

Sandy beaches?? Waving palm trees??

PAUSING UNDER THE SHOWER, Claudia Gullickson continues with the rehearsal even though surrounded by fellows. This is only one of the many substitutions the members of the cast of South Pacific have to make in preparation for the final production in April. Forming the shower booth are James Lanier, Charles Bateman, Byron Berntson, Dave Nelson and Larry VanSickle and a couple of fellows with their backs turned.

'South Pacific' Production Takes Shape; Directors Are Pleased With Results

by Barb Satovich

When sitting in on a rehearsal of "South Pacific" and watching all the hustle and bustle, you know what Bryon Gackle means when he says, "Things are going great!" As faculty director, Gackle states that, "Things couldn't be expected to go any better."

After three weeks of good rehearsals, the production is taking shape. Fewer scripts are being used, rough spots in the singing and dancing are being worked out and an overall unity is now evident.

From the observer's view, the rehearsals are orderly, well run and with a feeling of enthusiasm throughout. The spirit and morale of the group is tops. One can't help but feel their earnestness when receiving criticisms and notice their quickness to react to the humor that is always popping up. Making love before an audience, waltzing to imaginary music and missing cues provide the setting for the lighter side of

producing a show such as this. The improvised props also prove to be a source of humor. What do you do when the chair you are using for a bathtub breaks? Go right on taking a bath, of course! Imagination is also a must when a fire extinguisher is used for a tub of hot water or when a five gallon pail represents an airplane motor. Using a riser for a dock, a light bulb for a shrunken head or a newspaper for a grass skirt proves interesting and amusing.

Choreographer for the group, Miss Marilynn Nass, says, "Things are going along swell; we haven't run across any problems yet."

"Overall cooperation is great," states Charles Bateman, Blue Key president and member of the cast. "It's amazing how many people not taking part in the show will come over and put in as many as three hours of work on props and sets just to help," says Bateman.

Meanwhile, backstage, continuous progress on props, sets, costumes, music, lighting, publicity and a host of other details is being made.

At the half way mark, all indications are pointing to a professional production of "South Pacific" by the students of NDSU.

Record Number of Students Enroll In the SU Telecourse

A record number of students have enrolled in the third telecourse for credit offered by North Dakota State University of Agriculture and Applied Science. The course, "Educational Tests and Measurements" started Monday, Mar. 20, over three stations of the North Dakota Broadcasting Company, in Valley City, Bismarck and Minot.

The record total of 105 compares with an enrollment of 93 for the telecourse "Individual Appraisal" offered at this time last year. The telecourse "Introduction to Guidance," offered in the fall of 1959, had 74 students. The total for this year's telecourse includes 38 students regularly enrolled for classes at NDSU. This is the first year on-campus students are being permitted to take a telecourse for credit.

Off-campus enrollees include teachers, county superintendents, salesmen, and housewives. Teachers account for 59 of the total. The students hail from a three-state area, with 49 of them from North Dakota, 17 from Minnesota, and one from South Dakota.

The course aims to give an understanding of the methods and terminology of classroom and standardized tests, according to Dr. Quentin Stodola, NDSU director of counseling and testing and lecturer for the telecourse.

The six-week course will extend through May 2, with lectures be-

ing given daily from 7 to 7:30 a.m. Enrolled students earn three undergraduate credits.

AAS Is Highest In Enrollment

Spring enrollment at end of the second week exceeds last spring's first day enrollment by 245 students, according to Burton Brandrud, NDSU director of admissions. This spring's enrollment is 2877 students, 2244 men and 633 women.

Highest enrollment by school was Arts and Science with 888 students. Other school enrollments are: Engineering 805; Agriculture 391; Home Economics 300; Pharmacy 294; Chemistry 108; and night school 91 students.

Breakdown according to classes are as follows: Freshmen are high with 754 students, 554 men and 200 women; sophomore class has 519 men and 149 women totaling 668 students; junior class has enrolled 445 men and 127 women totaling 572 students; senior class has 583 students, of these, 495 are men and 88 are women; graduate school consists of 215 men and 54 women for a total of 269 students.

There are 31 students enrolled in special courses, and 61 students enrolled in college credit Television.

Vol. LXXI—No. 23 NORTH DAKOTA STATE UNIVERSITY March 30, 1961

Students Arrange Final Plans For 1961 Sharivar

With only a month to go Sharivar displays are taking shape. Students are working on some displays while arrangements and final plans are being made for others. The Easter weekend break will give the student body of NDSU an opportunity to publicize Sharivar on a statewide basis.

An idiot's pool table, a demonstration on toxic sacrifice of rabbits, a miniature basketball display—these are some of the displays students are working on for the 3rd annual open-house, Apr. 21-23.

