Bruce Goff, outstanding architect, discusses his field with students on a recent visit to NDSU.

Leonard J. Davis, member of the Little International Hall of Fame, and commercial cattle rancher from Killdeer, will be the speaker at the Hall of Fame Banquet in the Union Ballroom, February 15, at 6:30 p.m.

The fire that broke out Friday in the new addition to Reed Hall, men's dormitory (above) resulted in only minor damages. The fire was thought to be caused by sparks from a welding torch.

Eminent Architect Visits NDSU; Shares Views With Faculty

The fire broke out Friday in the new addition to Reed Hall, men's dormitory (above) resulted in only minor damages. The fire was thought to be caused by sparks from a welding torch.

Goff received his architecture education at Oklahoma University. At that time he was a junior professor of architecture at NDSU, said "I've never seen so much work being done on so many projects at one time." He shared his views with the students of the elements of composition, study of the nature of materials and the approach to design. The meeting was held in the Union Ballroom.

The fire broke out Friday in the new addition to Reed Hall, men's dormitory (above) resulted in only minor damages. The fire was thought to be caused by sparks from a welding torch.

Letters to the Editor

Sandal Urges Support Of Campus Chest Drive

Dear Editor:

I encourage all students to back the Chest Drive to support worthwhile charitable organizations such as the Salvation Army, American Red Cross, March of Dimes and many others.

As a university student, you are a privileged class having an advantage not available to communities provided by North Dakota's citizens. We are not bound to the same pursuits as students begin their civics-mindedness. We are fortunate not to be themselves.

Our country is great largely because of its charitable attitude and willingness of its citizens to voluntarily help others in need. This is not the first time called by leaders to strengthen, to develop, to understand that ND State students are proud of their roots, their history. We are fortunate, not to be themselves.

Let's get behind this "drive" and oversubscribe the goal of the Chest Drive. If you are a senior student on Wednesday or Thursday night, say "Yes." You'll like yourself for doing so.

Sincerely,

F. P. Sandal
Animal Agronomist, NDSU

Motives Questioned Behind Charity Ball

Dear Editor:

As a student with a moral conscience, I find the actions of our campus leaders for attempting a project of this magnitude to be questionable. However, the motives behind the decision of Panhellenic Ball may indeed be underhanded.

If the Panhellenic Council wants to raise money for a private dance for Greeks only, this is a good cause, but if Panhellenic Ball? It's a rather poor show of the public. Let's watch that thermometer get "hot"; let's watch it with pride.

What's a buck? A buck is what you give the little boy on the corner if he made a personal plea to you for help. Let's give to a worthy cause. Let's watch that thermometer get "hot"; let's watch it with pride.

Sometimes last year, a group of Indian tribes from one of our southwestern states made a plea to President Kennedy that a member of the Peace Corps be assigned to their community.

The President, replying to the tribe's spokesman that a Peace Corps member could only be assigned outside this country's borders, mentioned that in the future, it might be possible to organize a domestic Peace Corps.

In a report made public January 19, at the White House, a study group appointed by Kennedy recommended establishing just such a Corps. The group also recommended starting the domestic Peace Corps this summer with 200 to 500 volunteers and building it up to a maximum of 5,000 in three years.

As a result of this recommendation, the original Peace Corps, designed for duty overseas, was criticized in some quarters because it was felt there were still some urgent, and needed the same attention, here at home. Just as the first Peace Corps was not, as one prominent American called it, a "joke," so is the Peace Corps program now in this country.

As numbers for this category.

The crux of this whole thing is, of course, to induce you to give something to a worthy cause. Let's watch that thermometer get "hot"; let's watch it with pride.

Student Finds Error in Letter

Dear Editor:

In last week's issue of The Spectrum, January 23, 1963, there appeared an article by Frank Cassel of the staff of the "Spectrum" which presented an interesting viewpoint. How about that spirit of invincibility, Professor? Along the line, Professor Cassel said, "I am aware that no one, save the editor of The Spectrum has been giving us the benefit of the doubt." I am personally encouraged by your comments. From these two obvious errors, English grammar, it appears the editor in black in question may be so beloved as an uncultured group.

I do not believe that student readers of your newspaper are giving you the benefit of the doubt. It is my hope that your editor is not as egocentric as expressed in his letter to the editor goes unlearned.

