500 Girls Invade NDSU Campus For FHA Meeting

More than 500 high school girls are on campus this weekend attending the North Dakota State Future Homemakers of America Convention.

These 500 FHA'ers, together with their advisors and chapter mothers, represent 4,175 members from 108 chapters throughout the state.

Yesterday the state officers and officers-elect were guests at a buffet supper given by the foods department of the College of Home Economics.

This morning Bernadette Schroeder, state president, from Mohall, N. D., called the 17th annual convention to order. "FHA — Stepping Stone to the Future" is the convention theme.

"Hatbox Wardrobe", an illustrated talk by Gale Britton, West Coast educational representative of the Vogue Pattern Service, is a Friday morning highlight. Miss Britton will display various articles for the teenage wardrobe.

The NDSU Concert Choir, under the direction of A. S. Hou-

kom, will also present a short concert Friday morning.

A student panel consisting of NDSU home economics students will discuss the question, "What does a student study in a home economics college course?" Panel members are: Diane Brokate, Carole Schultz, Marlette Anderson, and June Huether, a former state FHA vice-president. Dr. Josephine Bartow, chairman of home economics education, will summarize the panel.

Special awards including the state homemaker award, honorary membership award, honor roll chapter certificate and the

Phi Upsilon Omicron award, which is given to the outstanding FHA chapter, will be presented at the annual banquet, Friday evening at the Elks Club. Lois McKennett, national FHA reporter from Bowman, N. D., will speak on "FHA — What Does It Mean to Me?"

Other activities that will keep the girls busy include a tour of the home economics building and sorority houses. The North Dakota FHA'ers will also see a sneak preview of "Damn Yankees" on Saturday morning before the 17th state convention is adjourned.

AAS Leads

Spring Enrollment Reaches New High

The official total enrollment for spring quarter is 3,110 students according to Burton Brandrud, director of admissions.

This is a gain of more than 100 students over last year's enrollment at this time.

The College of Arts and Sciences has the largest number of students enrolled with 1,025 and the College of Engineering ranks second with 776. Other colleges rank as follows: Agriculture, 450; Chemical Technology, 113; Home Economics, 334 and Pharmacy, 305.

Enrollment in the Graduate

School is 288 advanced students. In addition there are 74 students enrolled in special courses at night.

Freshmen continue to top the list in total numbers with 871 students (613 men, 258 women). Sophomores total 632 (489 men, 143 women); juniors, 682 (543 men, 139 women); and seniors have 563 (452 men, 111 women). The 288 graduate students include 234 men and 54 women. Of the 74 special students, 40 are men and 34 women. The report also shows 548 married students attending NDSU.

Professor Elected To City Commission

John A. Oakey, chairman of the civil engineering department at North Dakota State University was elected as one of the city commissioners last Tuesday in the Fargo city election.

This is the first time Oakey has served on the city commission. He was high man in a seven-way race for two commission seats.

"I am very happy to receive the position as city commissioner," said Oakey. "However, I realize there are many headaches that will go with the job."

He said he would try to use his best professional ability and experience to solve any community problems.

Oakey ran high in 42 precincts and tied for the top in three others.

"THREE COINS IN A FOUNTAIN" was the theme for the fourth annual SUAB Bridal Show yesterday. Karen Sexus and Kirby Erickson were two of the 22 models in the show.

SDSU Geologist Will Speak For Annual Science Program

"Unraveling Earth History" will be the topic of the second annual visiting geological scientist at North Dakota State University Monday night, April 9.

Dr. Robert E. Stevenson, chairman and professor of geology at the State University of South Dakota, is this year's visitor and will speak at 7:30 in room 319 of Minard Hall on the NDSU campus.

The scientist's visit to NDSU is sponsored by the American Geological Institute through a grant from the National Science Foundation. He will be on campus Monday and Tuesday visiting with staff and advanced students in geology, zoology and botany.

Dr. Stevenson has specialized in layered rocks and fossils of the Dakotas, as well as the relationship of ancient life to ancient civilization, layered arrangement of rocks, the mode of deposits of sediments and the study of fossils.

Before joining the staff at South Dakota University, Dr. Stevenson was on the faculty at the University of Hawaii, State College of Washington and a field geologist for the Venezuela Atlantic Refinery Co. and the Washington State Division of Geology.

A native of Iowa, he received his B.S. at the University of

Hawaii, his M.S. at the State College of Washington and his Ph.D. at Lehigh.

The AGI Visiting Geological Scientist Program is designed to improve the understanding of and provide a broader perspective of the geological sciences on various campuses, according to Dr. Brophy, NDSU geologist.

Dr. Stevenson's schedule at NDSU includes conferences and a tour of the campus.

Bison Boundaries Survey

On Monday of next week Student Senate will take a survey concerning Bison Boundaries, NDSU's student handbook. Students will be requested to fill out questionnaires in selected classes, and the results will be far more accurate if all students will familiarize themselves with the booklet before Monday.

Hauser To Discuss Population Crisis

Dr. Philip M. Hauser of the University of Chicago, a world authority on population problems, will address the Fargo-Moorhead Open Forum at 8:15 pm, April 9, in Weld Hall at Moorhead State College.

Hauser, who is chairman of the sociology department and director of the Population Research and Training Center at the University of Chicago, will speak on "The World Population Explosion." He has warned that urgent steps are needed now to cope with America's runaway population crisis.

He estimates that the U. S. population will increase by five times within the next 100 years, which would mean a population of a billion people by the year 2050.

The Negro population, Hauser said, is increasing at a rate 60 per cent ahead of the white population and they are forced "into depressed ghetto living in the

midst of crime, poverty, broken homes and social disorganization."

Hauser said that many persons recognize America's population problem but that they believe "we must outbreed China and the Soviet Union."

"Competition in breeding between the free world and the Communist bloc," Hauser asserted, "would only help reduce us to the Communists' miserably low level of living, and it would probably invite rather than retard the expansion of communism."

Hauser's observations on population problems have resulted from extensive practical experience with the United States government and the United Nations, in addition to his academic career.

Hauser has served as assistant to the U. S. secretary of commerce and was director of program planning for the commerce department.

APRIL FOOL? The four inches of snow dropped March 31 must have been the weatherman's idea of an April Fool's joke.

Editorial

Success Of Sharivar Depends On Students

"What are you doing for Sharivar?" asks Sharon and Sharky. Sharon and Sharky, in case you have never met them, are the symbols of NDSU's all-campus open house — SHARIVAR.

I understand that Sharon and Sharky have been spending the winter in the basement of the ATO House but recently have made a few appearances on campus at Sharivar committee meetings and such. Their job, and our job, is the planning of the 1962 Sharivar which is scheduled for April 27-29.

