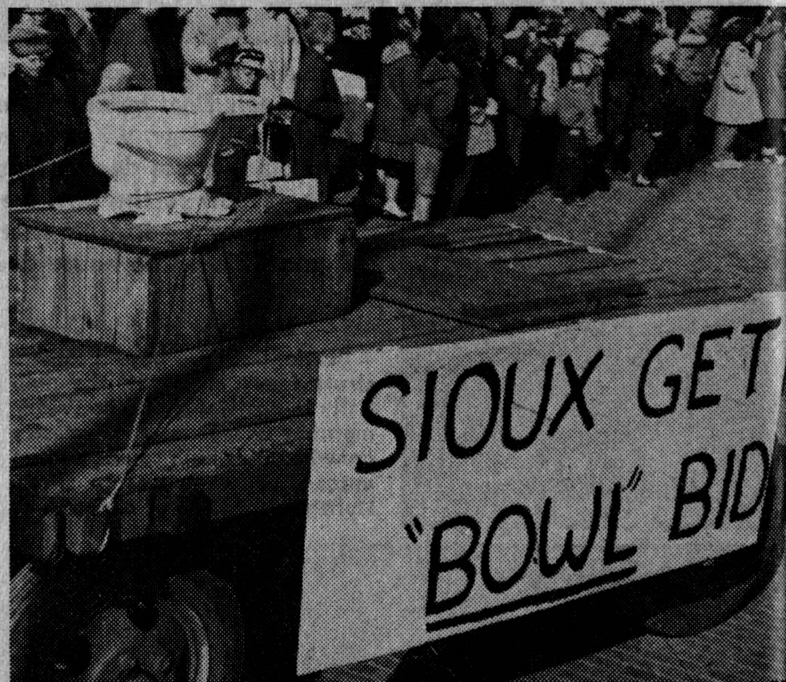

Queen Jean and Her Court

The pioneer wagon which was driven to Fargo from Grand Forks by the UND Vets Club undergoes a raid by NDSC Vets Club in the parade. Gun battles and holdups sparked the journey down Broadway.

More valuable than gold was the idea behind this float entry. NDSC & UND Blue Key members and members of the Golden Feather from UND guard the controversial Nickel Trophy with an eagle eye during the weekend.

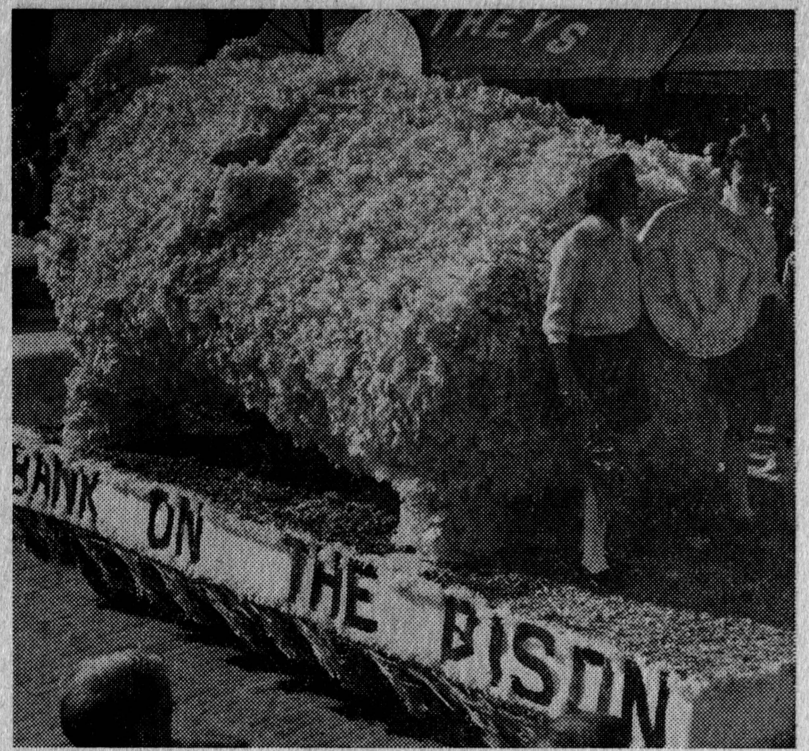

Friday Club members narrowly missed first place in the float contest with their contribution (?) to Saturday's pageantry.

