Carolers Express Christmas Joy

left are Ray Hendrickson, Kathleen Cullen, Karen Tinseth, Larry Seeger, Peggy Anderson. The night the photo was made, the singers found it extremely cold. With the thermometer at 15 degrees below zero, the cameras froze up after only three pictures.

Schindler to Study Abroad
Under Rhodes Scholarship

David Schindler, NDSU senior, was awarded a Rhodes Scholarship Dec. 17 in Portland, Oregon.

Schindler went to Portland where he competed with 13 other applicants from the seven states in the Rhodes Scholarship District. He is one of 32 scholars from the United States to receive the scholarship this year, he will go to Oxford University in England to study zoology for two years.

The Rhodes Scholarship is given for scholastic attainments, moral character and leadership, and physical vigor as shown by fondness and success in sports. Majoring in zoology, Schindler has maintained a high scholastic record with an overall average of 3.80, or nearly-straight "A," since he transferred from the University of Minnesota at the end of his freshman year.

In 1958 he won the General Motors Scholarship and in addition to his regular studies has assisted in a special research program with Dr. Gabriel Comita in a study of copepods, tiny shrimp-like crustaceans, sponsored by the National Science Foundation.

Schindler has been active in sports at NDSU and was a starting guard on the last two football varsity teams and on the varsity wrestling squad. He won honorable mention on the Academic Little All-American Team in 1960.

He is the third Rhodes scholar from NDSU. Gordon Kepner of Fargo was chosen to study physics in 1957 and Amcur Olson of Buxton received one in 1953 to study agricultural economics.

NDSU was the only agricultural college to have a Rhodes scholar in 1957. One of two to be selected from North Dakota, Schindler competed with applicants from the seven states of Oregon, Washington, Montana, Wyoming, Idaho, Alaska and North Dakota. While four were allowed for the district, only three were named this year.

The Rhodes scholarships were established by a 19th century British diamond king, statesman and empire builder. In addition to two years study in any field of study which is offered by Oxford, the Rhodes scholars are allowed stipends for travel in Europe during their study.

Schindler said "It's a most stimulating experience to go through all the exams and interviews."

Agriculture Short Course Begins Jan. 2

"About 50 short course students are expected to begin special instruction at NDSU Jan. 2 through Feb. 23," said Peder A. Nystuen, director of short course.

Short course in agriculture is offered for persons interested in obtaining further training in the field of agriculture, but who cannot avail themselves of the regular courses offered by the College of Agriculture.

This program is open to men 17 years of age and older who are interested in agriculture. A high school diploma is not a requirement for enrollment.

The instruction is both technical and practical. Courses offered as a part of the short course do not carry regular university credit. The agricultural short course program consists of a four year sequence of courses. A certificate of accomplishment is awarded upon successful completion of each course and a master certificate is offered for completion of all four courses.

Although very few men receive a master's certificate, about eight per cent of the men in the short course program later enroll as regular college students.

Sharivar Plans Call
For Student Help

Initial Sharivar plans call for student participation, according to Gayle Schultz, co-chairman of the annual event. Because Sharivar is an all-campus activity, the interest of all students and faculty members is essential.

Sharivar central committee, the backbone of the event, held its first meeting Dec. 13, serving on the committee are chairmen from each of the six schools on campus; publicity chairman, activities chairman, a secretary and a treasurer.

If you want to be a part of the "All Campus Open House" on April 27-29, call Gayle Schultz at AD 5-1285 or Marlo Brackelsberg at AD 2-3150.
NDSU Freshman Dies

A man was found dead in his car of poisonous fumes.

The banquet, of course, was designed to give FFA members the opportunity of entertaining their friends. But beyond that, it is a practice session for every future vocational agriculture teacher on staging the Father and Son banquet which is an integral part of the Future Farmer program in the home community.

Lee Grimm Wins Hughes Scholarship

Richard Lee Grimm, a senior in electrical engineering at North Dakota State University College of Agriculture and Applied Science, has won the Max Hughes Memorial Scholarship. The award is made on the basis of scholarship and need.

Grimm will be honored at a dinner meeting of the Institute this month. He is the son of Mr. and Mrs. John Grimm, Bottineau. The electrical engineering student attended Bottineau School of Forestry before enrolling at NDSU.