Elton B. West

Letters to the Editor

Sandal Urges Support Of Campus Chest Drive

Dear Editor:

I encourage all students to back the Chest Drive to support worthwhile charitable organizations such as the Salvation Army, American Red Cross, March of Dimes and many others. This is to be the least, an ambitious goal, but which one of 3700 students should be able to fulfill? As we are contacted, we are asked to contribute to this cause. And the students are asked to contribute to this cause. And the students are asked to contribute to this cause. And the students are asked to contribute to this cause. Let's take off the mask and look the situation squarely in the face. It is quite simple... they want some of your money.

But what is the use to exchange our money for intangible commodities? The fact that we can see exactly where it goes, or realizes the utility of it, is not going to lead anyone into the world of schizophrenia and its similar matter of digging into the wallet, which, when returned to the pocket or purse, will be worth something less that it was when you removed it.

The lobby of Memorial Union now contains a "thermometer" which is intended to show the daily progress of the fund drive. A goal of $1,000,000 was set, as many visitors will glance at the degree of progress each time they enter the Union. I'd venture to say that our feelings could be more easily justified if we followed a "thermometer" rising rapidly if it were not to rise at an embarrassingly slow rate.

Several times last year, a group of Indian tribes from one of our southwestern states made a plea to President Kennedy that a member of the Peace Corps be assigned to their community.

The President, replying to the tribe's spokesman that a Peace Corps member could only be assigned outside this country's borders, mentioned that in the future, "it might be possible to organize a domestic Peace Corps."

In a report made public January 19, at the White House, a study group appointed by Kennedy recommended establishing just such a Corps. The group also recommended starting the domestic Peace Corps this summer with 200 to 500 volunteers and building it up to a maximum of 5,000 in three years.

The crux of this whole thing is, of course, to induce you to give something to a worthy cause. Let's watch that thermometer get "hot"; let's watch it with pride.

What's a buck? A buck is what you give the little boy on the corner if he made a personal plea to you for help. Let's give to a worthy cause. Let's watch that thermometer get "hot"; let's watch it with pride.
CALPRUNIA, THERE I COME

Now, as the college year approaches its mid-point, one fact emerges clearly: you are all going to flunk everything.

There are two things you can do about it. First, you can marry money. (I don't mean you marry the money itself; I mean you marry a person who has money. Weddings between people and currency have not been legal anywhere in the United States since the Studebaker Act. Marlboro Cigarettes, on the other hand, are legal everywhere and are, indeed, smoked with great pleasure and enthusiasm all fifty states of the Union. I bring up Marlboro Cigarettes because this column is sponsored by the makers of Marlboro, and they are inclined to brood if I omit to mention their product.)

But I digress. I was saying you could marry money, but, of course, you will not because you just have offered, grasping, power-hungry, free-lance American kid. Therefore, to keep from flunking, you must try the second method: you must learn how to take lecture notes.

According to a recent survey, 123.0% of American undergraduates do not know the proper way to take lecture notes. To illustrate this shocking statistic, let us suppose you are taking a course in history. Let us further suppose the lecturer is lecturing on the ruling houses of England. You listen intently. You write diligently in your notebook, making a topic outline as you have been taught. Like this:

I. House of Plantagenet.
II. House of Lancaster.
III. House of York.

Then you stop, take out your pen. You blink back a tear, for you cannot go on. Oh, yes, you know very well that the next ruling house is the House of Tudors. The trouble is you don't know the Roman numeral that comes after III.

"They got to anagram..."

(If it may, incidentally, be of some historical interest to point out that Americans are not the only people who don't know Roman numerals. The Romans didn't know them themselves. I suppose they could tell you how much 200 was, but when it came to real entities like LXI or MMC, they just flung away their style and used decimal numbers. It's simple. You just add and take in a circus and maybe stab Caesar a few times. (You may wonder why this particular group of Romans used Roman numerals when the Arabs had such a nice, simple system. Well sir, the fact is that the Emperor Vespasian tried to make the Arabic numerals from Sudan and the Magnificans, but Suliman wouldn't do business—not even when Vespasian raised his ball to 100,000 gold mithras, promising to throw in the Colosseum, the Appian Way, and Charlton Heston.)

