

NDAC Invited to Take Part in Fargo Ceremony

The Spectrum

VOL. LXXI—NO. 18 NORTH DAKOTA STATE COLLEGE FEB. 5, 1960

THETA CHI DREAM GIRL

Kay Hulebak, AAS, Fr., was crowned 1960 Theta Chi Dream Girl at the Theta Chi winter term party held Friday, Jan. 29, at the Elk's Club. Kay was chosen from five candidates and was presented with the Dream Girl Trophy. The other candidates were: Adela Biel, a Home Economics freshman, Nancy Flatt, AAS freshman, Sue Jackson, AAS freshman, and Carol Mund, an AAS junior.

English And American Students Differ, Says Neil Johnson, Physics Professor

"American students are friendlier than English students and differ in many ways," says Neil Johnson, an Englishman, who arrived at North Dakota State College this fall as assistant professor of physics.

"It is much easier to talk to American students," he said. "They have no inhibitions and use a more direct approach, which is a good thing. American students also have much more poise but are sloppier in their dress."

"In this country, students tend to worry too much about grades rather than if they are learning anything," Mr. Johnson said.

"English students pursue a much more specialized course. For instance, if a student is taking modern languages, he takes two modern languages, Latin and nothing else."

Mr. Johnson is a graduate of the University of St. Andrews, Scotland, and taught physics at the University of Hull, England, for several years.

According to Mr. Johnson, there are few married students in England and no campus accommodation for them.

He went on to say that the English student usually does not pay his way through college and outside working is actually frowned upon as students are expected to devote all their time to college work. He explained that this is because of the population of over 50 million people; only 120,000 are students, and the majority have scholarships.

NDSC students and staff are invited to join the city of Fargo in the opening All-America pennant raising ceremony Saturday, February 6 at 11 a.m. in the Civic Center area. The ceremony will mark the beginning of a year's commemoration as an All-America city.

The invitation to NDSC was extended to President Fred Hultz for the entire college by H. W. Ludwick, general chairman of the All City Committee. Announcement of the award was made yesterday and the college is specially invited to share in Fargo's achievement.

The selection of Fargo for the All-America City Award was made by the National Municipal League and Look magazine. Fargo will have a series of events throughout February to celebrate winning the award and will be featured in the March 1 issue of

Former Communist To Speak Sunday At Newman Club

By Dan Kennelly
Dorothy Day will speak at St. Paul's Newman Club following the meeting Sunday evening, Feb. 7. Miss Day is the founder of the Catholic Worker movement and editor of the monthly magazine, "The Catholic Worker."

A former member of the communist party, Miss Day has described how she was disillusioned by communist philosophy in her autobiography, "The Long Loneliness."

A pacifist, Miss Day has attracted attention several times in recent years as a result of her objection to air raid drills in New York City. Last year she was jailed as a result of not cooperating with these drills. Other members of the Catholic Worker movement have picketed atomic bomb tests and the Washington internal revenue office. Their objection to income tax is that the money is used mainly for war purposes.

Primary work of the Catholic Worker movement is the immediate social work among the homeless and hungry in the large cities of America. In New York, Chicago, and San Francisco members of the group have established what are known as Houses of Hospitality where young people serve without pay aiding transient workers.

Although her practice of radical Christianity is often criticized, her many years of social work has caused her to be considered one of the most influential lay persons in the Catholic Church of America.

Tryota To Sponsor Tea And Style Show

Tryota is sponsoring a tea-style show in connection with Little International. It will be held in the Founder's Room of the Home Economics Building Feb. 6 from 3 to 4:30 p.m.

The theme will be a college girls' wardrobe. Two divisions will be shown; cottons and woolens.

Models include: Cottons—Ellen Buresh, Janice Hanson, Shirley Okert, Pat Reumler, Sonya Faldude, and Pat Hart; Woolens—Elizabeth Anderson, Stanlyn Berg, Diane Brokate, Karen Gronhood, Kathy Vigasaa and Doris Johnson.

Look magazine. The city is one of eleven throughout the nation to receive the All-America City Award. The award is given for citizen activity in community projects and civic improvements.

Fargo submitted its entry with 100 other cities of all sizes last summer and was judged by a special awards committee, headed by Dr. George Gallup.

The Chamber received word Fargo was among the 22 finalists in October and C. Warner Litten and William Schlossman, of the

Civic Affairs Committee, made a 10-minute presentation before the jury in Springfield, Massachusetts, in November.

The Citizens for City Planning urban renewal development project with the \$1,725,000 bond issue, together with the \$2,000,000 school bond issue and the \$2,000,000 flood control measure were included in the report.

Also included was the planned YM-YWCA building, a tax-free project, for which \$1,250,000 has been raised by the citizens of Fargo.

The Adding Machine To Be Presented Four Days In Little Country Theatre

"The Adding Machine", Elmer Rice's sensational expose of the thoughts and frustrations of the "white collar" worker opens Wednesday, Feb. 10 at 8:15 p.m. with a blast of stereophonic sound that will rock the Little Country Theatre, the campus and the community. Scheduled for a jam-packed four day limited run at the Little Country Theatre this is without a doubt the most startling and ambitious production staged at NDSC in some years, according to William Chichester, associate professor of speech.

Directed by Bryon Gackle, graduate student as part of his degree requirement and acted by a company of more than twenty, this production will feature some of the most imaginative staging seen in this area for many a day.

The difficult role of Mr. Zero will be handled by Tom Joyal, a favorite with Little Country Theatre audiences for the past few years. Susan Thompson and Marilyn Anderson are among the cast of twenty that will provide an exciting evening in the theatre.

Season ticket holders are urged to get their reserved seat tickets early by exchanging their tickets in advance at the Box Office in the Little Country Theatre. Tickets for the general public are also on sale now at 75c.

"The Adding Machine" is one of the few "expressionistic" plays written by an American. Much use is made of the abstract, both in the lines and in the scenery. Impressions and mood are extremely important to the expressionist. In

many cases he is concerned with the "unspoken thoughts" of his character and this technique is used in a number of scenes. Through the magic of theatre electronics we are able to see characters doing and saying one thing yet we are also able to probe their innermost thoughts.

Twenty five years ago when "The Adding Machine" was first produced it was acclaimed as one of the finest plays of its kind. Today with automation overtaking us by leaps and bounds the play takes on even greater significance.

Although a serious play, "The Adding Machine" is rich in comic overtones. Those few who have been privileged to see a rehearsal predict an unqualified, sold out fit. Mr. Chichester urges all to plan to see it for this play undoubtedly will be a conversation piece for weeks to come around the campus and the community.

SC Students Needed To Visit Schools, Publicize Sharivar

Are you interested in visiting local high schools during quarter break? Students are to speak to high schools in their home area during quarter break publicizing Sharivar, NDSC, and the importance and advantages of continuing their education by attending college.

A table will be set up in the union where students may register to help tour the state. A committee will organize the visiting. Plans for this must be completed soon.

Information pertaining to Sharivar will be given to NDSC students who are interested. This will include a basic outline of what to tell these high school students and also printed material which can be left in the schools.

For more information contact Tom Myhre at AD 2-9828 after 4.

Be sure to go to the Little International this weekend. The annual Hall of Fame banquet will be held tonight. Judging of crops and livestock by 4-H, FFA and NDAC students takes place tomorrow. The day will be climaxed with presentation of awards by Judy Cook, Little International Queen. See pictures and story on page 7.

Tom Joyal seems to enjoy practicing with Marilyn Anderson for "The Adding Machine". Tom plays the lead in the play to be presented Feb. 10 thru 13 by the Little Country Theatre. Marilyn plays a supporting role. Photo by Hilber

Letter to the Editor

Student's First Impression Of Senate

You who were not in Room 101 at the library at 7:00 p.m. on Tuesday night missed one of the more entertaining school events of the year. The sad point about the event was that it was not intended to be entertaining, rather it should have been of a more serious nature. The great spectacle of the evening was a Student Senate meeting.

The first thing on the agenda, roll call, seemed to indicate that the meeting was not taken too seriously by many of your elected representatives. At least a third of the members were absent; however, this is not too uncommon as 10 out of 18 were absent the previous meeting.

As the meeting progressed, it became apparent that this was not going to be an impartial meeting of representatives of the Student

Body, but, rather an outright inter-fraternity squabble. Most of the meeting was wasted on a heated discussion concerning inadequate election rules, a Senate responsibility.

When the advisor was asked for his comments on the issue, his only comment was that "this was the most 'picky-unish' senate he had seen in his eight years as advisor."

It is small wonder that the Student Senate is considered an ineffective organization which presently is not worthy of the respect it should receive from the Student Body and the Senators themselves.

Two observers to the spectacle,

Wayne Hamann
Mike Stallings
NDSC Students

The Spectrum Asked:

Do you ever worry?

Spectrum Photo Interview

By Mayo Flegel

Janice Nordeng
H. Ec. Soph.
Watford City, N. D.

No, I let my mother do that for me. Sometimes I wonder why she worries though.

Mary Ann Wilmer
AAS, Jr.
Fargo, N. D.

The only thing I worry about is that I don't have time to worry — it's a waste of time anyway.

Craig Sagehorn
Pharm, Fr.
Stanton, N. D.

That depends on how often I get to see my girl.

Noel Estenson
Ag. Sr.
Climax, Minn.

Sure I do and it worries me. However 90% of it is a waste of time.

Letter to the Editor

SC Students Agree With 8 UND Frats

Dear Mr. Thompson:

We feel that your editorial in the Spectrum of 29 January, 1960, indicates that you are in favor of fraternity and sorority participation in such extracurricular activities as the University's "Follies" and our own "Bison Brevities." Although these events serve to publicize the colleges, we feel that there is entirely too much emphasis being placed upon them. Our colleges can definitely use the publicity gained from scholastic achievement which would be of much more credit to the respective schools. We therefore uphold the position of the eight boycotting fraternities at UND.

Although a college or university means many things, it means first and foremost an institution of higher learning, and this fact should be kept in mind by the students. The publicity given to Russian schools during the past two years and to such institutions as MIT and Cal. Tech., along with the numerous Ivy League schools, is derived not from such events as these, but from the caliber of the students in these schools and from the standards set and maintained by these schools.