Ferrante and Teicher will return to Fargo-Moorhead patrons open to Fargo-Moorhead patrons for the Christmas Party held Thursday.

Popular Dual Pianists to Appear in Lyceum Series Jan. 15 at SU

This is the all-new fun program to be presented at a lyceum Jan. 15 at Festival Hall.

"Ferrante and Teicher Flip Their Hats". This is the all-new program to be presented at a lyceum Jan. 15 at Festival Hall.

This is a dynamic new approach to popular dual pianistic. The students who are courtesty and self respect.

The students who are courtesty and self respect.

And by trying to correct these things the patient is well on his way to recovery.

The students who are courtesty and self respect.

The students who are courtesty and self respect.

The students who are courtesty and self respect.

The students who are courtesty and self respect.

The students who are courtesty and self respect.

Ferrante and Teicher blend their careers, and by the use of famous and new gadgets they have devised to extend the total range of the Steinway concert grand pianos.

The first recording artists who have ever had the honor of having two separate instrumental discs selling over a million copies each, Ferrante and Teicher have been ranking as "firsts" since their debut on the charts at the jugalband School of Music in New York City which both were enrolled as twelve old prodigies.

They have made a lot of music together since that first meeting; all of it exciting and all of it bearing the hallmark of Ferrante and Teicher, innovators in music-making.

Ferrante and Teicher is one of three lyceum programs scheduled for 1962. On Feb. 11, Jose Greco will return to NDSU by popular demand. Greco was last here in 1959.

The Errol Garner concert was also changed to Apr. 28.
The C. St. maths spirit has been coming to terms with its effects about NDSEU of late. Decorations range from those on the doors in Diman Hall to the paintings in the Union. Most everyone has been entertained at some Christmas affairs or taken part in a few of the many Christmas activities. Probably the activity we will relish most will be going home at five Monday night SUAB hosted the entire campus at a Christmas party. I think all chemistry students will agree that their professors stole the show.

Christmas music highlighted the Christmas Conversation Tuesday morning and in the afternoon was the "Y" coffee party. Thursday seemed to climax the Christmas activities with the SUAB Children's Christmas party, a Junior Panhellenic Christmas Party, an Inter-Down Christmas party and also an LRA Christmas Party.

In the Greek line were entertainments with the ATOs and KEIs and the Co-ops and Phi Mus.

This afternoon the College of Engineering is holding their Christmas party. It looks like there has been ample opportunity for everyone to pick up some of the Christmas spirit. Before long campus will be nearly deserted and our vacation will begin. I would like to close by wishing everyone...

Bonita Bohnsack

Bonita Bohnsack has been selected to serve as 1963 Angus Queen according to Mlrs. Lyle Bohnsack, St. Anthony queen contest chairman. The North Dakota Angus Association is the sponsor of the contest.

As an Angus Queen Miss Bohnsack will reign over Angus events during the N. D. Winter Show in Valley City the first week in March.

Miss Bohnsack runs Angus cattle and quarter horses on her ranch on the Sheyenne River near Sheldon. She has won 35 trophies and 300 ribbons at horse shows and rodeos. A graduate of Leonard High School, she was also a 10 year 4H member. Her projects included beef, horsemanship, home economics, poultry, garden, and home beautification, in which she received county and state awards.

Miss Bohnsack, 20 years old, is a Junior at NDSEU majoring in home economics. She is a member of NDSEU concert choir, Kappa Alpha Theta sorority, and Saddle and Sirloin Club.

21 GREAT TOBACCO MAKE 20 WONDERFUL SMOKES!
AGED MILD, BLENDED MILD - NOT FILTERED MILD - THEY SATISFY
WAITRESS sets table, serves meals and puts dishes away.

A SNACK AND CHAT after a day's work is welcome relaxation for the coeds in the home management house.

TWO HOUSEKEEPERS clean and care for house.
Have you ever wondered what goes on in "the house" just north of Ceres? This is the home management house used as a four credit laboratory for seniors in home economics education. Women residents try out principles and homemaking skills they have learned in other classes throughout their college years.

About eight coeds live in the house each half quarter. During this time house duties are shared, with roles shifted every four days so that everyone eventually does everything!

The students entertain groups such as the home economics faculty, transfer students and friends.