The fourth annual Sharivar can be the biggest event of the school year because more students and faculty members work together on Sharivar than on any other event on campus.

The purpose of Sharivar as stated by the Sharivar central committee is:

- To acquaint the general public and, in particular, certain segments of the public, such as parents of NDSU students, alumni, prospective students, the radio-television-newspaper media and friends of the University with our campus activities.
- To combine several campus events into one weekend in order that the entire university may be presented to visitors attending a specific event.
- To give all NDSU students and faculty an opportunity to work cooperatively toward a common goal.
- To acquaint NDSU students and faculty with the entire campus and to involve them in an all-campus activity.
- To discover and develop new student leadership.

I firmly believe that the fulfillment of this purpose justifies the large amount of money and student and faculty time spent on planning Sharivar.

The Sharivar planning set-up is designed to involve a large number of students and faculty in Sharivar planning. Consequently there will be several requests for more Sharivar volunteers within the next three weeks so I join with Sharon and Sharky in saying, "if we are to fulfill the objectives of Sharivar, we need your help".

Different Aspects Stated On Future Of Fraternities

Students Need Group To Function

"Students need a group to function in and to find and identify themselves," said Dr. Lowell Walters, professor of animal husbandry at Oklahoma State University, in an interview last Thursday at NDSU.

According to Dr. Walters, who is also national vice president of Alpha Gamma Rho fraternity, administrative officials, particularly in the larger schools in the country, are realizing that fraternities are playing a large role in helping the individual student adjust to college life. These officials feel that a student who joins a fraternity functions much better and has a better chance of finding himself in a smaller group than he would if he were just one student in thousands.

These same officials also realize that there is a definite need for more fraternities in the light of increasing college enrollment.

In answering the question of how contract dormitories would effect the fraternity system, Dr. Walters felt that fraternities would have to adjust by pledging sophomores instead of freshmen as they now do. He felt that this would benefit fraternities in that they would have a longer look at prospective pledges and be better able to judge a pledge as far as scholastic ability and general character is concerned.

Dr. Walters felt that fratern-

ities have a definite role in colleges and universities. Dr. Walters said, "Students get only half of the value that a college can give if they don't belong to some group." He said, "People who speak loudest about the evils of fraternities usually have never been a member or closely associated with a fraternity."

Dr. Walters was at NDSU last Thursday on an annual inspection trip of Epsilon chapter. In his capacity as national vice president, Dr. Walters visits some 44 colleges and universities throughout the United States.

Future Looks Dim

Trends in higher education indicate that the fraternity system will be a thing of the past unless some changes are made, D. W. Halliday, University of Arkansas dean of students, told Alpha Gamma Rho representatives during the midwest province training school held at Fayetteville, Ark., last week.

Dean Halliday said it looks like there will be a decrease in the membership of fraternities.

Here are some of the reasons he gave:

- There is going to be an increasing demand on the parts of more people for a college education.

REMEMBER GIRLS, no matter what happens, we still will have the satisfaction of knowing we scared them to death.

Mayor Defines Purpose Of Married Students Association

In the past, the married student on this campus has been an independent in the strictest sense of the word. He had no means of expressing his wants, needs, or contributions except on an individual basis and, as many married students learned, this is not ideal nor does it bring many results. This fact instigated the organization of an NDSU married student government.

The idea has grown rapidly.

The first meeting was held with only a half day's notice and over 60 married students attended. From this group a ten man committee was chosen to draw up a form of government and draft a constitution. After this was completed and accepted, the government became a reality. A commission form of government was adopted. The housing areas were divided into six wards.

Two councilmen were elected from each ward and the mayor was elected at large.

Ward 1 — Darwin Lee and Arvin Hagen.

Ward 2 — Arnold Zimmerman and Rey Benusa.

Ward 3 — Howard Metelmann and Dave Larson.

Ward 4 — Tom Sparby and Jerry Ernst.

Ward 5 — Larry Braund and Paul Fuson.

Ward 6 — John Lundquist and Don Lynch.

This council holds all policy making powers and the right to organize such activities or provide such functions that shall

be of benefit to married students and their families.

Dr. John Bond, chairman of political science, and Col. Marion Richardson, chairman of industrial engineering, have proved to be very capable advisors and have been a great deal of help in the process of organizing. Also, we have been offered the services of a local attorney who is presently studying our constitution.

The purpose of the Married Student Association is: 1) to organize social activities, 2) to provide valuable experience in local government, 3) to put forth a UNITED effort to secure better cooperation between maintenance and the housing areas, 4) to encourage, as well as aid, married students in playing a more active role in campus affairs.

It is the sincere desire of the Married Student Association to be of service to this institution as well as serving its own wants and needs.

David Hoff
Married Student Mayor

Special Election Scheduled For May

A special campus-wide election will be held on Monday, May 7, for the purpose of amending the Constitution of the Student Body. Balloting will take place in the main lounge of the Student Union between the hours of 8 a.m. and 6 p.m. The election will be under the supervision of the Commission of Campus Affairs.

All students are urged to vote, since the total vote cast must not be less than twenty-five per cent of the active members of the student body. The proposed amendments will appear in a later issue of the Spectrum.

Harold Korb
Commissioner of Campus Affairs

Senior Staff Seeks Frosh For Honorary

Senior Staff will sponsor a Sophomore Women's Service Honorary at NDSU. The purpose of this group will be to promote school spirit, support activities in which the student body participates, to foster a spirit of loyalty and helpfulness among the women of the university, to work with the Dean of Women to promote a program for women on campus and to uphold the traditions of the university.

Suggested members should be third term freshman this spring so their classification will be sophomore in the fall of 1962. Other qualifications include an interest and participation in

university activities, dependability, sense of honor, sense of democracy, willingness to accept responsibility and scholarship rating at least an accumulative 2.50.

Members of Senior Staff do not know all third term freshmen who meet these qualifications. Therefore, they invite any student who wishes to suggest girls who meet the above qualifications to place her name in a suggestion box which will be in the first floor lobby of the Student Union Friday, April 6 from 10 a.m. to 4 p.m. and Monday, April 9 from 9 a.m. to 12 noon. The name may be turned in only on the following form.

NEW SOPHOMORE ORGANIZATION

I suggest _____ for membership in the new Sophomore Women's Service Honorary.

Veteran's Club Presents Award To Mayo Flegel

The NDSU Veteran's Club "Outstanding Veteran of the Year" award was presented this year to Mayo Flegel. Flegel graduated last quarter and is currently working as an industrial engineer at the Green Giant Company, LeSueur, Minn.

