Schnell Named Man of Year
By Saddle and Siroin Club

A former North Dakota L.t. governor has been selected by saddle and silo as its "Man of the Year." The 1963 selection, Ray Schnell, who is known as a rancher and businessman, was named by the Saddle and Siroin Club of University in England.

In addition to his many other activities, Schnell is a member of the Kiels, Eagles and Rotary Club in Dickinson.

Ray and his wife, the former Clara Lee, of Rapid City, South Dakota, are the parents of 13 children, most of whom are presently helping to operate the family business.

Schnell's portrait will be unveiled at the Hall of Fame Banquet in the Memorial Union Ballroom, February 7.

Banquet tickets may be obtained from Marvin Larson, ticket sale chairman.

Department Changes Made By Board of Education

At the first meeting of the Board of Higher Education this year, three changes proposed by President R. H. Albrecht were approved.

The ROTC department, present

ally under the control of the department, was transferred to the College of Applied Arts and Sciences. The physical education department was separated from the Division of Athletics and placed under the College of Applied Arts and Sciences. Finally, the ROTC department was moved from the College of Engineering to the College of Chemical Technology where he was graduated to the College of Chemistry and Physics.

In commenting on these three changes, Dr. Albrecht said that they followed the same trend. The ROTC instructors are of equal professional rank with other NDSU professors. The University feels that the ROTC department should be an arm of the University which has degree granting powers. Switching the department to the College of Applied Arts and Sciences accomplishes this aim.

Dr. Albrecht pointed out several reasons for transferring the physical education faculty, new, as known as the Schnell Dickinson Livestock Auction Market.

He is presently a Representative of St. Louis, serving his third term in the North Dakota House of Representatives. He serves as an attorney for the City of Dickinson.

A founding trustee of the Board of Theological Seminary, St. John's, the Sentinel Butte, North Dakota, has served a number of functions for the University and operates as well as soliciting livestock for the University. Each year, the family participates in the "Match of Champions" competition, a benefit for the College of Agriculture.

A Civic Leader

He is a member of the Catholic Church and has been Grand Knight of the Knights of Columbus, as well as a leader in church affairs. In 1956, he was named "North Dakota Father of the Year." He was chosen by the American National Cowboy and has competed to compete with thousands of men from all over the United States for the award.

Schnell has served as a director of the North Dakota State Chamber of Agriculture, the Hereford Breeders Association, and the Auction Market and Auctioneers' Association. He is a former member of the State Board of Higher Education and served two years as State Easter Seal Chair. He was instrumental in helping to establish the National Cow-

boy Hall of Fame at Oklahoma City, Oklahoma.

In addition to his many other activities, Schnell is a member of the Elks, Eagles and Rotary Club in Dickinson.

Ray and his wife, the former Clara Lee, of Rapid City, South Dakota, are the parents of 13 children, most of whom are presently helping to operate the family business.

Schnell's portrait will be unveiled at the Hall of Fame Banquet in the Memorial Union Ballroom, February 7.

Banquet tickets may be obtained from Marvin Larson, ticket sale chairman.

Winter Quarter SU Enrollment Reaches 3,780

Winter enrollment at North Dakota State University is the highest recorded for its term with 3,780 students now registered.

The College of Applied Arts and Sciences has the largest enrollment with 1,268. Engineering and Agriculture follow with 876 and 731 students respectively.

Other college enrollments are: Seminarians, 73; Agriculture Education, 331; Chemistry, 141 and Continuing Education, 379.

Undergraduates' totals are: freshmen, 1,102 (625 men, 227 women); sophomores, 851 (227 men, 223 women); juniors, 746 (183 men, 152 women) and seniors, 642 (331 men, 111 women).

Graduates, 233 (211 men, 33 women); master's, 183 (79 men, 79 women) and short course, 75 men and 75 women.

Drop Notice

Today is the last day of the fourth week of classes, which is the last day for the dropping of courses. Drop slips must be presented to the Administration's Office not later than 5 p.m. today.

Convocation To Feature Recreation Authority

The second in a series of winter quarter convocations features Dr. Catherine Allen, a nationally recognized recreation authority.

Dr. Allen, who is coordinator of special activities at Tufts University, her specialty is physical education at the Boulder Branch School, will also serve in a duo capacity during her Fargo-Moorhead visit. She will appear on all three campuses, speaking at different colleges each morning Wednesday through Friday.

She will also conduct a workshop in leadership for all recreation workers, teachers and students in the area Friday evening at Moorhead State College. She will be a guest at the Fargo-Moorhead Physical Education Association on Thursday evening.

Dr. Allen is vice president of recreation for the National Recreation Association of Health, Physical Education and Recreation. She has served on numerous national committees, including the President's Committee on Fitness, and was Group Chairman of the National Conference on Recreation in Fitness last year. In addition to these positions, she served as Conference Chairman on School and Community Recreation in Washington, D. C.

At Helsinki, Dr. Allen served as director of recreation for the Olympic Team and is recognized for her work with the International Folk Festival in Pittsburgh.

An author of several books, including "Yoga," she has a contract with Prentice-Hall for two new books, "Creative Approaches to Recreation," and "Folk Dance and the Related Arts." Articles of Dr. Allen's articles have appeared in education and recreation publications.

This special convocation speaker will be a guest of three colleges in Fargo-Moorhead, and recreation leaders from the church and community, together with college and high school recreation leaders from the two cities, are invited to attend the Friday workshop.