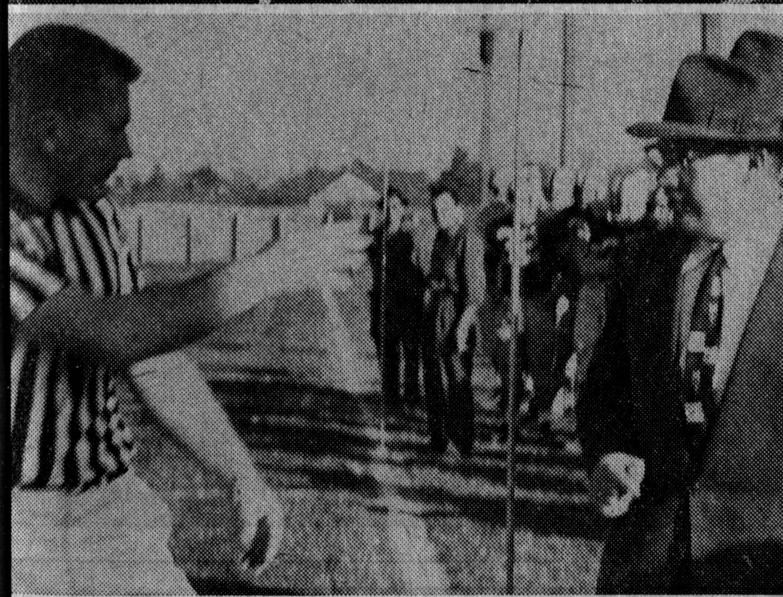

Theta Chi men entertain the crowd with their German Band. They played in English.

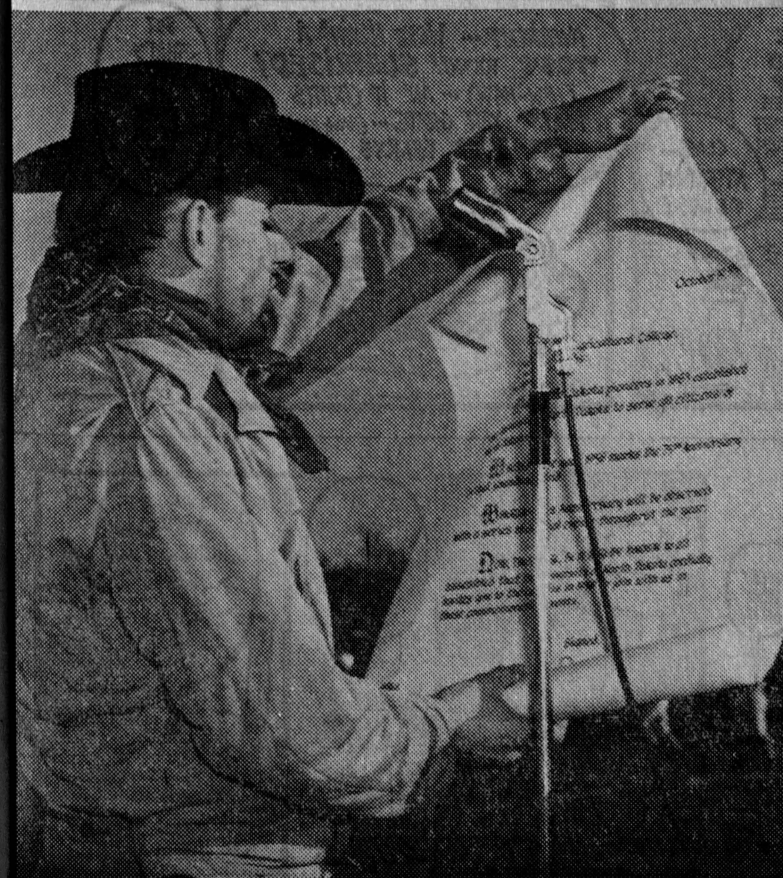

Looking none the worse for wear, the torch runners ride in style in the parade. These fleet footed lads and others carried the torch from Bismarck to Fargo to start the Homecoming festivities.

Above, the Coop House and their first place float. Right, Gamma Phi Beta took second place with their pink pig. Left, the Tekes took second place with a satellite float. Below, and here is the Phi Mu's with their first place ship.

