Half-Million Dollar Addition Planned For Memorial Union

Final plans are now being drawn up for a half-million dollar addition to the Memorial Union.

According to Dale Bretón, director of the Memorial Union, bids are to be called either the last week in April or the first week in May. If the bids prove to be favorable, construction should begin three to four weeks after the bids are opened.

Extensive Remodeling

The project calls for an increase of 40,000 square feet of floor space through the addition of new buildings and extensive remodeling. Plans call for an increase in basement size and an expansion to the east, up and over the present wing. The outward expansion will also include a two-story structure out to the edge of the present terrace.

Registration fee increases by $25, $25, $25, $25, $25.

The North Dakota legislature approved Thursday in Dickinson the North Dakota Board of Higher Education.

The Board's action will help to close the shortage of $12.6 million in the college budget as requested by the nine state-supported colleges and universities. The legislature approved a budget of $243 million for the institutions.

Effective in August

The fees will become effective August in time for the fall semester.

The resident fee will increase $20 to $60 a quarter. Non-residents will have to pay $50 more to the college board to discuss the future of the teachers college there.

Mead was directed to survey room rental charges for on-campus housing and teaching loads of faculty members.

Chairman Outlines

The board agreed to set some definite policy on how many classroom hours should be required of instructors.

Several course changes were presented by the colleges and the board indicated it will be conservative in granting additional hours.

The board said new courses will be allowed if they are in fields where there is a shortage of trained personnel in North Dakota and if they would mean training more college faculty members.

The next two board meetings will both be in Grand Forks. The site of the board for April 25-26 and May 30-31.

The board is expected to meet at the colleges and relieve their military obligations. They were told that the Air National Guard is in need of qualified pilots and navigators and that they will be having their last big push for recruitment at the end of this month.

The end of the present flight training program is drawing near, and members of the ANG will be in the three campuses in the next week to offer a chance to enlist in their corps. Guard officers emphasized the special opportunities available for junior service men.

The NGT will visit NDSU tomorrow in an effort to enlighten stu- dents of the possibilities for becoming an officer in the Guard.
No Need For Subtleties; Staff Seeks Controversy

Students are stupid. . . .
Professors are lousy. . . .
Student Senate is rapidly becoming a joke. . . .
So is the Student Conduct Committee. . . .
Minard Hall is a fire trap. . . .
Park your car in quicksand. . . .
Drama students are finky. . . .
Dear hours are established on a pre-historic basis. . . .
The athletic situation is abominable. . . .
And there are too many suitcases on campus. . . .
The Health Service has a high death rate. . . .
The parking system is full of Bircher. . . .
President Khristchev needs metracal. . . .
JFK is the Attorney General's pawn. . . .
Underclassmen shouldn't be allowed to have cars. . . .

Now that we have done our best to be controversial, will someone please respond with a violent letter-to-the-editor. If any individual or group feels slighted because we failed to extend the proper recognition above, let us know. . . . we'll be happy to make some arrangements.

In any case, we urge you to write! Be sure to type letters, double-space and sign them. — Ed.

Grounds Need More Care

(Editor's Note: A glance around our campus now that the snow is gone should remind us that the following letter by Dr. Stevens is very appropriate.)

To the Editor:

Would you like to see the campus look better for Sharivar, commencement, and all the special occasions in between? Let's give it a little everyday care. Use the walks and avoid muddy shoes whenever possible. Give the grass a chance to recover from its winter abuse. Just a little thought by everybody would make a great difference.

Paths across corners are not necessary and they create a bad impression for visitors. And pour waste paper in containers, not on the grass, walks and streets.

O. A. Stevens

The Spectrum

The Spectrum is published every Wednesday during the school year at Fargo, North Dakota by the NDSU Board of Publications, State University Station, Fargo, N. D.

Subscription rate $1.00 per term.

The race for student offices is now over and all past positions are filled with the duly elected officials.

Yet the signs of the campaign still linger in the hearts and minds of all of those who took an interest in the race. Unfortunately, these signs still linger on the trees, walls, and grass, reinforcing the look of the campus.

It saddens me to think that those candidates who ran for office were really not qualified, and that they were irresponsible. By taking down those posters, banners, etc. they do no service to the campus and certainly do not reflect on those whose names they bear.

I would also like to suggest that in the future, regulations should be made concerning the time these signs are to remain, and the methods to be used to affix them to the trees. As anyone is supposed to know, the wood of a tree does the tree no special good, and can lead to a leafless dead scar on the campus landscape.

Let's show a little more respect for the landscaping done on the campus and try and keep the place looking more like a campus than a kindergarten bulletin board. Respectfully,

Don Homuth, A.A.

Letters to the Editor

Signs Remain; Election Over

To the Editor:

The race for student offices is now over and all past positions are filled with the duly elected officials.

Yet the signs of the campaign still linger in the hearts and minds of all of those who took an interest in the race. Unfortunately, these signs still linger on the trees, walls, and grass, reinforcing the look of the campus.

It saddens me to think that those candidates who ran for office were really not qualified, and that they were irresponsible. By taking down those posters, banners, etc. they do no service to the campus and certainly do not reflect on those whose names they bear.

Cass Doctors Well Pleased

To the Editor:

The physicians of Cass County were very well pleased with the excellent turnout of the Type I Polio Clinic, which was held on February 1st. As you know, our next clinic offering Type III will be equally as successful, so that full protection against all three types of polio can be achieved at the completion of our final Type II clinic, which will be held on May 30th. It should be noted that the physicians and their families as well as students and their families participated in taking the vaccine.

This time of the year there is a high incidence of various infections present which cause a wide variety of symptoms. As one would expect, many such illnesses are brought to the campus and about the same time we had our polio clinic. Frequently, the number of calls received from many persons who had taken the vaccine, there was apparently the question in mind as to whether the vaccine could be responsible for these symptoms. The public can be completely reassured in any symptoms that developed following ingestion of polio vaccine was purely coincidental. No one who has had the vaccine taken will produce symptoms of any kind.

D. G. Lawrence, M.D.
City Health Officer

The Second Polio Clinic

The second polio clinic, offering Type III vaccine, will be held on April 3. The location and time will be identical with that of the first clinic; from 36 p.m. at the Fieldhouse.

