SUAB Christmas Party to Feature Faculty and Students

Student Union Activities Board presents their annual Christmas Party for all NSDU students, faculty and personnel on Monday, Dec. 18. Members of SUAB will start serving refreshments at 7:30 p.m. in Minnetonka Lounge, "we want to urge everyone to come and mingle in the Minn Lounge until the program starts as the purpose of this party is to promote better student-faculty relations," said Betty Breders and Phi Phi Kappa Phi co-chairmen.

The program will start at 8:30 p.m. in the Student Union Ballroom. Entertainment will be provided by the faculty and students. W. T. Chichaster will be the master of ceremonies. The program will consist of a skit given by a group of chemistry instructors, two Christmas carols - one German and one English - by Reinhold Schuster, CE and L. A. Sokett, English teacher, will give a reading; and a group of female students will present a "taleied surprise."

The annual SUAB Children's Christmas Party will be held on Thursday, Dec. 21, at 8:30 - 4 in the Student Union Ballroom.

Christmas Convos to Present Band, Choir

If you really want to get into the Christmas spirit, come to the annual Christmas convocation Tuesday at 9:45 p.m. in Festival Hall. In case you don't remember, the Christmas convocation is the responsibility of the NSDU music department, and they do a fine job. Taking part this year will be the 100-member Gold Star Band, the Concert Choir with 69 voices and the University Chorus with 110 members. The program will be entirely of Christmas music. No speech, few introductions and really good music. This should remind you that Festival Hall is a tight squeeze for late comers, so when that class lets out, "Move."

Editor

The Carl Mann orchestra concert begins at 7:30 p.m. in Festival Hall.

JoAnn Odegard First In Minn Contest

NSDU Students Place High In ND and Minn Wool Contests

JoAnn Odegard, H Er fr at NSDU, was the senior division winner of the Minnesota Make It Yourself With Wool contest at the University of Minnesota on Dec. 19. JoAnn will fly to Salt Lake City Jan. 19 to spend an expenses paid week at the national wool contest.

In 1960 JoAnn was the junior winner of the Minnesota wool contest. She attended the national wool contest in Portland, Ore.

JoAnn's three piece black ensemble consisted of walking suit and jacket. The coat had full quarter-length sleeves and a stand-up collar. She used an original pattern by Christian Dior and her accessories were beige. "Sewing, of course, is my hobby, and I started my winning dress as a summer project."

TakIng part this year will be the 100-member Gold Star Band, the Concert Choir with 69 voices and the University Chorus with 110 members. The program will be entirely of Christmas music. No speeches, few introductions and really good music. This should remind you that Festival Hall is a tight squeeze for late comers, so when that class lets out, "Move."

Second runnerup were La Vonne Anderson, NSDU soph, senior division, and Eldora Kjellberg, Blaisdell, junior division.

Mary Breitbach's one piece blue shantung dress featured a fringed tie belt and a standup collar. She made her hat from the same material. Other accessories were black kid leather.

La Vonne Anderson's deep violet shantung dress was comprised of big hot pleats in both front and back extending from a yoke. A self belt gave a tailored finish. Her accessories were white.

Dr. Walsh Speaks At Senate Meeting

Dr. Fred Walsh answered questions on the lyceum series at the Student Senate meeting Dec. 12. The series has caused much controversy on campus and in the senate. He stated that many of the attractions were artistically too small to appear in the field houses. Other points explained were that only 7 per cent of all tickets are sold downtown and student fees are spent only for outstanding artists.

In other senate news Tuesday evening the planning commissions told the student senate that they would be leaving the Spectrum room. This includes on and off campus circulation. A form letter has been sent to all secondary school principals in the state.

Changes in the campus radio station constitution were approved by senate. In addition to the SUAB sponsored annual Christmas party for students and faculty, Dec. 18, a Christmas children's party is scheduled for Dec. 21. George Duemeland, new commissioner of finances, has written to Pidilite and Deposit Co. for a bond extension insuring funds against mismanagement. A campus committee composed of faculty members is responsible for control of the traffic situation. Heading the committee is Professor Henning, who stated that there is speed control.

SANTA'S HELPER is just one of the chores around the Union of Program Director Allen and Assistant Director Mertes.

Bobby Bratland. Only decorations on the white tree are lights.
The Student Body Proxy Speaks

Questions Answered On Senate Activities

During this last quarter several questions have been asked of me as well as other Senate members in regard to various Student Senate activities which I would like to clear up in this letter.