One Rome stuck with Roman numerals—to its sorrow, as it turned out. One day in the Forum, Cicero and Pliny got to arguing about how much is CDL times MVIX. Well sir, no one in town ever dreamed about the base. In all the excitement, nobody remembered to lock the north gate and—wham!—before you could say "I didn't notice that" the Gods, the Visigoths, and the Green Bay Packers!

Well sir, that's the way the empire crumbles, and I digress. Let's get back to lecture notes. Let's also say a word about Marlboro Cigarettes. The makers would be pleased. And is it not fitting that we should please these honest tobacco-men? These fine men, fond of square dancing, water sports, protein, and tattoos—these tireless perfectionists who spend all their days trying to please us—searching everywhere for the best of all possible tobaccos, giving us with patience, blending them with tender, loving care? Marlboros are available in soft pack and flip top box. You will find XX cigarettes in each package.

Union Director Speaks At Student Open Forum

"Student Union on Trial" was the topic discussed at the Student Forum last Wednesday.

Dale Brostrom, director of the Memorial Union, explained the operations of the Union and answered questions put to him by NDSU students.

The question, in regard to an article that appeared in last week’s Spectrum, was asked about the coffee that is served at the Union. Brostrom said that the problem of how to serve fresh coffee and still meet the demand has always been a big issue. He went on to state that a great deal of study and investigation had been done on different coffee makers and procedures and that the way coffee is being served now seems to be the best so far.

Because the patronage of the Union is such that people will not wait for coffee to be freshly brewed, it must be estimated as to how much must be prepared at one time to meet the demand.

Brostrom said he was surprised at the good response to the Sunday noon meal being served at the Union, but was disappointed with the use of the other Union facilities on Sunday.

Brostrom said that not one organization, aside from SUAB, has scheduled events on the Sundays that the Union has been open.

"There is a need for the balance of intellectual, social and recreational pursuits at an institution this size." This was Brostrom’s statement to a question asked about the purpose of the Memorial Union. It is a place to relax from the pace of university life. As to the question about financing, Brostrom said that the Union must make its own way because it receives no appropriations from the state.

Sherry Bassin, Pharm sr, and Student Body President, will discuss the role of student government on a University campus at the student forum tonight.

The forum is open to all students and is held each Wednesday at 7 p.m. in the Lutheran Student Center.

Classified Ad

FOR SALE: Twelv eye old, 17 cubic foot upright freezer as low as $5 down. Budget terms. B. F. Goodrich, 1213 NP Ave. AD 2-7461.

FOR SALE: Good used and repossessed television sets. $30 and up. Budget terms. B. F. Goodrich, 1213 NP Ave. AD 2-7461.

WANTED: Fourth party to share apartment with senior engineering students. Preferably junior or senior engineer. Phone 234-9069.

The NDSU Kappa Delta Pi chapter, national honorary society in education, will host the Moorhead State College Kappa Delta Pi Chapter at their cherry pie exchange, February 15, at the NDSU Memorial Union at 8 p.m.

The Mechanical Engineer’s Liars Club will meet at 7:30 p.m. Wednesday, January 30, in the Student Union Ballroom. All Mechanical engineers and their instructors are invited.

Amateur Radio Society

The Amateur Radio Society will hold a regular meeting Thursday, January 31, at 7 p.m. in conference room A of the Memorial Union.

LSA

Student led Vespers will be at 8:30 tonight. Norm Sethedal will speak. Everyone welcome.

Due to a confused Confusius, the Oriental Party is this Friday at 8:30 (a week further in the future than formerly forecasted). Confusius says everyone’s welcome—that’s correct.

Confirmation! — The Sunday evening program will begin at 6:45.

Short Course

Short Course Students: A representative from the North Dakota Farmer’s Union will be the special guest at today’s Coffee Hour. It will be held at 4 p.m. in Meinecke Lounge. Coffee is free.

Inter-Varsity Christian Fellowship

Father Durkin, director of the St. Paul’s Newman center, will speak at the January 31 meeting. The meeting will be held in Meinecke Lounge at 6:45 p.m.

Young Dems

Young Democrats will hold their election of officers on Thursday, January 31, from 7-8 p.m.

AWS

The Associated Women Students will hold a mass meeting February 7, 7:45 p.m. in Burgum Hall Lounge.

Gamma Delta

Oriental Party is this Friday at 8:30 (a week further in the future than formerly forecasted). Confusius says everyone’s welcome—that’s correct.

Confirmation! — The Sunday evening program will begin at 6:45.