If you have not taken the Type I vaccine, you are nonetheless urged to obtain the Type III. There are no adverse effects.

by Russ Maring

Is maintenance and upkeep being overlooked in some phase of our campus during the rapid expansion program that our University is currently experiencing?

As you drive around our campus, you will undoubtedly see the construction or completion of many new buildings. This is an ideal situation; it is very typical of a growing institution. As our student population grows, the physical plant must also grow.

There are two basic factors the administration must face when dealing with a program of rapid expansion. The first is the construction of the buildings; and the second, equally as important, is the maintenance of the physical facilities already present. Although growing pains produce a need for new buildings and improved grounds, we should not overlook the importance of maintenance and upkeep.

It is this writer's opinion that the Buildings and Grounds Department on our campus has adapted reasonably well to an expansion program. However, it is possible that they have overlooked our parking lots. Minard, Memorial Union, and the Fieldhouse parking lots are the biggest "eye sores" on our campus. Melting snow and early rains render them practically unusable in the spring. This problem also continues during the summer when students enrolled in our various summer sessions. Our parking lots appear to be under water during the first six months of the year.

There appears to be no logical reason for this situation. Our University has the proper equipment, and considering the amount of money received from parking stickers and fines, should have sufficient revenue to improve our parking lots. A hard surface, such as blacktop, would be the most ideal solution to the problem. However, lack of revenue prohibits such a large expenditure. In lieu of this fact, it would appear that the less expensive method, which entails depositing gravel and leveling, would be in order.

Controversial Speakers Are Major Campus Issue

The American Civil Liberties Union (ACLU) reports that the right of university students to listen to controversial speakers has become a major issue on several major campuses.

On one campus, the University of Washington's, the storm entered around Benjamin Davis, national Communist party official. On another, the University of Buffalo's, an injunction against the appearance of Herbert Aptheker, member of the Communist party's national committee. A debate, whose participants were to include members of the Right, was tabled by University of California officials.

The ACLU is interested in these and other cases because it supports the right of intellectual freedom. "The ACLU not only fights to point out what the problem is, it fights to point out what the problem is," said a member of the American Civil Liberties Union.

In Minnesota, within the last year, we have had our own campus tempests over the right to hear controversial speakers. That right was upheld in the case of Communist Davis at the University of Minnesota, and in the case of George Lincoln Rockwell, American Nazi party leader, at Carleton College.

In both instances, we think, the proper decision was made. In both, too, we believe that the cause championed by the speakers suffered actual harm as a result of the decision.

Each case involving student activities must be judged separately, of course, on its merits. But in all of them it should be remembered that we think that the university that will not permit the interchange of ideas, which frowns on the testing of truth in the relentless fires of debate, fails to meet the basic challenge of higher education.

The Constitution's guarantee of free speech is not only a bulwark of democracy, it is also a bulwark of academic freedom. As the nation needs a wide variety of ideas, so does it need equally wide intellectual horizons on its campuses, and we are glad the ACLU is fighting for them.

— Minneapolis Morning Tribune

Deadlines . . .

This paper's deadlines are for all of you, reporters, fact men, administration too! Regardless of the position you hold, the deadlines are those which you've been told reporters cover their beat. And as for the others who wish to speak, Your stories or letters written "off the cuff" are due Thursday noon. Have I said enough???

DAG
dents that they are necessary the way they went next. The popular view of the conception among alumni seems to be expressed by one who sat beside this writer at last year's homecoming banquet. When he said, "Why doesn't someone get these things off the field?" there was no one who disagreed. The ball cars, after all, are as necessary to the students of this school.

Fitting Story

Dick Johnson, Sports Editor of the Dakota Student, wrote an impressive column last month. It could apply to our Rahjah Club.

Johnson found a farmer who would take the machine off his hands for the modest sum of $300. However, Johnson had the privilege of owning the machine combine for about two days.

Peer Poisons

A current article mentioned under the country across the width to clean up the morals of the people of the state of drunkenness.

That is why they are drinking.

The state of drunkenness. Do with their drinking.

One of Prout's student leaders, and the Rahjah Club.

The members of this school.

Rahjahs quickly took the offensive.

Picked On

Several of our classmates confronted this writer asking why such a letter was allowed to be printed. It was totally unfair to their reputation to have some of them branded as cowards and state of drunkenness.

We appreciate the fact that some stories of this school.

The Rahjahs have come under criticism from students of this school. In the last two years, two of the prestige which used to be the Rahjahs. Now they have a bad repu-

tation because they are associated with sports functions.

Most of the derogatory remarks which the Rahjahs have to do with their drinking. Their drinking habits are frequently viola-
ted which is frequently violated by a couple of the students.

Their answer to the charge that they drink too much is that it is impossible to get in front of the student body and make a fool of themselves.

One could think that member taking a group of people which they had been asked to make the student body in school clubs.

However, it appears that these are minor qualifications being applied to their drinking habits.

For instance, a prospective member can drink if he has been asked that when he is invited to the Rahjahs.

If he has been asked, his membership, the ques-
tion of drinking has been asked. A favorable answer from the Rahjahs.

Telltale Jackets

Whereas fraternity members are famous for their lack of jackets, the Rahjahs do not make a rule out of this. Thus it is that the rules which they have set themselves are not followed by them.

The Rahjahs do have a jacket policy in their line, but they don't mind being seen in them. The Rahjahs.

The problem has got so out of line with the Rahjahs.

If a man is seen in a jacket, he is 

A man is seen in a jacket.

He is not supposed to see the yellow gaudy men patronizing establishments, announcing by their jackets that they go to North Dakota.

No, it's not a flying saucer. Inside this glass dome atop the library rests a camera which photographs the horizon and weather conditions each half minute. Originally set up in 1958 as part of a two-year project for the International Geophysical Year, the strange-looking device is still operating, said H. Dean Stallings, librarian. A man must change the film each two weeks.

Reading Course; Second Time Around

A course in Reading Improvement is being taught again this quarter by the North Dakota State University Counseling and Testing Department.

There are still several openings in the program according to Verne W. Nelson, assistant director of Counseling and Testing.

The course, given by the department and located in the basement of Old Main, carries no credit.

