Le Grand Onsager, a senior at North Dakota State University, has received a $500 Mead Johnson Outstanding Agricultural Teacher Award presented to dietetic interns. The graduate faculty advisory committee approved his thesis and work on March 26 and recommended he receive the first Ph.D. to be granted by NDSU.

Enrolling at NDSU in the fall of 1959, LeGrand was one of the first group of graduate students to receive a three-year fellowship under the National Defense Education Act. He came to NDSU from Oklahoma State University in Stillwater where he completed his undergraduate work. While studying at Oklahoma he worked part-time as a research assistant studying wheat fertility which stimulated his interest for further study at NDSU.

North Dakota Recipient

Onsager, a native of Northwood, completed his graduate program within three weeks of LeGrand, and immediately began working as an entomologist with the USDA in Yakima, Washington, conducting research on potatoes and sugar beets.

President Albrecht gave a brief address in recognition of LeGrand's achievements.

LeGrand, chairman of the Animal Husbandry Department spoke on Light's eighteen years of service to NDSU.

Those attending the reception were also entertained by an instrumental and vocal quartet.

Notice

On Wednesday, Thursday, Friday and Saturday evenings, the Circle T Theatre will feature a series of student-directed one act plays. Ya’ll come, half a buck.

Space Age Electronic Equipment To Be Displayed On Campus Tomorrow

On Thursday, May 23, a mobile electronics exhibit, the ELECTROCRUZER, will be on campus to display and demonstrate a wide assortment of new space age electronic equipment.

The ELECTROCRUZER is being brought to the North Dakota State University campus by Cromsley Associates, Inc., and is sponsored by the student branch of the Institute of Electrical and Electronics Engineers. The visiting display unit will be located on the green behind the Agricultural Engineering building, and will be showing the exhibits between the hours of 8 to 11 Thursday morning.

The purpose of the exhibit is to demonstrate some of the new equipment which has been developed for space age applications. Many of the items that will be shown have been designed for use in situations that demand accuracy much greater than that possible in equipment previously available. Instruments that can measure values which are a thousand times smaller than those values one could measure with ordinary equipment will be shown. Magnetic tape recorders and automatic graph plotters will be demonstrated that can be used with data processing computers or other data handling systems.

The ELECTROCRUZER is a self-sufficient mobile electronics laboratory. It contains two gasoline driven generators which are capable of supplying fifteen thousand watts of power. The bus has a four-ton air conditioner to provide constant temperature and heat. The numerous wires and cables which are necessary to install the many pieces of equipment are all built into the bus.

First Two Doctors Degrees

The University Council approved, Wednesday, May 8, the first two candidates for the Doctor of Philosophy degree to be given at North Dakota State University.

Frank E. LeGrand of Mayfield, Oklahoma, and Jerome A. Onsager, of Northwood, will be the first recipients of the Ph. D. degree from NDSU, the highest educational degree that can be earned at any institution of higher learning.

The two candidates will receive their degrees at NDSU's Commencement exercises on June 2. Both completed their final oral examinations and dissertations, of their own, this spring and are currently on jury but will return to the campus to receive their degrees.

LeGrand was the first to complete his final oral examination. The graduate faculty advisory committee approved his thesis and work on March 26 and recommended he receive the first Ph.D. to be granted by NDSU.

Enrolling at NDSU in the fall of 1958, LeGrand was one of the first group of graduate students to receive a three-year fellowship under the National Defense Education Act. He came to NDSU from Oklahoma State University in Stillwater where he completed his undergraduate work. While studying at Oklahoma he worked part-time as a research assistant studying wheat fertility which stimulated his interest for further study at NDSU.

North Dakota Recipient

Onsager, a native of Northwood, completed his graduate program within three weeks of LeGrand, and immediately began working as an entomologist with the USDA in Yakima, Washington, conducting research on potatoes and sugar beets.

His present work is related to one of his earliest studies with Dr. Richard Post, NDSU entomologist, on potato pests near his home while he was still in high school.

Valdeciortin of the Northwood high school class in 1954, Onsager enrolled at NDSU that fall and planned to do Extension work. After four years study for his B.S. degree, his interest in research had grown and he decided to continue with advanced study.

He studied the effect of different ingredients in insecticides on the premination of beetles for his master's degree and then turned to basic research in ecology for his Ph.D.

Graduate Degrees

The granting of the Ph.D. degrees this year is another milestone in the growth of the Graduate School at NDSU, according to Glenn Smith, dean.

He said, "Ten years ago graduate degrees at NDSU were in 19, but today one in six degrees are either master's degrees or Ph.D.s at NDSU. While only two graduate students will receive their doctorates this year, nearly thirty are working on their advanced program and will receive their degrees in the coming years.

Space Age Electronic Equipment

To Be Displayed On Campus Tomorrow

On Thursday, May 23, a mobile electronics exhibit, the ELECTROCRUZER, will be on campus to display and demonstrate a wide assortment of new space age electronic equipment.