All the departments of the various schools on campus will have displays set-up in them. In addition all the schools will have a display in some downtown store window.

The school of Pharmacy with the help of two drug companies, the Abbott Company and the Squibb Company, will display medicinal isotopes.

The engineers will be displaying a wind tunnel—the only one in N. Dak., and cooking by radiation display. In addition they will have displays on an analogue computer, ham radios and McKinnie aircraft.

The Physical Education department plans a strength test, fitness test and miniature basketball displays.

A light powered telephone and an idiot's pool table will be included in the displays from the Math department.

Theater sets and designs will be on display in the Little Country Theater from the Speech department.

Agricultural Economics and Education are both planning movies and slides concerning opportunities in these fields.

Other displays from the school of Agriculture are: Dr. Post's tropical insect display and a display of living insects in a terrarium from the Entomology department; livestock breeds from Animal Husbandry; potato flaking demonstration and guided greenhouse tours by the Horticulture department; fetal development of

a calf, and skeletons of various animals from Veterinary Science; and a display on bacteria affecting the average person by the Bacteriology department.

The Nutrition department from the school of Home Economics will have displays showing the scientific principles of preparing North Dakota food products, as well as displays on food for Civil Defense emergencies and a demonstration on the preparation and use of potato flakes, manufactured in North Dakota.

The Education department will feature displays of four teaching methods as they would be used in an actual school situation.

Displays of old irons and spinning wheels, historic costumes and a style show are being worked on by Textile and Clothing students.

Steps in drawing the human figure, displays of ceramics pieces and accessories and table settings will be the contributions of the Related Art department.

The Child Development committees are working on displays featuring science as it is taught at the nursery school level.

A special display of the echo sateloon is being brought by Central committee and will be displayed on campus.

What's up there, girls?

YES, THESE ARE SIX NDSU COEDS who were spotted climbing one of the most outstanding trees on campus. Relaxing in the branches are Laverne Holbach, Janice Nordeng, Judi Belfour, June Heather, Collette Buhr with Bonnie Lillegard gazing up at them. A few minutes later an unsuspecting male came walking by. Deciding to tree him, that's just what they did!

Robert Harrison Appointed To NDSU Agronomy Staff

Robert L. Harrison has been appointed assistant professor of agronomy and experiment station assistant agronomist at NDSU, effective July 1.

Harrison's appointment was approved by the State Board of Higher Education at its March meeting.

The new appointee will finish work for a Ph.D. degree at the University of Illinois in mid-April, and he expects to receive the degree at commencement ceremonies there in June.

At NDSU Harrison will work with foundation seed stocks of important North Dakota crops. He received bachelor's and master's degrees at Oklahoma State University.

Harrison is married and is the father of four children, including identical triplet boys.

Editorial

Alyce Puppe

Due to Easter vacation the Spectrum went to press Monday evening. Due to the extravagance of the business manager, the Spectrum contains little room to print news stories. In the view of the preceding facts, you will find the reason why certain notices or stories didn't appear in this issue.

★ Just where are Reed and Burgum Halls going to be placed? This seems to be the question of the day. Both students, faculty and alumni are dissatisfied with the site selected. Yet, it appears their cry will go unheeded unless something is done mighty fast. Of course, I don't know how to solve the problem but I feel that the most beautiful part of the campus will be destroyed by placing a dormitory east of Putnam.

From the file of exchange papers I found these interesting items of news.

★ Ann Hason was elected prexy of AWS at Kansas State University. So what? A total of 565 women voted in the election!

★ Four Greek units at the University of North Dakota were placed on social probation for the remainder of the semester. This eliminated one of the Flickertail Follies acts. The Student Relations Committee placed them on social pro after hearing complaints of an unregistered party by University students. Greeks, take heed!

★ Other schools throughout the nation are preparing for some type of Easter vacation—either Easter Monday or for the entire week. Guess vacation for NDSU got lost somewhere along the way.

★ I still haven't found out what that little gray domicile on top of the Ag Engineering building is.

Planning Committee Reapproves Dorm Site

by Frank Vyzralek

In a meeting last Thursday the NDSU Campus Planning Committee voted 4-1 to reapprove the building of the two new dormitories in their planned locations south of Old Main and south of Minard Hall.

The committee as constituted at the meeting included Dean of Students C. A. Sevrinson, chairman of the Civil Engineering Department John A. Oakey, associate professor of Architecture Earl E. Stewart, chief of the division of Animal Husbandry M. L. Buchanan and A. Glenn Hill, chairman of the Mathematics Department. Stewart cast the only dissenting vote.

By taking this action the committee decided to turn down a faculty petition bearing 67 signatures which opposed the construction of the dorms on the planned sites. This petition has now swelled to a total of at least 125 signatures.