Your editorial seemed to center upon the question, "Is there a trend by the fraternity and sorority systems towards less participation in extracurricular activ-

ities and more participation in curricular activities?" To those fraternities and sororities who can answer YES to this question, a hearty WELL DONE!!

Mike Weiler and
Jerry Sandvick
NDSC Students

Car Moved Out Of Parking Lot

(ACP) — Southern California's DAILY TROJAN reports an SC coed must have misinterpreted the signs of the Zodiac last month. Thursday's astrological stars said that it was a day favoring the go-getters.

Judy Jones must not have realized this. When she parked her car in a student parking lot, she left the keys in the ignition, not wanting to stop other students from moving their cars in or out.

Someone, following the astrological advice to "make good use of smart ideas," moved Miss Jones' 1959 Chevrolet right out of the lot and into oncoming Los Angeles traffic.

Perhaps Miss Jones wouldn't have been "so nice," as a local police officer put it, if she had read her Friday horoscope.

What were the stars predicting for Miss Jones?
"Avoid all risks."

Letter To The Editor

SC Student Body Seeks Protection

This is a rather unusual letter because I am writing it to myself. You see—my name is really "The NDSC Student". I could hardly give my name in full, since it is about 3300 names in one. Therefore I find it easier to refer to myself as the NDSC Student Body.

Sometimes I get a little worried about myself. I get to thinking there are things about me that are not quite right. For instance last year, when I changed heads, I got into an awful mess. After two tries I finally got the job done, but it was certainly embarrassing. I certainly hope that doesn't happen again this year. I guess it will all go off well, if I am honest with myself.

But that isn't all that is wrong with me. I think I have quite a number of ills. However, there is one inward strife that tops all, a

sort of a mental anguish. In order to understand this better, I had counsel with a "head shrinker".

"Well, sonny," he said, "the trouble with you is you are really two people. You are the over-organized busybody who has no time to do anything really well. And apathetic, indifferent student who never pays any attention to what goes on around you."

"If you are ever going to 'get your name changed'", he said, "you will have to pull yourself together and share your responsibilities. That over-organized, busy-bodied part of you must slow down and take a look at the other half. You are like a team of horses pulling against each other. If you 'get together', great things can be done." He said this in a very convincing manner.

His advice seemed to the point. "But how can this be done?" I said. "That is entirely up to you," he said.

I began to see what he was getting at. I have a few closets that need a little cleaning out, and I am the only one who knows which ones need it the most. Right off hand I can think of a few:

1. How to spend my money wisely.
2. How to get the inactive three-fourths of my body interested in what goes on around me — like voting, lectures, special events (Little International), and lyceum meal.

programs, to mention only a few.

3. How to get enthused when I enter team competition.
4. How to follow the advice of my advisors and instructors.
5. Start staying around home on week-ends—and maybe creating a little incentive to stay here.
6. And most important, learn my lessons well.

I feel a little better now that I see part of my trouble. If I can put some of these things into effect it might help to bring about my much desired "change." Hopefuly,
The NDSC Student.

Student Criticizes Senate's Spending

The Spectrum editorials on Senate budget policy should remind us that government is everyone's business.

Our governmental units, whether college, state or federal, are besieged by pleas for money. These causes are always worthwhile, and desirable according to the sponsors. But maybe one who helps pay the bill can speak a few words.

The question of the relative merits of livestock judging, debate teams, IRC and, here I also add, sports events, is immaterial and irrelevant to the discussion. The real question is "How can Senate best serve the average student?" If any given event serves only a few, let those few support it.

It cost me \$45 last year for student activity fees and I was able to attend only three events. If the organizations on campus are going to squabble over this money, I'll volunteer to keep mine. I'm willing to pay for my education but not to support such organizational activities.

Paul Shea,
Ag. Eng. Jr.

IBM Computer Tells Need Of Man's Diet

(ACP)—DAILY LASS-O of Texas Woman's University reports that Brown University researchers asked an IBM computer just how much it would cost a man to live if his diet were determined strictly by scientific considerations.

The computer reported that minimum quantities of needed protein, calcium, iron, phosphorous and five vitamins could be obtained in only four foods at a nominal cost of 21 cents a day.

The four foods listed by the computer included lard, beef liver, orange juice and soybean meal.

JUST HOW LONG HAVE YOU BEEN MAJORING IN PHYSICAL EDUCATION?

Dr. Sy Mack Speaks on Media Says it Reflects Our Taste

Is mass communications today's potential Frankenstein? Dr. Syllus Mack, Director of Films and Broadcasting for the National Council of Churches, discussed moral responsibility of mass communications Jan. 27 and 28. SC students and faculty listened with eager ears and pounded questions that required definite answers.

Is the present status of mass media bad? No, says Mack. It mirrors our culture. So TV gives us westerns—if the people didn't want horse operas they wouldn't get them. The media informs us about the tastes of our country. Popular taste determines the program you see.

often the most appealing. Instead of censoring media why don't we spend our money pushing the good programs.

The problem of mass media seems to be an abatement of excesses not prementioned. Media simply mirrors our culture. Perhaps that culture is third rate, so we get third rate programs and movies. Then we forbid the public to see them when we should be pushing the finer programs. TV presents many good programs—we must teach the public to listen to them. They must tell us when they like a program as well as dislike it.

Should mass media be programmed to the mass people? It should help you understand and appreciate what others like whether it is above or below your taste.

Can society permit an "anything goes" policy? What about censorship of media? It remains to be seen that the forbidden room is

Mass communications affects you and me. Even religious programs are good religion only when they are good programs. People react. We must encourage them to think. Mass media is the people. What you want you get—and now you've got it. Do you like what you've got?

U Of Kansas Debates Loyalty Oath Based On A Different Vantage Point

(ACP)—Most widely debated issue in the nation's college press last month was still the loyalty oath provision of the federal student loan program.

From the University of Kansas DAILY KANSAN came this editorial opinion on the subject:

"Section 1001 (f) of Title X of the National Defense Education Act of 1958 sits like a tin can on a fence post.

"The American Council on Education opposes the affidavit for a number of reasons. The council calls it discriminatory, unfair, inappropriate, superfluous and ineffective, and says it involves government interference in institutional affairs.

"Each argument is well-supported."

"But these are just so many words in a controversy already muddled by weighty writing. We think the president of Harvard University got to the heart of the objections when he said:

"Arguments for the requirement reveal an unwarranted lack of confidence in American young men and women, in American education and in free inquiry."

"In support of the oath a Minnesota student wrote the following to the University's newspaper: 'Perhaps I may sound a little

old-fashioned in this era of liberal free thinkers, but I am a proud American citizen and even a little bit patriotic.

"I would be more than glad to sign any kind of paper stating this."

"We are equally proud to be Americans, but will line up behind the Harvard man to cast the next stone at this can of distasteful stew.

"We object to the loyalty oath for the very reason the Minnesota student supports it. As Americans we cherish the right to think and do as we please. We will fight any intrusion upon this right.

"The oath, in effect, asks us to guarantee the government that we are loyal citizens. This is like telling a man he must prove his love for his mother. It is an insult.

Dividend Declared By SC Credit Union

A 4½% per cent dividend was declared by the NDSC Employees' Federal Credit Union at the recent annual meeting. Members also voted to refund 5% of the interest paid by borrowers during 1959.

The credit union officers reported a gain of nearly \$26,000 in assets from the previous year to \$209,293.

The new board of directors for the credit union includes Dr. A. Paul Adams, bacteriology; H. Dean Stallings, librarian; Orville Jacobson, marketing; James Dogger, entomology; and Glenn Fisher, social science. Prof. Eugene Petty a retiring board member, was appointed financial advisor to the board.

Other committees include, Credit: Leo Johnson, YMCA; Joseph Zubrisky, soils; and Stallings, librarian; Supervisor: Milo F. Bryn, mathematics; Orville Banasik, cereal technology; and Don Schwartz, communications.

Verne Nies, communications, was named educational officer.

Grace Bayliss, assistant treasurer, was commended for her efficient operation of the credit union affairs.

Executive Council of ISA are: Back row, l. to r.: Sol Shulman, Chemistry Prof.; Bruce Brokke, IE-Jr.; Karen Lynnes, HE-Sr.; Maynard Anderson, Ag. E.-Jr.; and Gary Gilbertson, Ag. -ESr. Front row, l. to r.: Ray Hendrickson, EE-So.; Elnore Bentson, Chem.-Jr.; Phyllis Lunsetter, Chem.-Jr.; and Cathy Kiefer, Chem.-Jr.

Moviegoers Get Italian View Point

Movie goers who enjoy pictures where even rural church activities are given the "Hollywood" polish probably would not enjoy many of the films scheduled for this winter by the Campus YMCA Film Society.

An Italian religious procession shown in "Nights of Cabiria", Sunday afternoon's offering of the Society, had a bleak landscape, straggling lines of participants, not all of whom were worshippers, and lots of accompanying activity which does not fit into usual film church stereotypes.

Neither would the activities of the little streetwalker who star-

red in the show be deemed as black or as white as we are accustomed to seeing them portrayed, nor as sexy.

The film was obviously a low-budget, few-star production, but the artists did seem to get their message across, despite the handicap for most of the 75-member audience of not being able to understand the Italian. English subtitles, however, were deftly done.

That Italy today is a live, vital country could easily be seen in the film. Hug skyscrapers loom in the backgrounds, and motor scooters and compact autos show that her youth is pretty much motorized. The film had a lot to say besides its message of "hope and faith."

A 20-minute comedy, starring Laurel and Hardy, probably explains a lot of the affection our elders have for such old timers as that comedy pair, Charlie Chaplin, Buster Keaton and Harold Lloyd.

The film bundled together many of the sure-fire formula of the early films.

A fat man hung from a high window on a thin rope but was safely rescued. There was an entirely mad drive through heavy traffic which defied traffic laws, common sense and probability, in a Model "T" Ford.

The 50 cent membership fee for a Sunday afternoon at the movies society is certainly a "best buy" in Fargo.