The award is made annually to a Veteran's Club member who has shown leadership ability and has made contributions to the Veteran's Club, the campus and community.

THE SPECTRUM

The Spectrum is published every Friday at Fargo, North Dakota by the NDSU Board of Publications, State University Station, Fargo, N. D.

SOCIAL NOTES

By NANCY TOMAN

Popcorn, peanuts, and crack-jacks. No, I'm not talking about a baseball game. These are also hints of a circus, and what could be more exciting than a circus? The Beaux Arts Ball, of course! It will be held tomorrow night under the big top of Fraser Armory. Gals, this is your big chance if you haven't got a guy, dress your roommate in a clown costume and escort her to the gala party. No one will ever know the difference. Your only problem is keeping her quiet.

All clowning aside, Monday night found the AGD's, AGR's in a dinner exchange. The Phi Mu's and TKE's also exchanged dinners.

Monday night the Kappas held their annual Scholarship Recognition Banquet at the Colonial Room of the Gardner Hotel. Awards went to Bonnie Nordling, most outstanding senior, and Nancy Flatt, most outstanding junior. Joan Green received recognition as the pledge with the highest average.

The Phi Mu house was the scene of excitement on Monday night when Kathy Kruetz blew out the candle announcing her engagement to Tony England, an MIT man. Engaged at the

KKG house is Diane Henderson, Danny Louckes, an AES at Concordia College, is her "fancy".

The Thetas were serenaded by the ATO's on Monday night, and Karen Weber received a dozen roses for her recent pinning to Niel Henn.

Hmmm. Seems like those wedding bells that were ringing at the SUAB Bridal Show yesterday are catching up with a few campus coeds.

With scumming and initiations in the past, new pledges seem to be the word of the day. The Sigma Chi's have added Bill Spencer, Kurt Ericksmon and Tom Bohnet to their group.

Five new pledges at the SAE house are Rodney Stockstad, Dave Swanson, Dave Lee, Bob Hegstrom, and Sid Morrison.

Four new faces at the Kappa Psi house for the coming weeks will be their new Sweetheart candidates: Sonja Nelson and Karen Monson, Thetas, and Liz Bartley and Sara Avery, KKG's.

Latest events of the week — the SAE's and Kappas will be sporting their sunshine clothes at a beach party tonight. The Gamma Phi's seem to know the best way to a man's heart is through his stomach, as they will be hosting their dates to an Italian Spaghetti party tomorrow night.

Don't forget the Beaux Arts, and keep your eyes open for a masculine costume with a feminine voice!

Dean Thompson has announced that scholarships for women have been awarded by downtown committees. There were not enough scholarships to take care of all the women who applied. However, financial assistance for persons needing it can be arranged through loan funds.

Dean Thompson has requested that all women students who need financial aid should see her about negotiating a loan fund from one of the organizations in the state. These organizations have set up programs with very modest interest rates for students.

Past President Receives NSF Fellowship

Wayne Hamann, ME sr, has been named the recipient of a fellowship given by the National Science Foundation. Hamann will do graduate work on his master's degree in mechanical engineering at Massachusetts Institute of Technology.

Hamann's award consists of \$1,800, payment of all fees, tuition, and travel expenses to the institution.

The NSF award is based on academic records, faculty recommendations, scores achieved in graduate record examinations and scientific ability.

Hamann, past president of the NDSU student body, is a member of the Theta Chi fraternity.

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

CRAM COURSE NO. 2: BIOLOGY

The grisly shadow of final exams looms over us, so today in this column instead of merry quips and homely saws, you will find hard facts—quick cram courses to help you through the ordeal ahead.

Last week I gave you a rapid survey of Modern European History. Now let us turn to Biology.

Biology is divided into several phyla, or classes. First is the protozoa, or one-celled animal. All life stems from the one-celled animal. Over a space of millions of years, life slowly evolved until today we have animals with as many as 12 cells. Some larger mammals claim they have 14 to 16 cells, but you know how larger mammals lie.

The second class of animals is the periphera—a shadowy category that borders often on the vegetable. Take, for example, the sponge. The sponge is definitely an animal. The washcloth, on the other hand, is definitely not.

Next we come to the arthropoda, or insects. Most people, of course, find insects fairly repulsive—and yet, if one will but look, there is exquisite beauty in the insect world. Who does not remember the lovely insect poems of William Cullen Sigafos—such enchanting lyrics as *Tumbling Along with the Tumbling Tumblebug*, *Fly Gently, Sweet Aphid*, and *Gnats My Mother Taught Me*. Mr. Sigafos has been inactive since the invention of DDT.

Our next category is the mollusca—lobsters, shrimp, and the like. Lobsters are generally found under rocky projections on the ocean bottom. Shrimp are generally found in a circle around a small bowl containing cocktail sauce. Marlboro Cigarettes are generally found at any tobacco counter or vending machine.

What have Marlboro Cigarettes got to do with biology? Well, actually, not very much. It must be remembered, however, that the makers of Marlboro pay me for writing this column, and they are inclined to get surly if I fail to mention their product.

Mind you, I enjoy singing the praises of Marlboro—and so will you once you try that flavorful tobacco, that fine filter which lets the flavor come through undiminished. It is a great pleasure to smoke Marlboros and a great pleasure to write about them, but sometimes, I must confess, I find it a bit difficult to work the commercial into the column. Some years ago, for example, I did a piece about Alexander the Great, and, believe you me, it took a heap of stretching to drop in a plug for Marlboro. The way I finally managed it was to have Alexander go to the Oracle at Delphi and say, "Oracle, I have conquered the world and tasted all its pleasures, but somehow I am not content. I know that somewhere there must be a joy I have not yet experienced." To which the Oracle replied,

There is no great difficulty distinguishing the two

"Yes, Alexander, there is such a joy, but, alas, the time is not yet. I refer to Marlboro Cigarettes which will not be invented for another 2500 years." Whereupon Alexander fell into a sulk from which he never recovered. . . . Well sir, there is no question I sold a lot of cigarettes with this ingenious commercial, but the gang down at the American Academy of Arts and Letters gave me a mighty good razzing, you may be sure.

But I digress. Back to biology, and the most advanced phylum of all—the chordata, or vertebrates. There are two kinds of vertebrates—those whose backbones run horizontally and those whose backbones run vertically. Generally, there is no great difficulty in distinguishing the two varieties. A fish, for instance, has a horizontal backbone, and a man has a vertical backbone. Occasionally, however, you run into a problem—like a fish who swims upright and a man who spends most of his time in the sack. How, in such a case, do you tell one from another? Science struggled with this sticky question for centuries, but finally Sigafos of M.I.T. came up with a brilliantly simple answer. Offer the creature a Marlboro. If it is a fish, it will refuse. If it is Homo sapiens, it will accept. In fact, the more sapient, the quicker the acceptance.