It would seem either the committee was hasty in calling a meeting before the total number of signatures on the petition was known or the faculty members circulating the petition erred in not waiting till all copies were in.

In any case there should be some reconsideration of the petition in light of the fact that the final total of signatures is nearly twice that of the original first copy upon which the planning committee acted.

In addition, there is currently another petition in circulation opposing the location of the dorms. This one is student backed and is complete separate from the faculty petition. Not only does it ask for a change in location of the dormitories but advocates a complete reassessment of the current campus master plan.

There is another point which must be considered. According to a front page article which appeared in last Sunday's Fargo Forum bids for construction of the two dorms will be opened by the state Board of Higher Education on Apr. 14. Then, the story goes on to say that the board, at its May 20 meeting, will open bids for the sale of \$1,200,000 in bonds to finance construction of the buildings.

This means that bids from the contractors will be in at least a month before the money will be available to build the dorms. A strange situation, to say the least.

APO Ranks Near Top

Alpha Phi Omega service fraternity of NDSU ranked near the top nationally in money collected in its Ugly Man contest, held last month, according to Gene Nicholson, chapter president.

About 300 Alpha Phi Omega chapters on campuses throughout the country hold annual Ugly Man contests to collect money for charity. The NDSU chapter collected \$850. This ranked in the 95th percentile nationally. Ninety-five per cent of the chapters brought in less money.

The NDSU donation, less expenses, went to the Crippled Children's Home in Jamestown. For the contest, photos of campus males in "ugly man" makeup were posted in the Student Union. The Ugly Man was elected on the basis of a penny a vote collected in a jug in front of his picture.

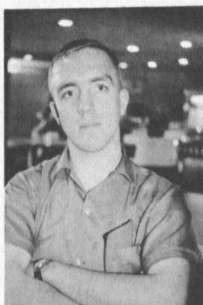

The winner of the title was Phil Roesch.

The Spectrum Asked:

Is Federal aid to education needed?

Harry Farr
Ag Econ., Jr.
Fargo, N. Dak.

NO!!! Why should the people pay the Federal Gov't. taxes to enable them to give a PORTION of this money back to our state? We can more efficiently handle the money at the local level without government bureaucracy dipping its hand into our pockets. (I am, however, in favor of federal aid to individual students.)

Yes it is. We need more unions, swimming pools and bowling aids on campus. It would also be nice to have a wonderful drama theater on campus! Like wow, we need it.

Yes, it is needed, but not so much that we lose certain of our freedoms which would happen if federal aid were to go into effect. If the act does go through, federal money should be used for buildings and not teachers salaries.

Definitely, to better the level of education. Also too many people would not be able to attend either high school or institutes of higher education such as this if we had to support it on our own. Yes, without federal aid we would not have the buildings we have on campus today. Also the salaries teachers are receiving would be increased and the quality of teachers would be better.

Letters to the Editor

WHY NOT MINARD

To the Editor:

The recent articles on future dorm placement have overlooked some basic considerations which, I feel, cannot be avoided. Among the various sites that have been recommended is the present Minard parking lot, which was chosen, it appears, solely on the merit of its being within easy walking distance of Minard Hall and the Library.

In my opinion, the use of the Minard lot for the location of a new dorm would be very unwise. Further expansion of the college of AAS is completely restricted on the north by Morrill Hall and on the west by the power house.

That leaves two possibilities for increased facilities for AAS: expansion to either the south or the southwest. A new dorm placed in the present Minard lot would eliminate one of the possibilities and severely restrict the other. In addition, use of this area could result in dispersion of the building of the College and the additional possibility of handicapping the other colleges.

If you consider the degree of expansion that is indicated by the surveys in the next ten years, there is no alternative. The Minard lot must be reserved for the call of AAS.

You stated in one of the later articles that the question of funds has been eliminated through appropriations for three new dorms only to create further problems of dorm placement.

I submit that the Minard Annex

parking lot as a site is an answer that will not create more problems than it solves. By utilizing this area, AAS would not be restricted and/or fragmented, dorms would be near the majority of the schools and if three dorms were located in the annex lot they would present the further possibility of establishing a large central cafeteria that could serve a large part of the student body, thereby relieving the present congestion of the Union Lounge and cafeteria.

Sincerely,
Steve Brogger

ANNEX PARKING LOT?

To the Student Body of NDSU:

I would like to extend an invitation to every student on this campus to attend at least one Student Senate meeting within the coming year. I feel every student on this campus should consider it his personal responsibility to get some idea of how his student governing body works and attending a Senate meeting is about the easiest way to do it.

Senate meetings are held usually every two weeks in conference rooms 1, 2 and 3 in the Union on Tuesday nights at 7 p.m. I think you'll find that Senate meetings are not only very informative, but also very enjoyable to attend.