Loyalty Oath Unfair To Citizens Rights

(ACP)—Taking a different view on the same topic was the Clark College (Wash.) PENGUIN'S PROGRESS:

"We have never felt that loyalty oaths are horrible insults that no citizen of the United States should ever be asked to sign.

"There is a legitimate use for loyalty oaths as long as Communist infiltration continues in an effort to weaken and destroy our country from within.

"Perhaps it is unfair to select one group and not others for the loyalty oath requirement. But it should be remembered that the loan fund program was passed by members of Congress. Our national leaders plainly felt that the loyalty oath should be required.

"The administrator of the fund, John F. Morse, said last week that the drop-outs could lead to the destruction of a magnificent program."

"The schools that pulled out of the loan program did not act wisely. They should have stayed in the program and worked through channels provided by the government for amending objectionable legislation.

"We still think no student seeking financial help from the government should object to professing his loyalty."

"The insecure thinking behind the oath—thinking that spreads distrust among our people—this we feel is the real threat to our freedom.

"The question becomes a matter of principle. We maintain that we are good Americans and do not have to prove it to anyone.

"We do not fear the few Communists who are in this country. We fear the men who preach patriotism while they destroy the truth that is essential to our unity. For this unity is the real source of our strength.

IFYE Student Kathy Stiner Speaks At Tryota Gathering On Campus

Kathy Stiner, former International Foreign Youth Exchange Student to Greece, was guest speaker at Tryota, professional Home Economics club, last week.

Miss Stiner showed slides and spoke on "Home Life in Greece". She told of her stay in each of ten homes there.

Her slides illustrated her experience of rural life in Greece. The customs and living standards of various families, differing in economic and social status, were discussed by Miss Stiner. She told how she became a part of

each family she lived with during her stay in this foreign country.

The International Foreign Youth Exchange Program is designed to create world understanding between youth of various countries. The program each year sends young people especially interested in foreign relations to various countries to share their customs of living.

Miss Stiner has done extension work in Iowa and is now working on her M.A. in sociology at Moorhead State College.

Like The Answer Is Still No, Says Prof

(ACP)—Southern Illinois University EGYPTIAN carried this item: A beatnik received quite a shock from a member of the Office of Student Affairs (OSA) recently.

An unclassified student was being advised for the winter quarter by a member of the OSA staff and was wanting to take 14 hours from the same department. The staff member informed the student that this was not possible. Snapping his fingers, the student reportedly said, "Like man, I gotta have the 14 hours, cause, man, I'm gonna turn this world upside down"

The adviser leaned back and calmly replied, "Well, like man, you're still not gonna do it."

High Society Goes To Senate

By Evanne Grommesh

After sitting in on Senate meeting Tuesday night, pinnings and serenadings didn't seem very important; therefore, no social column this week.

I'd much rather give you a run down on what was said and done at Senate.

Dean Stallings, advisor summed up the whole meeting very adequately when he said "This senate is the most "picky-unish" group I have ever seen." What brought on the statement? Here's the story:

Bill Lantz, commissioner of Campus Affairs, reported that complaints had been brought against, first, Dean Forseth; second, Jerry Schnell; and third, Mike Stallings and Wayne Hamann.

Dean Forseth, presidential candidate, was charged with campaigning before the opening day of Feb. 1. Forseth handed to each person who signed his petition a paper with his platform on it. The Commission on Campus Affairs ruled that this WASN'T A VIOLATION because he gave the letter as a platform which was too long to be placed on the petition.

Charges were brought against Jerry Schnell, presidential candidate, because his petition was turned in without his signature. Schnell had been out of town on a judging trip. The commission ruled against the charges because the petition had been signed by a fraternity brother and a telegram had been received from Schnell on Saturday telling of his running.

Mike Stallings and Wayne Hamann, senate candidates, were also charged with early campaigning. A banner was put up at 10:00 p.m. on Sunday, which was before the opening date. The commission ruled this a violation and their penalty be that their banners be taken down 12 hours before campaigning ends.

HOT DISCUSSION

Then the hot discussion on Forseth began. Charges on the other three candidates were left in the dust.

John Altenburg said "Handing out this letter was out-and-out campaigning. If it had been one letter attached to the petition I would have gone along with the idea."

Bob Mann asked, "Just what is campaigning? Many of the candidates have more signatures than they need. Isn't this a form of campaigning?"

President of SAE, Bob Thompson, asked for the floor and stated that Forseth had asked him if this would be against the rules (to put his platform in letter form), and Thompson had told him no. "In other words," Thompson said, "Forseth was not and did not have any intention of doing anything wrong." He criticized Senate for having an inter-fraternity battle on the senate floor and brought out that a senator's fraternity should be one part of him and senate another part. They should remain separate entities."

Forseth backed up Thompson's comment by stating, "This was the last thing I wanted to happen. I had no intentions of dirty campaigning. I felt if the others are to know what my qualifications are, they must know what I stand for."

Carol Olson, who felt that senate was wasting time, called for a vote on accepting the commission report. It was defeated 6 to 5 (not all the senators were present).

After reports from the other commissions were given, Forseth asked that something defi-

nite be settled so he would know what to do about his campaign. He stated that he would run regardless of whether his name was on the ballot or not. He would run as a write-in candidate.

Marv Bachmeier made the motion that Forseth be disqualified in this campaign. Dick Bergquist seconded the motion.

Bill Lantz then said that senate was nothing but a "Mickey Mouse" organization and senate should stop bickering over such trite things and settle down and function as a group. "We're about as unorganized as the Rahjans" . . . (laughter from the crowd) . . . Commissioner Carl Haas calls meeting to order . . . "It (senate) is a farce and the sooner I get through the better."

After Bills speech of anger Carol Olson rose and stated that the issue is nothing but a fight between the ATO's and the SAE's—the ATO's making the charges.

Commissioner Lyle Baker calmed things down a bit. He felt that senate needs to be evaluated and added that the committee that was supposed to look into this should have been functioning. This committee was appointed at the last meeting and as of yet has not met. Baker further stated that senate has a black name on campus and something should be done.

J. D. Johnson, a senate candidate, said if Forseth's name was taken off the ballot because he was wrong—OK, but if it was taken off because his name was Dean Forseth and he was an SAE—NO. He also felt that this was a squabble between organizations.

Bob McLeod and Jim O'Keefe then got into a discussion on campaigning when signing petitions. McLeod said just talking was campaigning and such was impossible. O'Keefe felt the candidate shouldn't say a word.

The vote was called on Bachmeier's motion that Forseth be disqualified. It was defeated 0-7.

Hodge then moved that the report of the Commission of Campus Affairs be accepted and the motion was passed unanimously.

MY THOUGHTS

This was the first senate meeting I have ever attended and I might say I was a bit disappointed. The meeting must also have been a bit discouraging for the candidates running for senate who were there, with two of the senators calling it a mickey mouse organization and saying they were ashamed to be a part of it.

I have tried to cover this meeting fairly and without bias. You might be interested to know we had a tape recorder there which took these comments down.

I feel, as Baker pointed out, senators should be more representative of each area on campus. Right now it appears to be pretty much of a squabble between the ATO's and SAE's. It's time senate acted as one intelligent group.

First we hear about the money situation with senate going into the red. Now they fight about minor things. Why doesn't senate concentrate a little more on a budget and spending our money intelligently for things worth while.

All I can say is before you vote for a president and senators, look at each of them and study his qualifications. Vote for someone who is interested and not just someone who wants to be a senator or president because it makes him look like a wheel. Senate needs good people.

Who Was Minard, Churchill, Bolley? See Display In Morrill For Answer

Are the students today interested in the early history of our college? The Agronomy Club answers an emphatic "Yes."

The Agronomy Club has started a series of displays portraying the deeds and accomplishments of the pioneer professors at NDSC. The student interest, shown by the finger prints on the glass showcase, indicated the desire for information about our history.

The display is located on the first floor of Morrill Hall. The displays will be changed monthly. Professor Bolley, known as "The Flax Man" to the world, is on display this month. Bolley was one of the first instructors at NDSC.

The Agronomy Club feels that a better understanding of the history of our college will create a deeper sense of honor for the college.

The question now arises, why not have a course (non credit) offered yearly giving the complete history of NDSC?

We all know that NDSC has a history. How much do we know about the deeds and accomplishments of men like Bolley, Waldren, Walster, Putnam, Minard, Shepperd, Churchill, and Ladd? Most of us would answer that they must have done something to have the buildings on campus named

in their honor, but what?

When you have a spare minute take a glance at some of NDSC's history by inspecting the display material on the first floor of Morrill Hall.

African Art Shown In Library Display

A 36 piece exhibit of African art is now on display in the library and will be on display until Feb. 17.

The exhibit is under the direction of the Related Art Department, School of Home Economics, and will feature sculpture from the collection of Ladislav Segy of New York City.

Segy, one of the world's experts on African art, will speak at a convocation Feb. 17 in Festival Hall.

Segy says that the work of art of the African is a tradition extending back at least 2,000 years, and is intimately tied up with his daily life.

Made of wood, stone, bronze, and ivory, at least 20 sculptures were used by each adult and consisted of ceremonial masks, fertility figures, ancestor and magical statues and others.

"Through this background and tradition a powerful art has emerged and it is hoped that the visitors to the exhibit will gain a better appreciation and understanding of the great inventiveness of the African artist," Segy said.

North Dakota Up Front In Counseling

"North Dakota is one of the leaders in guidance and counseling," said Dr. Robert B. Larson, NDSC associate professor of education and psychology. "We are the only state using federal money for counseling."

"NDSC is offering credit courses in psychology and education in TV classes, Saturday and evening classes for persons with full time jobs who wish training," said Dr. Larson.

The counseling and guidance program has been set up to meet several needs. One is training qualified school counselors with a master of science degree in counseling and guidance. Their graduates will meet the academic

requirements for state certifications as school counselors. Course work also meets the academic requirements for state certificates as a teacher-counselor.

During the fall quarter of 1959, fifty-three persons were enrolled in TV courses. For the winter quarter of 1959-60, 152 students were enrolled in night classes.

Alumni Are Aiding SC Petition Drive

Alumni are as interested in the NDSC name changing issue as are the students, according to Mr. Harold Olson, director of the Nelson County Alumni Association.