Besides living in the house the coeds have two classes: methods in adult homemaking education and home nursing the first half of the quarter, and methods of teaching homemaking education and home nursing for those living in the house the last half of the quarter.

HOME MANAGEMENT HOUSE presents an inviting and homelike atmosphere.

MANAGER in keeping with the family budget shops for groceries and supplies, keeps accounts and presides at house meetings.

FRIENDS are welcome at the house.

ANSWERING QUESTIONS for residents is one of Mrs. Walker's jobs. She is in charge of the house and teaches the house residence course.

FIRST COOK directs and carries out plans for meal preparation and helps with dishwashing.

ASSISTANT COOK does baking, works with first cook and helps with dishwashing.
by David Hoff

The NSDU College Chapter of Sigma Tau Gamma and Sigma Alpha Epsilon held their seventh annual Friend's Night Banquet Dec. 14 at 6:30 in the Memorial Ballroom.

Dr. Milo Peterson president of agricultural education at the University of Minnesota was the guest speaker. Dr. Peterson spoke about the future of agriculture education.

Dr. Peterson, in his address, stated that farming is still our largest business and there is at least ten times as great a need for replacement of farmers than any other single occupation except salesmen.

Dr. Peterson also predicted some of the future directions of agricultural education. He said we can expect to see a great increase in adult farmer education with a lot of attention centered on management.

Dr. Peterson stated that the Young Farmer group is the most neglected facet of agricultural education. It is in this age period when young men are striving to become established in farming that they can use the help and guidance by getting the least.

Dr. Peterson said, "This task tends to be more pressing than in the past," because there is no program properly geared to the needs of the group. He feels there is need for a program developed, in part, to identify opportunities and especially more education and help in credit and finance.

A future career in agricultural education looks bright. According to Dr. Peterson, one teacher per high school agriculture department will become scarcer as time goes on. As multiple teacher departments become more widespread even a greater teacher shortage than we are now experiencing shall come into being.

Darryl Faxva, NSDU sophomore and National FFA Vice President from the North Central Region, brought greetings from the national organization.

Job Interviews

Tuesdays and Wednesdays: Jan. 9 and 10

Allis Chalmers Manufacturing, Company, of Milwaukee, Wis., will send representatives to the campus seeking interviews with seniors and graduate students majoring in mechanical, electrical and agricultural engineering. The company is offering opportunities to investigate various types of careers in the company and they offers individualized on-the-job training for the specific career choice. Primary divisions of the company include atomic energy, industrial equipment, power equipment, hydraulics, farm equipment, construction equipment and engine-material handling divisions.

Tuesday: Jan. 9

K. B. MacKichan and D. A. Associates consulting engineers in Grand Forks, will be on campus seeking to interview March and May graduates majoring in civil and electrical engineering. All students interested in discussing employment opportunities with the MacKichan organization are urged to contact the Placement Office and arrange interviewing appointments.

Wednesday: Jan. 10

Westinghouse Electric Corporation will be represented on campus by E. K. Johnson and M. Butzloff. Westinghouse is currently offering employment opportunities to physicists and electrical engineering graduates at all degree levels. A formal training program will introduce all new hires to career opportunities within the company. U.S. citizenship is required.

Wednesday, Jan. 10

Aeronautical Systems Division of the Air Force System Command will send a representative to the campus seeking employment interviews with engineers and senior and graduate science graduates at all degree levels. There is also the possibility of openings available in the areas of business administration and industrial management.

The installation is located at Wright Air Force Base at Dayton, Ohio and is engaged in various phases of air research and development work.

Friday, Jan. 12

The U.S. Geological Survey will visit the campus seeking employment interviews with senior engineering and agricultural science students.

Work done by the Geological Survey includes mapping geology at the surface, supervision of subsurface exploration and collection of hydraulic data. Considerable field work collecting field data is followed by periods of report writing. All interested students are urged to arrange interviewing appointments through the Placement Office.

Peter Kiwiet and Sons Company, contractors with home offices in Omaha, Nebraska, are currently seeking to hire a number of civil engineering gradiate students at all times. Primary need for these young men is to begin work on the multi-million dollar Minne Man Minnie Project. Employment applications and additional information are available through the Placement Office.