First, for those of you who remember, Student Senate voted last spring to give $440 to the city to help cover the cost of the new street signs when 13th Street was redesignated University Drive.

The motion to give the money also included a clause which stated that this money should be returned to the Senate Reserve Fund through some type of fund raising device, and several students have questioned if this is being done.

Right now, approximately half of this has been paid back, mostly from a fund raising dance held during Freshmen Orientation Week. And from a $25 contribution from Pure Oil. It is planned to pay back the rest of it just as soon as an opportunity arises for some type of fund raising affair.

Secondly, in regard to tennis courts and a swimming pool, since the proposed activity fee was approved by individual instructors. If the department mentioned will provide the money to build the courts and a swimming pool, since the proposed activity fee was approved by individual instructors.

Efforts to get a swimming pool have been postponed until the arrival of our new university president in January.

Thirdly, in regard to finances, most students have inquired in regards to how their $15 quarterly activity fee raises. In all of the courts. For their information, here is the breakdown:

$1.00 - Public Programs, Activities, Athletics; $2.25 - BISON Annual Publication; $1.00 - Spectrum publications; $1.00 - Music Control Board, Band uniforms, etc.; $1.25 - School radio station; $5.00 - Student Union, Debt retirement for Union; $3.30 - Student Senate Reserve Fund; $3.30 - Student Senate Active Fund.

Senate expenditures will be expanded on further when a budget is printed in the Spectrum during January. I hope this letter has helped to answer some of the questions which have been directed at Student Senate members this last quarter.

Students in Pharmacy Complain Says Transfer

How many times have you heard pharmacy students complain? I have been here the past seven years and have never been listening to their complaints for the same period of time. Lately their case seems to have become chronic. It's been a standing joke that the first pharmacy course they have is the College of Medicine 101.

Did the college of Pharmacy make this a three quarter series last year? Or is there some other phenomenon at this college? These complaints have not been about the long hours or the difficult courses but rather on department policy and discrimination. It has been brought to the attention of individual students by individual instructors. If the department situation is to change it should be brought to the attention of the students first and the students' council should be asked to correct it.

Here is a suggestion for the future. Have a student evaluation of the department and the instructors. Have a committee made up of one person from each other department tabulate and determine the value of each data obtained from the student evaluation.

Have them present it to the College of Pharmacy if it is convinced the department or to the student body if it is complimentary.

I had to transfer to this school knowing that with the difference in the programming of courses here and at 'upstate it would mean an extra year in school, and I am glad that I did.

But to have pride in being in one institution, it is necessary to have pride in the whole institution. It is my belief that the department mentioned will accept this inquiry with the intelligence and maturity expected of University instructors.

Very sincerely,
Lloyd Hartley

Dorms Are Cleaner Due to Food Restrictions, Says Director

Miss Myrna Erickson is editor of the Student News Bureau at NDSU. With her is Toni Womsonmane.

NDSU Has Unique Student News Service, Says Editor

NDSU Dorms Are Cleaner Due to Food Restrictions, Says Director

"It is the only one of its kind," says Myrna Erickson, the most unique student service organization on the NDSU campus, Myrna Erickson, editor of student news bureau, said that this money should be returned to the Senate Reserve Fund through some type of fund raising affair. It provides a link between campus life and the students home town. It also does some stories of faculty and administration personnel.

The student news bureau was organized in 1967 by members on the Board. Publications Don Winkler serves as director, and Jim Harmon was the first editor.

The purpose of the organization is to provide adequate opportunity and training facilities interested in the media.

The news bureau staff includes Myrna Erickson, Barbara Batorich, Terry Woodmansee, Gary Longhala, Flugel, Chuck Humphrey of Woodwood, Jim Metserne, Erskill and June Hurlburt, reporters. Beth Retchert, assistant editor, and David Tischer, assistant editor.

Each reporter is assigned to a specific corner of the campus in one story each week when ever possible.

The reporters receive no compensation for the job they do, but the ability of the reporter to find news determines their survival points. This is the first quarter that this column has appeared.

Students that have a news writing knowledge and a viduality. Here is a report from the student news bureau, Myra says.

Dear Editor:

I would like to take this means of answering the letter in the Spectrum dated Nov. 26, pertaining to dorm restrictions, particularly restrictions on food. I admit that the men's dorms at NDSU have quite a few rules and regulations, but a large percentage are followed in each dorm.