The members of this recently-organized alumni group and other such groups throughout the state are presenting the case for changing NDSC's name in their community.

Petition signatures are being obtained by the alumni, although, as Mr. Olson says, "in many cases the students have beaten me to my neighbor's signatures."

The Nelson County Alumni Association was organized in August, 1959, and has a potential membership of about thirty members. Similar organizations have been developed in each county of the state.

Officers of the Nelson County Alumni Assn. include Mr. Martin Aaser, Lakota—President; Mr. Robert Getz, McVile—Vice President; Miss Beva Fegley, Lakota—Secretary. Mr. Sherman Quanbeck and Mr. Harold Olson were elected to the ex-officio board of directors.

Retailers Plan Trip To Survey Jobs

Twelve NDSC girls are planning a field trip to Chicago Feb. 9 - 12. The trip will be supervised by Miss Emily Reynolds, head of the textiles and clothing department.

The purpose is to give all junior and senior girls in retailing and related courses a chance to see opportunities open to them in the textiles and clothing industry.

In Chicago the girls will visit: Merchandise Mart, Chicago Museum of Natural History, Kupperheimer, Sears Testing Laboratory, Carson Pierie Scot and Nancy Pier—Houseware Exhibit.

Miss Reynolds said, "I know the trip will be worthwhile for anyone interested in textiles and clothing, and similar trips may be taken each alternate year."

LSA
The Lutheran Student Association will roller skate tonight at 8. Meet at the center. Sunday, Dr. Prausnitz of Concordia will speak on "On One Thing or Another" after the fellowship supper at 5 p.m.

Persons in these classes include teachers wishing to become counselors, those counseling without certificates, welfare workers, church workers, nurses and regular college students.

North Dakota schools have 28 full time counselors and numerous schools have part time counselors. According to Larson, there are approximately 2,000 students per counselor in North Dakota while the recommended amount is 250 students per counselor so there is a great need for more people in this field.

Students wishing to enroll in graduate study in counseling guidance at NDSC should notify Dr. Gary R. Walz, coordinator to arrange an interview with the Qualification Review Committee. Admission to study will be made on the following:

1. Possession of a teacher's certificate.
2. Evidence of at least one year's teaching experience.
3. Above average undergraduate achievement.
4. Possession of the maturity and interest appropriate to guidance work.
5. Recommendation of previous education supervisors.

Buying Farm Costs \$25,000-\$40,000

"A NDSC student graduating from the School of Agriculture this spring with the intention to start farming on his own will need a minimum of between \$25,000 and \$40,000 to get set up with adequate equipment, livestock and other necessities," said Leo Fenske, instructor in agriculture economics at NDSC.

"It would be cheaper for a young farmer starting in farming to rent the land and put his capital into equipment and livestock, thus being able to operate a larger unit."

According to Fenske, the opportunities of farming will probably be as good in the next 10 years as it has been during the last decade. "The biggest problem facing most young farmers is finances and the next 10 years will require more financing than the last 10."

"The coming presidential election won't have much effect on the opportunities of farming, so I don't see any apparent reason for waiting if a person intends to start farming this spring," Fenske said.

Gold Star Band Schedules Tour

The NDSC Gold Star Band will be going on its annual trip Mar. 3-15 according to Director Bill Euren.

Winnipeg and Brandon, Manitoba; Regina, Sask.; Williston, N. Dakota; and Glendive, Montana are some of the 12 cities and towns where they will perform.

Euren said that the trip has been scheduled over quarter break so the members won't lose as many school days as in the past.

Practices have been extended on Mondays and Wednesdays to 5:30 p.m., and an extra practice is held on Sundays at 2:30 p.m. in preparation for the trip.

Lab Added to Vet Science Dept.

A modern, spacious research laboratory has been added to the facilities at NDSC department of veterinary science during the past four weeks.

The walls are of brick tile contrasted on the North by a pastel green. The main working area has stainless steel cabinets which are placed in a U shape. This provides easy access to the entire area by technicians. Separate rooms are provided for special types of biological equipment and for office space.

This room was formerly a part of an old amphitheater in which veterinary medical students sat in an elevated semi-circle and observed surgical procedures on livestock performed by Drs. Leunis Van Es, Lee M. Roderick, and A. F. Schalk.

In 1946 under the direction of Dr. Donald F. Eveleth, chairman of the department and head veterinarian, the room was remodeled and the amphitheater was removed because it was no longer needed for the work being conducted in the department. The space was used principally for a small animal inoculation area.

Expanded research in the department made necessary the renovation of the area late in 1959. Today the old amphitheater houses some of the latest scientific

research equipment available. This includes electrophoretic equipment for the analysis of blood serum proteins. Diseased conditions of the circulatory system can be detected by separating the blood proteins. This is accomplished by allowing the proteins to migrate in an electric field and staining with an appropriate dye.

Other recent additions include a muffled oven which controls the temperature in the preparation of chemical specimens and a ventilated hood with a device for the prevention of explosions when the technicians are working with explosive chemicals.

The laboratory is under the direction of Dr. Myron F. Andrews, assistant veterinarian. His staff consists of Pat M. McIlwain, Homer Rothfus, a student research chemist and Miss Eileen Henning, student technician.

They work primarily on a study of host parasite relationships of the livestock of North Dakota. This is a study of the effects which roundworms, tapeworms,

flatworms, stomach worms and others have on the growth, development and efficiency of farm animals.

Diseases produced by these organisms are studied and drugs are tested which show promise of ridding the animal of these parasites. Various tests are conducted for poisons which are known to affect livestock and domestic pets.

Alpha Phi O Gives Display Case

As a result of their interest shown in honoring outstanding scholarship, Alpha Phi Omega, honorary service organization, is erecting a display case and a permanent plaque in the NDSC library.

The display case, to be changed every quarter, will feature students attaining a 4.00 average during the preceding term. The plaque will be a tribute to honor graduates.

SC Junior Says 'It Takes Patience To Become Good Ham Radio Operator'

By Raymond Scheetz

A native boy in Southern Africa was near death from the loss of blood. A ham radio operator in the area sent an SOS out on his set for blood for the boy. An operator on the eastern coast of the United States heard the message and the embassy in Washington in cooperation with the Red Cross got the blood to the boy in time to save his life.

This is an example of one of the services performed by a ham radio operator said Roger Malburg, who is a licensed ham operator. Roger Malburg is a junior at NDSC majoring in Dairy Husbandry from Cogswell. He has been a licensed operator since his first year in high school.

Roger took up ham radio as a hobby, mostly because he liked to talk with people in other walks of life. He has talked to quite a number of people in his spare time. One is from the state of Kansas, whom he has never met but feels he knows him personally even though he has never heard his voice. They communicate in code.

Roger has talked to a number of clergymen in the state of North Dakota and neighboring states. There are also a number of shut-ins who operate ham radios. Age doesn't appear to be a limiting factor. He has talked to a man who is 91 years old and he knows of a boy who has a license and is 9 years old.

According to Roger, to get a license for a ham radio operator you have to know the Morse code, a few basic understandings of ra-

dio and know the FCC regulations for ham operators. The cost of getting started is variable depending on what you want to invest. The cost may be as low as \$30, depending on the set you want.

The ham operators work with the Civil Defense in case of a national emergency. In peace time they handle emergency messages that may arise in normal communication operations.

"Most people get started in ham radios as a hobby and all it takes is a little patience and studying to get a license and be a good operator," said Roger Malburg.

Steel Worker Loses \$2,000 In Strike

On the basis of increased pay alone, it will require the average steel worker about 7½ years to make up the \$2,000 he lost in wages during the 116-day steel strike.

These figures are based on a 40-hour work week, 52-week year, and increases of seven cents an hour effective Dec. 1, 1960 and Oct. 1, 1961.

However this does not take into consideration fringe benefits, skill differentials, etc. It is difficult to figure exactly how long it will take him to make up the loss if all factors are considered.

Taking the estimate of a union official, it will take about 2½ years—the life of the new contract—to make up the loss, counting all factors.

SC Bowlers Lucky To Have Alleys

By Kay Klicker

"NDSC is lucky to have the bowling facilities it has," said Leo Klein, employee of the NDSC Bowling Lanes. "Other schools twice this size do not have bowling alleys that come close in comparison to ours."

Leo has been working at the bowling lanes one year. He said one of his problems is "putting up with smart college kids." From the way he said this it was quite evident that he doesn't mind them a bit.

Leo works close to 10 hours per day. He starts in the morning cleaning and spraying alleys, sorting towels, and taking care of other details that are necessary for the bowling lanes daily operation. Throughout the day his duties are to take care of the desk, alleys and watch the game room.

Bowling hours are from noon to 10 p.m. Monday thru Thursday, with bowling classes from 10 a.m. until noon. Friday and Saturday bowling is from 10 a.m. until midnight.

Bringing the Finest to Our Campus

THE LITTLE INTERNATIONAL STARTS TONIGHT

Judy Cook, queen for the "34th Little International," and Don Johnson, Manager of this year's show, checks over a Holstein which will be featured in this year's show.

"The Little International" will get its kickoff with the Hall of Fame banquet to be held this afternoon in the Union ballroom.

The 34th annual "Little International," sponsored by the Saddle and Sirloin Club, is primarily a contest among students at NDSC in the fitting and showing of livestock and a contest in exhibition of machinery, agronomic, and horticultural products. In conjunction with each year's program is the "Hall of Fame" banquet, a stock judging contest, and style show.

Hall of Fame

The Hall of Fame banquet, the first event, will be held in the Student Union ballroom today at 6:30, honoring an outstanding individual of North Dakota for his contribution to agriculture. Anyone may attend.

Participation

More than 200 4H and FFA members from North Dakota and parts of Minnesota will compete in the judging of livestock and crops beginning Saturday morning at Shepperd Arena.

Style Show

A style show presented by stu-

dents in home economics, will take place in the Student Union tomorrow afternoon at 3:00.

Coed Milking Contest

A coed cow milking contest and a calf tying contest are among the "Special Events" scheduled for the evening performance starting at 7:15 p.m. tomorrow.