© 1962 Max Shulman

The makers of Marlboro, upright vertebrates all, remind you that their fine cigarettes are available in pack or box wherever cigarettes are sold in any of the 50 states.

Study Area In HE College Will Soon Be A Reality

A study-browsing area with reference books and other reading material will soon be a reality in the home economics building as the result of a gift in appreciation for outstanding work done by a 1960 graduate of NDSU, Miss Donna Holcomb.

Miss Holcomb is home service adviser for the Ohio Fuel Gas Company, Parma, Ohio, and in recognition of her work a gift of \$300 was given to the University to be used in the home economics department.

Following recommendations by a faculty committee, the final decision was made by Dr. Caroline Budewig, dean of home economics, and President Herbert Albrecht. The gift will be used to purchase reference and reading material to further cultural and professional development of students in home economics and would be called

the Donna Holcomb-Ohio Fuel Gas Collection.

The initial step toward a study area was begun earlier this year as a professional project by Phi Upsilon Omicron, professional home economics fraternity, in which classrooms were designated as available for study and relaxation. The Donna Holcomb Collection will serve as a nucleus for the study area and will consist of a selection recommended by students and faculty with Mrs. Marian Walker, assistant professor of home management, as chairman.

Miss Holcomb, formerly of Minot, has received numerous awards. As Miss Betty Newton, as she is known professionally, she received awards twice for being top demonstrator in her district. Her work consists of

demonstrations before club and organizations as well as home calls on the use of gas in all types of appliances.

At NDSU Miss Holcomb was active in Tryota and Phi Upsilon Omicron, Student Senate, LSA, Independent Students Association, Kappa Delta Phi and Sharivar. As a freshman she won the Elk's Leadership Award.

Members Named To Student Union Activities Board

Twelve new members have been named to the Student Union Activities Board. They are: Fred Palmer, Kay Oveson, Carol Hanson, Mervin Nordeng, Candy Clement, Christie Powers, Virginia Nelson, Karen Nordstrom, Lynn Marr, Jim Weisser, Linda Trautman and Joan Brandt.

Committee chairmen recently elected include Mary Hinz, personnel; Stuart Bond, house and hospitality; and Dave Pollock, publicity.

Phil Wattles was appointed to head creative arts. Tom Olness and Frank Lantz were named chairmen of games and recreation, and dance and decorations, respectively.

Classified Ads

Needed: model for drawing class 2-4 Monday, Wednesday and 10-12 Friday. Not necessarily female. Start Monday, April 9 to May 4. Contact Ralph Peotter, Home Economics Building.

Staff members, see your credit union for loans. Hours are from 1-5 p.m. Monday's, Wednesday's and Thursday's. Phone 216.

For sale or rent. 1955 trailer home. 35 x 8 at J2 Stadium Court. Spring graduate. Reasonable. Call AD 5-2456.

"BIG TOP" under construction! All hands in the architectural department are busy creating an atmosphere for you, if you are coming to the Beaux Arts costume ball, Saturday, April 7 in the Fraser Armory.

WISCONSIN FFA MEMBERS VISIT NDSU. Three members of the University of Wisconsin Collegiate FFA Chapter visited the campus March 29-31.

Pictured from right are Dean Peterson, Russell Bernstein and Bob Ruef of Wisconsin and Blake Peterson and David Hoff of NDSU.

Wisconsin FFA Members Visit SU Through Exchange Program

Three members of the University of Wisconsin Collegiate FFA Chapter visited the NDSU campus March 29-31.

Dean Peterson, Ag soph, Russell Bernstein, Ag sr, and Bob Ruef, Ag, soph, visited the

NDSU campus through an exchange program set up between the two universities.

The three Wisconsinites stated that they were amazed at the size and topography of the NDSU campus. The University of

Wisconsin is located on a hill overlooking a lake and has an enrollment of about 20,000.

The University, located at Madison, is a land grant and state supported co-educational institution as is NDSU. It was chartered in 1848 and opened in 1849.

Tours of the NDSU campus and experiment station were arranged which included a visit to the livestock and poultry farms and the animal research center.

Friday afternoon they visited the Kindred High School vocational agriculture department.

The Wisconsinites were introduced to Arlon G. Hazen, dean of agriculture, and other professors and instructors on campus.

Friday evening a luncheon was held in the Memorial Student Union. Following the meal a film entitled "The Durum Story" was shown.

Rooms and meals were furnished by the NDSU Collegiate FFA Chapter.

The NDSU chapter plans to send three students to Wisconsin sometime in April or May.

Are Today's Women Superior to Men?

Is there such a thing as female superiority? This question was the topic discussed by Dr. William Hawkinson, chairman of child development and family relations who spoke to the NDSU 4-H Club in Morrill Hall on March 29.

He based his lecture on questions asked 61 NDSU male students concerning female superiority.

Dr. Hawkinson's discussion covered such statements as: "History is studied with accomplishments by females," "Women live longer than men," "Women are less physically awkward than men," and "although women have more emotional problems, men have more ulcers."

He elaborated on these statements pointing out that men

have made more accomplishments in history because accomplishments are products of opportunities and throughout history men have had more opportunities than women.

In reference to the other questions he said that women do live longer than men, physical awkwardness is determined by the situation, and men have ulcers because they don't express their feelings.

Dr. Hawkinson said that the purpose of this survey was to create an understanding of why these statements were true or false and not just to see if a student could answer them in a yes or no manner.

Dr. Hawkinson, a graduate of Ohio State University, is also an instructor in sociology in the School of Arts and Sciences.

Christian Formula Discussed At Seminar

Is there a formula for Christian living? Dr. J. Frank Cassel, chairman of the Zoology department, moderating the first of a quarter long series of Christian Witness Seminars, stated that a stereotype formula cannot be given, but ideas may be gained that will help us make our own formula. The seminar was held in room 236 of the library, at 12:20 p.m., March 28, with 20 students attending.

Cassel stated that the purpose of the seminar, through student discussion, exchange and interchange of ideas, is to have the students discuss, evaluate, and apply the principles of Christian living.

Although there will be many questions that cannot be answered, Cassel said he hoped that the seminar will give the students ideas on how to work out a problem solving approach concerning Christian living.

Is something true because it's in the Bible or is it in the Bible because it's true?