Within a month or so, there will be an all-campus election to rate of Stanley High School. A freshman at NDSU she studied decide whether or not to raise the student activity fee. Every student should consider it his responsibility to gain all the information he can on the issue so he can make a qualified vote. Student Senate will do everything it can to inform the students within the next month.

One last point, remember the Student Senators are your elected representatives in student government. They can only base their decisions on the contacts they have had with members of the Student Body. If you feel strongly about certain issues, do not hesitate to express your opinion to a Senate member. Only in this way, with full participation of all the students on campus, is our student government the representative government of the Student Body as it should be.

Wayne Hamann
Student Body President

LITTLE ARNOLD

KEY IDEAS

"A BLUE KEY MEMBER SPEAKS"

by Dick Bergquist

When I look at this campus and then immediately switch my thoughts to the future, I think of the individuals on this campus and how they will look in the future.

At one time or another each could have been classified a leader, a laborer, or a loafer. Sometimes we could have had a dual classification. The question we now face is, were will we be classified in the years ahead?

Look around the campus. Let us say there are 3000 students enrolled. We will be hard pressed to list 60 campus leaders—people that we consider to have the qualities of leadership or that we think of as potential leaders. Sixty campus leaders in a campus population of 3000 students is one in fifty. That is only 2 per cent.

Let us admit that there's nothing wrong with being a laborer. We cannot have all Chiefs in the tribe. We must have some Indians also. However, most of us with our college educations should strive to be a "Chief" in whatever line of endeavor we undertake.

North Dakota State University is the place where leaders can be developed. There are today two great areas of leadership needed among North Dakota State's graduates. The first one is professional leadership. The second need is leadership in living together.

The need for professional leadership in the field of our endeavor is obvious to all of us.

Let us be proud of the field of our endeavor, whether it be agriculture, engineering, pharmacy, home economics, chemistry or medicine. Let us not go around with our chins on our chests. Let us look with confidence and with optimism to the challenging opportunities that face us in our growing and dynamic future.

The second area where we need to develop leadership—is in the field of living together. This we call government. It may be at the campus, community, county, city, state, national, or international levels. We live in a very complex society. Our democracy does not function automatically. It calls for thinkers. It needs leaders.

We are engaged in a global struggle for power today, with one center in Washington and one in Moscow. These are days when foreign ideologies wash our shores, and alien philosophies circulate in

our midst—some times on our very campus. This is more than a material struggle. This is a battle for the hearts and minds of men. This is a battle from which we cannot escape. We are on the front lines constantly.

This, therefore, underscores the tremendous importance that attaches to the opportunity which is ours to develop leadership, first in ourselves and secondly in everyone about us.

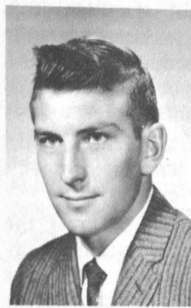

There are many well-meaning people in America today, both on our campus and off, who would change that system one way or another. But those of us who rose through the ranks of a college or university, who understand work, who understand production, who understand the importance of giving a day's work for a day's wages, have a tremendous opportunity to extend that philosophy to others and to make other people understand these basic principles.

We must convince others that the American system works. Then we must somehow instill in them the idea that they must become a leader in government, a leader in politics, and a tireless booster for perpetuation of the American philosophy of freedom and opportunity.

Elections

NDSU VETS CLUB

Don Holloway was installed as the commander of the NDSU Vets Club Mar. 16.

Other officers include Ron McNesse, vice commander; Frederic Hursman, secretary; Ray Hendrickson, treasurer; Bill Olson, chaplain; Wayne Scott, Arlen Nordgulen, Leonard Anderson, Don Bravold and Dick Wilz, executive committee.

Outgoing commander, Harold Pederson, was selected as veteran of the year for his contributions of time and ideas to the club during the past year.

PHYSICAL EDUCATION CLUB

Tom Reynolds, AAS jr, was elected president of the Physical Education Club for the coming year. Other officers are: Pat Baker, vice president; Sue Jackson, secretary; Ron Erdman, treasurer; Marla Robberstad, women's program chairman; and Roger Villarreal, men's program chairman.

On Campus with **Max Shulman**
(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

BOOM!

Today, foregoing levity, let us turn our keen young minds to the No. 1 problem facing American colleges today: the population explosion. Only last week four people exploded in Cleveland, Ohio—one of them while carrying a plate of soup. In case you're thinking such a thing couldn't happen anywhere but in Cleveland, let me tell you there were also two other cases last week—a 45 year old man in Provo, Utah, and a 19 year old girl in Bangor, Maine—and in addition there was a near-miss in Klamath Falls, Oregon—an eight year old boy who was saved only by the quick thinking of his cat Walter who pushed the phone off the hook with his muzzle and dialled the department of weights and measures. (It would perhaps have made more sense for Walter to dial the fire department, but one can hardly expect a cat to summon a fire engine which is followed by a Dalmatian, can one?)