With almost 600 men, there must be rules for the good of the dorms and the majority of the residents. Almost everyone agrees that alcoholic beverages should not be allowed in the dorm, but some residents get caught trying to bring it in and get evicted, so everyone would not be satisfied no matter what the rules were.

I lived in Churchill and Dartmouth Halls as a freshman before there were any rules. Some of the residents could bring in food and pop, consume it, and not create a mess, but some didn't care how big a mess was created because the mauls would clean it up. Consequently, there would be crumbs, food, pop, etc. all over the room.

This is primarily the reason there are restrictions now to protect the dorms and to eliminate the mess caused by food in the rooms.

Now the dorm residents are climbing back up to a status they can be proud of. True, the only food allowed is cookies in the metal or glass container. The only thing that is the limit is the container and the residents don't crowd the residents out of the room. Also provided for the residents in each dorm is a food room which includes milk and pastry machines. They can make in pizza, milk shakes, bars, burgers, etc.

The hours when these rooms can be used are limited. The hours are decided on the basis and as long as residents get caught trying to bring in butter, bread, fruit, etc. in their rooms, the dorms can expect to make the dorms and in its policy manuals. This is primarily the reason there are restrictions now to protect the dorms and to eliminate the mess caused by food in the rooms.

The NDSU dorms are cleaner, and more of a food than a lot of dorms at other colleges. As time passes on, the men's dorms will be more organized there will be more improvements and regulations.

The Interdorm Council probably will be given more voice in the operation of the dorms and in its policy manual. The residents must be able to find like rules now enforced, so that the residents can expect to live the rules.

Thank you.

Barbara Batorich, Assistant Editor
Pharmacy Wives

The annual auction of the pharmacy wives will be held Dec. 19 at 8 p.m. at Sudro Hall. All wives are asked to donate two things that they have made. Proceeds are given to the Opportunity School to defray expenses of the year.

Campus Coffee

Campus Coffee Christmas party will be held at the office in the library from 4-5 p.m. Tuesday, Dec. 19.

Newman Party

Children of the Catholic married students are invited to a Christmas party to be held at St. Paul’s Student Center at 3 p.m. Sunday, Dec. 17. The annual Christmas party is sponsored by the Newman Club. Supper will be served Sunday, Dec. 17 at 5:30 p.m. A social meeting will follow.

4H Club

The University 4-H Club will hold its annual Christmas party Dec. 21 at 7:30 p.m. at Morrill 217.

Panhellenic

Panhellenic Council will meet Tuesday, Dec. 19 at 7 p.m. in a conference room of the Memorial Union. Annual pictures will be taken.

FROM SEA TO SHINING SEA

America is a great country. America’s cities are full of houses. America’s forests are full of trees. America’s rivers are full of water. But it is not houses and trees and water that make America great; it is curiosity—the constant quest to find answers—the endless, restless “Why?” “Why?” “Why?”

Therefore, when I was told that Marlboro is a top seller at colleges from USC to Yale, I was not content merely to accept this gratifying fact. I had to find out what it was that bound my mind to notions in every sector of this mighty land.

First, I went to the Ivy League—dressed, of course, in an appropriate costume: a skull-and-bones in one hand, a triangle in the other, a mask-and-wig on my head, a hasty pudding in my shirt pocket. I ventured on an Ivy League by the lapses, which is no mean task considering the narrowness of Ivy League lapses, but, I, fortunately, happened to have little tiny hands; in fact, I spent the last week working in a small arms plant where I am proud to say, I was awarded a “Navy E” for excellence and won many friends—“Sir,” I cried, assuming an Ivy League by the lapses, “how many Marlboro is your favorite filter cigarette?”

“I’m glad you asked that question, Shorty,” he replied. “Marlboro is my favorite filter cigarette because it is the filter cigarette with the unfiltered taste.”

“Oh, thank you, sir!” I cried and ran post haste to several campuses in the Big Ten, wearing, of course, the appropriate costume: cap, costume, and several oil poisons. Spying an apple-cheeked young coed, I hugged my fornicade and said, “Excuse me, miss, but how come Marlboro is your favorite filter cigarette?”

“Your majesty is my favorite filter cigarette because it is the filter cigarette on the unfiltered taste, Shorty,” she replied.

“Marlboro is my favorite filter cigarette because the flavor is flavorful, the flip-top box flips and the soft-pack is soft.”

“Thank you, young man,” I cried and handed a cutie and sped as fast as my little fat legs would carry me to several campuses in the Southwest, wearing, of course, the appropriate costume: cap, costume, and several oil poisons. Spying a group of undergraduates singing “Strawberry Roan,” I removed my hat and said, “Excuse me, friends, but why is Marlboro your favorite filter cigarette?”