Cost

The entire program is open to the public. Tickets for the banquet have been set for \$1.75 per person.

Farm Equipment Show

The Farm Equipment Show of the Little International will take place in the Agricultural Engineering Building, according to Arlyn Kraft, Farm Equipment Publicity Chairman. It will start at 12:00.

The Farm Equipment Show will consist of 5 divisions. The Historical Division, which is non-competitive, will feature models of some old tractors, a 1918 Avery steamer and a kerosene burning Rumley. The four competitive divisions consist of: Farm Structures, Utilities, Soil and Water Conservation, and Farm Machinery.

Any students who wish to compete in any of these four divisions may sign up on a list placed in the Ag. Eng. Building.

Committees

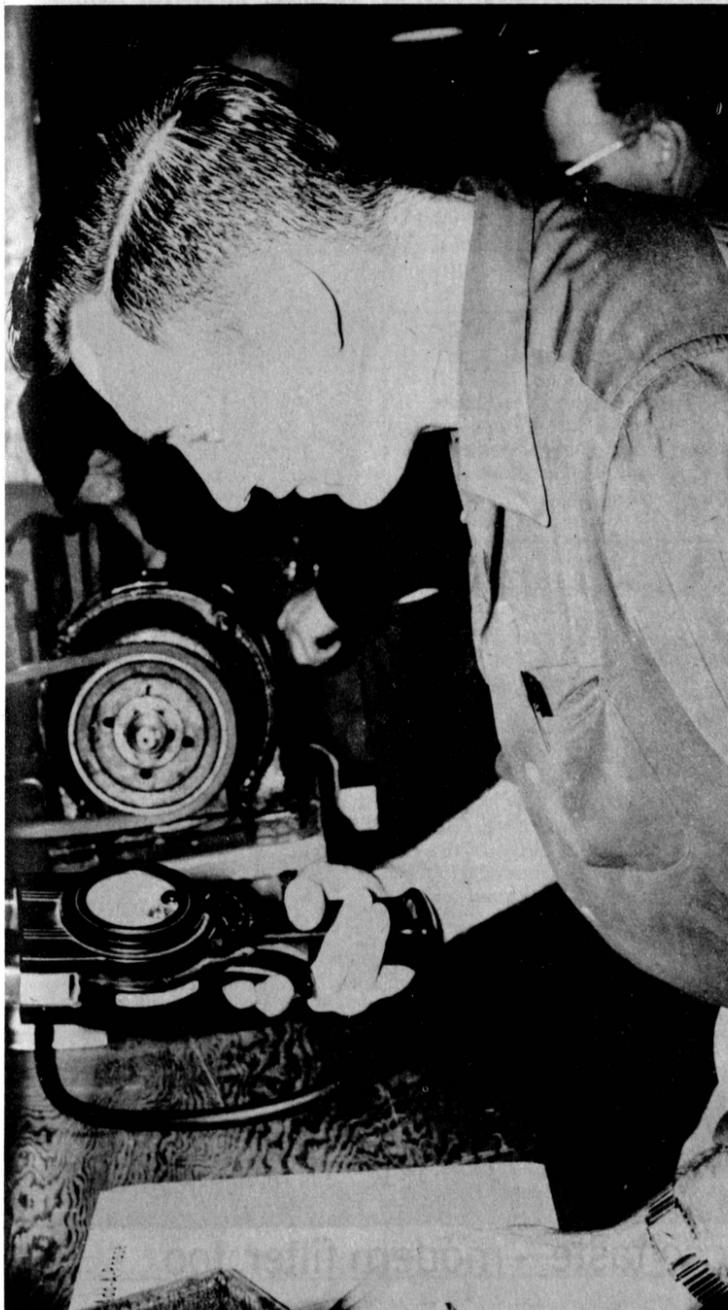

The manager and his assistant, Richard Knutson, NDSC agriculture junior, recently announced the Little International staff. They are Gordon Lund, Mike Brandvick, Charles Bateman, Keith Bjerkke, Paul Brackelsberg, Vern Boeshans, Ray Meyer, Gerald Puppe,

Maynard Iverson, Allyn Hart, Floyd Aune, Floyd Albers, Jack Brown, Ray Kleppe, Carlyle Hillstrom Sherwood Peterson, Douglas Richman, Carl Larson,

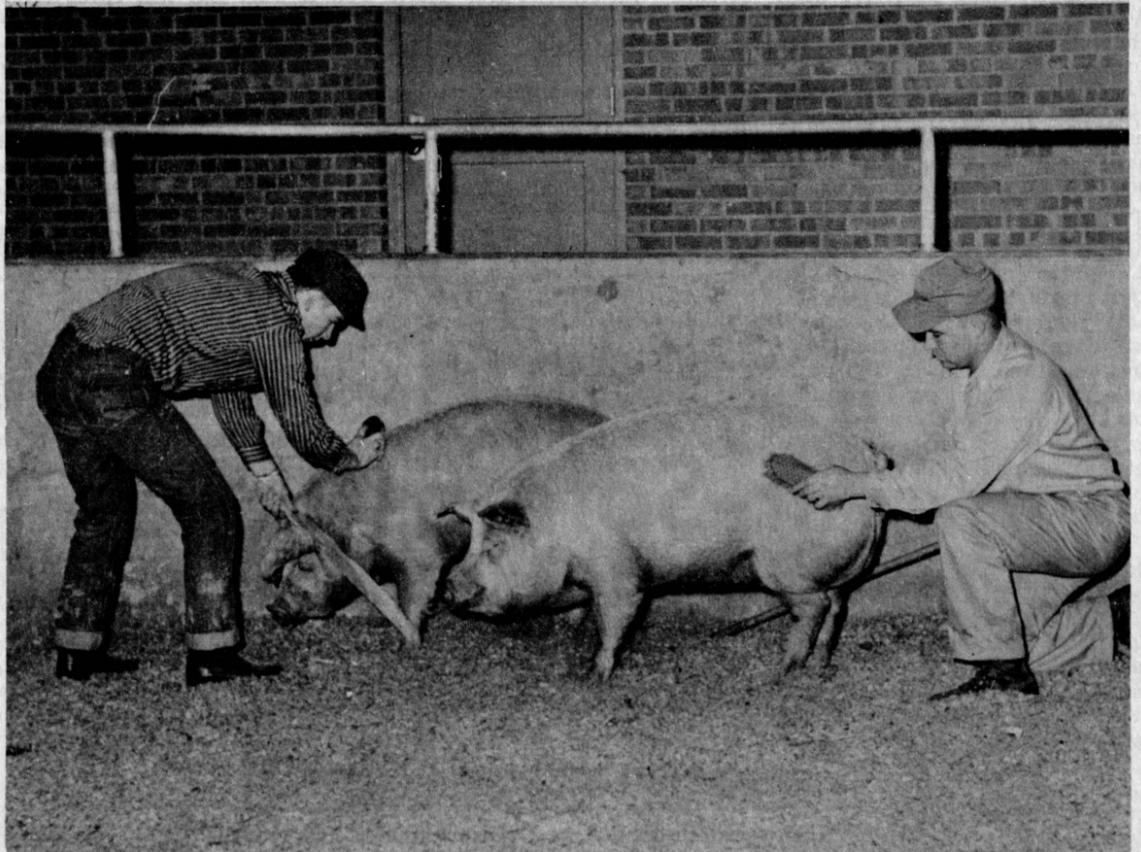

Edward Hins, Einar Bredeson, Norman Baakegard, Ted DeKrey, Henry Singer, Dexter Johnson, and Pat Meyer.

"This is one of the biggest shows held on the NDSC campus and is a great way of improving relationships between NDSC and the people in the surrounding area," said Don Johnson.

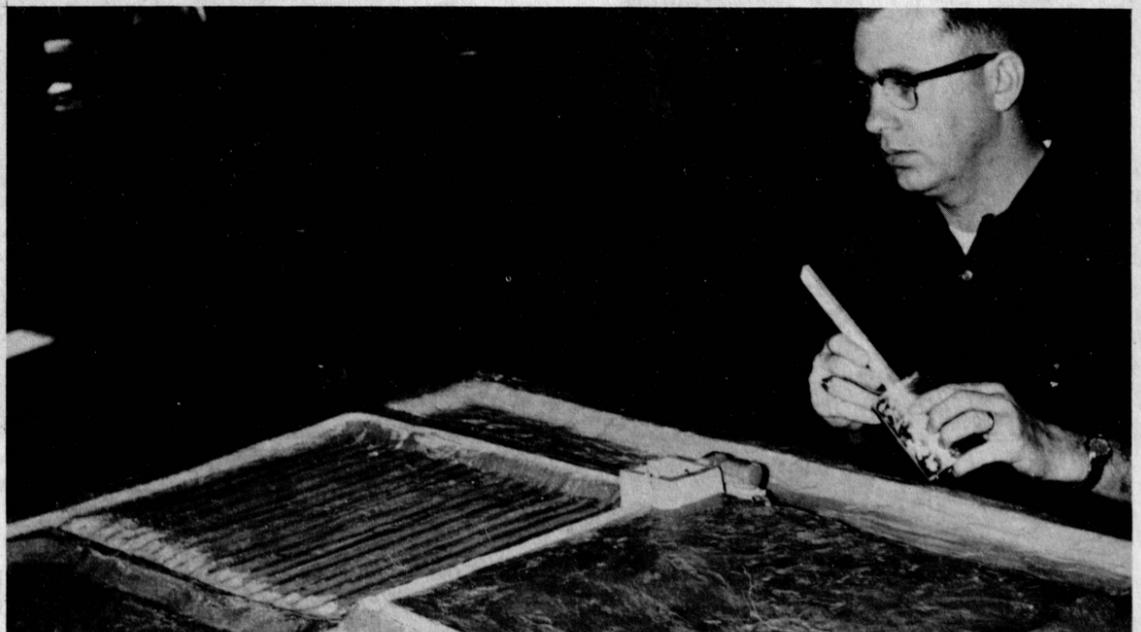

Part of take goes toward the judging team's expenses.

Don Elston demonstrates the Add-A-Phase machine which changes single-phase electricity into triple-phase electricity. He will demonstrate it at the Farm Equipment show Saturday.