The program consists of two hours a week with a reading machine utilizing a speed controlled filmstrip. There is no charge for the course which is offered on a first come, first served basis.

Nelson said anyone interested in improving their reading skill is welcome to see him in his office in the Counseling and Testing Department, at which time scheduling of the program can be arranged as long as openings exist.

The course will accommodate twenty students.

The Reading Program was offered for the first time during the past winter quarter.

A Reading Skill Test

At the beginning of the program, each student takes a reading skill test to determine his rate and level of comprehension. The scores from this test tell the student at what level to begin individual work with the filmstrip machine, which is designed to improve both reading speed and comprehension.

Each of twenty students who participated in the program during the winter quarter filled out an evaluation sheet of the course, as well as an individual progress sheet during the quarter. A complete evaluation of the overall program is being made with the aid of the student report and progress sheets. The details of the report are not available at this time.

Ag Grant Awarded Sastroy

A United States Department of Agriculture grant has been awarded to G. M. Sastroy, a student from India working on his doctorate degree, according to President H. R. Albrecht.

The grant provides for equipment and a two-year fellowship which will be employed by Sastroy in his study of the utilization in coating of two new oils in order to find a new product for surplus seeds.

One oil comes from lesquerella, a wild plant in the plains, which is similar in characteristics to oil in resins, coatings and foams, according to Sastroy.

Original research on this project was initiated by the USDA western regional research lab in Albany, Calif. Dr. A. E. Rhoades, chairman of NDSU’s coating department, has also done research on the dimorphotheca methods.

Missed A.F.R.O.T.C.?

These letters stand for Air Force Officer Training School—a three-month course for those who realize they want to become Air Force officers, but don’t have enough school time left to enroll in AFROTC.

We prefer our officers to start their training as freshmen, so we can commission them directly upon graduation. But right now we’re accepting applications for another fine way to become an Air Force officer—OTS. We can’t guarantee that this program will still be open a year or so from now.

As an Air Force officer, you’ll be a leader on the Aerospace Team, serving your country while you get a flying headstart on the technology of the future. The U.S. Air Force sponsors one of the world’s most advanced research and development programs—and you can be part of it.

If you’re within 210 days of graduation, get more information on OTS from the Professor of Air Science.

U.S. Air Force
Several Faculty Changes Announced;
Whitman New Botany Department Head

For recent changes in universi-
ty faculty positions were an-
ounced by President H. R. Al-
bro during the quarter break.

Whitman, Botany Chairman

Dr. Warren W. Whitman, pro-
ducer of botany, will become
chairman of the department on July 1. He succeeds Dr.
Emery Anderson, who will retire
at the end of the department after
serving in this position for over
fourteen years.

Helgeson's retirement as chair-
man of the department is the re-
flect of a new retirement policy
for administrative personnel adop-
ted by the State Board of Higher
Education, which will become ef-
fective this July. He will continue
his teaching duties in the depart-
ment.

Under the new board policy,
administrative personnel with
academic rank must retire from
their administrative position at
age 65 with a right to remain un-
til he is a teaching or research
position which is non-administra-
tive.

De Whitman is a native of Far-
Go and received his B. S. and
M. S. degrees from NDSU. He re-
ceived his Ph.D. from the Univer-
sity of Wisconsin and began work-
ing at the NDSU Experiment Sta-
tion in 1938 as an assistant botan-
it.

Parsons Acting Chairman

Dr. Jesse Parsons, associate pro-
fessor of bacteriology, was named
acting chairman of the department
of bacteriology to replace Dr. A.
Paul Adams, who is returning to
his native Utah to work for the
Federal Government.

Parsons will assume his new
position April 1. He came to NDSU
in 1949 as an instructor and was
promoted to assistant professor in
1950 and to associate professor in
1957. A native of Illinois, he re-
ceived his B.S. from Illinois State
Normal University and his M.S.
from the University of Wisconsin.

Two New Staff Members

James Irving McDowell has been
named assistant professor of agri-
cultural economics and assistant
agricultural economist to replace
Emery Anderson who is working
as an extension agent in Montana.
McDowell will begin his new
duties March 1. He comes to
NDSU from Oklahoma State Uni-
versity where he was a research
assistant while working on his
Ph.D. degree. He received his B.S. from Colorado State and his
M.S. from Oregon State where he
also served as a research assis-
tant.

Harley R. Swanson will begin
his new duties as assistant county
agent in Grand Forks on March
15. Swanson replaces Ronald A.
Uleva who was named agricul-
tural representative for the Jame-
town National Bank.

Swanson is a native of Brecken-
dridge, Minnesota, and received his
B.S. degree from NDSU last June.
He was a research assistant in
botany for two years at NDSU. He
went to the University of Illinois
last summer where he was a re-
search assistant in agronomy.

College Success: 'Matter Of Motivation'
Comments NDSU Pharmacy Professor

by Mary Brehm

Students who don't read their
exam questions are the pet peeve
of Dr. Max A. Heinrich Jr., pro-
fessor of pharmacology.

When asked if pharmacy was
harder than any other curriculum
on campus, Heinrich replied no.
He went on to say that those who
do well in pharmacy may not do
well in arts and science, for
example, and vice versa. Different
types of individuals and interests
are involved in finding the course
easy or hard. "It's a matter of
motivation," he concluded.

"From my point of view, it looks
as though he (the student) has to
be driven. Generally they'll do
what they have to do and what's
expected of them," Heinrich said.
"If a student wants to get B's but
could get A's, he'll get B's be-
cause he'll only work hard enough
to get what he thinks he has to
get." 

A native of Pennsylvania, he at-
tended Philadelphia College of
Pharmacy and Science. His college
career there was interrupted by
World War II when he volunteered
duty with the Navy. He re-
turned to get his B.S. and M.S.
degrees there. From Jefferson
Medical College of Philadelphia he
obtained his Ph.D.

At University of S.D.

Before coming to NDSU in 1956,
he taught at the University of
South Dakota in the medical
school. The study was in pharma-
cology and he was teaching grad-
uate medical students.

Blood pressure in the pulmonary
arteries is the current research
project for Heinrich. He said that
blood vessels in the lungs act dif-
ferently and respond differently to
drugs than other blood vessels in
the body. Testing had been done
using the "open chest" method.