“We are glad you asked that question, Shorty,” they replied. “Marlboro is our favorite filter cigarette because we, native sons and daughters of the wide-open spaces, want a cigarette that is frank and forthright and honest. We want, in short, Marlboro.”

“Thank you, sir,” I cried and, drawing a sunny morn, I set sail for Hawaii, because in Hawaii, in every state where Old Glory flies, Marlboro is the leading seller in flip-top box. On campus, off campus, in all fifty states, wherever smoke求 for pleasure in this great land of ours, you will find Marlboro.

YOUR ORDER FILLED IN 20 SECONDS

“Where Quality and Thrift go Hand-In-Hand”
Julianne Falleide, NDSU student in AAS, is working as a refugee camp in West Berlin. She was chosen through the Lutheran World Federation to do this work. After a year in Berlin she will return to NDSU to complete a quarter before graduation.

I am now working in Cimade Helm which is a day center or home for the Mandatory refugee camp. This is the main camp and perhaps you have heard of or seen pictures of it. All refugees coming into Berlin register here and then may be sent to other camps here in the city or in the west zone. Cimade Helm is run by Hilawerk, the social relief agency of the Evangelical Church of Germany.

The home is a social center for the people of the camp. There they can iron clothes, sew and repair their shoes and clothes, listen to records, or perform music as they are doing now — a regular jam session; or they can read magazines, newspapers and books. (We have about 500 books.) They can also play games such as ping pong, checkers, chess, skat and can cook coffee. In the evenings we have special programs.

Here in Cimade we have been working closely with the Church in the camp.

As you could probably expect many of the young people come here before they will go to the church in the camp. Every Tuesday one of the pastors from the camp comes over here and has a program for the young people, and do we have a full house. Most of the people coming across now are boys in their late teens and 20's — about our age. They have not only the daring but the strength to come over.

I was in Hollanderheim before and right after Aug. 13. Here in Berlin the people reckon time before and after the blockade and right after Aug. 13. Here in Berlin she will return to NDSU Mary, the pastor's wife, spent and our classes were for three 13 kilometers from the middle of Berlin. Here one can hear rockets crash in the morning. There are regular little farms with cows, pigs, and even hay fields.

For the last couple of weeks, or so we have been hearing blasting and shooting from the direction of the border and didn't know what was happening. They had been digging a trench in the zone near here. I know it wasn't hunting season. We haven't one — at least not on animals.

THE BELL TELEPHONE COMPANIES

Because of Steve Banks, who just two years ago was an undergraduate engineering student, the Bell Telephone System is closer to wiping out the noise (or "static") that sometimes interferes with telephone conversations.

On one of his first assignments, Steve examined the noise levels that had "leaked" into telephone circuits in Colorado. His findings shed new light on the source of noise, and on the important methods of measuring it.

Steve Banks of Mountain States Telephone Company, and the other young engineers like him in Bell Telephone Companies throughout the country, help make your communications service the finest in the world.

Research Grant Totals $11,000

NDSU has received a grant of $11,000 for study of the effects of pesticides on tiny animals and plants in the soil. The grant comes from the National Institutes of Health, a division of the U. S. Public Health Service, and was announced by Arlen G. Siberry, acting president of NDSU.

The grant goes to Dr. Ana J. Arden, chairman of the bacteriology, and Dr. J. T. Schwartz, assistant professor of agricultural entomology.

The funds bring to $25,000 the amount of federal support for the project, which was started last year with a grant of $11,000 from the Institutes of Health.

The study aims to trace the effects of four pesticides on the tiny microorganisms that inhabit the soil and to measure the duration of the effects. Many microorganisms have a beneficial effect for crops, Dr. Schultz pointed out.

The researchers are also studying methods of "biological assays" in connection with the effects of the pesticides. By these means the scientists can measure the amount of poisonous material introduced in the soil by the pesticides. To get an indication of poison the scientists expose fruit flies and measure the death rates of the insects.

In one of its final steps the study will show how the amount of the toxicant, or poison, relates to changes in the population of the various microbes.

The study will be directed by Dr. Schulz and Dr. A. J. Arden, professor of agronomy, and Dr. J. T. Schwartz, assistant professor of agricultural entomology.