Lincoln Debate Society

The Lincoln Debate Society will meet today from 4:45 p.m. in Administration Building, room 307.

IEEE

There will be a meeting of the Institute of Electrical and Electronic Engineering on Wednesday, January 30, at 4 p.m. in room 214 of South Engineering.

Open Forum

Open Forum to be held at Lutheran Student Center, 7 p.m. Wednesday, January 30. The topic will be: "Does Student Government Have a Role on Campus?"

Bridge Tournament

There will be a bridge tournament Sunday, February 3 from 7-9 p.m. in Meinecke Lounge of the Student Union.

Students wishing to enter are required to register in the Program Director’s office by February 1 at 5 p.m. There is a $5 a person registration cost and prizes will be awarded to the winners.

Students interested in playing pinocchio or what are invited to Meinecke Lounge at this time as it will not be necessary for these people to register.
Silver Opinion Contest Open
To NDSU Coeds

During the months of February and March, Reed & Barton, America's oldest major silver manufacturer, is conducting a "Silver Opinion Competition" in which valuable scholarships totaling $2,050 are being offered to duly enrolled women students at a few selected colleges and universities.

North Dakota State University has been selected to enter this competition in which the first grand award is a $500 cash scholarship; second grand award is a $300 scholarship; third grand award is a $250 scholarship; fourth, fifth and sixth awards are $200 scholarships; and seventh, eighth, ninth and tenth are $100 scholarships. In addition, there will be 100 other awards consisting of sterling silver, fine china and crystal with a retail value of approximately $30.

In the 1963 "Silver Opinion Competition," an entry form illustrates twelve designs of sterling with eight designs of both china and crystal. The entrants simply list the three best combinations to action, and some recent food and nutrition which would help to concentrate our attention and is made to correlate, the interests of the student with the selected patterns illustrated. Scholarships and awards will be made to those entrants matching or coming closest to the unanimous selections of take-alike entries, are from three of the nation's leading magazines.

Miss Connie Preuss is the Student Representative who is conducting the "Silver Opinion Competition" for Reed & Barton at NDSU.

Those interested in entering the "Silver Opinion Competition" should contact Connie Preuss at Ceres Hall for entry blanks and for complete details concerning the competition rules. She also has samples of 12 of the patterns illustrated, and may discuss ideas of Reed & Barton designs so the entrants can see how these sterling patterns actually look.

It looks good, whatever it is! Steve Olston and Larry Rolfstad are enjoying fixing their part of the meal as Liz Bartley and Earl Berkland dish up the muffins in the non-major foods class offered for the first time this quarter.

Unique Food Class Results
From Recent SU Surveys

by Jean Pulkrebeck

Campus surveys sometimes lead to action, and some recent food surveys showed the importance of establishing a new course in home economics this quarter, called Foods and Nutrition 241, a lecture hour with a laboratory period, open to any student of sophomore standing.

The campus surveys, taken over a period of time by students in home economics, showed that the NDSU students have a poor breakfast consumption pattern. Failing to eat breakfast may be due to a lack of money, long distances between eating facilities and living quarters, and to the favorite past-time of "sleeping in" rather than getting up in time for breakfast, or indifference to the important part breakfast plays in our dullness or brightness, and our ability to concentrate, our attention and our general good health.

It is hard to believe that about one quarter of a moderate income is spent for food, which makes feeding a family everyone's job!

Mrs. Myrtle Challey, instructor in foods and nutrition, believes that knowing something about nutrition as it affects the individual and becoming aware of food standards and basic foods and techniques is something men should know as well as women. This course is offered in other colleges or in home economics.

Mrs. Challey has noticed that the class interest is excellent, students are eager, and above all, they are satisfying to work with because of their interest.

Placement Office
Job Interviews

Wednesday, January 30
Green Giant Company of LaSalle, Minnesota, will be represented by Employment Personnel Manager, L. D. Schlaefer. Any student interested in the Green Giant Company may register for a personal interview.

Wednesday and Thursday
January 31 and 2, 1970
Motorola Corporation of Quincy, Illinois, and the Glidden Division of Lake Creek, Manager of Professional Placement, to our campus for the purpose of interviewing superior and graduate engineering students. Glidden Paint Company of Cleveland, Ohio, will be represented on campus by R. G. McKay, Personnel Manager and Dr. Harry Z. Kiefer, Director of Coatings and Research for the company. All senior and graduate students interested in coatings technology are invited to register for personal interviews.