Closed Chest Method

Heinrich is using a "closed chest"
method. The difference between
the two is as the names imply.
The chest is opened in the open
closed chest method but not in the
other. Dr. Heinrich feels that the read-
ings taken when using his method
are taken under more normal con-
ditions. His findings are different
from those which have been re-
ported before, and he thinks this is
due to the different methods
in taking the blood pressure of the
arteries.

He met his wife, Bette, through
the church that he was attending
in Philadelphia. A friend of his
had met the girl whom he was
going to marry at this church, and
advised Heinrich to attend the
same one.

The Heinrichs have three chil-
dren: Paul, ten; Joyce, almost
nine, and Karl, four.

Does a man really take unfair advantage of women
when he uses Mennen Skin Bracer?

All depends on why he uses it.
Most men simply think Menthol-Iced Skin Bracer is the best
after-shave lotion around. Because it cools rather than burns.
Because it helps heal nicks and scraps. Because it
helps prevent blemishes.

So who can blame them if Bracer's crisp, long-lasting aroma
just happens to affect women so remarkably?

Of course, some men may use Mennen Skin Bracer because
of this effect.

How intelligent!
Many scenes like the one above can be expected when SUAB presents its fifth annual bridal show on April 4. Various fashions will be featured, including both casual and formal wear.

"College Mirror" To Be SUAB's 5th Annual Show

The bustling of wedding garments will be heard throughout the Memorial Union on April 4, as the Student Union Activities Board presents its 5th Annual Bridal Show.

The theme for this year's show will be "The College Mirror," featuring styles starting with casual dress, including beachwear, dating, semi-formal, and ending with formal dress.

Sponsors from Fargo are: The Bridal Shop, Strauss Clothing, and Flowers by Marty. The Bridal Shop will furnish a commentator and organist to accentuate the colorful clothing modeled.

There will be ten girls and eight men modeling in the show. One couple will lead off each style. Models will enter from back stage and will walk down a narrow ramp to a circular show place to display their apparel. The commentator will give a caption and description of each outfit while the organist will fill in with appropriate background music.

Everyone is invited to attend and refreshments will be served. There will be two presentations; one in the afternoon at 3:15, one at 7:45 in the evening. There is no charge.

Get Lucky

Play "Crazy Questions"

[Based on the Alligator book "The Question Man"]

50 CASH AWARDS A MONTH. ENTER NOW. HERE'S HOW:

First, think of an answer. Any answer. Then come up with a nutty, surprising question for it, and you've done a "Crazy Question." It's the easy new way for students to make loot. Study the examples below; then do your own. Send them, with your name, address, college and class, to GET LUCKY, Box 64F, Mt. Vernon, N. Y. Winning entries will be awarded $25.00 bonus. Enter as often as you like. Start right now!

LUCKY STRIKE

Get Lucky

the taste to start with...the taste to stay with

THE QUESTION IS: WHAT DO YOU GET WHEN YOU REQUEST A PACK OF THE MOST POPULAR REGULAR-SIZE CIGARETTE AMONG COLLEGE STUDENTS? Right! You get Lucky; you get the fine-tobacco taste of Lucky Strike. This great taste is the best reason to choose Luckies... the big reason why Lucky smokers stay Lucky smokers. So get with it. Get Lucky today!

North Dakota State University's Inter-Religious Council took what is hoped will be the first in a series of annual trips during the recent quarter break. Included in the group's agenda were visits to the United Nations, tours of the White House, Capitol, Supreme Court, and meetings with several officials of North Dakota and Minnesota.

Flowers by Marty. The Bridal Shop will furnish a commentator and organist to accentuate the colorful clothing modeled.
Merchandising Another Varied Career For Home Ec. Graduate

by Jean Pulkreboek

Finding the family and furnishing the home involves millions of people working in several great areas. Super Economists will find opportunities in such areas as buying, selling, consumer relations, fashions, styling and design, and research.

Merchandising

Merchandising embraces the promotion and distribution of goods. Home Economics training should enable you to interpret the wants and needs of the buying public and maximize one's value to a merchandising organization. Retail and mail-order houses, resident buying offices are among those offering opportunities in merchandising. Experience in a retail store contributes to an over-all realization of consumer problems. Such a background can be valuable for advancement in retailing or as experience for future jobs in other areas of home economics. The beginner will probably start as a salesperson, for a limited time, to learn techniques of selling in a stock room or some job requiring little or no merchandising experience. In any store, a young home economist will probably be competing with persons having less formal education, but years of practical experience. Those interested in merchandising will find it valuable to work part time and during vacation periods at almost any store job. There is no better way to learn to handle the buying public with diplomacy and to learn what people really like. Many stores offer special training programs. Advancement may come more rapidly from participation in such a program.

Fashion and Textiles

Fashion permeates the whole area of textiles. The word "fashion" is used in the sense of styling and design. Manufacturers and distributors of textiles, patterns, clothing, and dress accessories employ designers or buyers who buy new style suggestions. You as a home economist are trained for the background of a stylist or consultant who may be employed by manufacturers and distributors. With this article and the ideas which have been presented to you in past articles, it is hoped you will realize that there is a definite reason for calling home economics, "The Career With A Thousand Job Titles."

Skip the sulphur and molasses—
get a CHEVROLET SUPER SPORT

Chevrolet Super Sports have a charm that soothes your springtime yen for romantic adventure as fast as you can slip into a bucket seat. (Especially the Impala’s, with its adjustable new Comfortilt steering wheel.) Front bucket seats are a great start, but Super Sports also feature plush all-vinyl interiors, special interior-exterior trim in tasteful touches, and a veritable feast of goodies we call performance options*. Chevrolet and Chevy II Super Sports invite adventure in convertible or coupe form. That same Super Sport zing applies to the Corvair Monza Spyder, very breezy with its air-cooled 150-horsepower rear-mounted engine, and 4-speed shift.* Ditto for the new Corvette Sting Ray, a magnificent thoroughbred among pure-blood sports cars with not a single sacrifice in comfort. Both Spyder and Sting Ray come in convertibles or convertible style. All Chevrolet Super Sports are like spring days—you’ve got to get out in them to savor them. So catch yourself a passing sephy and wait on down to your Chevrolet showroom.