(Below) Denis Meyer will display a scale model showing the different types of irrigation. It will be displayed at the Farm Equipment show Saturday. (Above) Vernie Boeshans and Francis Kukowski, a short course student, prepare two swines for the Saturday evening show. Also taking place in the evening is a coed cow milking contest, and calf tying contest.

Sid Rusdal, janitor at the library, walks out of the newly installed vault at the NDSC library. The 22 by 45 foot fire-proof vault will be used for storage of college records, which have to be kept indefinitely. It will replace the old vault in the Administration Building.

Where Do Arts and Science Fees Go?

By Christy

"Where do the arts and science fees go?" How many times have you wondered this as you stood in the line at registration?

"The fees go for projection equipment, calculating machines, microscopes, maps, instructional aids, and paper for quizzes and curriculum outlines," said Seth Russell, Dean of the School of Arts and Sciences.

He pointed out that there is no budget for instructional equipment in the appropriations given

to the school. Many colleges have a fixed fee charged to all students at registration to cover these costs. For example, at Pennsylvania State the fee is \$135 a semester.

If we did not have arts and science fees, it would be necessary to raise the tuition in order to cover these costs.

Dean Russel said that the need for more instructional equipment is brought on, in part, by the increased enrollment. Larger classes need equipment that can be seen from a greater distance. In the days of smaller classes, quizzes were written on the board and there was little, if any, expense for paper. With larger classes, a great deal of paper is used for tests alone.

There are now nine classes in the School of Arts and Science,

which number over 150. In some of the classes student fees are used to purchase the books which are placed on reserve in the library. While the fees from one quarter hardly pay for the books, the student's costs are cut since he does not have to buy a text.

The arts and science fees, after collection, are put in a lump sum. Then it is allotted for various purposes. Not all of the money that is aid for one class is used in that class. The cost of materials and equipment for the science classes is very high. One embalmed cat, of the type used in zoology costs \$10.

Although the money that you pay in fees for a history course one quarter may not be entirely used in that class you may receive more equipment that you have payed for in fees in another class.

Barley Conference Held On Campus

Approximately 200 barley research workers from the U. S. and Canada met on the NDSC campus Feb. 14 for their 4th International Barley Conference.

According to Dr. A. E. Foster, Assistant Agronomist and Barley Breeder at NDSC, this conference is held every three years. The majority of the scientists attending were from the northern section of the U. S.

Dr. R. H. Harris, Cereal Technologist at NDSC, was chairman of the local arrangements committee for the conference.

Registration will be held Feb. 1 and lectures will be given daily in the Student Union ballroom.

There will be a building tour Feb. 2. This tour will cover three buildings, cereal technology, agronomy-plant, pathology greenhouse, and the plant breeding laboratory.

A banquet will be held for the barley workers on Wednesday evening, Feb. 3, at the Gardner Hotel.

Marketing Class To Go To Minneapolis

Spend two days in Minneapolis for a class? Sounds wonderful doesn't it?

Members of Prof. Perry Hemphill's class in agriculture economics 326, agricultural marketing, will go to Minneapolis on a marketing tour Feb. 8 and 9.

Some of the places they will visit are the grain exchange, the Minnesota Mining Company and a federal reserve bank in Minneapolis, and at Hopkins, Minn. they will visit a large Red Owl store.

On the tour the class will be able to observe ways in which different marketing systems function.

The group will leave by private car Sunday afternoon Feb. 7 and return Tuesday evening, Feb. 9.

'Support Prices' Is Debate Topic

The American Farm Economic Association is sponsoring a debate contest and a public speaking contest. The contest is open to all students enrolled in Agricultural Economics. All colleges are encouraged to send representatives which will compete the 8th and 9th of August at Ames, Iowa.

The topic of discussion will be "Has Government Support Prices Aided the Farmers". A student may enter only one of the two and only one debate team consisting of two students may be entered by one institution.

For further information contact the Agriculture Economics Department in Morrill Hall.

Leadership School Held At NDSC To Train Future Recreation Leaders

Thirteen campus students are sharpening their leadership skills in the Community Recreation Leadership School which began January 18 at Morrill Hall.

Kenneth Olson, assistant state 4-H Club leader and director of the leadership school, said the purpose of the school is to "train future community leaders so that they could conduct a two hour community party of folk games and dances if called upon to do so."

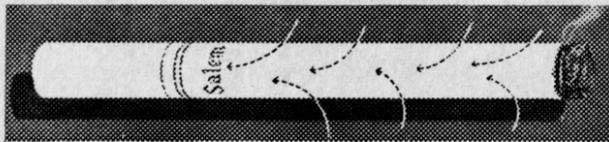

The leadership training school consists of ten 1 hour meetings and is held every winter quarter.

Students attending are: William and Kenneth Kellogg, Monango; Margaret Harbeke, Page; Marie McKinzie, Douglas; Judi Rae Frey, Jamestown; Gloria Schmeling, Sentinel Butte; Elaine Narum, Michigan; Cecile Myhra, Stanley; Nick Rice, Pettibone; Ernest Rethemeier, Larimore; Arthur Schroder, Mekinock; Louise Dallmann and Sherry Hegdahl, Barnesville.

Major General Guthrie Visits Campus

tary academy at West Point, General Guthrie has served in Africa, Europe, and the Far East. He has received the Distinguished Service Medal with one Oak Leaf Cluster, the Legion of Merit, the Army Commendation Ribbon with two Oak Leaf Clusters, the French Legion of Honor, and the Order of the British Empire, to name only a few of his decorations. Prior to his assignment to XIV Corps, General Guthrie served as Director of the European Region, International Security Affairs, Office of the Secretary of Defense, Washington.

General Guthrie is married and has two sons, one of whom is a second lieutenant in the Artillery; the other, a cadet at West Point.

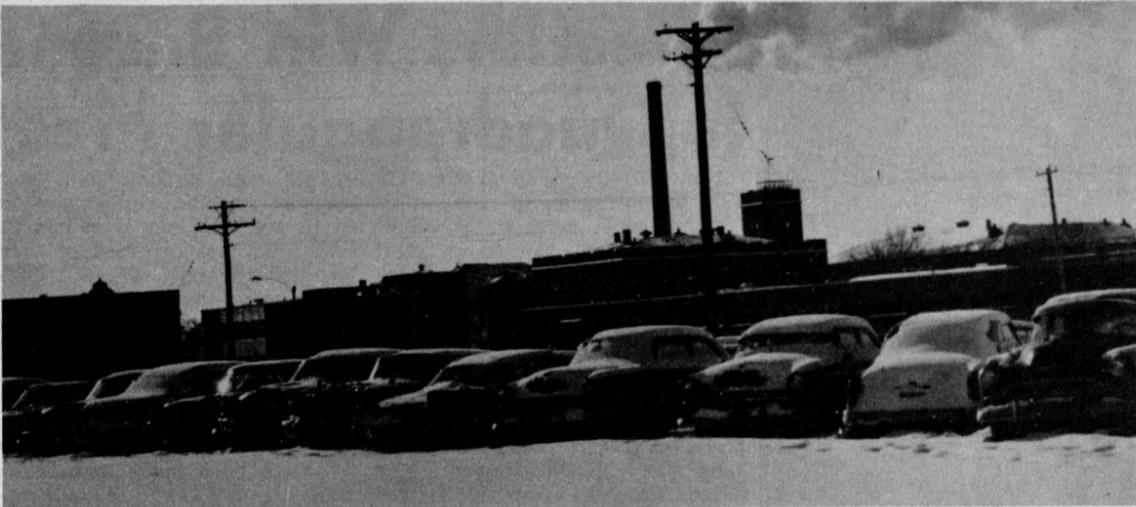

The XIV Army Corps, with headquarters in Minneapolis, has charge of the ROTC and Reserve Affairs in the states of North and South Dakota, Minnesota, Wisconsin, and Iowa.

General Guthrie plans to return to Minneapolis the evening of February 11th.

Major General John S. Guthrie, Commanding General of the Army's XIV Corps, will visit Fargo on Feb. 11. General Guthrie will confer with college officials and the Army ROTC staff.

General Guthrie assumed command of the XIV Corps in September 1959 replacing Major General Briard Johnson who was transferred to Bangkok.

Is U. S. Youth Really Listless?

(ACP)—Editors of a national news magazine last month queried college journalists about the supposed demise of "Young Turks" in America today.

Retorted the Missouri Valley

College DELTA: . . . "stop running around like a blind mole, bumping into tree after tree, and still asking, 'Where is the forest?' Open your eyes and look about you. If you do, the traditional en-

terprising and forward looking Young American will be found.

"You won't find American youth wielding guns and grenades as the youth of Hungary and Turkey have done. But you will find enterprising youth working and building for the future.

"If you believe that youth is listless and unenterprising, perhaps you have never bothered to notice how several hundred college men spend their summers each year. They spend them overseas—but not in plush hotels or on fancy tours. No, they spend them working—digging ditches, pouring concrete—hard manual labor. Working side by side with young men of the foreign nation, they build roads in remote villages and raise missions in the furthest corners of the earth. And at night, after the day's work is done, they sit down beside their foreign brothers in a circle of brotherhood and fellowship. Open your eyes—the 'Young Turk' is there.

"If you still feel that youth is listless and unenterprising, how do you explain away the New York Explorer Post that made 1086 phone calls in one evening to secure volunteers for civil defense work, and how do you explain the actions of the group of students on this campus who organized a marathon run to Orlando, Fla., which attracted nationwide attention?

"You're still looking for 'Young Turks?' Well, what about the Negro students you read about each September?—the brave souls who flaunt the centuries of tradition and unfounded prejudice that have been built up and assert their God given right to equal treatment.

"Keep looking up, people. The 'Young Turks' are there. All it takes is eyes to see them. Look about you and you will see that you are surrounded by 'Young Turks' who are using initiative and enterprise, who are healthy, strong and forward looking—who are doing their 'best today, for a better tomorrow.'"

NORTH AMERICAN AVIATION, INC.

Bentson Heads Herd For Eleventh Year

Head coach of the 1959-60 North Dakota State basketball team is B. C. "Charlie" Bentson.