Nurses Display Christmas Spirit

ST. LUKE'S NURSES lift student spirits as they sing Christmas carols in the union during final week. Following the students of the tensions of examinations, the group was directed by chemist Prof. F. H. Sands. This is an annual event for the students. Fifty-three freshmen nurses took courses in psychology, chemistry and zoology at NDSU last quarter.

Library Doors Open, Close 36,496 Times

Students passed through the doors of the library at NDSU 36,496 times in Nov., according to H. Dean Stallings, librarian. The figures result from a continuous count taken at the door as students leave and is about last November's figure, Stallings said. Busiest day for the month was Wednesday, Nov. 15, when 2,067 students were counted.

The figure reflects attendance at classes in the building as well as use of reading room and other facilities in the 150,000 volume library, according to the librarian.

It is expected the daily count will show a rise this month, as students prepared for final examinations, Stallings said.

Siberry Visits Europe On Two Month Tour

"Students seem to be more student over there," said Rev. Bob Siberry, director of United Campus Christian Fellowship, while reporting on his European trip.

Siberry traveled two months and visited eight countries. He was one of a group of 12 campus pastors who went abroad to study the "Religious of the Church in Europe."

"Students are completely on their own, sink or swim," Siberry stated. "The whole pastoral system is thrown out the window. Little help is given to students when they choose their vocations and their courses. Students learn responsibility ."

"Religion is not a big factor with European students," Siberry said that it is difficult to get people to open up in religious discussion groups because in the past these people have not questioned religious teachers.

Meet old friends and make new ones Dance at the CRYSTAL BALLROOM Oldtime and Modern every Tuesday Rock 'n Roll every Saturday

There's actually more rich-flavor leaf in L&M than in even some unfiltered cigarettes. You get more body in the taste more fancy in the smoke, more taste through the filter. So expect more, get L&M now. L&M's modern filter, only pure white touches your lips.

You Can Be Arrested Without Knowingly Breaking the Law

This is the season of snow and ice; the season of hazardous driving.

According to John Pavek, a Fargo police sergeant, there are

Father Durkin Treats Italians, Visits Pope

Father William Durkin, chaplain of St. Paul's Student Center at NDSU, played Piped Piper to a band of Capri urchins during his trip to Europe this summer.

Speaking Latin, Father Durkin convinced four Italian boys to sing him a song. Their reward for this serenade was to be an ice cream treat. When Father Durkin reached the ice cream store his entourage numbered about 35 boys who had heard the good work about the American Padre.

Father Durkin traveled with Father Gerald Potter, UND Newman Club chaplain. Father Potter and Father Durkin traveled in Italy for a month visiting Venice, Naples and Rome. They saw Pope John XXIII in a general audience. They also visited Munich, Paris, London, Austria and Switzerland.

"The high points of my trip were the many plays and musical events I attended," said Father Durkin. "Some of these were the Brundt's Ballad, International Folk Dance Festival in Venice and the Abbey Theater Players in Dublin."

Father Durkin left New York June 2 aboard the "Leonardo da Vinci". He dined in Naples on June 10 and flew back from Dublin Aug. 12.

four important points to remember if you are in an accident:

1. Stop.
2. Check for injuries. If someone is injured, immediately call a law enforcement official. Do not touch the injured unless you know first aid.
3. Exchange names and addresses.
4. Call law enforcement official. Law enforcement officials are: campus, campus police — maintenance in daytime and power plant at night; city, city police; county, county sheriff or state highway patrol.

The city of Fargo requires that all accidents be reported. If you agree on terms with the other party and leave the scene, you are subject to arrest for leaving the scene of an accident.

Any damage to an auto in Fargo must be reported to the police. The investigating officer will fill out a report and give you a damage release sticker. No repairs are made in Fargo or Moorhead without a damage release sticker.

The officer will also give you a state form SR41 to complete. It is your responsibility to send this to your insurance representative who will forward it and your insurance information to the Safety Responsibility Division at Bismarck. If you have no insurance and are unable to prove you have $5,000.00, your driver's license will be repealed until the proper qualifications are met.

YOUR YEAR 'ROUND DRIVE-IN ON S. UNIVERSITY DR. AT 16TH
Good-bye, "MRS. Z" — After answering about six million telephone calls for NDSU, Mrs. Emmeline Ziegenhagel, NDSU switchboard operator, began retirement on Friday, Dec. 1. As the "hello" voice of NDSU for 13 years, she answered calls from every state in the union and scores of foreign lands. The longtime telephone operator was honored at a coffee-hour.