*Optional at extra cost.

Modeling this lovely gown is Bunny Forness, one of two active chapter members to participate in the eleventh annual Kappa Gamma alumni sponsored style show. The proceeds from the show, which took place in Memorial Union last week, will be used primarily for a scholarship to one deserving young lady, and for rehabilitation and charitable purposes.

Campus Organizations Hold Elections, Initiations

Over the past several weeks, many campus organizations have held their election of officers, and initiations. Here are some of the results:

Alpha Gamma Delta
Mary Nelson, president; Janice Dunlop, first vice president; Kathy Spitzer, second vice president; Joan Wyngarden, secretary; and Kathleen McNulty, treasurer.

Alpha Gamma Rho
Gary Puppe, president; Mike Horner, vice president; Lannis Bergsgaad, secretary; Stuart Bond, Horner, vice president; Lannis Lorentzen, IE jr; Lanier Oxton, AAS soph. Merritt Flynn was initiated as faculty advisor.

Alpha Tau Omega
Roman Klein, president; Jim Vorachek, vice president; John Bodmer, treasurer; Duane Bender, scribe; Erling Rasmussen, keeper of the annals; Roger Mickelson, pledge trainer; Leo Vahna, social chairman.

Kappa Kappa Gamma
Bunnie Forness, president; Meriel McLaughlin, first vice president; Maggie Swanston, second vice president; Moma Larson, secretary; and Dorothy Sholts, treasurer.

Kappa Phi
Dennis Kaldir, president; Dick Lindseth, vice-president Mike Berg, secretary; Phil Wattles, treasurer; Duane Schoeppeph, social chairman; Ned Minger, house manager; Gary Greenfield, pledge trainer; Adolph Ilke, historian.

Renaissance
Carol Trieglaff, vice president; Mike Hett, president; Mike Puppe, president; Mike Hanke, pledge chairman; George Flaskerud, reporter; and Charles Lindtwed, corresponding secretary.

Alpha Phi Omega
New pledges: James Fasching, AAS soph; and Collin Rognlie, AAS soph.

Gamma Delta
Charles Franklin, president; Carol Trieglaff, vice president; Eldon Joers, treasurer; Marlene Krenz, secretary.

Gamma Phi Beta
Suzanne Jenson, president; Betty Bitterman, first vice president and social chairman; Murtha Rate, second vice-president and pledge trainer; Maxine Jordheim, membership chairman; Karen Under, recording secretary; Jacqueline Boelter, corresponding secretary; Jane Conmy, treasurer; Carol Berg, house president.

Kappa Delta
Patricia Bernd, president; Marlette Anderson, vice-president; Kay Ovesen, secretary; Kathy Butler, treasurer; Georgia Hohasson, assistant treasurer; Janette Junten, editor; and Virginia Nelson, assistant treasurer.

Kappa Kappa Gamma
Bunnie Forness, president; Meriel McLaughlin, first vice president; Maggie Swanston, second vice president; Moma Larson, secretary; and Dorothy Sholts, treasurer.

Kappa Psi
Bunnie Forness, president; Meriel McLaughlin, first vice president; Maggie Swanston, second vice president; Moma Larson, secretary; and Dorothy Sholts, treasurer.
Summer School Program Revisited; Oriented To Three-fold Purpose

The present summer school system at North Dakota State University has undergone a revision which will go into effect this summer. The old system has been replaced by the State Board of Higher Education. The new system will be under the direction of a council consisting of the deans of the six colleges, the director of the graduate school, and Dr. Hale Arness, former director of the summer school sessions.

The new program is designed to give benefit to graduating high school seniors who wish to get a head start on their college education. The effectiveness of this type of program has been proven in other parts of the country. Out of 224 last fall, 224 had college credit from previous work. The 224 qualified for over 500 courses on the upperclassman level.

The new program here at NDSU is student oriented with a three-fold purpose: enrichment, acceleration, and supplementation.

The student specializing in a single profession such as pharmacy will now be able to attend summer school and enrich his education through study of course work in a cultural vein.

By making it possible for the student to finish his undergraduate work in a shorter period of time, the new program can open the door to graduate school sooner. This will allow the entering student to finish his education and institute his earning power at an earlier age.

The new program also will make it possible for the student to supplement his major and minor field of study with courses that he could not work into his schedule during the regular school term. This should be a boon to those who wish to attain more than the minimum number of hours required for a major or a minor.

In addition to the obvious benefit of the program, it also gives the freshman student a chance to orient himself to college work before undertaking a full schedule of class work in the fall.

The new program also will make it possible for the student to finish his undergraduate work in a shorter period of time, the new program can open the door to graduate school sooner. This will allow the entering student to finish his education and institute his earning power at an earlier age. Retiring Commander, Ronald McNeese, installs the new officers of North Dakota State University's Vet's Club. Pictured above, right to left, are: McNeese; new officers Dennis Haugen, treasurer; Frank Vaplon, secretary; Bruce Bartch, commander; and Bernard Thompson, chaplain. Not pictured is the new vice-commander, John Fritz.

The new members of the executive committee are: David Aaas, AAS jr; Keith Bjerke, AAS jr; Con Davis, ag fr; Joseph Ehner, AAS fr; and Dale Trenbeath, ag fr. This committee is responsible for planning and programming social events and entertainment at meetings, coordinating with the University intramural board on club athletics, keeping in close contact with the Veteran's Administration, and for publicizing club activities.

**Former Servicemen's Club**

The NDSU Vet's Club is an organization of former servicemen. To qualify for membership, one must be a bona fide student at NDSU, have served 90 days or more on active duty with the Armed Forces of the United States, or its' Allies, and shall have been discharged or separated under honorable conditions.

The purpose of the club, according to its constitution, is to provide a central medium for discussion of material problems, to provide mutual assistance to veterans on the campus, and to provide a means for social and recreational activities.

Advisors to the Vet's Club are H. Dean Stallings, librarian and professor of library science, and Ernest Hoaby, assistant professor of electrical engineering.

**Herberg's Works To Be Studied**

A study group in the works of Will Herberg, noted social philosopher, who will speak on the NDSU campus April 18-19, will begin two sessions in Meinecke Lounge of the Union, Wednesday, 27th at 4 p.m.