Dr. Allen's DDSU convocation appearance is scheduled for January 24, at 9:30 a.m.
Letter to the Editor

Disapproval of Contract Feeding
Expressed by NDSU Graduate

Dear Editor:

With this letter I add voice to the growing number of students, faculty and staff who are concerned about the practice of contract feeding by the University of North Dakota. The term "contract feeding" is not the intention of the Spectrums editorial page concept to complex off fraternity food service. We feel that if a person wishes to pledge, he should pledge only to one of the other dormitories.

The Spectrums editorial page is intended to be a forum of campus opinion, to provoke thought, action, comment or criticism. Views expressed are those of the author of an article and do not necessarily reflect those of the Spectrums staff or anyone else.

Unsigned editorials are the expressions of the editorial staff. (Dora Gaat, Everett Richardson and Joe Schneider.)

North Dakota State University.

Your students, faculty and staff are constantly trying to fire up their groups; the members are always trying to keep apathy from getting a firmer grip on campus.

A university is supposed to be the seat of enlightenment and of all the groups. If everyone, who should include students, and of course the administration, would try to improve our school in any respect, and I mean it, we would be a lot more successful in keeping apathy at bay.

For it is a fact that the cost of education at Ellendale is the same as our student body, yet the cost of education at Ellendale is over twice as expensive to educate a student at NDSU. Since the Spectrums can presently feed over $700. Using the "student-unit" method, which takes into account the fact that it is twice as expensive to educate a student at NDSU, it can be seen that Ellendale is over twice as expensive as the average, or as compared with $200.

It is also a fact that Ellendale has not been able to increase enrollment, even though it has been allowed to reduce its non-resident enrollment for at least this one time, let common sense and available guides.

**Mistaken**

Dear Bad Face,

Yea! Thousands have found help by applying a blow torch to those unsightly blemishes. We know this because thousands have received this information from us and no one has ever written back.

Dear Ev and Dave,

Dear Sir and LadyPh�行,

Of course not! Faithful service for that long certainly deserves a little friendly gesture. By the way, our first reply to you has been returned with "No Longer At This Address" stamped on the front. Please advise new location.

Dear Ev and Dave,

Here is a little fact of interest.

Unattractive Girl

Dear Unattractive Girl,

Absolutely! By shaving it all off, you could change quite a bit!

Dave Herstad & Ev Richardson

** Inferiority Can Be Fun**

The second greatest problem confronting college students today is inferiority feelings. (The first greatest problem is of course, the recent outbreak of noddy among sorority house candidates.) Let us today look into the causes of inferiority feelings and their possible cures.

Psychologists divide inferiority feelings into three principal categories:

1. Physical inferiority.
2. Mental inferiority.
3. Financial inferiority.

(A few say there is also a fourth category: ichthyological inferiority—a feeling that other people have prettier fish—but I believe this is common only along the coasts and in the Great Lakes area.)

Let us start with the feeling of physical inferiority, perhaps the easiest to understand. Nobody we are inclined was felt inferior to the bowwows football captain or the beautiful home­coming queen. But we all didn't. Look at all the people, neither brainsy nor beautiful, who have made their marks in the world, from Napoleon. Look at Socrates. Look at Caesar. Look at Lavinia.

We are inclined to feel inferior

What I mean is that you can't always tell what's inside a package by looking at the outside. (Sometimes, of course, you can, as with Cigarettes. Take Marlboro. It can be discerned at that jolly red-and-white package—so bright and port — so neat but not guilty.—so perfectly in place whether you are at a formal dinner or a beach picnic—to invariably correct for any time, clime, or condition—one look, I say, at this paragon of packs and you have it. It has to contain cigarettes of absolute, perfect perfection. And you are right! That pure white Marlboro filter, that fine, flavorful blend of Marlboro tobaccos will give you a smoke to make the welkin ring, whatever that is. So those of you who have just been sitting and admiring your Marlboro packs since the beginning of the semester, why don't you open a pack and light one? Light a cigarette, I mean—not the package. Then you can settle back and smoke your Marlboro and, at the same time, continue to gaze rapturously at the pack. You will thus be twice as happy as you are if that is the case.)

But I digress. Let us turn now to the second category—mental inferiority. A lot of people think they are dumber than other people. This is not so. It must be remembered that there are different kinds of intelligence. Take, for instance, the classic case of the Signofo brothers, Claude and Sturbridge, students at Yale. It was always assumed that Claude was the more intelligent just because he knew more than Stur­bridge about the arts, the sciences, the social sciences, the hu­

And what about friendship? You don't need money to have friends. You can, for example, become a Furman cigarette. Or you can go for a life class, if your college is well suited.

But a better way to handle mental inferiority is to accept it philosophically. Look on the bright side of poverty. True, others may have more money than you have, but look at all the things you have that they don't—debts, for instance, and hunger cramps.

And what about friendship? You don't need money to have friends, and let me tell you something, good people: the older you get the more you will realize that friendship is as precious as friendship, and the richest man in the world is the richest with the most money.

Rich or poor, you can all afford the pleasure of Marlboro, available at popular prices in all 50 states of the Union.

Another Post Office Department directive, in addition to the one which fixed a higher mailing rate, requires its personnel to wear new jackets. Soon wearing them here are SU postal employees Lloyd Thumberg and Lyle Iken.