Thursday, January 31
George A. Hormel & Company of Austin, Minnesota, will be represented on campus by Roger W. Lockrem, Director of Management Recruitment and Dr. Harry Z. Kiefer. Students interested in the Hormel Company may register for a personal interview.

Friday, February 1
Johnson Service Company of Milwaukee, Wisconsin, design, manufacture and install pneumatic control systems. The company will send a representative to our campus for the purpose of interviewing senior and graduate students interested in this industry.

Iowa State Highway Department will be represented by Donald Zierath of the engineering personnel office.

Attention
Students interested in applying for summer camp positions should contact the Placement Office for information and assistance in filling applications. Numerous positions are open for counselors and water front directors in various geographical areas.

by Joe Schneider
Tom Beyer, former SAE intramural representative, was elected secretary of the Intramural Board on January 7.

Beyer, who replaces Larry Gabe, former SAE representative, assumed his new position last Monday at the Intramural Board's weekly meeting.

I-M Change
Irvin Kaiser announced to the board a change of policy which had been suggested to him. Kaiser said, "I suggest that we make out only one master schedule and leave it in this room."

He went on to explain that this meant the organizations would not be given a list of the games they are to play in the future.

At present, the organizations are handed a mimeographed sheet of paper containing their organization's games for several weeks in advance.

Under the suggestion, only one list will be published, and this will be shown at the weekly Monday afternoon game. This list will only include the games for that particular week.

Kaiser explained to the men that the purpose of this program is to help eliminate forfeits because representatives forget to check with it.

Discrimination
The Sigma Nu representative addressed the board and asked its opinion on allowing one of his fraternity members to play on the Stockbridge team.

Several weeks ago the Sigma Nu representative announced that his fraternity was dropping their basketball team. The Sigma Nu representative wants to play for Stockbridge and be a member of that now disbanded team.

Tom Beyer asked the Sigma Nu representative if Stockbridge was interested in having them. Beyer's answer was that he needed to talk to his president. Beyer said he would get back to him later. Beyer will address the board and ask for their decision in the near future.

How far can your ideas take you in the new world of opportunity at IBM?

How far can your ideas take you in the new world of opportunity at IBM?

Growth and discovery: The development and application of data processing at IBM open a new world of exciting opportunities for individual career growth. Data processing is producing some of the most far-reaching developments of our age. Each basic advance in technology and application requires new concepts. Ideas—new thinking and new ways to approach problems—are needed. For the individual who likes to discard conventional solutions and find new ideas, there's room to grow in IBM.

IBM offers graduates with Bachelor's or advanced degrees in Engineering, the Sciences, Business Administration, Psychology, Economics, or Liberal Arts assignments in the marketing of information systems and equipment. These opportunities include many new system that is designed to meet the growing needs of business, industry, government, research, education, and space. Each technological advance and each new application can enlarge the scope of your own career at IBM.

A wide range of positions: Rewarding opportunities will exist in more than 190 IBM Sales and Service Offices, located in major cities throughout the United States. Positions include:

- Marketing-Sales: The IBM Data Processing Representative is a consultant to his customers. He calls on customer executives, giving timely information, presentations, and demonstrations for better business management and control through data processing.
- Systems Engineering: IBM Data Processing Systems Engineers are men and women who study customer requirements for the selection and placement of the best approach, define a preferred machine and operational solution, and assist in the implementation of this solution.
- Customer Engineering: The IBM Customer Engineer is a specialist in precision data processing machines and applications. He is responsible for the installation, maintenance, and functioning of IBM's vast line of electronic and electromechanical equipment.

Opportunities for advancement: IBM offers you extensive initial training, both in the classroom and on the job, in the areas of your special interest. This training continues as you advance along a planned career path leading to professional or managerial positions. IBM offers company-sponsored education programs to keep you abreast of developments in your field, and a tuition-refund plan to give you financial assistance for graduate study.

Company-paid employee benefit plans are comprehensive, and include life insurance, family hospitalization and major-medical coverage, sickness and accident pay, and retirement benefits, to name but a few.

See your college placement director to determine when IBM will interview on campus, and make an appointment to see your IBM representative to discuss openings and opportunities at IBM, including our training and education programs, financial assistance, company benefits, IBM's equal opportunity policy, and IBM's commitment to equal opportunity.