Under the leadership of Dr. Cleland, the group will pursue Herberg's social philosophy, particularly as it is expressed in his book, "Protestant, Catholic, Jew."

All interested faculty and students are invited to attend sessions which will continue through a three week period.

---

**For Your Every Entertainment Mood**

**You'll Find the Records You Want**

Bruce Bartch, AAS soph, was recently elected commander of the North Dakota State University Veteran's Club. Bartch replaces Ronald McNeese, AAS sr, as head of the club, and will serve a one year term in office.

Other new officers elected were: vice commander, John Fritz; Pharm soph; chaplain, Bernard Thompson, AAS jr; secretary, Frank Vaplon, EE fr; and treasurer, Dennis Haugen, ag fr.

This committee is responsible for planning and programming social events and entertainment at meetings, coordinating with the University intramural board on club athletics, keeping in close contact with the Veteran's Administration, and for publicizing club activities.
Japanese Film, "Rasho-mon," To Be Shown Here Tonight

"Rasho-mon," a Japanese film classic and winner of an Academy Award in 1951 as the Best Foreign Film, will be shown tonight in the Union Ballroom at 7:30 p.m.

The film is the second in a monthly series being offered by the Student Chapter of the American Institute of Architects. Tom Selland, Arch. Jr., and chairman of the Film Committee, said admission price will be $1 per person and $1.50 for couples. The group's first offering was "Citizen Kane," with Orson Welles.

Also awarded the Grand Prize at the Venice Film Festival, "Ra­sho-mon" was reviewed in the Saturday Review as "...a great film...its editing structure, camera work, and acting challenge film achievements in any country or period." The dialogue is Japanese, with English subtitles. The story is of a brutal murder which was perpetrated 1200 years ago at the main gate to Kyoto. The crime is enacted four times, resulting in four different stories as told by the people involved in the slaying.

Other reviews have described the photography as almost ghostly at times, and have credited the director, Akira Kurosawa, with revealing his characters through clever details and devices in a way that suggests the dark per­versities of man.

Along with "Rasho-mon," two shorts will be shown. "Fiddle De Dee" and "Ilen Hop" are both in the realm of experimental cinema. Artist Norman McLaren has used the film medium to translate sound into light, as his colors and music work. The Plastic Soldier, the film medium to translate sound into light, as his colors and music work. The Plastic Soldier, the film

**THE BELL TELEPHONE COMPANIES SALUTE: DON OLSEN**

Don Olsen (B.S.E.E., 1959), Sales Manager for Data Com­munications in Wisconsin Telephone Company's Madiso­n Office, coordinates all data communications projects in the entire Southern Division. He works with company sales­men and customers throughout his area to uncover new data service applications.

Don previously was a Communications Consultant helping business customers pay up profits by making better use of telephone services. His performance earned him the opportunity to attend the Bell System Data Communications School and won him his latest promotion.

Whether guiding company craftsmen, or supervising the installation of transmission equipment, or working with customers, Don has capably handled a variety of challenges.

Don Olsen and other young engineers like him in Bell Telephone Companies throughout the country help bring the finest communications service in the world to the homes and businesses of a growing America.

Patronizing another sort of placement office during registration are these gents as they make arrangements for ROTC. The one smiling face in this crowd is obviously expecting an announcement that all sections are closed.

Last Con Exits 'Rock'; Says, "Alcatraz No Good"

UPI—The answer to the question most probably circulating the nation's penal institutions for the past few months came over the United Press International news service last week.

Frank Weatherman was the last man to leave Alcatraz. According to the report, the cell blocks on the "Rock" stand empty. The tin cups don't rattle in the mess hall, the towers are deserted, the big search lights are off. The "Rock" is closed.

The 29 year old Weatherman said upon leaving the legendary pokey, from which it is said no one has ever escaped, "Alcatraz was no good." Asked how it felt to be the last regular tenant off, he said, "Good. Good for me, good for everyone."

The final resting place for some of the most notorious "heroes" in American crime annals was shut down because it would cost the government five million dollars to repair the deteriorating buildings. All convicts, among their own numbers respectfully called "guests," have been transferred to other institutions.

Frank Weatherman will, no matter what new housing complex he is transferred to, undoubtedly demand a unique claim to respectability from fellow inmates.

State University recently asked if they couldn't start a counterguerrilla outfit of their own.

"The school frowned on that idea," laughed Colonel Edwin Clapp, professor of military science. "But it does serve to illustrate how these platoons have contributed toward the rising stature of ROTC on the campus.

North Dakota State Junior and Senior cadets, including some Air Force ROTC students, also conduct weekly meetings. In addition, they conduct various problems outside, such as a patrol raid, and stage two overnight problems at the National Guard rifle range and recreation area in nearby Valley City.

Female Guerrillas?

These platoons have taught fire and spread throughout the nation's colleges and universities—"it's sweeping the first 5 places... something no one else had equaled in the history of the event. In a competition that anyone can enter—designed to prove how well a car hangs together, 9 Fords finished out of 12 built that it can stand up to normal driving—the car is strong. This kind of American cars are now grouped so closely together that the differences have no real meaning. To us, who are building cars, success in this kind of competition means just one thing: the car is strong. This kind of performance capability means that the car is so well built that it can stand up to normal driving—the kind of day-in, day-out demands you put your own ear through—for thousands of miles longer than less capable cars.

In tests like the Daytona 500 and Riverside, we find out in an afternoon what might take us 100,000 test-track miles to discover. We learn how to build capable cars.

Why do we keep such an interested eye on competitions such as these? Is speed important to us? Frankly, no. The speed capabilities of the leading American cars are now grouped so closely together that the differences have no real meaning. To us, who are building cars, success in this kind of competition means just one thing: the car is strong. This kind of performance capability means that the car is so well built that it can stand up to normal driving—the kind of day-in, day-out demands you put your own ear through—for thousands of miles longer than less capable cars.

36 DAYS THAT CHANGED THE PERFORMANCE PICTURE IN AMERICA

In 36 days, starting with the Monte Carlo Rallye in January of this year, our products have posted a series of competition wins that have made performance history. Here's what has happened:

Three V-8 Falcon Sprites were entered in the Monte Carlo Rallye. This is not a race. It is a trial of a car's total capabilities. We did it (nervously) for the experience and with practically no sense of expectation, because we had not entered an event like this before. One Sprite ended the experiment in a snowbank. But the others finished 1-2 in their class with such authority that they moved the good, grey London Times to say, "The Falcons are part of a power movement in every country in the world." That was Number One.