After some discussion it was

SU Rodeo Club To Hold Annual Bison Stampede

The annual Bison Stampede, annual intercollegiate rodeo, is scheduled to be held at the Fargo Fairgrounds May 12-13, said Arlin Holtan, president of the NDSU Rodeo Club.

The two day performance will be run in accordance with the National Intercollegiate Rodeo Association rules and will feature major rodeo events such as saddle bronc, bareback and brahman bull riding.

Arlin Holtan and Howard Leland were chosen at the last meeting of the Rodeo Club to represent NDSU at the Great Plains Regional meeting in Spearfish, S. D., March 31. John Johnson, faculty advisor accompanied them.

agreed that, although the Bible, when it was written, was directed toward a certain people under certain conditions at a certain time, the Bible is relevant to us. It was also stated that studying the Bible, listening to God speak, has a spiritual meaning and significance that is applicable to us as students.

The seminar group also concluded that, as students, we must study with the purpose in mind to learn of God, Christ, the Holy Spirit, others, ourselves and the interrelationship that we all must have in our life. Various study methods mentioned were topical Bible study, book study, and the verse by verse method.

WIN IN THE COLLEGE BRAND ROUND-UP

PRIZES:
1st Prize - 1 Stereophonic, 4-speed, Hi-fidelity Console Phonograph.
2nd Prize - 1 Motorola Table Radio.

WHO WINS:
1st. Prize will be awarded to any group, fraternity, sorority or individual accumulating the highest number of points.
2nd Prize will be awarded to any group, fraternity, sorority or individual accumulating the second highest number of points.

RULES:
1. Contest open to all students, instructors, or anyone working on campus.
2. Each empty package submitted on Marlboro, Parliament or Alpine will have a value of 5 points. Each empty package submitted on Phillip Morris regular or Commander will have a value of 10 points.
3. Closing date will be Friday, April 13, at 5:00 p.m. Empty packages must be turned in at the Varsity Mart no later than 5:00 p.m. April 13 to be eligible for acceptance.
4. Entries will not be accepted after closing time. Empty packages must be submitted in bundles of 50. Separate your 5 and 10 point packages.

"Teachers Should Be Free From Trivial Jobs", States Willman

"No nation can expect to remain ignorant and remain free," said Clyde Willman, principle of Fargo High School, at the Y-Noon-Luncheon Thursday.

Willman, who spoke on "New Roles in Education", said teachers must be freed from the trivial jobs to spend more time on the courses they teach in their field. He gave as examples such time consuming activities as doing their own clerical work, teaching outdated dubious courses, and advising extra-curricular activities.

Shortage of teachers is becoming more apparent every day, the greatest loss resulting from women who give up their careers for marriage.

Thirty per cent of all bachelor of arts degrees are earned by women. For the next ten years 200,000 teachers are going to be needed every year. Fifty professionals, guidance people, instructors, and admin-

istrators are recommended per 100 students.

Willman listed many new factors in our educational system. Grammar tests will be given at the end of the ninth grade. If the student passes, grammar will be eliminated from his curriculum until just before secondary graduation. There will be no grades at all during the first four years of primary school. The children will progress at their own speed and ability.

Science and mathematics will be stressed until students are more interested. Every language spoken in the world will be taught somewhere in the United States. Elementary teachers, now expected to be an authority on every subject, will only have to be proficient in their area. Grades will be given on ability basis.

More schools will have students rotating during the day

to accommodate growing school age population. Television, supplemented with a teacher in the classroom, will play a new role.

Willman said the true test of education is in preparing children for a well-rounded life. They should know where they are going, what they are doing, and how to go about it.

Solberg Elected Sorority Prexy

Carol Solberg is the new president of Alpha Gamma Delta. Other officers are Janice Dunlop, first vice president; Marlys Melhouse, second vice president; Karen Nordstrom, recording secretary; Jean Thompson, corresponding secretary; Judy Highness, social

chairman; Mary Nelson, treasurer; Janice Hanson, panhellenic delegate and Sherry Quinnild, house president.

IFC

Glenn McCrory, Ag jr, is the newly elected president of the Inter-Fraternity Council.

Other officers are Phillip Wattles, vice president; Gary King, recording secretary and Russell Anderson, treasurer.

AN INSIDE VIEW of Burgum Hall, the new girls' dormitory, shows it is nearing completion.

Newmanites Discuss Rules Of Order

Parliamentary procedure according to Robert's Rules of Order was the topic discussed by Eugene Kruger, a Fargo lawyer an authority on Robert's Rules of Order, when he spoke to the Newman club members at the meeting, March 27. The group was interested in learning the proper way to conduct their weekly meetings. Kruger said that Robert's

Rules are 75 years old, but with few revisions are still the most widely used system today. He referred to the book of rules as the "lawyer's bible".

The speaker told the group that being well informed on these rules has worthwhile advantages because at a large meeting, for example — a stockholders meeting, the majority of people don't know the procedure and by knowing the proper way, one can get the floor and get his point across.

Kruger explained fillibusters, questions, points of order, different types of motions and many other fine points.

For the remainder of the meeting, the group was kept alert putting into practice the principles they had learned.

The business of the meeting included plans for initiation of new members, games and bowling party, and entertainment after Sunday dinner.

President Tony Berger called for nominations for new officers. Elections will take place in two weeks.

College Queens choose Artcarved

What makes a girl a College Queen? Beauty and brains. What does she look for in a diamond engagement ring? Beauty and value. Smart girls!

These 1961 College Queens, twelve of them from all over the country, found the designs that flatter their hands (and warm their hearts) among Artcarved's award-winning styles. They found value, too. Every Artcarved diamond ring carries a written guarantee of quality and value that is recognized by fine jewelers from coast-to-coast.

You'll find the extra measure of beauty and value that you want in a diamond ring at your Artcarved jeweler, listed below. Ask him to show you the designs chosen by America's College Queens.

"Damn Yankees" Underway

Broadway Show Sponsored By Blue Key

Preparation for "Damn Yankees", to be presented on April 26-28, by Blue Key, are starting to go into their final stages.

Blue Key, sponsor of South Pacific last year, is putting on another Broadway show this spring.

This year Blue Key is sponsoring "Damn Yankees" written by Richard Adler and Jerry Ross from the book, "The Year The Yankees Lost The Pennant," by Douglas Wallop. It is a baseball story set to music. It contains such familiar songs as "You Gotta' Have Heart", and "Whatever Lola Wants". It has also been made into a motion picture.

The Director of "Damn Yankees" is Bryan Gackle and Marilyn Nass is choreographer. They are both faculty members who are largely responsible for putting the show together. There are about 40 students in the cast and many more working behind the scenes.