SU Post Office Personnel Now Wearing New Jackets

Have you noticed the new jacket worn by North Dakota State University's Post Office personnel since the first of the year?

They were brought about by an executive order from the Post Office department released November 15. Employees started wearing the jackets December 15. They receive forty dollars a year for their jackets, shirts and ties.

Besides the new jackets, the post office now has new postage stamps. By January 8, the third day of the new rates, approximately 25,000 one cent stamps, 20,000 five-cent stamps and 750 eight cent stamps had been sold.

NDSU's postal station is a branch of the United States Post Office. It gives the same services that other post offices give, including money orders, claims on packages and C.O.D.'s. Aliens can register and give changes of addresses there also.

"The kids (NDSU students) are good," stated Lyle Iken, SU's postal clerk for nearly six years.

"We have no gripes against them," added Lloyd Thumberg, station superintendent for six years. Prior to this position, Thumberg worked 20 years as a part-time employee at the NDSU station.

NSF To Sponsor Summer Program

"The National Science Foundation will sponsor a research program over the summer for high school chemistry teachers," commented Dr. Donald Schwartz, professor of chemistry at NDSU.

The high school teachers will be working with experienced researchers such as Dr. Ray McDonald, Dr. Donald Schwartz and Dr. James Rudesill.

The foundation is also offering cash stipends for the research done.

NDSU students are urged to contact their high school chemistry teachers and tell them of the opportunity in research. If the teacher is interested he should contact Dr. L. McDonald, assistant professor of chemical technology at NDSU.

North Dakota State University's Concert Choir has eight performances scheduled in North Dakota prior to the annual extended spring tour in March.

These preliminary appearances will give the choir an opportunity to perform within the state, giving the members of the choir valuable experience singing under touring conditions. North Dakota residents will be the first to hear the choir.

The Fargo Lions Club, an organization of 150 business and professional men, will hear the choir during a noon luncheon meeting in Memorial Union January 21. The half-hour program will consist of concert tour numbers lightened with some spiritual and folk songs.

On January 29, the choir will take a two-day trip to Bismarck. At that time they will give five performances beginning with a concert at Page High School. The choir will then sing in Bismarck High School and Hughes Junior High School in Bismarck. Bismarck's High School Choir will arrange overnight housing for the NDSU students.

Returning home Sunday, March 24, the choir will present a concert in Festival Hall for NDSU students.

Adult Class
To Be Taught
By Students

"Secrets of Being Well Dressed" is the title of the adult education course which will begin a week series January 23 at 8 p.m. in room 111 of the Home Economics building.

The course is being offered to the wives of NDSU students.

Figure analysis and color trends will be the secret discussed. Members of class will begin a folder figure assets and problems.

Other secrets will be on the dress, accessories, flattering and colors, dressing right for occasion, and points to look in ready made clothing.

Clothing for the family will be emphasized.

The course is being taught by home economics majors from Home Economics Education.

There is no charge for course.

Dietrich, Hove
Publish Text
For Junior High

"To publish a book," said Irvine Dietrich, "you have to have two things: money and a publisher who has faith in you!"

Dietrich, soil conservationist in the Extension Service at North Dakota State University, has just had a book published called "Conservation of Natural Resources in North Dakota." The book was edited by Dietrich and Dr. John Hove, chairman of the English department, was written from contributions of agencies such as the State Soil Conservation Committee, State Game and Fish Department and the North Dakota Association of Soil Conservation Districts. It is meant for use in the junior high school level as a text book, but is easy and interesting reading for people of all ages.

In the preface Dietrich and Dr. Hove state that "We have attempted to make an inventory of natural resources of North Dakota as well as present basic information about their origin, current status and utilization." The book was published in 1960 by the North Dakota Institute for Regional Studies.

Stevens' Collection Aids
In Specie Recognition

A friend's suggestion brought Orin A. Stevens, curator for the North Dakota Institute for Regional Studies to North Dakota State University in 1909. At that time NDSU's seed department under the Experiment Station was just starting. A friend, a member of the NDSU department, suggested Stevens, who had been testing seed, join the staff and he applied.

Salem refreshes your taste
-- air-softens every puff

Take a puff... it's Springtime! With every Salem cigarette, a soft, refreshing taste is yours. Salem's special cigarette paper breathes in fresh air ... to smoke fresh and flavorful every time. Smoke refreshed...smoke Salem!

• menthol fresh • rich tobacco taste • modern filter, too

Dr. Stevens

Stevens is interested in birds, native wasps and bees. From 1909 until last year he banded birds for the United States Fish and Wildlife Service.

Between 1909 and 1920 he collected and identified 100 species on this project. His traps, located on the horticultural grounds, averaged a catch of 1,000 birds a year, however, one year he banded about 2,000 birds. Most of them were trapped during the months of migration, April, May, September and October.

Dr. Stevens said reminders should be given students through the Spectrum about wasting time and cutting paths across the grass. The latter is one of his pet peeves.

Home Economists Needed
With Advanced Study

"Advanced Study in Home Economics" was the topic discussed on January 10, by Dean Budewig, College of Home Economics and panel members consisting of Rose Rystad, Marillete Anderson and Susan Hofstrand.

The meeting was open to all home economics students interested in information on the graduate study program and the financial assistance that is available.