Number Two was a double win in the Pure Oil Performance Trials. Fords captured Class 1 and Class 2 for high performance and large V-8's. Both of these trials were for over-all points rolled up in economy, acceleration and braking tests. Then, at Riverside in California, in America's only long-distance stock car event that is run on a road course (superspeedway), banked tracks such as the track at Daytona), Dan Gurney pushed a Ford to first place.

The latest news comes north from Daytona. There in the open test that tears cars apart—the Daytona 500—Fords of both closed and banked courses dominated the field. Fords swept the first 5 places... something no one else had equaled in the history of the event. In a competition—where anyone can enter—designed to prove how well a car hangs together, 9 Fords finished out of 12 entered... a truly remarkable record considering that over 50% of all cars entered failed to finish.

Fifty Million Frenchmen Can't Be Wrong

(From UPI) . . . The French government, which gives much thought to such affairs, reports that 557,900,000 bottles of champagne were consumed last year. The big champagne quaffers were Frenchmen, Britons and Americans. The Frenchmen, however, were in front by millions of bottles. The report says that the French alone consumed 25.5 million jugs of the bubbly, while the Britons and Americans could manage only 4,200,000 and 2,800,000 respectively.

Columbia, S. C. - The state penitentiary admitted it was in the market for new talent, but turned down an inmate's application to become a "roving reporter."
1963 Football Schedule Set; Bison To Face New Opponent

An eight game schedule was announced today for the 1963 NSU football team by Les Loyes, director of athletics.

In the schedule, the Bison will face one non-conference, Southern Illinois University, an independent of Carbondale, Illinois. NSU will play three times at home and five on the road in an afternoon contest in Illinois.

The Salukis, former members of the Central Intercollegiate Athletic Conference, face Drake, Central, Eastern Illinois and other Midwest teams this fall. Figure to win.

South Dakota replaces Montana State who will return to the Bison schedule in 1964 with an October 24th date at Dacotah Field.

The coaching staff of the 1963 Bison team is as follows: head coach, Bob Danielson; backfield coach, Don Johnston; line coach, Chuck Benton; freshman coach, Les Loyes; and assistant coach, Jim Walline.

A seventeen game schedule has been set for the North Dakota State University baseball team according to Les Loyes, director of athletics.

The 1963 baseball team will be coached by Roger Shelstad, a 1960 graduate of North Dakota State, who served this past winter as freshman basketball coach.

The schedule:
April 20 - SCI (2) - St. Cloud
April 21 - MSC (2) - Moorhead
April 26 - Bemidji St - Bemidji
April 28 - Concordia - Moorhead
May 3 - SDS - Here

Bison Break Five Records In 1962-63 Basketball Season

By Dave Pollock

The NDSU Bison broke five records during the 1962-63 basketball season, even though they ended up in last place in the North Central Conference.

Highest Total Points

In a game against Mooringside College, the Bison hit the highest score ever recorded in a regular season regulation game scoring 114 points against 68 for the opposition. This broke a record that was set in 1954 by Walt Fogel. Fogel hit a mark of 763 but McLeod surpassed this with a 811 accuracy, sinking 95 out of 115.

Langen Replaces Langen

Another record was broken by Lynden Langen. In 26 games, Langen pulled down 247 rebounds for a .85 average in 26 games. He switched places with his brother Wayne who held the title last year with 216 grabs in 26 outings. The record Lynden broke was set by Warren Arman back in 1952 when he established a high of 241 rebounds.

Ron McLeod Scored 443 Points

Ron McLeod scored 443 points and ended up the season with 163 average. He led the North Central Conference scoring race most of the season, but hit a slump later and finally ended up in the third-place slot.

South Dakota State Won the NCC Race

South Dakota State won the NCC race while the Bison finished the season with an 8-18 record. Last year NDSU posted a 9-17 final record.

NSDU Is Host For Third Annual F-M Track Clinic

North Dakota State will host the third annual Fargo-Moorhead Track Clinic for interested area coaches and athletes on April 6, at the SU Fieldhouse.

The clinic will start at 9:30 a.m. in the afternoon (1:30) it will move to Nemzek Fieldhouse at Moorhead State for the high school track meet.

The clinic staff will consist of five area track coaches and officials. K. T. Smith of Breckenridge will handle the high jump; Rod Max of Thief River Falls the sprints; Sid Grande of Jamestown College on relays; and Chuck Peterson of Oake Grove on the pole vault. Bile changes in track this year will be discussed by Arnie Babke of Grand Forks.

In the high school meet, each school will be allowed only one man in each event. The scheduled events are as follows: 60 yard dash, 440 yard dash, 880 yard dash, mile run, 60 yard high hurdles, 60 yard low hurdles, pole vault, high jump, broad jump, shot put and mile relay.

Fargo Central is the defending champion in the Annual Fargo-Moorhead Track Clinic.

Pollock's Pitches

Spring sports are getting under way. Considering the potential in all of them from golf to baseball, NSDU has a lot of talent that may do things for area prestige.

The track team is moving along o.k., having won more than they lost. The NCC meet in Grand Forks was a loss because of ineligibility. Bruce Albrecht is out for awhile but there is a chance he may become eligible again. It would be nice and can be done if someone in the right place helps. Coach Neuberger is happy over the defeats he handed Minnesota but sorry about the loss up north.

This weekend the Bison coaches and teachers in a meet to be held at Moorhead State. The big attractive meet with top-ranked Western Kentucky slathered at Darrah Field on April 17 will be a great one to watch.

Bison Athletes Receive Awards

The Athletic Board of Control at North Dakota State University approved the awarding of 34 letters and numerals to B Bison athletes participating in basketball and wrestling.

Included in the group were 13 letters to varsity men and 21 numerals to freshmen.

Those receiving varsity letters in basketball were: Mike Anderson, Verlin Anderson, Lee Grim, Neil Jacobson, Lynden Langen, Wayne Langen, Ron McLeod, Dave Lee, Bob Reslock, Bob Tuscherer.