"YOU CAN'T LOSE," says the devil (Tom Joyal) as he tries to tempt Joe Hardy (Bruce Anderson) a baseball player in "Damn Yankees" to go with Lola the devil's assistant played by Judy VanVlissingen.

"LET'S DO THE RUMBA." One of the dances performed in the production "Damn Yankees" is being perfected by the dance group.

"I WONDER IF THEY WILL EVER LEARN," thinks Kirby Eridson as he watches the actors in "Damn Yankees" rehearse. Kirby is stage director for the Blue Key production.

Cast For "Damn Yankees"

BRYAN GACKLE ----- Director
DWAYNE KING, -- Student Director

Sharivar Plans Near End

Colleges Disclose Sharivar Plans

LET'S GO MEN! Publicity is needed for the 1962 Sharivar. These men are hoping to have their sign finished in time to erect it on the mall on University Drive this weekend.

Time, money and ingenuity are all part of Sharivar planning. Students and faculty from each college work together to plan educational and novel displays which represent the activities of their college.

The College of Home Economics chose "Portrait of Progress" as their Sharivar theme according to Toni Woodmansee and Janice Dunlop, co-chairmen.

A style show including garments made in classes dating back to the first years of the home economics department will depict progress in clothing. These garments will be modeled by their owners or by NDSU students. Pantaloon, made by the first North Dakota high school instructor from NDSU,

will be displayed.

The department of foods and nutrition has collected cookbooks, the oldest being 72 years old. While cookbooks will represent the old, aluminum yarn fabric, to be exhibited by the clothing and textile department will depict the new.

The Alba Bales Home Management House will be open for the first time during Sharivar according to Mrs. Marion Walker, assistant professor of home management. This is your opportunity to see where and how home economics education students receive six weeks of their training.

If you don't know what a one-sided surface is, Don Dell, chairman of the Sharivar math department committee, recommends that you visit the math department. Several one-sided surfaces will be on display for the public to experiment with during Sharivar open house.

Anybody can be a bowler providing they are playing on the "idiot's bowling alley." It insures a strike every time if you just know a few mathematical secrets. The mathematics students will pit their knowledge of probabilities against the luck of the Sharivar visitors. Visitors will also have a chance to test their skill.

A "microscopic" zoo including many minute animals taken from lakes and ditches will be displayed by zoologists. A crayfish will lose the sense of equilibrium in the presence of a magnet after eating iron filings. Visitors will get a look at the inside of things as they see living chicken eggs showing the stages of development of the embryo and as they view shark and cat dissections.

Cochairmen Carol Solberg and Russ Maring promise many more demonstrations and displays of the "Liberation of the Mind" as portrayed by the College of Applied Arts and Science.

During quarter-break 59 NDSU students visited 134 high schools throughout the state. The reports indicated that many students were interested in coming to NDSU next fall and plan to visit Sharivar this spring.

NDSU students are urged to visit their high school if it was not among the 134 schools visited during quarter break.

AAS Features Teaching Machine

Teaching machines will be on display during Sharivar by the education department. Education students will demonstrate how learning can take place through the use of "teaching machines". The wonder of the teaching machines will be on display in room 320 of Minard Hall.

A film "Aim for Excellence" will also be shown during Sharivar in the same room. The ten-minute color film portrays some important trends in teacher preparation and punctures some myths about the profession.

Students studying guidance and counseling will be on hand to show how the guidance and counseling laboratory operates. The counseling practice room with a one-way mirror will be one of the special interests.

"WHAT SHARIVAR PLANS ARE LEFT?" asks Sharky. Shar-on and Sharky are the two Sharivar symbols that appear on all Sharivar plans.

LAST MINUTE TOUCH-UPS are done on Dennis the Menace posters for the child development laboratory by Pat Hipsher and Jackie Olson. The posters will be used to guide spectators to the nursery school during Sharivar.

"AM I GLAD THIS IS OVER," says Betty Jane Dressler as she winds the last tape for the Sharivar publicity committee. Betty Jane was in charge of radio and TV publicity for Sharivar.

Architectural Graduate Wins First In Design Competition

"IT'S WORK, BUT IT'S FUN," says Arlene Weiss as she checks the distillation apparatus for her project concerning the Kjeldahl determination of nitrogen in the chemistry lab. Arlene is planning to study abroad next year.

SU Student Plans To Study Abroad

"All I know is that I am going and I don't know where," said Arlene Weiss, Chem soph, after receiving a telegram from the United Presbyterian Church telling her she would be spending her junior year abroad.

Arlene will study abroad next year under the Junior Year Abroad Program sponsored by the Presbyterian Church. She is the first person chosen for this program from NDSU and will be going to Lebanon, Pakistan or Nigeria. It is open to any students participating in the work of the United Campus Christian Fellowship.

"My biggest encouragement came from Rev. Robert Siberry, director of the United Campus Christian Fellowship," said Arlene. It was he who first brought the program to her attention.

"An applicant who is accepted for this program must be deeply committed to the Christian faith and must have a sincere interest in promoting international Christian fellowship. Applicants must have a Christian concern for the world and a desire to learn from the people of other lands. A "B"

average or above is required in academic standing," Siberry said.

Twenty-three schools representing 11 countries are cooperating with this program which has now completed its seventh year. In the current academic year there are 47 students studying under the program in Asia, Africa, the Near East, Europe and Central America.

Anupam Banerjee, Arch grad, from Calcutta, India, recently received word that his theater design won first prize in the India Students' Design Competition. He worked on the design while attending the University of Calcutta.

The design has been selected as an exhibit in a theater architecture exhibition being held in New Delhi.

Banerjee, the group leader, worked on the project with two other Indian students. They won a total of 1500 rupies which is equivalent to 1050 American dollars. The prize was split three ways.

"I planned to use the money to pay for my passage expenses home," said Anu, as he is better known to his friends "But. I can't get the money due to the foreign exchange."

Banerjee's design is called "National Theatre, West Bengal."

It seats approximately one thousand people and has parking area for cars beneath an open plaza.

A grand staircase leads spectators up through the open plaza, past a row of seven sta-

tues representing the seven pioneers of the Bengoli stage, to the auditorium.

"The design is Indian in spirit. The high plaza, sculpture shed, decorative panel, slightly inclined western facade — reminds us of the composition of South Indian temples to some extent. These qualities of the temple architecture — the classical mass, solidarity of structure and profusion of details are found here," stated the JOURNAL OF ARCHITECTURE, STRUCTURE AND TOWN PLANNING.