Science will ultimately solve the problem

bring up the population explosion not to alarm you, for I feel certain that science will ultimately solve the problem. After all, has not science in recent years brought us such marvels as the transistor, the computer, the bevatron, and the Marlboro filter? Oh, what a saga of science was the discovery of the Marlboro filter! Oh, what a heart-rending epic of endless trial and error, of dedication and perseverance! And, in the end, what a triumph it was when the Marlboro scientists after years of testing and discarding one filter material after another—iron, nickel, lead, tin, antimony, sponge cake—finally emerged, tired but happy, from their laboratory, carrying in their hands the perfect filter cigarette! What rejoicing there was that day! Indeed, what rejoicing there still is whenever we light a Marlboro and settle back and enjoy that full-flavored smoke which comes to us in soft pack or flip-top box at tobacco counters in all fifty states and Cleveland!

Yes, science will ultimately solve the problems rising out of the population explosion, but in the meantime the problems hang heavy over America's colleges. This year will bring history's greatest rush of high school graduates. Where will we find classrooms and teachers for this gigantic new influx?

Well sir, some say the answer is to adopt the trimester system. This system, now in use at many colleges, eliminates summer vacations, has three semesters per annum instead of two, and compresses a four year course into three years.

This is good, but is it good enough? Even under the trimester system the student has occasional days off. Moreover his nights are utterly wasted in sleeping. Is this the kind of all-out attack that is indicated?

I say no. I say desperate problems call for desperate remedies. I say that partial measures will not solve this crisis. I say we must do no less than go to school every single day of the year. But that is not all. I say we must go to school 24 hours of every day!

The benefits of such a program are, of course, obvious. First of all, the classroom shortage will immediately disappear because all the dormitories can be converted into classrooms. Second, the teacher shortage will immediately disappear because all the night watchmen can be put to work teaching calculus and Middle English poetry. And finally, overcrowding will immediately disappear because everyone will quit school.

Any further questions?

© 1961 Max Shulman

Yes, one further question: Have you tried Marlboro's newest partner in pleasure—the unfiltered, king-size Philip Morris Commander? If not, by all means come aboard. You'll be glad you did.

Meet old friends and make new ones
Dance at the
CRYSTAL BALLROOM
Oldtime and Modern every Tuesday
Rock 'n Roll every Saturday

by Donna Helbling

Dear Mom and Dad,

Don't be surprised if my grades aren't so good this spring as I have Astronomy labs at night, Union classes on coking during the day, and a Campusology course that requires lots of attention.

Just thought I'd furnish everyone with an idea of how to explain the spring goings-on to a set of parents.

★ ★ ★

It's time to assume the roll of college recorder and do some listings. The SAE's have added thirteen new active members to their chapter. They are; Jim Abbott, Joe Anderson, Jerry Dommer, Tom Erickson, Steve Heidecker, Frank Lantz, Russ Maring, John Mark, Dalton Meske, Dave Milbrath, Steve Oakey, Don Rusness and Jim Trangsrud. The outstanding SAE pledge is Jim Trangsrud.

Sixteen men went active at the AGR house. The newest with the pins are; Stuart Bond, Gerald Reiger, Bill Hanson, Gary Puppe, Don Paulson, Roger Gissel, Joe Kary, Edward Saugstad, Terry Vorachek, Howard Leland, Gerald Olmstead, Darrel Eastvold, Paul Marchell, Gary Welsh, Jim Nelson and Mike Horner.

The KKG's also initiated new actives Nancy Toman and Donene Sorenson.

New KAT actives are Barbara Flohr and Penny Vosper.

★ ★ ★

Tuesday was the KAT-Sigma Chi orphan party and the KD-AGR entertainment.

★ ★ ★

First Burglar; "Where've you been?"

Second Burglar; "Robbing one of the fraternity houses."

First Burglar; "Lose anything?"

New SAE pledges are Wilfred Findley, John Gerlach, Jerry Filam, Thomas Beyer and Gunner Unger.

Dennis Hogan is the new pledge of ATO.

★ ★ ★

After three years of college life, I've come to the conclusion that students show their intelligence best when they are coniving to get out of class or working on little schemes. I think of the student who wrote checks frequently at the Five Spot and had his father convinced that it was the name of the book store. Now that seems to be an excellent name for our presently named Varsity Mart.

★ ★ ★

Congratulations to new SAE Sweetheart Lynn Sheryak, KAT. Also congratulations to Engineers Ball Queen Loree Sanden, Gamma Phi.