Bentson, who last year completed his tenth year of coaching Bison basketball teams, has an overall record of 117 wins and 114 losses. He guided his team to a conference championship in 1952, and in 1954 his squad tied for the league championship.

Bentson graduated from the University of Wyoming in 1941, where he lettered in football, basketball and baseball.

After graduating from college, he spent six years in the U. S. Marine Corps, rising to the rank of lieutenant colonel. He coached for two years while in the service; for one year after getting out of the service Bentson served as freshman coach at Wyoming, before coming to North Dakota State in 1949.

Benefit Match Is Tribute To Roehl

The benefit wrestling match scheduled for Monday night is a tribute to Larry Roehl, a heavy-weight wrestler who drowned in the Mississippi last summer.

Coach Tom Neuberger said, "We think this will be a good wrestling match. The frosh have a good squad as their record of 6-0 indicates. The varsity has been improving each match and, of course, they will scrap like tigers to keep from being humiliated by the freshmen. You know the kids on last year's squad thought a lot of him, when they will lay their record on the line since they have everything to lose and nothing to gain by wrestling the freshmen. I hope the student body will support this venture and see an interesting wrestling match, too."

Coach Neuberger does not know the exact line up, because the captains will coach and organize their respective squads. Mike Bewley is the captain of the freshman team and Dale Hinkle heads the varsity. However, the coach expects the lineup to be as follows:

Weight	Varsity	Freshmen
123	Bob Holmes	Banks Swan
130	Glenn Holte	Gary Yost
137	Larry Van Sickle	R. Wedel
147	Frank Johnson	Mike Bewley
157	Einar Bredeson	Lyle Bring
157	Noel Mohberg	Russ Hedge
167	Dale Hinkle	Kenn Carr
177	D. Whitson	D. Schindler
Heavy	K. Anderson	G. Anderson

Wrestlers Win Second In Quadrangular Meet

The NDSC varsity wrestlers we did and accumulated more won second place in the quadrangular meet held in the NDSC Fieldhouse last Saturday. MSC won the meet with a total score of 71. The Bison scored 67, and the University of Saskatchewan and Valley City State Teachers scored 35 and 27 respectively.

Coach Tom Neuberger said, "We had our best performance over a period of three matches that we've had since wrestling came to NDSC. The boys were really fired up to avenge our previous spanking by MSC and we beat them 18-15. We defeated both Valley City and Saskatchewan in the afternoon and evening sessions, but the Dragons beat them worse than

we did and accumulated more team points. We would have liked to win, but our wrestlers did more than was expected of them. The Bison seemed to get stronger as the day went along. We have given them this week off since we have no matches this weekend. I'm sure they won't take many days off, however, because they won't give the freshmen a chance to beat them in the benefit match on Monday night."

Dennis Whitson led scoring for NDSC with 15 points on three pins. Larry Van Sickle got three wins, and Frank Johnson and Dale Hinkle each won twice and tied one. Glenn Holte won twice and Bob Holmes got forfeits in all three matches.

North Dakota Defeat Big Ten Champion As Highlight Of Two Day Road Trip

The NDSC bowling team beat defending Big Ten champion Minnesota as a highlight of a two-day road trip last weekend in which the Bison competed against five schools.

NDSC outscored the Gophers 2,758 to 2,684 to win three points in a Region 7 match. The Herd's final game in the series was an errorless count of 1,001.

Gordie Teigen's keglers opened the trip by winning three points from Wahpeton Science in a Louis C. Strack League series, 2,573 to 2,536. Mankato State swept a four-point Region 7 series, 3,012 to 2,857. The Bison won all four points at Winona by beating St.

Mary's, 2,619 to 2,319 in another Region 7 match.

LaCrosse State and NDSC split in a four-point non-conference series in the Wisconsin city. LaCrosse had the total pin edge, 2,577 to 2,475.

DuWayne Baranyk of the Herd had a 622 series and 269 singletons at Mankato. Chuck Frantz totaled 621 at Wahpeton and 604 against the Gophers at Minneapolis.

LaCrosse will meet the Bison Friday at the Memorial Union Lanes here. Minnesota will be here Feb. 13 and Mankato's powerful team makes an appearance Feb. 27.

IBM WILL INTERVIEW

FEB. 16

IBM invites candidates for Bachelor's or Master's Degrees to discuss opportunities in Manufacturing, Product Development and Programming.....positions throughout the United States.

CAREERS PATCH 24

Laboratories and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie, Yorktown, N. Y.; Burlington, Vt.; San Jose, Calif.; Lexington, Ky.; and Rochester, Minn. Corporate headquarters is located in New York, with 192 branch offices in cities throughout the United States. The IBM representative will be glad to discuss with you the type of career of particular interest to you. IBM offers:

- Leadership in the development of information-handling systems.
- New applications for data processing and advances in computer technology.
- Favorable climate for continued career growth.
- Opportunities for a wide range of academic backgrounds and talents.

Contact your College Placement Officer to arrange an appointment for a personal interview with the IBM representative.

If you cannot attend the interview, call or write:

Mr. R. A. Lonergan, Branch Manager
IBM Corporation, Dept. 868
139 Provident Life Ins. Building
Bismarck, N. D.
Capital 3-1277

WRITE-IN PATCH 79

YOU'LL BE ENCHANTED WITH OUR WIDE SELECTION OF FINE CHINA AND SILVER!

Our fascinating selection of fine china and silver offers so many exquisite patterns for you to choose from! Each one is so right for all occasions—timeless in its loveliness!

What about gifts? You know how thrilled you'd be to receive a place setting of fine china or sterling silver in the pattern of your choice. For birthdays, anniversaries or weddings, why not give gifts of china or silver . . . a lasting remembrance.

If you're just beginning your Lenox, why not start with a few place settings now. If you are a Lenox owner, don't put off adding to your service any longer! When you own Lenox, you'll know the joy of possessing a china so lasting in its loveliness that many services have been in use for generations!

Talk over your gift plans with our helpful salespeople. They'll give you sound advice—and fascinating tips on matching your fine china with gleaming silver, crystal and colorful linens. Pay us a visit soon. We'll enjoy showing you all the beautiful things we have!

MARTINSON'S JEWELRY

BISON BITS

By Sherry Bassin, Sports Editor

The old proverb of "if you've got a fightin' ball club, you've got a winnin' ball club" was certainly thoroughly proven at the NDSC fieldhouse last Friday night.

The NDSC Bison did what was thought to be the impossible last Friday when they downed the North Central Conference league leading South Dakota State Jackrabbits 75-72.

Some partisan SDS fans may say that it was a terribly bad night for their southern crew. But such facts as these don't go down in the record book; it will only be the score board which read Bison 75, SDS 72 that will be thought of in the future.

This Bison undoubtedly played their best game of the season. They controlled the ball well, made fewer mistakes and didn't throw the ball away as many times as in the past.

Perhaps the Paul Bunyon crew of SDS was a little bit too sure of themselves and felt they had added another victory to their 59-60 schedule before the game started. Whatever it was, we really don't know. But we do know that the Bison are now deserving of a little more recognition in the NCC.

Forward Harold Anderson came through with one of his best performances of the season against SDS. Along with his seven points he stole the ball a number of times to set up his backcourt to score.

As far as the scoring is concerned, it was the Devils Lake Jr., Marv Bachmeier and his partner, Soph. Ken Lehr combining for 58 points. Bachmeier scored 34 of this total and Lehr found the hoop for the remaining 24.

Sisk was high man for the Jackrabbits; his left handed shooting netted him 27 points.

Lehr and Bachmeier did some of the nicest ball handling that has been seen around this country in the recent past. They combined to play control ball late in the game and for approximately 2½ minutes didn't let South Dakota State as much as touch the ball. They would probably still be in control if the whistle hadn't sounded for an infraction.

The following night it was a different story for our hometowners as the Moorhead State College Dragons thwarted an NDSC bid for a clean sweep of victories in inter-city competition by defeating the Bison 62-60.

It was either a case of too much the night before or a matter of not taking the game seriously enough for NDSC. They didn't seem to have the drive that they had so much of the previous night.

Again it was the backcourt men of Marv Bachmeier and Ken Lehr doing most of the scoring for the Bison. Bachmeier scored 21 points and Lehr 13.

Jim Nagel was high man of the night for both teams as he picked up 27 points for his hometown Dragons.

Tonight the Bison will be in Vermillion to battle the South Dakota University Coyotes in what is termed as the "big one" of the two games the Bison play this weekend. Tomorrow they journey over to Sioux City to play the Morningside Maroon Chiefs.

Bentson is putting most of his effort on tonight's game. This is the team the Bison previously lost to at the fieldhouse 75-70 and this is also the team that is

threatening SDS for the championship.

Thus, the Bison will likely need a game comparative to last Friday night's victory in order to defeat the Coyotes on their home court.

They can do it, at least they proved they are capable last week.

HERE AND THERE . . . Ken Mizerny, the SDU flash, has become ineligible for the rest of the basketball season due to scholastic reasons . . . Marv Bachmeier is leading the NCC in total points and game average. He has a total of 160 points for an average of 26.7 . . . This Monday night is the Benefit wrestling match. Let's fill that fieldhouse

Whitson Selected Athlete Of Week

Dennis Whitson, a 177 pound junior majoring in physics from Brainerd, Minn., won "athlete of the week" award due to his outstanding performance at the quadrangular meet the past Saturday when he won three matches. He won them all by pins.

Known as the "Challenger" by his teammates, hardly a practice session goes by but what Dennis challenges some other member of the team to a match after practice.

Coach Neuberger says, "Dennis has definitely improved the most of any member of the team during the season. He has been a pleasant addition to this year's squad."

"Dennis is a great asset due to his great enthusiasm and has come through several times this year."

Intramurals

by Jim Russ

The intramural league bowling honors last week were almost completely taken by the All Star League bowlers. Top place in the three game totals was occupied by the Chemistry Club with 2125 followed by the Pharmacy Club and the SAE No. 1 teams with scores of 2069 and 1947 respectively. The highest three game total was turned in by Jim Anderson of the Chem Club with 569 and D. Baranesk and Don Braun tied for second place with 554. The best individual game of 225 was bowled by R. Lee in the Engineer League.