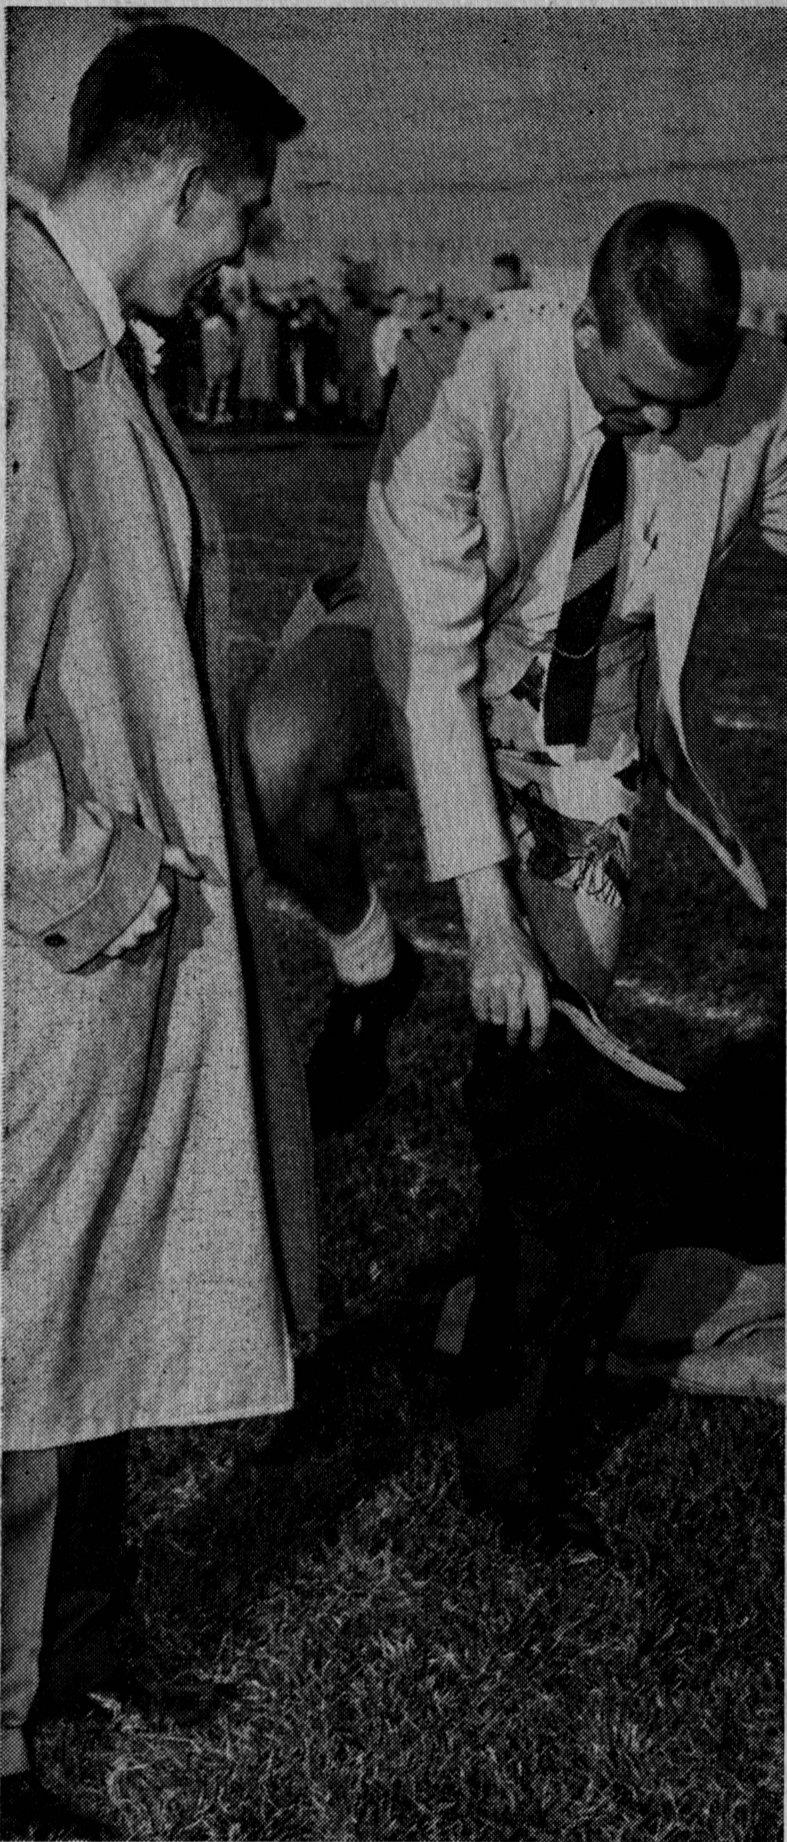

"You just cross that line and say that". A rhubarb at the game Saturday caused feelings to run high between coach Johnson and an official, at the above left.

On the right, Governor Davis places the crown on Queen Jean at the half time ceremony. Queen Jean then received two kisses from the Governor. Mrs. Davis was later crowned Alumni Queen by Maine Shafer, President of Alumni Association.

A representative of the UND Vet's Club reads the message which they brought from Grand Forks via covered wagon. The message, from UND faculty and students, invited the NDSC community to join the upriver institution in celebrating their 75th anniversary.