APO Elects Officers, Installs New Pledges

Alpha Phi Omega, national service fraternity for men recently elected officers and a new group of students will be awarded N.D.E.A. fellowships for work in plant science at the state university during the last three years, he said.

NDSU graduate students in the areas of plant science, pharmacy, entomology, and the three in which the new grants are being made.

APO NOTICE

Students who left books in the Alpha Phi Omega Book Exchange should pick up their checks or unsold books. Do this at the Exchange from 9 a.m. until 5 p.m., Tuesday, Dec. 19.

Winston TASTES GOOD like a cigarette should!
It seems to work in the reverse for student union employees, according to Dale Brostrom, Memorial Union director. "I think the overall average would be higher for working students than those not working," Brostrom commented.

Since Brostrom became director five years ago there have been only two suspensions of student employees. A few student employees have been on the honor roll all four years while attending NDSU.

SENATOR BURDICK with officers of the campus chapter of American Society of Civil Engineers posed for this picture before the senator's talk to the group Wednesday night. From left, Burdick, Eugene Zimmer, ASCE president, and Eugene Briss, ASCE treasurer. Vice President Correll Peterson, who Burdick was talking to on the left was cut off by the photographer.

**Do Lower Grades Accompany work?**

It seems to work in the reverse for student union employees, according to Dale Brostrom, Memorial Union director. "I think the overall average would be higher for working students than those not working," Brostrom commented.

Since Brostrom became director five years ago there have been only two suspensions of student employees. A few student employees have been on the honor roll all four years while attending NDSU.

Further breakdown of figures on Memorial Union student employees shows that during the school years, 1956-1957 and 1957-1958, only one employed student was on the probation list each quarter. An average of 30-75 students were employed during the two years. During the 1958-1959 two years, of the 60 students employed one was on the probation list fall quarter, five winter quarter and none spring quarter.

Sixty students were employed in 1959-1960. Of these two were on probation fall quarter, six winter, and one spring quarter.

Five students of the 60 employed were on the probation list fall quarter of 1960-1961, five winter quarter and one spring quarter.

"I feel that every student should work some. Work helps giving them job experience which is needed to graduate," Brostrom said.

**Sen. Burdick Speaks At SU Wednesday**

The future of North Dakota lies in the water supply associated with the Garrison diversion stated Quentin Burdick, Democratic Senator from North Dakota, in a speech at the ASCE meeting Wednesday evening.

Industry must be brought into North Dakota if we are going to save the population of our state. The storage of water supply may be our answer, but there is a ten year lag period before construction can begin. These ten years will be the important years of our state, Burdick commented.

Industry must be brought into North Dakota because of the low consuming power of North Dakota population. North Dakota has lost 42 thousand people in the last ten years says Burdick.

Burdick went on to say the United States has become involved in serious trade competition with Western Europe, since Western nations have formed a common trade market between them with probably seven more nations joining. Burdick said the US built up Western Europe and made it prosperous by giving them foreign aid, advice and purchasing power of the GI's. Now we are faced with the big problem is whether we should lower our tariffs. If we do, it could cause bankruptcy. If we don't we will have a large amount of surplus.

**LUCKY STRIKE presents:**

**LUCKY LUNNERS**

"Better work on his stomach— he's got a head like a rock."

"Those beach toughs better not kick sand in my face next summer!"

"Wow! A four-letter man."

"Now that's what I call a power play."

WHEN DOES A LUCKY TASTE BETTER THAN A LUCKY? There's a dangerous question because, as you well know, college students are crazy about Luckies and smoke more of them than any other regular. Still, there is one kind of Lucky that tastes a little bit better than any other kind. These extra-special Luckies are the ones you get for Christmas. They're only thing better than a Lucky is a free Lucky. Ask for a carton this Christmas.

**CHANGE TO LUCKIES and get some taste for a change**

Product of The American Tobacco Company - "Lucky" is our middle
by an atmosphere of methane, water, ammonia and hydrogen. Dr. Urey suggested that energy broke up these molecules. The resulting fragments combined to form larger molecules, which, the scientist hypothesized, finally produced the complicated organic compounds that make up living organisms. Dr. Urey and his scientific team showed in the laboratory that energy in the form of an electric discharge converts a mixture of methane, water, ammonia and hydrogen into a large number of organic compounds. The organic compounds included amino acids, the "building blocks" that yield proteins.