The Brass Lamp

... Serving European and American coffees, imported teas, hors d'oeuvres, and especially prepared sandwiches and pastries in an unhurried and interesting milieu.

When you return from Christmas Vacation an entirely new kind of Coffee House will be ready to serve you.

Meet old friends and make new ones. Dance at the Crystal Ballroom. Oldtime and Modern Rock 'n Roll every Saturday.

All entries in secretSanta contest must be for one sample in each legume or grassy sample. Two cheerleaders will be established for judging: one for small grains and another for legumes or grasses. The winner will be the least. Dr. Peterson stated, "Farming is still our largest business and there is at least ten times as great a need for replacement of farmers than any other single occupation except salesmen."

J. W. Barlow, NSDU sophomore. They and Mike Connor, Mayville, were speakers at the banquet.
INTRAMURAL SPORTS

By DENNIS KALDOR

There will once again be no bowling for the Friday night league this week. This league will pick up again after Christmas vacation.

The meeting of the intramural board last Monday was spent reworking a proposed basketball schedule for the first half of the intramural season. Several complaints have come in to this desk in regards to the setting up of these schedules.

After every schedule has been set up there are inevitably several changes which have to be made in the schedule before the games even start. The basketball schedule was no exception. Monday's meeting was spent discussing a schedule which should and could, have been completed correctly before hand.

Instead of the meeting being devoted to any business transactions which may have been pertinent to the running of the intramural program, the members were forced to sit through a very lengthy program which in no way concerned the majority of the representatives.

Everyone realizes the problem but no one seems to have a solution for it. The idea has been brought up that maybe three of four people should be in charge of setting up the schedules and make sure that each team is playing the required number of games and that there are no mistakes in their schedules.

One of the representatives also mentioned at the last meeting that the officers of the intramural board should exercise more authority during the meetings and maybe could be-speed up and become more interesting and meaningful to the representatives who have no choice but to sit there and take whatever is thrown at them.

BISON GUARD Ron McLeod adds another two points to lead NDSU to a 76-69 victory over Mankato State College Indians. These two points plus 24 more are the amount of points McLeod scored last Tuesday night.

BISON BITS

By SHERRY BASSIN

There was a little more joy in Bisonville today because last Tuesday the Bison did not strike out.

Last Tuesday the Bison displayed the form they should have displayed in their previous games and beat the Mankato State Indians 76-69 in overtime.

Not only was it a deserved victory for the Bison but a much needed one.

With only four seconds remaining in regulation time and NDSU beaten by two points, it was a time for many Bison backers to pick up good odds. Like the Bookies at the track, they would say, "As a thousand to one shot."

Bison guard Ron McLeod sunk a two pointer that tied the game 69-69 as the buzzer sounded to end regulation time.

In the overtime it was all NDSU as the Bison added nine more points to win 76-69.

McLeod's offensive power led the Bison with 36 points followed by Neal Jacobson, 14; Wayne Leppe, 11; and Roger Erickson, 10.

It was definitely a team victory for the Homestowners as all players contributed with their hustle and desire.

The Bison grabbed 39 offensive rebounds which is the most since the days of Lil Abner's famed Dog Patch.

The .38 per cent shooting from the floor didn't break any records but this is bound to change. Once this does improve, they will certainly be tough.

The Bison received one bad blow in last week's game by losing the services of Ken Lehr indefinitely.

See you the Friday and Saturday after we return from Christmas vacation when we meet USD and Augustana.

By the way, Merry Christmas.

Expect more, get more, from L&M

There's actually more rich-flavor leaf in L&M's filtered cigarettes than in any unfiltered cigarettes. You get more body in the smoke while in the filter. So expect more, get more from L&M. And remember, L&M's modern filters are not pure white but are the color of your lips.

L&M's the filter cigarette for people who really like to smoke.
Dr. Norum to Deliver Sixth Faculty Lecture

Dr. E. B. Norum has been chosen as the 6th annual speaker in the Annual Faculty Lectureship Series at NDSU. Dr. Norum is professor and chairman of the department of soils. His lecture is one of a series begun six years ago at NDSU to recognize outstanding faculty members. The lecture will be Feb. 12, 1962, in the Memorial Union Ballroom at 8 p.m., and is open to faculty, students and the general public.