Eldon McLain, SC student body president pays off a bet as Tom Wold, student council prexy from UND looks on. The student body leader of the losing school was to lose his pants following the game, according to the wager. True to his word McLain descended to the field and turned his trousers over to Wold after the Sioux had dumped the Bison 9-0.

Above, Jean Ann Nelson, SC Queen, chats with Governor and Mrs. Davis, Alumni Queen, at the open house at the Kappa Delta sorority after the game Saturday. The Davis' were guests of honor at the KD house, and Mrs. Davis is a KD alum.

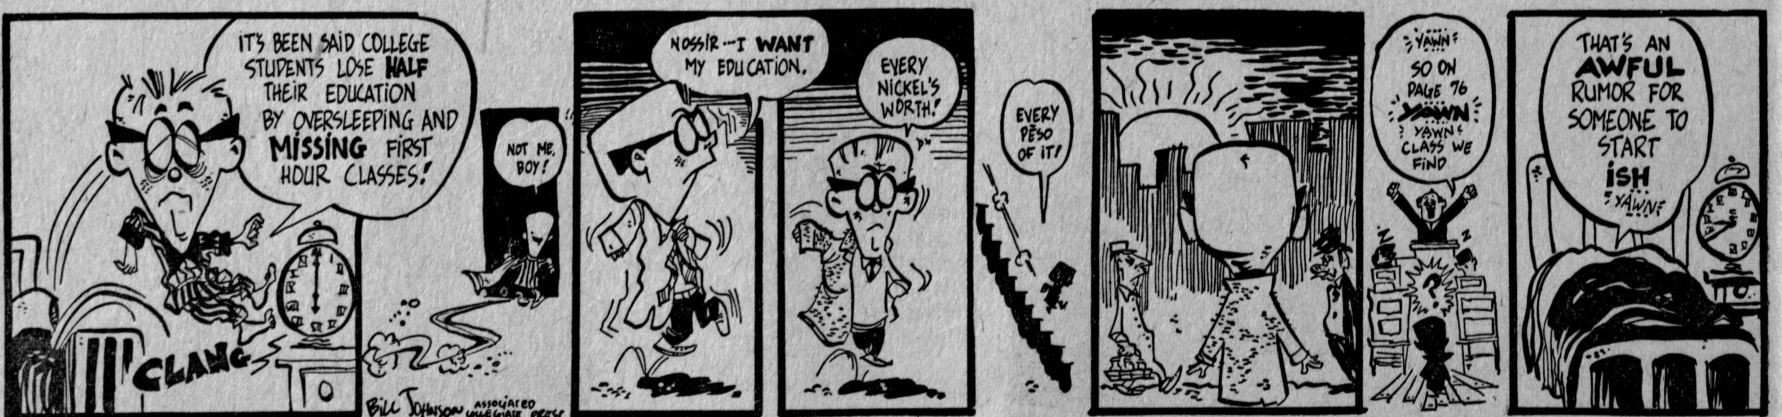

Below, Queen Jean, addresses her subjects at the Homecoming Dance as her parents look on. Mr. and Mrs. Nelson of Milnor, N. Dak. were on hand to see the second of their daughters wear the SC Homecoming Queen crown. Joan was Queen in 1954.

Little Arnold

Little Arnold

Did You Know? By Corky

I'd like to aim a question to the male contingent on campus. The derived benefits from this question, if any, will go to the gods, I hope.

The question: What is it about a girl that elicits a murmured approval and creates in a man the desire to take a second look?

Each man will have his own set of standards with which he judges a girl, but the basic fundamentals are pretty much the same. The difference lies in the use and expression of these standards.

There are many things about a girl that make her pleasing to a man. First, the fact that she is a girl. Secondly, her physical endowments and thirdly, the way she handles the above two factors to her advantage.

Next, to answer the restrictions of society, she covers herself with clothes. Conforming to another case of society, she wears her hair in varying lengths and adds cosmetics and perfume to suit her personality.

To complete the picture, she walks with a lilting grace, buttons her coat from left to right and chats in a feminine pitched voice. Now, we have the house built, tinted and landscaped. And a pleasing picture it is indeed. Here where the difference in use and expression of standards enters.

Some men see the whole picture. A scrutinizing look reveals the body, the clothes and the accessories. Some men look at the foundation. A neat pair of legs encased in sheer nylons indicates sturdy but delicate support. Some men see the hint. Complimentary colors applied by means of a sweater and skirt or a sheath dress do a good job of enhancing the natural lines. Other men notice the surrounding features. The perfume, tinge of lipstick or darkened eyelashes create a "gold border around blue velvet" if you please.