The ELECTROCRUZER is being brought to the North Dakota State University campus by Cromsley Associates, Inc., and is sponsored by the student branch of the Institute of Electrical and Electronics Engineers. The visiting display unit will be located on the green behind the Agricultural Engineering building, and will be showing the exhibits between the hours of 8 to 11 Thursday morning.

The purpose of the exhibit is to demonstrate some of the new equipment which has been developed for space age applications. Many of the items that will be shown have been designed for use in situations that demand accuracy much greater than that possible in equipment previously available. Instruments that can measure values which are a thousand times smaller than those values one could measure with ordinary equipment will be shown. Magnetic tape recorders and automatic graph plotters will be demonstrated that can be used with data processing computers or other data handling systems.

The ELECTROCRUZER is a self-sufficient mobile electronics laboratory. It contains two gasoline driven generators which are capable of supplying fifteen thousand watts of power. The bus has a four-ton air conditioner to provide constant temperature and heat. The numerous wires and cables which are necessary to install the many pieces of equipment are all built into the bus.

In addition, there is over 30 feet of bench and cabinet space.

Crosley Associates is an affiliate of Richard Coos which manufactures and produces precision electronic instruments and components. After leaving NDSU, the ELECTROCRUZER will travel to Grand Forks for a similar exhibition and will tour through Nebraska, Iowa and South Dakota before returning to its home base in St. Paul.
1953, Ten years ago: NDAC received a $4,000 Grant for cancer research. Medical specialists were fighting the disease all over the country. Some researchers were trying to connect cigarette smoking with lung cancer. This discussion is, of course, still going on today. I saw a student on campus last week with a cigarette holder three feet long. He said his doctor told him to stay away from tobacco.

1948, Fifteen years ago: Football coach Stan Kostka had resigned, and the Spectrum Sports Editor observed: "NDAC athletes are going through a transitional period. The next few years will undoubtedly prove the most important — athletically at least — in the history of the college. Changes have been made both in the academic and in the operation of the athletic department. The way the school goes athletically during the next few years is likely to determine the whole college and the student body for years to come. If the school can get re-started on the right foot in football, for instance, then the probability that a new coach can start rebuilding process that will take and keep NDAC at the top in football for a long time to come, are greater indeed."

Sound familiar? The above words of wisdom could just as easily apply to the 1963 situation. Let's hope we won't have to play the same record again in the future.

1933, Thirty years ago: Buttryes had an end of season clearance sale and "were selling ladies' dresses for 67c. A guy could almost afford to be married in those days."

1928, Thirty-five years ago: Adrian Fox was an unusual student at NDAC. For recreation, he went spikes with his teeth, blew up inner tubes until they burst and tore decks of cards into eight parts. The 175 pound Fox could support nine men on a board on his chest, a weight of 1,500 pounds. Fox, who was also an expert tailor, worked his way through college — not doing strong man tricks, but by selling suits.

1923, Forty years ago: The Garrick was showing a film "I'm sure you've all seen." The Spectrum complained that the student body was "going on strike" and if they slowed up the making of their own films, the "childish" attitude of the audience would be met with a "no-admittance." The Garrick received a $4,000 Grant for cancer research.

1918, Forty-five years ago: Ray "Bolley" Bolsinger left for the aviation section of the Signal Corps. Bolsinger, besides being president of the class of 1916, had won no less than fifteen varsity letters at NDAC. He instantly recognizes the Cricketeer way in traditional suits. Neat (Fall-look) herringbone patterns for Summer, in "shirtweight," a no-weight blend of Dacron polyester and cotton that's always cool, calm, clean-cut. Colored in the new "great light way," Cricketeer tailored, naturally, along leaner lines. $159.95

Survey Of Finances

Graduate Students Reminded To Return Survey Of Finances

Graduate students recently surveyed for the National Science Foundation study of graduate student finances are reminded to mail back their questionnaires if they have not already done so. The plea was made by Dr. Courtney B. Cleland, professor sociology and dean of the college clocks varied from five to seven minutes. There was a move to adjust within the last few weeks. The Fargo sophomore is a top Bison halfback on the State grid squad. The award is based on scholastic and athletic ability, sportsmanship and general over-all performance.

Marr Awarded

Lynn Marr has been awarded the North Dakota Farm Bureau Athletic Achievement Scholarship for 1963-64.

Survey Of Finances

Graduate students recently surveyed for the National Science Foundation study of graduate student finances are reminded to mail back their questionnaires if they have not already done so. The plea was made by Dr. Courtney B. Cleland, professor sociology and campus representative for the study.

The survey is part of a national study. At NDSU, approximately 150 students were included in the sample. At press deadline, less than 50 per cent of the local students had returned the questionnaires. Some other universities have already obtained 90 per cent returns. "We need at least 85 per cent return at NDSU and hope to get 100 per cent," Dr. Cleland said.