Found in the Want Ads of the Greenwich Village Voice; Educated young American seek position as journalistic worker, tutor, house-keeper or window cleaner.

Have a happy one day Easter vacation.

Bonnie Nelson Wins Exchange Club Freedom Essay Contest

Bonnie Nelson, AAS fr, has been named NDSU winner of the annual Freedom Essay Contest sponsored by the Fargo Exchange Club.

The contest was open to all freshman students in the three Fargo-Moorhead colleges. The winner in each college received a one-hundred dollar savings bond. The title of the essay

was "What Our American Freedom Means to Me."

More than 60 essays were entered. The finalists were selected by the respective English departments of the colleges. The first place choices were made by the Exchange Club committee.

Bonnie's essay evolves around this main idea, ". . . I began my search for the answer to 'What is democracy?' As she further developed her essay, she found that 'democracy is all around me. . . in free enterprise, . . .

free political discussion, . . . in opinions, rights, beliefs and freedom."

The most important phase of democracy, to Bonnie, is the "democracy born in the soul of every human being, . . . it can be neither destroyed nor enslaved."

For A Happy Easter To The

Faculty And Students Of NDSU

From Your

VARSIITY MART

Bright Colors Dominate Campus Easter Parade

by Bonnie Lillegard

As students and faculty from NDSU join in the Easter parade certain trends become evident. An appearance of specific styles and colors is quite noticeable.

Orange, lemon and zingy pinks are taking the lead in women's color choices for clothes.

The males on campus favor the color olive—new variations combine olive with gold, blue or black casts. Medium gray closely follows for the more conservative men.

The biggest single influence on coeds choices for Easter is Jacqueline Kennedy. As one designer stated, Mrs. John Fitzgerald Kennedy could start wearing a tin foil muumuu and it would become fashionable.

Her preference in clothes which

allows for easy movement has been enthusiastically received. Flare in skirts is being achieved by pleats, bias cuts and gathered waistlines that ease the front.

As evidenced around campus skirts remain short in length—just covering the knee. NDSU males seem to like this trend.

Choices in suits for spring show jacket lengths vary from hip-bone to mid-thigh. The women on campus are appearing in coats which are full and have shorter, wider sleeves.

The most popular color in shoes and gloves is a very neutral bone.

An almost unanimous decision has been reached to wear the Easter bonnet on the back of the head—definitely emphasizing the "Jackie look." Hat styles range from the small pillbox to cloches and sailor hats.

NANCY FLATT IS SHOWN WEARING ONE of the fashions which was featured at the annual Kappa Kappa Gamma Alumnae Style Show held Mar. 23. Proceeds from the event will be used for a scholarship to be given to a NDSU coed.

Coeds Attend WRA Convention

Four Women's Recreation Association members from NDSU are attending the national convention of the Athletic and Recreation Federation of College Women at the University of Illinois in Urbana, Ill., from Mar. 29-Apr. 1.

NDSU members and local officers attending are: Marsha Bergman, president; Collette Buhr, vice president; Marjeanne Tehven, secretary-treasurer; and Sonja Zueger.

"The purpose of the Federation, according to the constitution, shall be to further athletic interests and activities for girls and women according to the highest and soundest standards of sports and recreation. The Federation shall strive to increase consciousness of

its purpose during and after college," stated Miss Bergman.

"Sports, Womanhood and You" is the theme being discussed by guest speakers, discussion groups, panels and informal discussion groups.

Two approaches to the
"man's deodorant" problem

If a man doesn't mind shaving under his arms, he will probably find a woman's roll-on satisfactory. Most men, however, find it simpler and surer to use Mennen Spray Deodorant. Mennen Spray was made to get through to the skin, where perspiration starts. And made to work all day. More men use Mennen Spray than any other deodorant. How about you? 64c and \$1.00 plus tax

Coeds and Staff Attend Convention

Four NDSU coeds and Miss Beulah Gregoire, head of physical education department, will attend the Convention of Central District Association of Physical Education for College Women in Wichita, Kan., Apr. 24.

Miss Gregoire will attend the convention as chairman of the legislative committee and recorder for the Movement Education Clinic. Donna Helbling, Kathleen Shepard, Ruth Gores and Marla Kobberstad will be delegates to

the student sections and report on them to the local Physical Education Club at their April meeting. Last year these girls planned the student sections for the convention that was held on the NDSU campus.

Highlighting the program will be a pre-convention track clinic by Wilma Rudolph, Gold Medal Winner at the 1960 Olympic Games. "The problem of Recruiting and Selecting Potential Physical Education Teachers will be

discussed by Richard E. Karlgaard from Bismarck Jr. College, Bismarck, N. D.