The scientist, who won the 1934 Nobel Prize in chemistry, has done high-level research on other questions relating to the origin of life. Recently Dr. Urey has applied the techniques to studies of early life forms and the geologic development of the earth. He won the Nobel Prize for his discovery of deuterium, an isotope of hydrogen with twice the atomic weight of the common form of the element. Dr. Urey later turned to atomic bomb research and space studies.

Since 1958 he has been professor-at-large at the University of California. He has done special research for the Institute for Space Studies, New York.

The Nobel winner was graduated from the University of Montana in 1917. He earned his Ph.D degree at the University of California.

NEW FRENCH INSTRUCTOR S. A. Popel holds a textbook used in one of his classes. He has a degree in philosophy from the University of Liver, Poland. He has been a language teacher for years, loves chess and spent many years in Paris. He is married and has three children.

New French Teacher
Is a Chess Champion

Versatile and educated are perhaps the key adjectives to the personality of the new French instructor on campus, Stephan A. Popel.

Belgium was the starting place of Popel's higher education. From 1926 to 1930 he studied philosophy with French as his major and Latin and Greek as his minors.

Upon completion of his master's degree, Popel served on the law faculty at the State University of Louvain until 1939, when he finished his master's degree in law. Popel taught until 1945, at which time he became a reporter in Paris for the Frenc-Tireur, a newspaper with a circulation of 200,000.

Besides writing articles on education and sports, Popel had a weekly chess column. Chess is Popel's main hobby interest. He is Master of the United States Chess Federation, has won the North Central Open Championship, the Great Lakes Chess Championship, and the Michigan Championship.

The Michigan Championship is of small significance to Popel, for he has won it several times. Popel extends his assistance in organizing a chess club at NDSU. To quote Popel, "I consider chess more than an intellectual activity, it is an art." The snow is appreciated by Popel, for it reminds him of his homeland.

When asked what he thought of Christmas customs in the United States, he said, "The Christmas air before hand is nice. For my children it is very nice. They hope ahead of time."

NDSU BOWLERS HOST FIVE OTHER COLLEGES

LARRY PAULSON, Jim Andersen and Roy Folstad are checking over Larry's bowling ball in preparation for tomorrow's invitational tournament against schools from Colorado, Minnesota and North Dakota.

INTRAMURALS

By DENNIS KALDOR

Intramural basketball got into full swing this past week with forty-one teams participating in six leagues. Time will not permit the playing of a complete round-robin schedule, but each team will be permitted to play an ample number of games to determine the league leader at the midway point of the season in order that leagues may be re-scheduled for the remaining half of the year. The present league setups for the first half of the season are as follows:

Bracket 1
Kears-Pol
Simon
Neb Tru
Chis-Pol
TKE-1
Theta Chi-2

Bracket 2
BPJ
K. R.
Omega
Beta Chi-1
Theta Chi-1
Alpha

Bracket 3
AIA
Buchholz
Mons
AIO-1
Chis-Pol
TKE-5

Bracket 4
AIO-2
Phi-Phi
Phi Club
S.A.E.
E. C.

Bracket 5
AIO-3
G.L.
AIO-4
S.A.E.
C.E.

Bracket 6
TMC-1
Phi-Phi
EA
Kappa Phi-2
Rhône Chi-2
A.O.

The Friday night bowling league will not bowl again until Jan. 5. Solid standings have now been set in nearly every league and definite leaders have been set in each bracket.

Almost every scientifically trained man can find stimulating and rewarding career opportunities within the broad spectrum of Pratt & Whitney Aircraft activities.

From the solid foundation of 36 years as a world leader in flight propulsion systems, P&W development activities and research investigations today are far ranging. In addition to continuing and concentrated development effort on air-breathing and rocket engines, new and exciting avenues are being explored in every field of advanced aerospace, marine, and industrial power applications.

The reach of the future ahead is indicated by current programs. Presently, Pratt & Whitney Aircraft is exploring the fringe areas of technical knowledge in magnetohydrodynamics, thermonuclear, and thermo-electric conversions. New and exciting avenues are being explored in every field of advanced aerospace, marine, and industrial power applications.

The field still broadens. The challenge grows greater. And a future of recognition and advancement may be here for you.

For further information regarding an engineering career at Pratt & Whitney Aircraft, consult your college placement officer or write to Mr. R. F. Azinger, Engineering Department, Pratt & Whitney Aircraft, East Hartford 9, Conn.

North Dakota State Wrestlers Compete in Invitational Meet

Wrestlers at North Dakota State University will compete against wrestlers from seven other colleges Saturday at the Valley City Pre-Season Invitational Tournament.