Fine, fine. But let's carry this thing a bit further. You have been inspired by this lovely creature and unconsciously your pulse increases and your eyes gleam. "Man, what a living doll!" and similar phrases escape with a gasp. Don't let it end there,

Kappa Epsilon Greets Pharmics

Freshman and transfer women students in the school of pharmacy were entertained at a social hour given by Kappa Epsilon, professional sorority for women in pharmacy. Other guests included alumnae members of KE and faculty members.

The purposes and activities of the group were presented through a program and skit. Participating were Lorraine Hanson, Loreta Aipschach, Mary Pfeiffer, Peggy Tomstock, Cathy Pfeiffer and Miss Ola Hopkins, faculty advisor.

express your enlivened masculinity!!

Take note of the bright colored scarf the girl has around her throat. Tell her it goes well with her dress or jewelry. Compliment her on the perfume and inquire what kind it is. Remark about her silk stockings. She will think you are ignorant, because women don't wear silk stockings any more. But she'll be charmed to think you've noticed. Exclaim about the cuteness of her earrings. Tell her they are odd, but beautiful. Round out this snow job with a general compliment on her tastes in choosing her ensemble.

You can tell a girl she is pretty and she will say "Thank You". But tell her WHY she is pretty and—va va voom—!! I said the benefits would go to the coeds, maybe I was wrong. This 'string' has two ends. Seems more likely the man should receive the rewards.

Women love to be noticed and complimented. In this battle of sexes, any well tested methods of subversive activity are to the advantage of the male. Try it.

UND Vets Reach Fargo In Time To Take Part In Homecoming Events

"It wasn't so bad, but it would have been nice if we could have had our shower hooked up," joked unshaven Bruce McCrum Saturday morning after he and four other University of North Dakota Vets' Club members made a trip by covered wagon from Grand Forks to Fargo to appear in NDSC's homecoming parade.

The five, who took off from the University Thursday afternoon, were McCrum, wagonmaster; Don Pfau, Cook; Ken Dettling, Scout; Harley Kaspai and Teamster Harry Balow.

The men spent Thursday night near Kelso, 30 miles south of Grand Forks. During the night the crew was raided and the team lost its harnesses. In the morning the travelers borrowed another set of harness and continued on their way.

Addition To SC Power House To Be In Operation Next Fall

A new addition to the NDSC power house will be in operation next fall. Original plans called for the addition to be completed this fall, but the tornado and wet weather delayed construction. The building itself is completed but the machinery is not installed.

The new building is of brick, 36x32 feet. It will house two vacuum pumps, a 3,200 gallon water tank and two air compressors.

Steam from the power house is fed to the various buildings on the campus through a system of underground steam lines. A high pressure line goes to each building requiring hot running water and low pressure steam is used for heating.

Vacuum pumps draw unused steam and steam that has condens-

ed into water back to the power house into the 3,200 gallon water tank. Water pressure inside the boiler is higher than the city water pressure, so feed pumps increase the water pressure to force water inside the boiler.

Thermostats and other controls used in the power house are controlled by air pressure. The vacuum pumps will be lowered 2 feet from their present position making the pumps more in line with the underground steam lines. This will increase the efficiency of the power house by decreasing the lift of the pumps.

Pumps and compressors in the new addition will be free of coal and ash dust reducing maintenance and repair costs on the machine.

Bison Homecoming Spirit Deflated By 9-0 Loss To University Sioux

An injury-riddled team and the Bison homecoming spirit couldn't stop the University of North Dakota Sioux as they defeated the Herd 9-0 at Dakota Field Saturday afternoon. The win boosted the Sioux to a .500 mark in the conference and pushed the Bison into a tie for the cellar with Augustana with four losses apiece.

The teams played to a standoff in the first half. Both teams put together sustained drives which were stopped only yards from the goal. Intercepted passes resulted in the thwarting of both drives. The Sioux intercepted a Bison aerial

SDS And Bison Record-Holders To Do Battle Saturday

Two perfect records will be laid on the line at Brookings, S. Dak. tomorrow when the conference leading SDS Jackrabbits (4-0) play host to the cellar-dwelling NDS Bison (0-4) at State Field.

Led in the line by guard Len Spanjers, tackle Wayne Haensel and end Carl Katzenberger with Ron LaVallee at quarterback, the Jacks have lost only two games this season, both to non-conference foes. Sophomore Jim Vacura has come through nicely as a runner, as has junior fullback Al Breske.

Although the Jacks finished in a tie for fourth in NCC play last year, they have won or tied for the conference championship five times since 1950.