After the convention for college students, Miss Gregoire will attend the Convention of Central District Association for Health, Physical Education and Recreation which will also be in Wichita. She is the vice-president elect of Health and will represent North Dakota as chairman of the North Dakota division of Girls in Women's Sports.

ROSALYN WARDWELL, SENIOR HISTORY STUDENT at NDSU, has accepted a national Woodrow Wilson Fellowship. The award will pay for a year's study in graduate school.

Rosalyn Wardwell Accepts Woodrow Wilson Fellowship

Rosalyn Wardwell, senior in school was easy, the NDSU coed history at NDSU, has accepted a national Woodrow Wilson Fellowship, after a bit of a mental tussle.

She was named a fellowship winner two weeks ago by the Woodrow Wilson Foundation. The award will pay for a year's study in graduate school.

Miss Wardwell had to decide whether to accept the Wilson fellowship promptly or wait for the results of her pending application for another scholarship, which might have taken her to Austria for study, she explained.

Once she'd decided to go ahead and accept the Wilson award, her choice of where to go to graduate

school was easy, the NDSU coed said. She'll go to the University of Wisconsin, which has been her choice "for a long time" as a good place to study history. The Wilson award allows winners to select the school where they'll study.

Dr. Hale Aarnes, Woodrow Wilson chairman for NDSU, called Miss Wardwell "an excellent student, extremely well qualified for the award." The coed has a perfect grade-point average in history and nearly perfect grades in her other subjects. She was initiated into Phi Kappa Phi, national scholastic honorary, last fall.

She has managed to achieve her high marks even while working on outside jobs up to 25 hours a week. Currently she instructs about 100 students in correspondence classes in the division of supervised study.

The farther smoke travels Air-Softened, the milder, the cooler, the smoother it tastes

THIS ONE'S THE SATISFIER

This king wrote the book on flavor. Every satisfying puff is *Air-Softened* to enrich the flavor and make it mild. Special porous paper lets you draw fresh air into the full king length of top-tobacco, straight Grade-A all the way.

THIS YOUNG ENGINEER IS ON THE ROAD TO MANAGEMENT

Dick Cotton knew he wanted to take the engineering route into management long before he joined New Jersey Bell Telephone Company. In fact it was his goal when he was working for his engineering degree at Rutgers.

When he graduated, he had his lines out to eleven other companies. He came to New Jersey Bell because: "I didn't feel I was just a number to these people. There was no doubt in my mind that this job would be the best for the long pull."

His first assignment was a tough one. A complex of major telephone cables lay in the path of the approach to the new traffic level of the George Washington Bridge on the Hudson. Dick's job was to find the most practical and economical way to reroute these cables, and at the same time to provide for future telephone growth in the area around the bridge approach.

Dick ironed that one out and got a crack at another tough job.

Next stop: New Jersey Bell Headquarters Engineering Staff, Special Studies Group. Here

Dick was a member of a four-man team whose job was to find ways to eliminate some of the routine work of field engineers to give them "more time to think." Dick also helped plan and control a \$100,000,000 annual telephone construction budget.

Presently, Dick is responsible for telephone equipment engineering projects in the Camden, New Jersey, area.

How does Dick look at it? "This is a growing business. I work with this growth every day. And growth means more room at the top. Of course, I don't figure I'll get there overnight—but on my jobs so far I've had a chance to take a good look at how this business is run. And I think the sky's the limit for a man who really wants to work for it."

If you're a guy who can tackle a tough job and deliver the goods—then you're the kind of man who should find out more about the Bell Companies. Visit your Placement Office for literature and additional information.

"Our number one aim is to have in all management jobs the most vital, intelligent, positive and imaginative men we can possibly find."

FREDERICK R. KAPPEL, President
American Telephone & Telegraph Co.

NDSU Place Second in Meet

North Dakota State's Bison placed second in the north field meet in Grand Forks Saturday. Only one record was posted by NDSU.

The South Dakota State Jack Rabbits placed first in the meet with 78 1/3 points; NDSU placed second with 28 points and UND placed third with 22 2/3 points.

Following are NDSU entrants who placed in the meet.

Oddvar Helgeson broke his own 60 record. His new record is 27.8. He also placed second in the two-mile run.

Dieterle High Point Man

Brian Dieterle was high point man in the meet with 12 3/4 points.

He placed first in the 440 with a time of 52.4; first in the 60 yard dash in 06.5 seconds and fourth in the broad jump.

Jerry Erck placed first in the 60 yard high hurdles. He turned in a fine performance in the low hurdles but his efforts earned him only a third place.

Jim Clow placed third in the pole vault and Neal Jacobson was fourth in the 880 yard run.

NDSU Freshmen Place

Six members of the NDSU freshman team placed in the meet. They include Chuck Offendahl, Dave Hanson, Tom Holmgren, Dave Hanson, Henry Wesman, Jerry Dommer, and Gary Boehm. The mile relay team placed second.