The questions discussed shed light on the facts that graduate study is important because a student is able and has the obligation to himself and society to use, this ability.

Home Economics needs people with advanced training and often competes with itself because of its basic goal of teaching family living. The requirements usually ask for a high "C" average and better, with advanced training and often also with a Masters degree.

NDSU offers graduate work in the three areas of education, foods and nutrition, and child development and family relations. Dean Budewig said that graduate work implies research both of ideas and laboratory nature.

Musical Groups
Will Perform

Two musical ensembles are available to perform for interested campus organizations.

A woodwind group will play chamber music for campus entertainment. Alf Clausen, Kathy Thomas, Kay Fischer, Ralph Oberlander and Roy Johnson play the five instruments. Interested parties should contact any member of the ensemble at least a week before the performance is requested.

New this year is a saxophone quartet which also plays chamber music. Arrangements may be made with Roy Johnson of the music department.

The popular Statesman may be engaged by contacting Alf Clausen.

NDSU Coed Sew's Way to Vegas
Mary Breitbach, HE Jr, will compete for honors in the National Wool Contest this week and in Las Vegas, Nevada.

Mary won the district, state and regional wool contests modeling a suit which she made herself of 100% American wooled wool. The suit has a pleated skirt with a Chanel type jacket in rust and green plaid.

After winning the state contest, the suit was sent to Denver, Colorado to be judged for the regional contest. Mary competed with the winner from Minnesota in this contest.

Mary found out New Year's Eve that she had won first prize and would receive an all expense paid trip to compete in the national contest.

Accompanying Miss Breitbach will be Mr. and Mrs. Ralph Hickle from Center, North Dakota. Hickle is state director of the wool contest.

Placement Office

Job Interview

United States Civil Service has recently announced openings for Plant Quarantine Inspectors. Applicants at the time of graduation are requested to have completed at least 20 semester hours in sciences or related subjects. Most of the positions are located in the Plant Quarantine Division of Agricultural Research Service, U.S. Department of Agriculture. The positions are located at stations on the east and west coasts and Great Lakes of the United States, at border points and at the airport in the United States.

Plant pest control Inspector positions in the Plant Pest Control Division of Agricultural Research Service may also be filled from this examination. These positions are located in all the States in the continental United States. The necessary application forms are available in the Placement Office.

Thursday, January 17

Nebraska State Bureau of Highways will be represented on campus by technical personnel seeking employment interviews with senior civil engineering students. An expanded highway in the state of Nebraska is challenging and interesting opportunities for interested students. Please contact the Placement Office to register for interview.

Friday, January 18

Line Materials Industries, Milwaukee, Wisconsin will interview senior electrical and mechanical engineering students. Line Material Industries produces products used in distribution and transmission systems by electrical power utilities. A training program leads to positions in design, development, product engineering, sales and manufacturing engineering.

Gllden Paint Company of Ohio, will be represented on campus by B. E. Lamalle Personnel Department. This company has special interest in minority students who have completed the special curriculum in architecture. Gldden is also interested in chemistry graduates who may have interests in other operations such as food crops, painting and metals and paper chemicals.

Space, Missiles & Jeeps
Projects at Douglas

have created outstanding career opportunities for

Scientists and Engineers

B.S. degrees or better:

Assignments include the following areas:

Space Activity - relating to all types of control problems

Electronic Systems - relating to all types of guidance, detection, control and communications

Propulsion - relating to fluid mechanics, thermodynamics, dynamics, internal aerodynamics

Environmental - relating to air conditioning, pressurization and oxygen systems

Human Factors - analysis of environment affecting pilot and passengers, design of cockpit consoles, instrument panels and pilot equipment

Heat Transfer - relating to missile and space vehicle structures

Structures - relating to cyclic loads, temperature effects, and the investigation of new materials, methods,products, etc.

Aerodynamics - relating to wind tunnel, research, stability and control

Solid State Physics - relating to metal surfaces and fatigue

Space vehicle and weapon system studies - of all types, involving a vast range of scientific and engineering skills

Official Women's Ring Approved At Recent Student Senate Meeting

Student Senate has unanimously approved the Balfour ring as North Dakota State's official women's ring. An earlier meeting, the Balfour ring was presented to the Senate for approval. Several senators and commissioners questioned the approval of any ring without competitive bids. At the time, no one at the meeting, approved the Balfour ring. Since Balfour has designed the ring, the committee felt that senate had a "moral obligation" to use that company's ring. In addition, Mr. Casper, manager of the Varsity Mart, would not handle any other ring. Presently, Casper is selling rings at no profit as a personal favor to the Balfour salesman. Finally, the committee was of the opinion that the Balfour was the best ring in quality and design. Duemeland ended his report by saying, "I move that we accept the Balfour ring as the official school ring." The motion was unanimous and carried.

The senate meeting was the shortest and most peaceful meeting held by student senate since the current senate term began. Opening promptly at 7 p.m., the meeting adjourned before 7:30.

Home Economics - Profession With A Thousand Job Titles
by Jean Pulkrebeck

In an effort to promote a better understanding of home economics and to give an insight into education in this field, I would like to set before you this profession with a thousand job titles and as many opportunities.