Banerjee has won several other prizes in various contests in the United States and India with his paintings and sculptured objects.

He plans to return to India after completing his graduate studies.

Tennis Team Works Out Indoors

THE BISON TENNIS TEAM has had to confine their workouts to the NDSU fieldhouse until the courts are playable. Here coach Erv Kaiser talks over some problems with his team during a lull in a practice session.

Intramural Mutterings

By JOE SCHNEIDER

Where can intramural teams play softball was the question raised at last Monday's meeting as the campus organization representatives were discussing spring sports.

In the past four years the intramural teams have had to travel to Mikkelson Field, a distance of over a mile, to play softball.

The point was raised that the field north of the stadium is supposed to be used for this sport, however it hasn't been done in the past because their are no backstops.

Erv Kaiser, intramural advisor, raised this question to the board, "Is there any reason why we have to travel down to a city owned field when we could play on that land?" He suggested that the Board, through the Student Senate, propose that the college erect backstops for softball diamonds.

In the past, this field was used as a pasture for grazing cattle, but it was later seeded for grass, then turned over to the intramural department for their sports activities.

The Intramural Board decided to send a delegation of their three officers to Student Senate to bring up this issue before them and to acquaint them with their problems.

Kaiser announced that the field house will be open from 2 p.m. to 6 p.m. today which

will enable students to participate in basketball, volleyball, and other sports.

"It is an experiment to see how badly the student body wants to use the gym. If there is a large enough demand for the use of it; we will keep it open from now on," stated Kaiser.

Rosters for team sports were handed out to all representatives at the meeting. They must be turned in by next Monday with the \$3 entry fee.

It was announced by Kaiser that the Edgewood Golf Course will open on April 15, thus enabling the organizations to organize intramural golf teams to start playing on this date.

The board discussed the possibility of having a change of policy concerning the golf set-up. Some members felt that the games lasted too long, so they suggested that nine holes of golf constitute a match instead of the usual eighteen holes. No action was taken on this proposal because some definite plan will have to be set up soon to offset the loss of interest in golf. Last year only one team finished the schedule setup. Thus, the trophy which was to have been given out for first place is still unclaimed. It was decided that the board would have to outline some plan in the near future to promote more interest in this intramural sport if it is to continue.

Phy. Ed. Club To Host Open House Activity

An open house co-recreational event will be sponsored by the Physical Education Club at the Physical Education Building on Friday, April 6, from 2 p.m. to 6 p.m.

The event was announced by Miss Beulah Gregoire, associate professor of physical education at North Dakota State University, at a women's physical education meeting, March 29.

The co-recreational event is open to all students and faculty members on the campus. There will be enough activities to take care of about 150 people at once. Featured will be almost every kind of indoor game.

There will be no specific sport attire required for the event.

Shooters Win Sectional Match

Members of the Women's Recreation Association were represented in two contests March 31. The National Rifle Association 91st Sectional Match was held at the NDSU field house with two teams from NDSU taking first and second place.

The first place team was Carren Steffel, 250; Sharon Sylvester, 236; Cheryl Palmer, 236 and Carroldine Kautz, 230 which gave them a 925 point total.

Winning second place were Linda Nass, Marjeanne Tehven, Violet Anderson and Judy Leis with a total of 892 points.

Prizes in the Merchants Match were won by Sharon Sylvester, Cheryl Palmer and Linda Nass.

WRA's basketball team received officiating ratings at Moorhead State College the same day. NDSU won three out of four games from Bemidji State College, Moorhead State

College and the University of North Dakota. Concordia outscoored the NDSU team in the final rounds.

Team members are Marsha Bergman, Collette Buhr, Roberta Quick, Marilyn Ostrem, Barbara Limke, Roberta Oksendahl, Judy Kraft, Jane Eggert and Sharon Smylie.

Baseball Notice

Freshman baseball is now underway. Interested parties who will still desire to participate are asked to contact coach Ross Fortier as soon as possible.

Dinwoodie Scholarships Award

MRS. JOHN T. E. DINWOODIE discusses NDSU athletic history with the winners of the Dinwoodie Memorial Scholarships. At the left is Bob Yaggie, and Roger Erickson is at the right.

Two NDSU athletes have been given scholarships in memory of Dr. John T. E. Dinwoodie, a long-time friend of athletics at NDSU who died in 1957.

The scholarships went to Bob Yaggie, Ag sr, a member of the Bison football squad, who was the "most valuable" on the 1961 squad, and Roger Erickson, Arch sr, who has competed in football, basketball and baseball for NDSU.

The scholarships are from memorials given following the death of Dr. Dinwoodie.

Dr. Dinwoodie was North Dakota director of the Agricultural Adjustment Act from 1932-41 with offices on the

NDSU campus. He was on the Athletic Board of Control during the 30's and was a life-long backer of NDSU athletics.

He was a 1911 graduate of NDSU and completed studies as a doctor of veterinary medicine in Pennsylvania in 1913.

After Dr. Dinwoodie left Fargo in 1941 he was executive assistant in the U. S. Department of Agriculture at Fort Collins, Colo., until 1947 when he went into the veterinary service division of the Bureau of Animal Industry stationed at Garden City, Kan., Devils Lake, N. D., and Billings, Mont.

Mrs. Dinwoodie lives at 1117 13th Avenue North, in Fargo.

SPORTS SPOTLIGHT

By DENNIS KALDOR BASEBALL

Coach Ross Fortier and his Bison baseball crew left last Monday for their first games of the season with a tour through Colorado. On this initial road trip

stops are to be made at Colorado State College, Greeley, and Colorado State University, Fort Collins, prior to a two game contest with the USAF Academy today and tomorrow.

The Bison have been definitely hampered due to the fact that they have been unable to get in any outside practice yet this spring. All practice has been confined to the field house, but Fortier had hopes of getting in a practice session along the route to Colorado, possibly at Pierre, S. D.

The Bison's first scheduled home game is slated against Moorhead State College on May 2.

TRACK

Bud Blakely has high hopes for the track team this coming week and hopes to avenge an earlier defeat at the hands of UND. Next Wednesday is the date set for a dual meet with our friends to the north, and the team is reported to be ready for the onslaught.

The contest will be a joint meet of both the varsity and freshman squads and Blakely reports that both he and the squads are eagerly looking forward to another meet with UND.

Following Wednesday's contest with UND, the Bison runners will compete in the Inter-City Indoor meet with teams from the local colleges. The Bison freshmen and varsity will match their talents against runners from Concordia and Moorhead State College.

Unlike UND, Blakely has had no indication as to how strong either Concordia or MSC are, but is confident that his team will make good showing at this meet.