Speakers for the Faculty Lectureship Series are chosen from those outstanding faculty members at NDSU, and are chosen by a committee composed of other faculty members.

The present committee members are: chairman, Dr. Leo Herndon, associate professor of chemistry and acting dean; Dr. Muriel C. Vinton, associate professor of botany; Dr. Ray E. Dunbar, dean of the college of chemical technology; and Dr. W. C. Whitman, professor of agriculture and animal nutritionist in agriculture sciences; Professor A. Glenn Runn, professor of textiles and clothing, in home economics; Miss Emily P. Reynolds, associate professor of pharmacy; and Dr. P. L. Minnear, professor of chemistry and acting dean of the college of chemical technology.

Dr. Norum has been chairman of the soils department since 1938 and has been associated with NDSU since 1947. Prior to that he had been in farm management at the Green Giant Company, Luverne, Minn., since 1944. He was at Iowa State University, as a teaching assistant and research associate from 1941-1944. He was with the USDA Soil Conservation Service from 1946-1949, and was an assistant county agent for the University of Minnesota Agricultural Extension Service from 1938-1939.

He was born near Hallock, Minn., and attended high school there. He attended NDSU and the University of Minnesota, receiving his B. S. there in 1941. He attended Michigan State University, and earned his Ph.D. in soil fertility at Iowa State University in 1944.

Previous speakers for the Faculty Lectureship Series have been: Dr. David Ross Molt, associate professor of botany; Professor A. Glenn Hill, professor and chairman of mathematics; Dr. Gabriel W. Comita, formerly of the NDSU staff, and professor of zoology; Dr. William E. Dinusson, professor and chairman of the department of soils; Dr. Gabriel W. Comita, chairman of the department of soils; and Dr. W. C. Whitman, professor of botany.

The advent of the space age and the increased interest in biological research has increased the demand for veterinarians, according to Dr. W. T. S. Thorp, dean of the college of veterinary medicine at the University of Minnesota. Thorp spoke to the members of the NDSU Pre-Veterinary Club Dec. 2. He said that in past years the veterinarian was chiefly employed as a practicing doctor of animal medicine, but the trend is toward employment in research. Emphasis is being placed on the study of diseases of animals which are transmissible to man. The reason for this trend is that the veterinarian's knowledge of animal kingdom is not limited to one species. They receive extensive training in normal and abnormal body tissues and functions of many animals. This knowledge is a valuable tool in research projects in which the effect of a controlled environment on infectious diseases are studied.

Thorp also discussed the training requirements of Minnesota's veterinary college subjects which would be asset to the pre-veterinary medicine student. Thorp is the second dean a veterinary college to speak to the Pre-Vet Club members. In February, 1956, Glenn Holm, dean of the College of Veterinary Medicine, Oklahoma State University, spoke to them. Dean Holm was dean of agriculture at Oklahoma State from 1933 until 1939.

Salem refreshes your taste “air-softens” every puff

Take a puff...it's Springtime! With every Salem cigarette, a soft, refreshing taste is yours. Salem's special cigarette paper breathes in fresh air...to smoke fresh and flavorful every time. Smoke refreshed...smoke Salem!

Need for More Veterinarians Stressed by Minnesota Dean

The need for more veterinarians is being placed on the study of veterinary medicine at the University of Minnesota. Dr. W. T. S. Thorp, dean of the college of veterinary medicine at the University of Minnesota, spoke to the members of the NDSU Pre-Veterinary Club Dec. 2. He said that in past years the veterinarian was chiefly employed as a practicing doctor of animal medicine, but the trend is toward employment in research. Emphasis is being placed on the study of diseases of animals which are transmissible to man. The reason for this trend is that the veterinarian's knowledge of animal kingdom is not limited to one species. They receive extensive training in normal and abnormal body tissues and functions of many animals. This knowledge is a valuable tool in research projects in which the effect of a controlled environment on infectious diseases are studied.

Thorp also discussed the training requirements of Minnesota's veterinary college subjects which would be asset to the pre-veterinary medicine student. Thorp is the second dean a veterinary college to speak to the Pre-Vet Club members. In February, 1956, Glenn Holm, dean of the college of veterinary medicine, Oklahoma State University, spoke to them. Dean Holm was dean of agriculture at Oklahoma State from 1933 until 1939.