At its recent convention in Miami, Florida, the American Home Economics Association, which represents 28,000 members, used as its theme, "Home Economics in Changing World — Raising Our Professional Status." From such topics as "Unwanted Sound: What Can Be Done About It?" to "Metabolism Studies With Pre-adolescent Children," and "Fashion and Mental Therapy," to name a few of topics explored, the tremendous scope of today's home economics profession becomes apparent.

At a first glance, the careers of textile designing, dietetics, advertising and consumer education might seem to have little in common. The people who engage in these arts and sciences share one important bond—that of a college background in home economics.

To a teen-age girl entering high school or the college student who is about to choose her life's work, the career training which she selects is of vital importance to the business or professional role she will later assume. She must choose a field in which her interests and talents can be channeled, in which she will be well paid, and always desirable, in which the fact that she is a woman will be an asset.

An ideal combination of one of these titles which seems to have a little of every interest would be a home economist with a career in advertising, where she could work with about 30 other colleges and universities. The scores were mailed to be considered with about 30 other colleges and universities. The women's team scored 1942 points and 112 goals. High for the women was Martha Bateman HE Jr, with 502 points.

Fred Morman, Chem sr, had a 518 point high for the mixed team.

Other team members are Joanne Hanks, Suzanne Jensen, Audrey Kemmer, Sara Ketterling, Barbara Nelson and Robert Bellberg.

New Secretary Assists Dean In Home Economics Building

The new secretary to the dean of home economics, Miss Irma Rhodenbough from the Laramie, North Dakota, is now in charge of home economics placement and secretary to Dean Caroline Budewig.

Miss Rhodenbough came to Fargo from Minneapolis, Minnesota, where she worked as a secretary for the superintendent of the Kennedy Public School. She told a Spectrum reporter that she has recently taken a job in this field which she likes and choose her life's work.

Students.

Three North Dakota State University ROTC seniors have been named as distinguished military students.

The awards were presented by President H. R. Albrecht January 26 in NDSU's Fieldhouse. Recipients of the awards were: Cadet Col. Ross Johnson, Cadet Maj. Jerome Richter and Cadet Maj. Robert Veen.

Qualifications for the honor include high moral character, high academic standards and military attitude. Recipients are eligible for appointment in the regular Army.

Participating in the presentations with Dr. Albrecht was Colonel E. G. Clapp, professor of Military Science.

**Fort Sill Tour**

A group of advanced Army cadets, 15 in number, will leave tomorrow morning for a tour of Fort Sill, Oklahoma.

This particular tour is part of a program which, during the course of a school year, allows all advanced students in the Army ROTC to make an on-site inspection of a military camp. In addition to Fort Sill, three other posts are visited by different groups of cadets. These include Fort Benning, Georgia; Fort Knox, Kentucky and Fort Bliss, Texas.

The purpose of the present trip, as with the case of all the others, is to receive orientation on branch training centers of the Army. Fort Sill is an artillery and missile center, and the NDSU cadets will be shown through the entire training area. It is hoped the tour will familiarize them with the operations of an artillery center, and demonstrate what it would be like if any of them were assigned to such a base. While at the base, the group will be escorted by several officers, all of whom are ROTC graduates.

The cadets will make the round trip in a plane furnished by the 4432nd Air Transport Squadron from Chanute Air Force Base, Chanute, Illinois. They will be accompanied during the trip by Captain Huba, United States Army Artillery, and will return to Fargo on Saturday.

### THE BELL TELEPHONE COMPANIES

#### SALUTE: DON OLSEN

Don Olsen (B.S.E.E., 1959), Sales Manager for Data Communications in Wisconsin Telephone Company's Madison Office, coordinates all data communications projects in the entire Southern Division. He works with company salesmen and customers throughout his area to uncover new data service applications.

Don previously was a Communications Consultant helping business customers pep up profits by making better use of telephone services. His performance earned him the opportunity to attend the Bell System Data Communications School and won him his latest promotion!

Whether guiding company craftsmen, or supervising the installation of transmission equipment, or working with customers, Don has capably handled a variety of challenges.

Don Olsen and other young engineers like him in Bell Telephone Companies throughout the country help bring the finest communications service in the world to the homes and businesses of a growing America.

### BELL TELEPHONE COMPANIES

#### TELEPHONE MAN-OF-THE-MONTH

Displaying his skill with the saber saw is Jim Larson cutting figures in plywood for the setting of Royal Gambit in the Circle Theatre. King Henry VIII and his six successive wives take their place on history's chessboard. They move from square to square revealing their part in the making of The Modern Man. Plan to see "Royal Gambit" directed by Lois C. Bommina January 29, 30, 31 or February 1 and 2.

### Credit Union Meeting Set

The North Dakota State University Credit Union plans to pay a 4.75% dividend to stockholders and give a 20% refund on any interest paid in during the year.

**Further action on dividends and refunds will be taken at the Union's annual meeting to be held on January 17 at 4 p.m. in Room 101 of the Library.**

Dean Stallings states that the purpose of the meeting is to select officers and to have reports from the standing committees such as the credit, supervising and publicity groups.

Anyone on NDSU's payroll, and military officers who are on the faculty may belong to the Credit Union. At the present time, there are 520 members. Assets total $307,408.52.

The NDSU Credit Union meets every month and the annual meeting is held every January. The credit committee meets almost every day.

Members of the Board are: Dean Stallings, President; James Dogger, Professor and Chairman of Agricultural Entomology, treasurer; Wayland Gardner, Associate Professor of Economics, vice president; Gary Reinke, Assistant Superintendent of Buildings and Grounds and Orville Banasik, Associate Cereal Technologist.