GOLF

The door is still open to any parties interested in freshman or varsity golf and tennis according to **Erv Kaiser, NDSU golf and tennis coach.** Time is running short, however, before the first scheduled playing dates. If anyone is still interested he should contact Mr. Kaiser in his office at his earliest convenience.

Candidates presently working towards seats on the squad are: Norm Vennerstrom, Ron McLeod, Jim Wolff, Tom Wimmer, Gerald Schmidt, Jim Dahl, Bob Daly, Jeff Colehour, John Porter and Jerome Barrett.

Freshman candidates are: John Peterson, Mark Mathiason,

Robert Dahm and Edwin Anderson.

TENNIS

The tennis team is working under the same handicap which all sports have had to contend with this season and that is weather.

Coach Kaiser has been carrying on practices for the past few weeks but has been unable to move his squad out onto the concrete courts. With the warm weather of the past few days it is hoped that the team can get the feel of a court under their feet before they have to meet any opponents.

Kaiser has presently scheduled eight matches with these surrounding schools:

April 25 — St. John's University, here; May 1 — Concordia, here; May 4 — Bison Invitational; May 9 — Concordia, there; May 11 — UND, there; May 12 — Bemidji Invitational, there; May 15 — UND, here; May 18 — Conference Tourney, Cedar Falls, Iowa.

As yet no dates have been scheduled with MSC but matches will be set up between the schools.

Candidates for the tennis squad are: Tom Wright, Errol Quick, Kermit Knutson, Dal Dustrud, Richard Baker, Dave Herstad, Pat McDonald, Charles Ngo, Larry Seeger and John Staples.

Freshman team includes: Dave Namar, Alex Sagay, Wesley Jones, Robert Rick and Paul Miller.

Varsity Football

Varsity football practice starts April 9. Persons interested should check out equipment prior to that date.

BONING UP for midterm exams is the reason behind this studious scene. These students study while others cross their fingers before midterm

week. There is a rumor that studying does raise the exam grades.

BANKING ON ENGLISH or depending on Lady Fortune? Midterm week does not seem to bother some students. The well-populated pool room is proof of this fact.

Experience As Page Is Enlightening

Pages at conventions are actually errand boys according to Gary Reddig, AAS jr. Reddig was a page at the North Dakota Republican Convention held in Bismarck last weekend.

Reddig explained that a page at a convention is one who carries microphones to persons wishing to speak, distributes and collects ballots, pages people, runs errands for candidates and delegates at the convention and helps with procedures on the convention floor.

"It is probably the most unforgettable experience I have ever encountered," explained Reddig. He advises anyone who gets a chance to be a page at any political convention to make good use of the opportunity because this is one time you can really learn about the political party, its insights and objectives.

Reddig said on his time off he helped Mark Andrews, Republican candidate for North Dakota Governor, with his campaign, because Andrews was a member of the Sigma Chi fraternity when he attended NDSU. Reddig is also a member of the Sigma Chi fraternity. Reddig said the Sigma Chi's sang at a political gathering for Mark Andrews a few weeks ago and have been helping with the campaign.

Reddig receives his job

through K. A. Fitch, Cass County committeeman.

The other Young Republicans who attended the convention were: Harlyn Bjerke, Stuart Cameron and Susan Hofstrand.

Honor Society Initiates 13

Thirteen new members were initiated into Tau Beta Pi, National Engineering Honor Society, March 14.

New members are William P. Bakken, Lowell Christiansen, Kenneth R. Geisen, Ronald I. Gilje, Richard B. Fockler, Charles W. Forsland, Raymond E. Jutila, Carmen P. Lynnes, John E. Lysaker, Val G. Tareski, Waldo E. Waller and Charles M. Wilcox.

The new members were honored at a banquet with Dr. Elliott H. Weinberg as master of ceremonies and Dr. Harold J. Klosterman was the guest speaker.

4-H

There will be a 4-H meeting Thursday, April 12 in room 215, Morrill Hall. Refreshments and social hour will follow.

FIRESTONE TIRE AND RUB-

Job Interviews

BER COMPANY will be represented on campus by J. R. Knisely who seeks interviews with spring graduates interested in sales, retail, shop management, credit and distribution accounting. All business administration and accounting students are invited to interviews for the above areas of employment.

Wednesday, April 11

UNITED MONEY SAVER COMPANY is enlarging its sales organization and will have several positions available for the months of June, July and August. A diversified line of merchandise is handled and those selected will find the work pleasant, dignified and profitable. There is a definite possibility of students being assigned to their home town areas within the state.

Thursday, April 12

AGRICULTURAL MARKETING SERVICE of Albert Lea, Minnesota, will be represented by H. L. Wilson who will seek candidates to fill openings for Processed Foods Inspectors. These positions begin at a GS-5 level with normal promotions to GS-7 rating following 6 months of satisfactory training. Travel is necessary in order to gain experience. Inspectors are ordinarily detailed from one area to another to coincide with the season. Students majoring in agriculture, biological sciences, chemistry or related courses qualify for these positions after having completed 12 quarter hours in chemistry and/or soil testing.

Thursday, April 12

MUTUAL BENEFIT LIFE INSURANCE COMPANY of Bis-

marck, North Dakota, currently seeks to hire two full time representatives who are interested in a career in the life insurance business. The selected individuals will complete a two year training program entering into business insurance and estate planning as soon as they are able to comprehend this phase of insurance selling. All interested students are urged to register with the Placement Office for a personal interview with the General Agent, Gordon Stensgard.

Tuesday and Wednesday, April 17 and 18

FARMERS HOME ADMINISTRATION will be represented on campus by Leonard Ralsted of Bismarck. Senior students interested in farm management who do have agricultural backgrounds are urged to contact the Placement Office and arrange for a personal interview with Dalsted.

FHA will for the first time offer summer assignments to a number of sophomore and junior students.

The BLACK HILLS POWER AND LIGHT COMPANY of Rapid City, South Dakota, is seeking to employ a mechanical engineering graduate. The company services the entire Black Hills area extending into Wyoming a limited distance. They own and operate their own coal mine. The company is at the present time involved in an experimental project with generating equipment. The engineer selected for hire will be involved in plant work with supervisory responsibilities in the near future. Contact the Placement Office if you would like more information on this opening.

Two approaches to the "man's deodorant" problem

If a man doesn't mind shaving under his arms, he will probably find a woman's roll-on satisfactory. Most men, however, find it simpler and surer to use Mennen Spray Deodorant. Mennen Spray was made to get through to the skin, where perspiration starts. And made to work all day. More men use Mennen Spray than any other deodorant. How about you?