The NDSU track team will compete in a triangular meet with UND and Mayville State Teachers College Apr. 8. The meet will be held at UND.

North Dakota State Champs

THE NDSU BOWLING TEAM WON THE NORTH DAKOTA State Championship for the third year in a row at Valley City last week. The team was able to retire the trophy for winning the championship three consecutive years. Chuck Hernet was high individual in all events and Larry Paulson and Roy Folstad were high in the doubles team. Left to right, front row: Larry Paulson, Chuck Hernet, Roy Folstad. Back row: Jerry Lingen (holding traveling team trophy) Jim Anderson and Jerry Johnson.

Viewing Intramurals

by Fred Wright

The coming of spring apparently marks the end of the bowling season as the popular sport bows out next week.

Tau Kappa Epsilon is the only team which seems assured of gaining first place in a league. At the present they have a 27 1/2-4 1/2 record while their closest rival is Churchill which holds a 21-11 record.

The races in the other leagues are still close and the first league leaders could very well be determined by the last week of play.

DuWayne Baranyk, Pharmacy Club, holds the highest average at 189.

#1 in a series of polls conducted by L&M student representatives in over 100 colleges throughout the nation. Watch for the next poll coming soon.

L&M UNLOCKS CAMPUS OPINION

Light up an L&M, and answer these questions. Then compare your answers with those of 1,383 other college students (at bottom of page).

Question #1: Suppose the government asked for volunteers among college students to pioneer in manning the first space station, would you go if odds for your safe return were 50-50?

Answer: Yes _____ No _____

Question #2: How many children do you plan to have when you are married?

Answer: None _____ One _____ Two _____
Three _____ Four _____ Five _____
Six _____ Seven or more _____

Question #3: Should class attendance be optional so long as students pass the exams given in class?

Answer: Yes _____ No _____

Question #4: When buying cigarettes, which do you usually purchase, the soft pack or the box?

Answer: Soft Pack _____ Box _____

L&M UNLOCKS FRIENDLY FLAVOR

... Flavor that never dries out your taste!

Get the flavor only L&M unlocks... available in pack or box!

The L&M Campus Opinion Poll was taken at over 100 colleges where L&M has student representatives, and may not be a statistically random selection of all undergraduate schools.

L&M Answer: Question #1. Yes 36.2%. No 63.8%.

Campus Opinion Answer: Question #2. None 3.1%. One 8.3%. Two 30.5%. Three 30.6%. Four 16.4%. Five 4.6%. Six 2.3%. Seven or more 4.2%.

Answers: Answer: Question #3. Yes 68.7%. No 31.3%.

Answer: Question #4. Soft Pack 72.2%. Box 27.8%.
L&M comes both ways, of course, but the big difference in L&M is friendly flavor of fine tobaccos blended to suit your taste.

In Your Easter Bonnet . . .

. . . With all the flowers upon it! Judy Heitman and Kay Thompson proudly display Easter bonnets from Herbst department store which they wish belonged to them. These are

only two of the many styles and sizes that women will be wearing this coming Sunday. Most popular are the hats with the large colorful flowers. Judy insisted that her hat was the nicest of the two but Kay didn't quite agree.

Two Receive Fellowships

National Defense Education Act fellowships totaling \$10,400 have been awarded to two students who will enroll at NDSU next fall, to study for Ph.D. degrees, according to Dr. Glenn S. Smith, Dean, Graduate School.

Alfred M. Wiedemann will study plant science under a \$4400, two-year fellowship. He is currently finishing work toward a master's degree at Utah State.

Lewis H. Edwards, a senior at Oklahoma State, will enroll at NDSU under a three-year \$6000 fellowship, also in plant science. Both fellowships carry additional allowances for dependents.

Enrollment of the two fellowship winners will bring to 16 the number of Ph.D. candidates studying at NDSU and to nine the number assisted by NDEA fellowships.

TEACHER VACANCIES

Numerous school administrators in Oregon, California, and Washington have submitted their 1961-62 vacancy lists to be published. To receive your copy of the listings write to Teacher Information Service, 2125 N.E. 140th, Portland, Oregon. Enclose \$1.00 to cover cost of handling.

Salem refreshes your taste
—“air-softens” every puff

Take a puff...it's Springtime! For the cool, fresh softness in Salem's smoke is the very essence of springtime. This most refreshing cigarette of all is made even more so by Salem's special High Porosity paper that "air-softens" the smoke. You'll be delighted with Salem's springtime freshness — its rich, tobacco taste. Smoke refreshed . . . smoke Salem!

- menthol fresh
- rich tobacco taste
- modern filter, too