### JOBS IN EUROPE

Grand Duchy of Luxembourg Jan. 11 1963 - Would you like to work at a Swiss resort, a Norwegian farm, a German factory, a construction site in Spain, or a summer camp in France? Thousands of paying summer jobs (some offering $180 monthly) are available in Europe to U.S. students.

The American Student Information Service, celebrating its 6th Anniversary, will award TRAVEL GRANTS to first 1000 applicants.

For 20-page Prospectus, complete selection of European jobs and Job Application (enclose $1 for Prospectus, handling and airmail reply; write, naming your school, to Dept. J, 22 Ave. de la Liberte, Luxembourg City, Grand Duchy of Luxembourg. The first 6000 inquiries receive a $1 coupon towards the purchase of the new student travel book, Earn, Learn & Travel in Europe.
Intramural Basketball has all the spirit of competition without the recognition of varsity sports. Here a member of the ASCE intramural team fights for a basket while an able teammate adds a hand. The defenders, Sigma Chi Fraternity, spread their arms in an attempt to block the shot. The Signs were victorious in the end results of the game.

NOTICE — The Intramural Board has asked all interested persons who wish to play in intramural ping-pong to please turn in their rosters and entry fees this week. The three dollar fee may be turned into E. Kraiser in the Physical Education building.

Kappa Delta Team Wins Inter-Sorority Basketball Contest

(March 3, 1933) The inter-sorority basketball tournament ended Thursday afternoon with the Kappa DeltaAs winning for the fourth consecutive year, when they defeated the non-sorority yellows in a close game ending 74-71.

Neither team had lost a game throughout the tournament. The half ended with a scoreless tie.

Players on the Kappa Delta team are: Ruth Moore, Evie Hammer, Betty Kratzschmar, Grace South, Imogene Ward, Audrey Boe and Marion Powers.

The non-sorority team contained Cleo Knapp, Marion Wagners, Eunice Conlon, Marcella Anderson, Judith Lara, Florence Beaudine and Marion Anderson.

Results are as follows:

Kappa Delta 7 6
Non-sorority 6 1
Phi Mu 5 2
Kappa Kappa Gamma 4 3
Alpha Gamma Delta 3 4
Phi Omega Pi 2 4
Gamma Phi Beta 0 7

“Of all the cans which are canned in this canning world,—though the can of hypocrisy may be the worst,—the can of criticism is the most tormenting.”

—Laurence Sterne

Intramural Board Topics

Criticism About Basketball

Spectrum Column, Discusses

by Joe Schneider

Poor basketball was used in intramural play and criticism of “Over The Back Fence,” were the topics of discussion at the Intramural Board meeting held last Monday. 

Several schools were interested in some new basketballs; the ones we are using are in bad shape,” said Erling Rasmussen, ATO representative.

Poor Basketball

After Rasmussen’s statement, Allan Glyn, AGIR representative and president of the board, asked the other representatives what they thought of the basketballs.

It was the feeling of the board that the balls were not suitable for competitive basketball because they were lop-sided and torn. They felt the Intramural Board should procure, in time for the coming week’s games, some new balls.

Tony Hogan, president of the Fly-Ed club, and man in charge of the intramural basketball games, disagreed with the board’s recommendations.

He stated that there weren’t always old balls used, but since many of the good ones have been stolen by intramural players over the years, they decided not to furnish decent playing balls.

In reply, Rasmussen suggested that the referees take charge of the good balls, and see to it that they are used only during the actual games. “The old balls could suitably be used for warm-ups before the games,” said Rasmussen.

WRA Places 6th In Recent Bowling Bout

The Women’s Recreation Association bowling team placed sixth in the first round of the 24th annual Postal Intercollegiate Bowling Tournament with a total of 1482.

Rae Ann Winlaw placed fifth in the Tournament, the University of Alaska, Iowa State University and Arizona State University.

Animals are such agreeable friends — they ask no questions, they pass no criticisms.”

—George Eliot

Although Hogan protested this and named several reasons, the board drew up a motion to read that, “The Intramural Board should provide three balls to be used only for games.” It was passed without any opposition from the representatives.

Column Criticized

Denny Hogan, commanding the attention of the board, inquired about their feelings toward the comments which appeared in the Spectrum the week before Christmas.

“I was wondering what the rest of you think of the remarks in the Spectrum,” said Hogan.

He continued by stating that he was referring to the column, “Over The Back Fence,” in which the writer said that the intramural program was weak.

After he waited for some representatives to reply, and it was apparent that none would, Hogan continued.

“If everybody thinks it is a weak program then perhaps we should do away with it.”

After Hogan remarked about the way the board operated, and tried to explain the good they were doing, Joe Schneider, Sigma Chi representative and author of the column in question, replied to Hogan’s remarks.

Schneider clarified his remarks about the ‘weak’ program by saying that he was referring to the board’s action regarding the Psi’s intramural teams. A new board was named several other ins where the program was weak.

Namely, Schneider contended that the method of selecting the members on the board was poor. He felt that many officers did not send their best able men to be representative on the Intramural Board. “Most good members are only on a board for one year and then they are replaced.”

Schneider continued, so that every new member comes to it unqualified what he has to do. “They know what is happening and they have no interest in bettering the program,” said Schneider.