Wrestling Meeting

There will be a meeting of all men interested in wrestling on Tuesday, Nov. 5 at 7:30 p.m. in room 204 in the fieldhouse. Participants will be expected to work out on their own in preparation for organized workouts which will begin Nov. 13.

DAKOTA Photo Engraving Co.
 ENGRAVERS & PHOTOGRAPHERS
 FARGO, N. DAK.

on the 10 to end the only major threat State was able to muster. Piasecki's toss on fourth down on the Bison two went amiss to insure a scoreless first half.

The first score of the game came on a 14-yard field goal by Vanyo late in the third quarter. The Bison defense had stiffened and held the Sioux for three plays prior to the boot.

The lone touchdown of the game was scored via the University's most dangerous weapon, the forward pass. Piasecki pitched a 28-yard aerial to end John Roche. The ball eluded his grasp, was batted in the air by Kingery and fell into the waiting arms of Sioux end, Bob Herrick, who stepped across for the score.

Neither team was at full strength. The Bison were handicapped by injuries to Hyde, Larsen, Basche, Nagel and Gebhart. Larsen and Basche did not dress for the game.

Sioux casualties included Jarrett, Grumbo, Voigt and Wolfe.

Defensively, Smith of NDU and Gebhart stood out.

Bison standouts on offense were Campagna and Kingery.

SDS Takes NC Conference Lead By Beating Coyotes 21-13

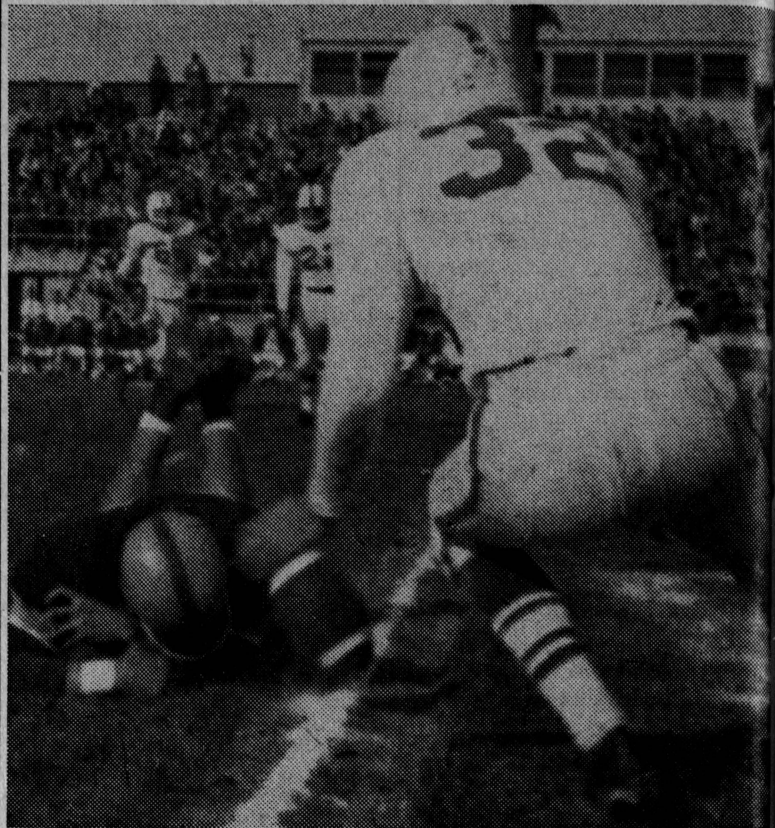

South Dakota State moved into undisputed possession of first place in the North Central Conference with a 21-13 win over the South Dakota University Coyotes at the Hobo Day celebration at Brookings.

In the other two conference contests, NDU defeated the Bison 9-0 and Morningside stayed in the running for a share of the conference title with a 21-7 victory over ISTC.

This weekend the Bison travel to Brookings to play South Dakota; ISTC plays host to the Sioux and Morningside takes on Augustana at Sioux Falls. South Dakota University journeys out-of-conference to Washington, Mo.

Conference standings as of Oct. 24th:

	W	L	T	Pct.
South Dak. State	4	0	0	1.000
Morningside	3	1	0	.750
South Dak. Univ.	3	1	1	.700
Iowa State Teach.	2	2	0	.500
North Dak. Univ.	2	2	1	.500
North Dakota State	0	4	0	.000
Augustana	0	4	0	.000

This is one of the fumbles that may have been costly in the Bison-Sioux tiff. The UND player gets set to pounce on the fifty yard line error.

13 Varsity Basketball Candidates Report So Far, Announces Benson

Thirteen candidates have reported for varsity basketball practice thus far this year, according to Chuck Bentson, head basketball coach.