The track team was also honored with 12 awards. Dave McCracken was named the Most Valuable Player in the NCC. He was also named to the NCC All-Conference team. Ron McLeod ended up the top scorer in the conference. Our Ron McLeod made the second team in the NCC.

Some Final NCC Stats

Dave McCracken was named the Most Valuable Player in the NCC. He was also named to the NCC All-Conference team. McCracken ended up the top scorer in the conference. Our Ron McLeod made the second team in the NCC.

Stan Johnson of SDS tied the Canadian Indoor Record in the 60-yard dash when he ran it in 6.1 seconds. This is one area in which we have been tops in the last few years and have taken the championship.

Diamond Specialists

Spring sports are getting under way. Considering the potential in all of them from golf to baseball, NSDU has a lot of talent that may do things for area prestige.

The track team is moving along o.k., having won more than they lost. The NCC meet in Grand Forks was a loss because of ineligibility. Bruce Albrecht is out for awhile but there is a chance he may become eligible again. It would be nice and can be done if someone in the right place helps. Coach Neuberger is happy over the defeats he handed Minnesota but sorry about the loss up north.

This weekend the Bison coaches and teachers in a meet to be held at Moorhead State. The big attractive meet with top-ranked Western Kentucky slathered at Darrah Field on April 17 will be a great one to watch.

Bison Athletes Receive Awards

The Athletic Board of Control at North Dakota State University approved the awarding of 34 letters and numerals to B Bison athletes participating in basketball and wrestling.

Included in the group were 13 letters to varsity men and 21 numerals to freshmen.

Sharivar Open House Hours Set; Parents', High School Days Planned

by Joan Pullerbak

Sharivar will conduct open house from 1:30 to 5 April 26, 27, 28. The programs for Parent's Day and High School Day have been designed to include full schedules of activities and events worth taking in.

Parent's Program
The Parent's Day program, which takes place Friday, April 26, will start at 9 a.m. with registration for the parents in McNeese Lounge of the Memorial Student Union. There will be class visitations during the morning from 9 a.m. to noon, when the parents will follow the regular Friday morning class schedule of their son or daughter. The advisors will be available for office calls when they are not teaching classes. A noon luncheon will be held for parents in the Union Ballroom. President H. L. Albrecht will be the main speaker and entertainment will be provided by the ND-SU Concert Choir.

The afternoon can be spent looking over the college open houses and viewing their exhibits. At 3 p.m., there will be a coffee hour for parents, students and the faculty will also be present. The coffee hour, held in the Union Ballroom, will give the parents and students a chance to talk with the faculty in their area of interest. The high school visitation event will be President and Mrs. Albrecht. From 4 to 7 p.m., there will be open house in the dormitories, fraternities, sororities and the religious centers. It is hoped that meals will be served in these places.

HS Day Activities
The High School Day, scheduled for Saturday, April 27, is jam-packed with activities. This day is especially scheduled during Sharivar for high school students and their parents to visit NSDU and learn about registration, costs, careers, and opportunities at the University. This is an opportunity for you to enjoy the festivities of Sharivar including wholesome entertainment and college exhibits. Registration for high school students and parents will be in Festival Hall from 9:30 to 9:50. At this time the Gold Star Band will present a concert in the same building. President Albrecht will welcome all visitors at 10 a.m. At 10:05 a topic of discussion on “Selecting An Academic Program” will be discussed by Dr. Q. C. Stoddard and Dr. Hale Aarnes. This discussion will give you a glimpse of campus life including wholesome entertainment and college exhibits. Students will be available for office calls when they are not teaching classes.

Herberg Chosen RE Week Speaker

Dr. Will Herberg, widely acclaimed as a commentator on religious circles as one of the nation's most outstanding students of religious society, will be the Religious Emphasis Week speaker April 18-20. He is a personal friend of Dr. W. W. Nelson and a panel will discuss this topic. At 1:30 a panel meeting with Dean S. W. Russell will be held in the Union Ballroom with music provided by "The Statesmen.”

The afternoon events start at 1:30 with Dean F. C. Mirzian and a panel discussing available scholarships to new students and where to get application forms, how to proceed and an explanation of the Federal Student Loan Program. At 2:15 p.m. information will be given on all colleges and specialists available for help in choosing a curriculum. Dr. L. W. Nelson and a panel will discuss this topic. At 3:30 a parents meeting with Dean S. W. Russell will let you know what parents should know about college and how you can help your student in college. At this time there will also be a meeting for counselors headed by Dr. B. B. Mouse, where the high school counselors can meet with the staff to discuss mutual problems regarding the transition of students from high school to college. There will be visitation of college exhibits from 1:30 to 5 p.m.

See Pajama Game

Evening entertainment features “Pajama Game” in the Fieldhouse, which is the story about a group of workers who are fighting for a 7½ cent raise in a pajama factory. They get it too! At 9:00 to 12:00 a dance will be held in the Union Ballroom.

In talking to E. M. Van Vlamin­gen, chairman of the Parent's Day committee, it was brought out that enthusiasm has to be stirred up among the student body. The students must be willing to do their part in making Sharivar a success. People are very necessary in an effort of this type and all the time and money are only means aids in making our Sharivar a smashing success.

Herberg’s extensive writings on religion and social philosophy have appeared in many journals—lay and academic, secular and theological, Protestant, Catholic and Jewish.

Herberg’s Early Work

His early work, “Judaism and Modern Man,” received acclaim from religious leaders of the three faiths and his more recent work, “Protestant-Catholic-Jews,” has become a classic in the field of religious sociology.

Herberg is currently professor of social ethics at Drew University, Madison, New Jersey.

area for student publications and the campus radio station. To the east, the student lounge is planned which will connect to the Union ballroom on the south. This will not be a public lounge as is the downtown lounge, but will be open for scheduled functions.

The present building was completed by the University when it was the Electrical Engineering building. Since its enlargement was about 1600. Plans then called for facilities to handle an estimated approximately 2500 students. The unanticipated rapid growth of the University has led to the expansion, and room has been provided to allow for even further expansion if it is deemed necessary. Battling unforeseen difficulties, the project should be completed within fifteen months after its start.