SU Gymnastics Team Near Peak

The NSDU gymnastics team will compete in the Concordia Invitational Meet on February 9, at Concordia Fieldhouse.

In the last meet with Concordia, the Cobbers won 59-53. The SU team lead in most events, but lost out narrowly in tumbling.

"Our team has shown surprising development and they are over most of the injuries, ready to compete near to strength in the Concordia Invitational," stated Coach Kaiser.

Teams entering the meet will be Concordia, Winnipeg, UND, Mankato, BSU, and NDSU. Although the competitions will not be so strenuous, having a team that is said to be close to Big Ten caliber.

Coach Kaiser further comments, "Individual competition will be the winning factor and we have a few boys that will be just as good as the best."

The next meet is a tentative date of February 23, against UND.

Parents will be unable to hold their boys individually, but they can attend the meet and support their team. The charts favored the Dragons in this department also.

ADVANCED AEROSPACE PROGRAMS AT DOUGLAS

have created outstanding career opportunities for

SCIENTISTS and ENGINEERS

B.S. degrees or better

Assignments include the following areas:

Servo-Mechanisms — relating to all types of control problems

Electronic Systems — relating to all types of guidance, detection, control and communications

Propulsion — relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics

Environmental — relating to all conditioning, pressurization and oxygen systems

Human Factors — analysis of effective functioning of pilots and space crews, design of cockpit consoles, instrument panels and pilot equipment

JOE BENSON Averaged Earlier Loss;

Fall Prey to Bemidji State

North Dakota State downed the visiting Bemidji State Dragons, 77-62, in a game at the Bison fieldhouse, Friday. Victory avenged an earlier loss by the hands of the Dragons.

The game was played on the pre-game strategy defensive. The Bison was to open with a conference ball game.

The Dragons, including traveling, poor passing and dribbling out of the foul line, were one of the major reasons the Bison was piled by the home standing team. The Bison could not find itself until the final six minutes when it staged a comeback which fell three points short.

Again it was free throws that decided the outcome of the game as the Bison hit for 25 field goals as compared to 24 for Bemidji. The North Dakotans sank 22 of 25 from the foul line while the Beavers sank 21 of 27 in the field.

Wayne Langen tallied 24 points to lead all scorers. Other Bison to hit double figures were Ron McLeod with 18 and Verlin Anderson with 10.

The Bison scored three consecutive baskets to begin the game; Ken Hanson with 21, Dave Sjodahl with 15 and Larry Higgins with 12.

Pollock's

Pitches

by Dave Pollock

On looking back over the last two games, we should have won both.

In the MSC game we did get our revenge, but should have beat them by more than we did. Nonetheless, it was a nice victory for us.

In the Bemidji game, Bentson stated, "We fell out of our stride and basically we didn't shoot well." The Bison threw the ball away 27 times in the game. A rule of the thumb regarding this is that you lose two-thirds of a point for each turnover. Figuring this out, we gave them 18 points. So you could say we threw the game.

Bentson also said that we may have fallen prey to their slow deliberate way of playing ball, and didn't stick to our own style. The Bison outscored Bemidji from the field 25-24 and also lead rebounding 26 to 21. Wayne Langen's shooting was the best for the team. Ace McLeod has been off the last few games but managed 10 points for this highest of the season.

The team showed remarkable improvement at the free-throw line lately. In the Bemidji game we sank 35 out of 35 for a hot 80.

We have been losing our last few games on free-throws and if the Bison keep this up, it will pay off.

Bison Line in Three

Bob Renlock has taken over in field goal accuracy in the NCC with a .556%, hitting 15 out of 27. Teammate Ron McLeod still leads in scoring with an average of 23.5 for six games. The other leading spot the Bison hold is field goal accuracy with a percentage of 43.5.

The area we are hurting most in is the individual rebounding. As the statistics read, the Bison aren't high enough to be listed.

So, we have a weak area and the leading scorer, these must be feeling too much and not rebounding enough. Let's hope we pick them up so as to win the "U" series and come out high in the NCC.

On Gymnastics

The progress and development of the newly re-organized NSDU Gymnastics is somewhat great and I predict we will be proud of them as it continues to develop. The reaction to their demonstrations has always been great. They are working on a few more area demonstrations, the last one being at Casselton, where they were heavily applauded.