Included among the men returning from last year's team are Warren Arman, Hib Hill, Dale Lundby, Bob Brown, Lyle Huizenga, John Foss, Al Brenteson and Slim Williams. Up from last year's freshman team are Ron Schiff, Bill Buckholtz and Larry Swenson. Marlin Hackenstad, a transfer student from Bismarck JC, and Don Backley round out the prospects who have reported.

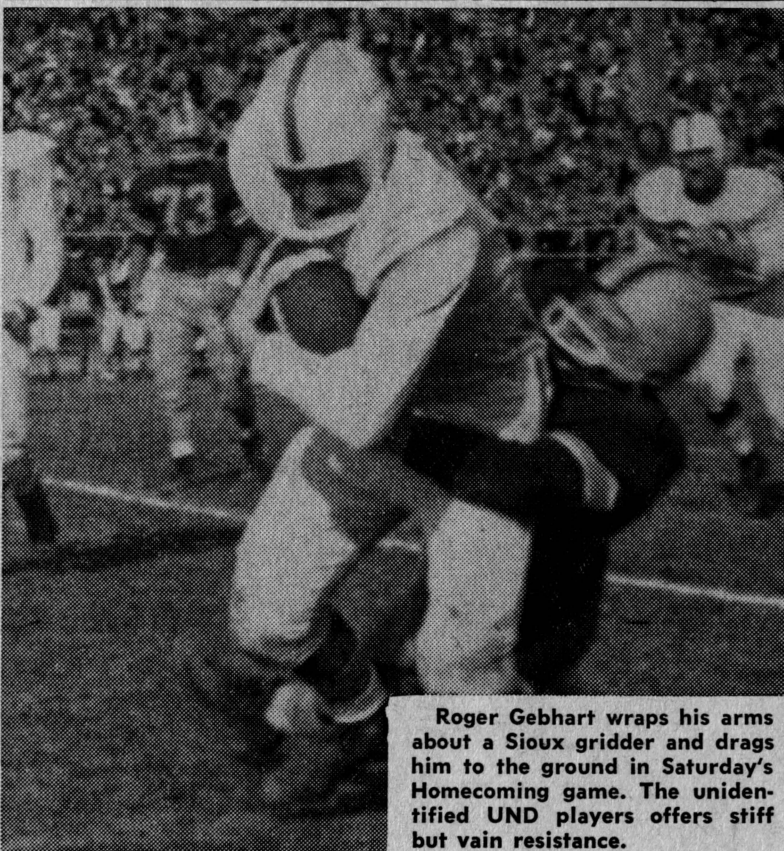

Practice thus far has been irregular and got into full force Oct. 23, according to Bentson. Last week, many of the candidates were on the torch run and practice this week has been limited because of illness.

Bentson expects the squad to be bolstered by the turnout of Bill Bartels, Gary Boldenow, Dick

Faught, Ross Fortier, John Campagna, Jerry Kingery, Jerry Walker and Curt Quenette once football is over.

Bentson anticipates that both South Dakota teams will be tough as last year when they dominated the conference. He believes ISTC will be greatly improved and Augustana should be somewhat improved. He felt that the Bison, North Dakota University and Morningside could not be rated at this time.

Bentson went on to analyze the team for the coming season. "Our team will have good overall size with fair shooting ability. We lack a 'real good big man' and team speed. Our strength will depend on improvement of some of our sophomores and the possibility of Kingery helping us." Bentson was quick to add, however, "We'll be hampered by the late start of some of the men from the last year's freshman team due to football."

Roger Gebhart wraps his arms about a Sioux griddler and drags him to the ground in Saturday's Homecoming game. The unidentified UND player offers stiff but vain resistance.

... by Clarence Anderson

Gone is homecoming and back to University goes the Nickel trophy. For the thirty-ninth time in 62 meetings between the two rivals the Sioux have emerged victorious.

One consolation for the Bison players and their fans is that this year was not one of the easiest for the Sioux victories. They put up a hard fight for the win. Not until the Bison passing really went haywire were the Sioux assured of the victory. The team seemed to get desperate and almost panicky after the Sioux scored. Both sides showed over-anxiety as evidence by the off-ends and the flareups on the field. Steve Piasecki certainly lived up to his reputation. He didn't exactly set the world on fire with his passing but, then, he didn't have to. Merely the threat of his arm kept the Bison defense from concentrating on the Sioux round game.

Piasecki hit on nine of the 19 passes he threw. Considering that the defense was set up primarily to stop a passing game, Pike's 47.4 percentage against the Bison looks even better. Actually, it's too bad the Sioux don't have a couple of outstanding backs to complement Pike's passing. Put together Piasecki and the backs from SDU or ISTC and you would really have an offense.