Teams can enter two men in each weight event and matches will be six minutes long, rather than the conventional nine minute matches.

Other teams entered in the Valley City event are Bismarck Junior College, Northern State Teachers College, Jamestown College, Minot, Dickinson, Mayville and Valley City State Teachers Colleges.

In their second match of the season last Saturday, Bison wrestlers were tied by Concordia, 2-2. The NDSU squad has its first home match on Wednesday, Dec. 20, against the Dickinson State team. The varsity match will begin at 8 p.m. and will be preceded by a 6:30 match between the NDSU freshman squad and the Valley City State B squad.

THE FOUR LETTERMEN guards on the Bison basketball team are, left to right, Mike Anderson Jr., Bert Sperling Sr., Ken Lehr Sr. and Lloyd Babby Sr. All four are expected to be called upon during the regular season to lead the Bison to a successful season.

Good Luck, NDSU Bowlers!

The Gant Story

We believe that Gant shirts have a certain well-bred look that distinguishes them from all others. Careful tailoring and adherence to a strict tradition are qualities indigenous to Gant. The emphasis here is on meticulous detail in a heritage of conservatism.

Do you like a really neat, well fitting collar? Softly bared collar construction is gently RIGHT. Do you want to hang your shirt up? A trian hanging loop says to that. Breathe? Oversize body construction is the answer. There's a full length box pleat back for trimness, too. Precise stitching lets the easy barrel cuffs roll up at mid-point.

The Gant shirt has been designed to serve you through a lifetime of correct dressing. There is painstaking workmanship that distinguishes them from all others. Careful tailoring and adherence to a strict tradition are qualities indigenous to Gant.

The Gant Story

The United States Military Academy at West Point is currently recruiting for several positions in the Engineering Branch of the Engineers' Office. Positions are concerned with design and specifications for equipment and alterations to structures of all kinds. Positions are open in architectural engineering, civil engineering, electrical engineering and mechanical engineering. Contact the Placement Office for additional information.

STANDARD OIL of Ohio will not visit the campus for personal interviews this year. However, the company does have a number of employment opportunities that are available at the Placement Office.

Ten ME Students Named to Honorary Placement Office

Ten mechanical engineering students were named to Phi Tau Delta, national mechanical engineering honorary. The new members include: Allen Brunsvold, John Freeman, Reino Matamaki, Lemoore Buse, Richard Fockler, Raymond Jutilla, Thomas Larsen, John Lysaker, and Ronald Bihala.

Lawrence Nelson, a student at UNM, and a member of the Placement Office, was named to honor society. He is a member of the Placement Office, and is at large, and Alan Vick, assistant professor of industrial engineering, was made an honorary member.

Ten ME Students Named to Honorary Placement Office

AIEE-IRE will meet on Dec. 24 at 4:30 p.m. in south engineering room 22. All electrical engineering students are urged to attend.

NOTICE

STATE BISON LOSE TO MOORHEAD

State Bison Lose to Moorhead College 61-56 Wednesday

After taking a week off for final examinations and winter quarter registration, North Dakota State University basketball players returned to action this weekend against two area opponents.

Wednesday night, the Bison played Moorhead State College in Moorhead, losing 61-56. Saturday night, they play Mayville State Teachers College in the dedication game for the new gymnasium, at the Mayville school.

Bison Coach B. C. Bentzon will have to do a little reshuffling of his personnel, following completion of the fall quarter at NDST.

Two of the Bison forwards are scholastically ineligible for competition in the winter quarter. They are Lynden Langen, 6-7 forward who has been a starter this year and last; and Gerald Booth, a 6-3 sophomore forward who had developed rapidly in this, his first season on the varsity squad.

Bentzon said that Neal Jacobson and Roger Erickson are currently the leading forward candidates. Bentzon expressed pleasure with the development of Erickson in the first Bison games and felt that he should be playing at full strength after this week's practice. Erickson joined the squad after the completion of the football season.

The Bison coach also said he was considering move Mike Anderson, a 6-3 guard in the forward position. Bentzon said that 6-3 forward Kent Reslock, performed effectively in the opening Bison game and should see more action in the future.

APHA

APHA will meet Wednesday Dec. 30 at 7:30 p.m. in room of Sudro Hall.

"When you think of DIAMONDS", think of Crescent!

"This is art... that we can see through," say Kathryn Vigesaa and Dennis Sobtiak. The Christmas drawings on the plate glass windows at the Student Union are by Bob Kewich.