When Hogan asked for some constructive remedies to the play, Schneider remarked that the committee set up by Larry SAF, representative, should work out all the problems that the board.

This committee, as yet unaattempt to revamp the handbook of rules and cies.

POLLOCK'S

Pitches

by Dave Pollock

"Everything was done right and we attained all the things that
we have been striving for," stated Coach Bentson.

After watching the two wins this past weekend one has to agree.
The Bison played some spectacular ball. Maybe it was the new
warm-up suits that arrived before the game. Maybe it was the in­
creased team spirit.

Whatever it was, I sure hope it stays with them.
The majority of the team has started a no-shave until we lose' agreement.
If that's all we need to do to win, I'm all for it. I hope it doesn't have the R. W. Winkle effect on their actions
on the court.

The BB Team has nicknamed Bob Tuscherner "darling". He has
really shown the spark and the crowds enjoy his performances. He is
currently second in rebounding on the team.

Ron McLeod has 249 points this season shooting a big 45%. This
averges to a nice 19.1 points per game so far for the season. In the
NCC he's tops with 24.1 points per game.

For those who saw the wave from Verlin Anderson in the Morn­
gaside game—it signaled the first tip-in after a miss on the free­
throw line for the Bison this season.

Coach Benton was pretty thrilled with both wins and pleased
with sharp recovery of Wayne Langen's playing.

It's nice to see that Wayne Langen has regained his leadership
on the floor. His playing was terrific in the last game. Coach Benton
probably has lost some of the worry over the "bench" as they surely
displayed their talents also.

Guard Mike Anderson's drive and hustle cannot pass with any­
thing but favorable comment. Anderson and Tucherter Inc. put on a
great floor game. Bob Renfrew deserves credit also.

Considering all of the players, and after watching the games, one
can see that it's all of them as the whole team played magnificently.
It's too bad about the cancellation of the annual Concordia/NDSU
GAME. I attended the press conference and thought it was a little
nicky. We are starting a week earlier outright, but it shouldn't make
that much difference. A coach should look out for the welfare of his
team and not risk their security, but one week of practice shouldn't
make that much difference.

In Track...

Twenty-four men have already qualified for track and they could use
more, especially in field events. I've heard we have some good talent
out now in the first squad and they're practicing hard already.

The wrestling team tied Valley City 16-16 in their last match.
Our rivals to the north are keeping up with us in the North
Central Conference. We are both 2-7-4 D. State and are also tied with
a 3-1 record. We'll have to wait for the "U Series" and see what happens.

Games Coming Up:

On Friday and Saturday night we will face two of our toughest
enemies. Friday we play NCC, leader S. D. who lost to
January 3, 78-68. Tom Black, 6-10, 225, is the big gun for the
Jackrabbits along with Sid Boutie, 6'4. Together they are averaging about
34 points per game.

On Saturday the Bison play State College of Iowa. SCI tied for
first in the NCC Conference last year and is about as tough as this
year. Since NSDU began playing SCI in 1955, they have won 26 and
lost 14 to us.

This weekend's action starts out with a pep rally by the Rahja's in
Memorial Union and from there Sunday 1 hope we succeed in all
events.

On Gymnastics...

In the first meet of the year, NDSU lost to UND 67½ to 47½. The
team was handicapped as Jack Dohrer pulled a muscle and SCI had
to spot points in his event. Coach Kaiser stated, "All in all, we did
real good considering it was our first meet since resuming gymnastics
and you can't expect a best effort at first try." Dan Dillon was high
scorer with 22.

On Apathy...

It seems like the apathy is suddenly disappearing as attendance
at the last couple home games has been excellent. I recommend coming
a little early for the game this coming weekend as the crowd should
be the biggest ever.

Bison All Time Individual Record: 47 points in one game by
Marc Bachmeier against Morningside in 1960.

Herd Grapplers
To Meet SDS

The Bison wrestling team will
face South Dakota State Friday
evening immediately following the
basketball game.

The Jackrabbits have recorded
one victory against two losses as­
fter defeating St. Cloud College last
Friday.

NEW EDUCATIONAL LOAN

• Up to 7 years to repay
• Low Interest Costs
• Only farm youth qualify

EMERY JOHNSON
WHOLESALE OR WHOLESALE EQUIPMENT
7 S. Broadway
AD 5-5361
Dwain E. Gregoire, Michael Backsen, Russell Harkness, Stephen Ronald Larsen, Orville Nyhus and Waldo Waller. Others were John...ed a 4.00 or straight "A" last quarter; four of them were...ning student's academic achievement. Honor Roll as a means of recognition by two colleges at North Dakota.

The "FM Sextets" will provide the music January 25 at the Fraternity Memorial Armory for the Alpha Phi Omega sponsored dance. Award presentations will be made to the man selected the "Ugliest Man on Campus" (UMOC). According to Dave Ruff, president of the national service fraternity, each sorority enters a fraternity man as their UMOC contestant. The men are "decorated" and have their pictures taken. It is from these pictures that voters must decide who is the UMOC.

All voting for the contestants is done at the dance. The admission price of one dollar will admit one; this will also give him one vote in the balloting. The dance and contest will begin the Inter-Campus Affairs Commission's Campus Chest Drive, which will be held the following week.