The junior from Chicago threw only when he had to or to keep the defense from zeroing in on the Sioux running attack which functioned well for most of the game. Much of the effectiveness of the Sioux running attack can be attributed to Piasecki in another way. His faking was the best shown by any quarterback in games here this year. Often, these fakes were all the rest of the backs needed to get off to a good start.

Another tribute to the Sioux field general was that he was caught attempting to pass only once. He was sacked hard several times but he always managed to get rid of it with amazing accuracy. For instance, the time the Bison intercepted at their own goal line. Pike drew that pass sidarm as he was falling to the ground.

The sixth place Bison have al-

lowed fewer points in conference games than any other team. The opposition have scored only 46 points in four games. This is eight points less than conference-leader South Dakota State. Saturday's game represented the first time this year the Sioux have been held to less than 20 points.

* * *

Spectators at the game Saturday probably saw the two top ends of the conference in John Campagna and Bob Herrick. Campy represented the major part of the Bison offense in at least part of the game. The Sioux secondary were concentrating on stopping Campy in a manner similar to the Bison's coverage of Herrick. Herrick has been up among the leaders in conference scoring for most of the season.

Meyer Wins \$250 Sales Scholarship

Vernon Meyer, a student at NDSC, has been named the recipient of a \$250 scholarship from Vita Craft Mid-Continent Sales, Inc.

The award is part of a nationwide program which students participate in by selling products for the firm. They work part time during the school year and either part or full time during the summer.

Initiated in 1947, the scholarship program has been extended to the point that this year 200 college students in 75 schools across the country will receive scholarships ranging from \$100 to \$300.

SC Basketball To Jump Off Dec. 6; Full Season Schedule Is Announced

The 1957-58 NDSC basketball season will get under way at Concordia Dec. 6. The first home game will be Dec. 7 against Southern Illinois. Conference action will start Dec. 13 at Iowa State Teachers.

Monday, October 28, 1957

Iowa State College Institute for Atomic Research is interested in interviewing seniors in chemistry and mechanical engineering. The Institute trains graduate students in the

field of atomic energy.

Tuesday and Wednesday, October 29 and 30, 1957

The United States Marine Corps, Officer Procurement Office is interested in interviewing students for the purpose of discussing officer training programs. Representatives will be in the Student Union Tuesday and Wednesday next week and available for informal interviews.

Wednesday, October 30, 1957

Great Northern Railroad Co. desires to interview graduating civil engineers. Positions are available in the bridge department for those who wish to enter the structural engineering field.

Wednesday, October 30, 1957

Commonwealth Associates of Michigan are interested in interviewing BS and MS candidates in civil and mechanical engineering. They serve public utilities, industrial, commercial and other organizations throughout the nation and in some overseas areas.

Thursday, October 31, 1957

The Texas Company (Texaco Petroleum Products) of New York City, is recruiting candidates for BS degrees in liberal arts, business administration, and civil, mechanical and electrical engineering.

Dept. Of Agric. Asks Applications

The U. S. Department of Agriculture is interested in receiving applications from senior students of North Dakota State College for a wide variety of positions, the Department's recruitment representative, Stanley Voelker, announced today.

These positions are located throughout the United States and offer outstanding opportunities for individual development and advancement in worthwhile careers. Practically all senior students in the Schools of Agriculture, Applied Arts and Sciences, Engineering, Chemistry and Home Economics are eligible to apply.

Many of these positions will be filled from the new Federal Service Entrance Examination. Applications will be accepted until further notice. Seniors however, are advised to apply immediately if they are interested in appointments to become effective at the time of their graduation.

Detailed information and assistance in filling out application forms may be obtained either from Mr. Voelker's office (Room 307 A, Morrill Hall) or from the College Placement Office in Memorial Union.

Students Comment On Attending SC

What causes out-of-state students to come to college at NDSC? This question was asked of several non-resident students. Their comments follow:

Bob Selkirk, Indianapolis, Penn. "It's cheap and it's close to my wife's home and you can't fight that."

Vernon Meyer, Hartington, Neb.: "It is reputed to be a good engineering school."

Ruth Sanford, Elbow Woods, Minn. "Macalester didn't have a home economics department and this is closer to home."

Dick Gamble, Cloquet, Minn. "I don't know why I came here."

Merlyn Meyer, Columbus, Ohio. "I heard it was a fairly good engineering school and it would be cheaper for me to go out-of-state than to go in state."

Mayonne Johnson, Roseau, Minn. "I just wanted to. They have a very good physical education department here."

Bryon Hodge, Winnipeg, Manitoba. "I couldn't get in at home."