They will furnish half-time entertainment at the upcoming "U" series.

Coach Kaiser commented he would like to take Duane Quenette, Dan Dillion and Tom Viek, who are the heavy scorers, to the Northwestern meet; Coach Kaiser was walking out with the trophies. That probably won't happen again, but I think they'll bring a trophy back if they go this time.

Games Coming Up

The Bison have a break until February 1st, when they meet Moorhead at Sioux City, and USD at Vermillion on February 2.

The team has shown remarkable improvement at the free-throw line lately. In the Bemidji game we sank 25 out of 25 for a hot 88.

We have been losing our last few games on free-throws and if the Bison keep this up, it will pay off.

**Physical Education Departments**

**Sponsor Speaker For Three College**

Dr. Catherine Allen, nationally recognized recreation authority, addressed students in the Inter-Religious Council meeting on Wednesday at 7:30 p.m. in Memorial Union.

**Speaking as a guest of the Physical Education Department of the Inter-Religious Council meetings, Dr. Allen stated that young people are the key to the future. They have a vital responsibility the growth of this country and the health world relations. She went on to emphasize the need for understanding today's world and the resulting opportunity.**

During her career, Dr. Allen has worked with many people, one of whom she related with a story she related to a childhood gathering. It concerned a Russian, Edison by name, who traveled Africa building one-room school houses. His story supports the conclusion that all people can perform a service to the world. "Perhaps," the young man, "the African joy in living, our in­nate happiness and laughter, will be the salvation of the world,"

**To Dr. Allen, young people seem to be more serious, more probing, more concerned than ever before.** She cited three areas in which they are being apparent to her. The first one is the Peace Corps, where young people are working, she said, in the name of the purpose of sharing their knowl­edge for the benefit of others.

The second area is in our own country: the South, "It is here," said Dr. Allen, "where right is replacing wrong." The interna­tional conferences, which involve the investigation of other cul­tures by the younger generation, was the third area cited by the speaker.

Another story recounted by Dr. Allen involved the travels of a journalist in Africa, India and the Middle East, in search of an answer to the question: "What education is necessary to the people of the world as the twenty-first century?" To this query, he received the general answers: First, scientific education; second, the understanding of cultures and international societies; and third and perhaps most emphasized, the importance of im­proving moral and spiritual values.

Dr. Allen believes that he or­cipation, concerning health, phys­iical education and recreation, is of great interest. "All of these things contribute to the development of human beings," she said.

"The human being is actually one of three different worlds," concluded Dr. Allen, "the self which in­tains the abilities and talents of each person, the spirit of commu­nity, and the world of nature. She remarked that people should strive to improve their strongest world and to develop this one as well."

Closing, Dr. Allen emphatically stated that people should strive to develop the mind and body, and develop the spirit.

**Correction**

In the last issue of the Spectrum, it was reported Dick Kasper, manager of Varietart Marly, could not release the class ring made by L. G. Balfour Company. It has informed the Spectrum that Varietart Marly handles rings as a favor to Student and receives no commission on the purchase. He said he is willing to handle any class ring approved by Senate as a farce to that body.

**Personal Solicitations Continue Through Week**

Personal solicitations for the Campus Chest Drive are under way and will continue through the rest of the week.

Solicitors are working to reach the $3,000 goal They will be do­ing the majority of the remaining solicitation tonight and Thursday night between the hours of 6:10 p.m. The Campus Chest Drive committee encourages the students to be at home at these times.

All solicitors can be identified by the bag they wear marked NDSU Campus Chest Drive. Checks for donations should be made out to "Campus Chest Drive." Commissioner Bill Findley, drive co-chairman, answered the ques­tion of how much to give with this: "The little boy cried be­cause he had no shoes until he saw another boy who had no feet."

A student should give as much as he can. I feel that the student should be able to give up a movie or a haircut for a week."

Progress reports for the drive are available on the "thermometer" in the Office of Inter-Religious Council.

The percentages for the organizations involved were approved at the Thursday meeting. They are as follows: March of Dimes, 25 percent; Opportunity School, 15 percent; Salvation Army, 10 percent; National Society of Professional Engineers, 15 percent; the Crippled Children's Home, 40 percent.

The Charity Ball will wind up the events of the drive Saturday night.