Dr. H. R. Albrecht had this to say about the drive: "The Campus Chest Drive, planned for the period of January 28 through February 11, provides an orderly, sensible way for NDSU students to discharge their obligations to those charities they themselves have selected for support." The charities included in the drive are: the Crippled Children's Home, Jamestown, North Dakota; March of Dimes; Special Olympics; and S.D. Inter-Council and Red Cross.

Champaign Sunday, January 24, will be the Charity Ball to be held February 2 in Memorial Union Ballroom. Admission to the dance being held from 9-12 p.m. is $2 per couple, and tickets may be purchased at the door. Semi-formal dresses are in order for the girls for this Panhellenic sponsored event.

Junior Panhelanni is under the supervision of Kappa Alpha Theta, is in charge of the decorations. Kappa Gamma is in charge of the orchestra and general arrangements; Gamma Phi Beta, publicity; Alpha Gamma Delta, tickets; Phi Mu, invitations; Kappa Delta, entertainment and lunch, and Kappa Alpha Theta, cleanup.

The proposed addition of a new chemistry building has been approved and is in the final stages of planning.

The building will augment the facilities of the present chemistry building. It will be in full operation by fall quarter of 1964. This will allow more area for teaching and general chemistry instruction.

Plans for the additional chemistry building began almost five years ago, but became more concrete when the 1961 State Legislature gave first priority of college construction in the state to the chemistry addition. To this end, $700,000 has been appropriated for the new building.

The architectural firm, Clark, Elklen and Holman, working closely with the College of Chemistry, drew the plans and presented them to the State Board of Higher Education. The Board approved the plans at the last January meeting.

Additional funds for increasing research facilities were made by the National Science Foundation and the National Institute of Health. Funds from the National Science Foundation are to be used for contributing to the NIH to be used for contributing to the NIH for the NSF to be used for contributing to the NIH for the NIH.

This is the largest federal approved for use for "other-than-health" related research.

Bruce Goff, one of the world's outstanding architects, will visit North Dakota State University January 21, 22 and 23. Goff will be conducting lectures with all architecture students and will also hold a seminar for professional people during his stay.

On Monday and Tuesday he will meet with undergraduates and Wednesday's visit will be primarily with senior and fifth year architecture students. His visit will be climaxed by a lecture open to the general public on Tuesday, January 22, in room 319, Minard Hall.

Goff's work follows no mainstream of present academic architecture.

He has been described as one who designs every house as if it were the first one in the world. It is considered to be an artist more than a technician.

An exhibit of ten Golf paintings will be displayed in the library and the second floor of the South Engineering building as well as photographs of his recent buildings during his visit. Goff was Director of the School of Architecture at the University of Oklahoma from 1948 until 1955.

The Engineering and Agriculture Release Fall Quarter Dean's Lists

Dean's Lists have been released by two colleges at North Dakota State University.

Fifty-five engineering students and twenty-nine students in agriculture were honored on the honor roll.

The Dean's Lists replace the Honor Roll as a means of recognizing student's academic achievement.

Engineering

Seven engineering students maintained a 4.00 or straight "A" last quarter; four of them were seniors. They are: John A. T. Johnson, Ronald Larsen, Orville Nyhusand, Waldo Waller. Others were John Neidwicki, Arvid Winkler and Edward Griffin.

Other engineering students were: Dwayne Gregerich, Michael Backsen, Russell Harkness, Stephen Ronald Larsen, Orville Nyhusand, Waldo Waller. Others were John Neidwicki, Arvid Winkler and Edward Griffin.

College of Agriculture Over half of the agriculture students honored for their scholastic work last quarter were seniors. They are: Richard Hofstrand and Blake Peterson.

Three of the freshman students honored were from Nigeria. They are: Ayotade and Olumupiwa Osiname.

Other students on the list are from the following countries: all, Darryl Eastvold, Merlin Ek, Robert Hofstrand, Richard Scharf and Ian Shaw.

Wayne Langen, Darwin Lee, Norm Bent, Blake Peterson, Allen Dockner and Ronnie Kruger.

Proposed Use of Building

The present plan reveals that the new building will be used for upper-class instruction and research, while Ladd Hall will be used primarily for general chemistry instruction. Ladd Hall will also be used for lecture rooms, offices, store, research and storage. Dr. Minnear, "It is easier to build laboratory building from the ground up than to try to adapt the other building into a laboratory so the search and labor work will be moved into the building designed for that purpose."

The new four-level building will have one sub-level on which will be the polymers and coating department. The department of chemical, administrative studies, conferences and conference rooms will be on the second floor. Organizational studies, instruction and laboratories will be on the third floor.

The State Board of Higher Education is concerned with the possibility of conducting engineering curricula at the University of North Dakota and North Dakota State University.

Meeting January 34 in Bismarck, the Board of Higher Education committee to study the situation. The committee ... three from the UND engineering faculty, and the NDSU engineering faculty, has been appointed by the presidents of the two universities.

Dr. W. C. Bober, UND president, appointed Professors Cooley, Reitan, and Thomford from the University's departments of chemical, mechanical, and electrical engineering respectively to conduct the survey. The NSF president, named Professors B. Aley, and Henning to represent the NDSU engineering, industrial engineering, industrial engineering, architecture respectively.

The committee will study whether there is duplication in the present engineering curricula of the two universities and if present system is satisfactory. The committee will base its recommendations on the best method of offering courses from the point of view of quality education?"