In the women's league the Gamma Phi's won top honors with 523 for the highest team game followed closely by the WAA No. 2 team with 503.

Track Begins Early

Coach Tom Neuberger is quite enthused about the early interest in track this year. He says there are about 20-25 boys working out for the indoor campaign that will begin after the spring quarter vacation. At least a half dozen boys are working intensively for the Northwest Open Meet at Minneapolis on February 13 and a meet in Winnipeg on February 27.

The coach feels that things could be looking up for track at NDSC. He stated that he knows of sixteen freshmen on the campus this year that placed or qualified for the state high school meet last year.

"Really my knees ARE bent," says Sherwood Bassin, Ph. Fr., as he dances with Jean Jackson, AAS So., to the music of Paul Hanson and his orchestra at the Charity Ball on Jan. 30, 1960.

KDSC Adds Improvements To Include Soft Music, Live Broadcasts Of Games

"Soft music to study by", is just one of many improvements at KDSC radio station, according to Larry Hunter, AAS Jr., station manager.

Founded in 1952 as an extra-curricular activity, KDSC recently acquired the news service of the United Press International. Other improvements Hunter cited were the increased station wattage and "live broadcasts", enabling the station to broadcast games played at home as well as those played in other cities.

Hunter said, "Improved programming has increased student listening, especially since the introduction of weekly interviews and the tri-college network of Concordia, MSTC and NDSC, which permits broadcasting events of these schools that are of special interest to NDSC students."

The Loyalty Oath: Has It A Purpose?

(ACP)—From Davidson College (N. C.) DAVIDSONIAN comes this comment:

"The two universities (Harvard and Yale) regard the loyalty oath as a deprivation of an individual liberty. We can hardly agree with this.

"This statement is attached to an application for a loan. In every instance a loan applicant must divulge certain information he regards as his personal affairs.

"Certainly the state will not use its governmental power to lay taxes upon all the people and then use the money collected to subsidize those people who 'believe in or teach the overthrow' of the very government that is supporting them. As another newspaper noted, 'if the state is going to pay the piper, it is most certainly going to call the tune.'

"The real right that has been denied, to our way of thinking, is the right of needy students to obtain funds in order to further their education because of the institutions' refusals to accept the loyalty oath along with the funds."

KDSC, 750 on your radio dial, broadcasts from 4 p.m. to 10:30 p.m. weekdays, Friday from 4 p.m. until 1 a.m. and on Saturday from 12 noon until 1 a.m.

Five minute news broadcasts are made every hour, and "soft music to study by", is played from 8 p.m. until 10 p.m. Monday thru Friday.

NOTICES

Gamma Delta

Rabbi Robert Leviton, of the Temple Beth El in Fargo, will be the guest speaker at the regular Sunday night supper meeting of Gamma Delta on February 6. It will be held at 5 p.m. in the Immanuel Lutheran Church, 1258 Bdwy. Everyone is invited to attend.

LSA

Friday Feb. 5—Rollerskating at eight, meet at the Center.

Sunday, Feb. 7—Dr. Prausnitz of Concordia will speak on "On One Thing or Another" following our fellowship supper which is at 5:00 p.m.

Friday, Feb. 12—Open House at the Center after the Iowa Basketball game.

Sunday, Feb. 14—Pastor Quello will show his slides on Russia following the 5:00 fellowship supper.

Remember—Hi-Noon Focus, dinner and chapel, everyday at noon and our 0:45 Worship Service on Sunday here in the Center.

Newman Club

Sunday evening the Newman Club will sponsor a ham supper at 6:30. After the meal Miss Dorothy Day will explain the work of her group of liberals and pacifists in New York.

ISA

Theater party Monday, Feb. 8. Meet at 7:00 p.m. in the Union lobby for rides.

New ISA officers will be elected Feb. 15. Be there! Term party will be held Feb. 13. Get your tickets by Feb. 9.

Placement Service

Monday, Feb. 8 1960

Continental Can Company, Inc. wishes to speak to students majoring in M.E., I.E., and business for positions in their manufacturing, research, development, chemistry and sales departments.

Monday, Feb. 8, 1960

Bureau of Reclamation wishes to interview C.E., E.E., and M.E. students who graduate in the upper one-third of their class and who may qualify for a GS-7 rating. There are a few vacancies for undergraduates in their summer training program. Those interested can schedule an interviewing appointment at this time.

Monday, Feb. 8, 1960

Sundstrand Corporation is interested in interviewing E.E., M.E., and I.E. for all three divisions of the company — machine tool, hydraulic and aviation. Sundstrand offers opportunities in technical writing, purchasing, processing and research and development.

Tuesday, Feb. 9, 1960

LeTourneau Westinghouse is interested in interviewing M.E., E.E., Ag.E. and C.E. for employment in the product engineering and sales engineering training program.

Tuesday, Feb. 9, 1960

International Harvester Company will interview Ag.E., E.E., I.E. and M.E. for assignments in product research, product design, stress analysis and testing of farm tractors, farm implements and motor trucks. They will also interview business or engineering graduates interested in motor truck or farm equipment sales.

Tuesday, Feb. 9, 1960

Line Materials seeks interviews with senior E.E., and M.E. Line Materials produces products used in distribution and transmission systems by electrical power utilities.

Wednesday, Feb. 10, 1960

Hughes Aircraft is interested in interviewing students at all degree levels in E.E. and physics. Physics majors should have electronics interest. Areas of assignment will be in research, design, development, field service and administration in connection with electronic systems and computers such as missiles, airborne and ground radars and semi-conductor devices.

Wednesday, Feb. 10, 1960

Federal Food and Drug Administration seeks interviews with graduating seniors for positions as food inspectors or analysts. Any physical science graduate or person with 30 hours of physical science may interview. Additional information is available at the Placement Office.

Thursday, Friday, Feb. 11, 12

North American Aviation. Representatives from three divisions of North American (Autonetics, Los Angeles and Rocketdyne) are interested in interviewing students graduating in engineering, mathematics and physics at all degree levels, however, a student requesting an interview will be considered for a position with North American.

Found

Black pair of glasses near Old Main. Claim them in the Spectrum office.

ASCF

ASCF will meet Wednesday, Feb. 10 at the Union, room 1, 2, 3. There will be a guest speaker and our Spring Party will be discussed.

THE SPECTRUM
NORTH DAKOTA STATE COLLEGE
FARGO, NORTH DAKOTA

American Home Ec. Assn. To Hold State Convention At UND During March

The American Home Economics Association will hold its annual state convention March 19 at UND. The theme for the convention is "Pause with a Cause". Miss Mary Kimball head of the Pillsbury Research, will be the keynote speaker; she will talk on "Focus on the Future".

The general idea of the convention is to further develop plans of action based on the evaluation made by the National American Home Economics Association at their 50th annual convention in 1959.

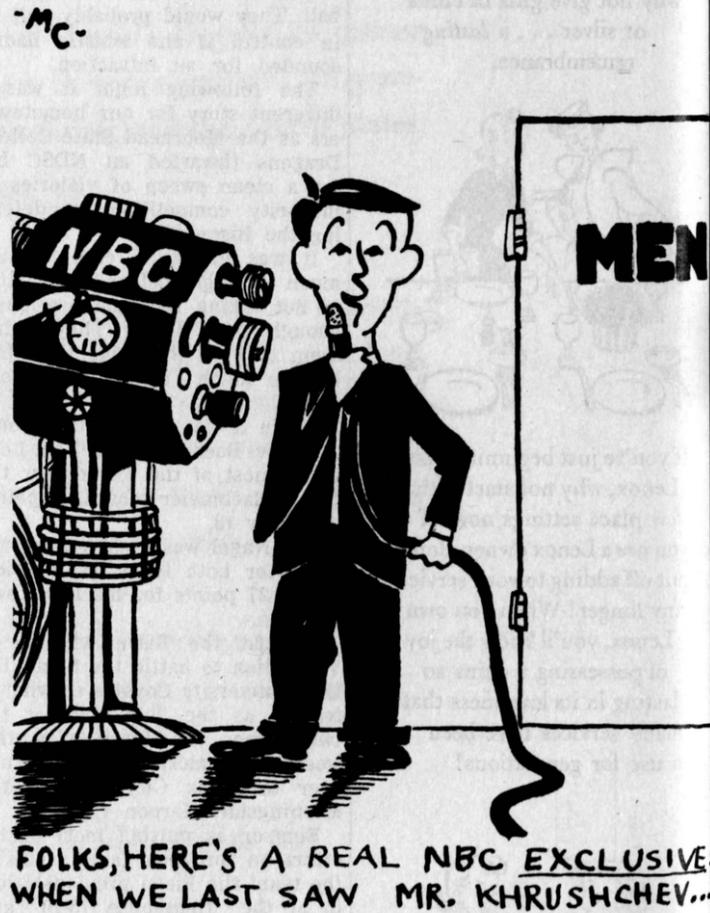

Miss Betty Ruth Joyce, field secretary for the Home Economics College Club of the United States Dept. of Education, will speak to the college students. She will work with the Tryota Clubs of

NDSC and UND attending the convention.

Group discussion will be led by Miss Marian Benson, on secondary education in home ec. Mrs. Naurine Higgins, on higher education in home ec.; Mrs. Charles Norton, on adult education and homemaking in home ec. and Mrs. Ruth Bruegger, on extension in home ec.

A presentation of a communication workshop will be given by Miss Marjore Loving, Miss Lorissa Sheldon, and Miss Emily Freeman, NDSC faculty members.

The meeting will include about 60 members in the home economics field of business, extension dietetics, college teachers, secondary teachers, and homemakers.

YMCA Film Society

The Film Society will again show movies Sunday at 2:30 in Minard Hall, room 319. Films shown this week will be "The History of the Cinema" and a drama called "Fame is the Spur," an outstanding British film.

SAI

NDSC chapter of Sigma Alpha Iota will hold a special meeting Sunday, Feb. 7 at 9:30 p.m. in Dinan Hall, Room 17. All SAI actives are expected to come, according to Diana Herman, SAI president.