 Replies are confidential, and no one on the campus sees them. Names are checked off a coded list by Mrs. Cleland, and the questionnaires are then forwarded directly to the National Opinion Research Center in Chicago, where the replies are tabulated.

The first student has lost or mislaid his questionnaire; another copy can be obtained from Dr. Cleland in 317 Minard hall. Some of the students have remarked at the length of the questionnaires and have likened part of it to filling out their income tax return. Dr. Cleland said that even "if the present-day graduate student may not benefit directly, the results should help other graduate students in years to come."

Findings from the study are expected to influence federal policy on financial aids for graduate students.

Marr Awarded

Lynn Marr has been awarded the North Dakota Farm Bureau Athletic Achievement Scholarship for 1963-64.

The Fargo sophomore is a top Bison halfback on the State grid squad. The award is based on scholastic and athletic ability, sportsmanship and general over-all performance.

The 20-year-old Pharmacy major is a graduate of Fargo Central where he lettered in football and track. He still holds a pole vault record at Central.

Coach Bob Danielson said of Marr, "Lynn is a fine athlete on and off the field and a great credit to the University. We think he is most deserving of the award."

Dorothy F. Kostka has resigned, and the Spectrum Sports Editor observed: "NDAC athletes are going through a transitional period. The next few years will undoubtedly prove the most important — athletically at least — in the history of the college. Changes have been made both in the academic and in the operation of the athletic department. The way the school goes athletically during the next few years is likely to determine the whole college and the student body for years to come. If the school can get re-started on the right foot in football, for instance, then the probability that a new coach can start rebuildingprocess that will take and keep NDAC at the top in football for a long time to come, are greater indeed."

Sound familiar? The above words of wisdom could just as easily apply to the 1963 situation. Let's hope we won't have to play the same record again in the future.

1933, Thirty years ago: Buttryes had an end of season clearance sale and "were selling ladies' dresses for 67c. A guy could almost afford to be married in those days."

1928, Thirty-five years ago: Adrian Fox was an unusual student at NDAC. For recreation, he went spikes with his teeth, blew up inner tubes until they burst and tore decks of cards into eight parts. The 175 pound Fox could support nine men on a board on his chest, a weight of 1,500 pounds. Fox, who was also an expert tailor, worked his way through college — not doing strong man tricks, but by selling suits.

1923, Forty years ago: The Spectrum complained that the college clocks varied from five to seven minutes. There was a move to get the clocks synchronized as the problem had been encountered for some years. Persistence pays off, and I understand the clocks were adjusted within the last few weeks.

us keep enjoying those fine Marlboro Cigarettes—rich, golden
tobacco—pure white Selectrate filter—soft pack

Let us not, however, take our leave of smoking pleasure. Let
us take our reluctant leave of Spain—or Perfidious Albion,
the Maxene, and the Laverne—and discovered Ohio. Magellan
and then, believe you me, the fur starts to fly!

of this incessant struggle and have left their homeland. Co­
numbus, for example, took off in three little ships—the Patti,
the Maxene, and the Laverne—and discovered Ohio. Magellan
later discovered Colon. Balbo also sailed across the New
World, but he was silent on a peak in Darien, so it is difficult
to know what he discovered.

Well sir, I guess that's all you need to know about Spain.

As a result, Spaniards were all forced to turn to bull-fighting
in order to keep body and soul together. Today, wherever you
went in Spain—in Madrid, in Barcelona, in Toledo, in Cleveland
—and everywhere in Spain and throughout the world—bulls
have an inherent sense of propriety and not wishing to en­
harm their monarchs, decided that everybody should lend.
This indeed put Philip Henry Box at his ease, but in this
it turned out to be a very bad thing for Spain. It wrecked
the mushroom industry—Spain's principal source of revenue—and
reduced the nation to a second-class power.

Better Rovers

The two independents who

purposely of the prank wasn't

brought out by just smearing a

light paint around, thus they let

tered "the hell with ROTC" on top

of the other paint.

in Closing

Although the Spectrum staff is

stupidly going to put out another

issue after this one, we feel that

one should start taking advantage

of the fact that the year is almost

over and relive the old school

year.

A good spot to start with our

yearly ranking member is the thought

which have provided the students

of SU with many hours of enjoyable

viewing. On second thought, let's skip sports.

Next in priority is the great and

fearless student senate which has

lead us into the year under their

brilliant leadership.

Sherry Bassin, our beloved for­

eign student from Canada, will un­

doubtedly go down in history as

one of the best student body presidents

that this school has ever had. He

led Senate as skillfully as anyone
could hope to do, and still he

found time to get things accomplished.

For this leadership we tip our press hat to Bassin, and

quickly replace it to talk about his

Senate.

They have provided this writer

with quite a few inches of copy

during the past year, and for this

we are grateful. Why, without

these foolish things as a "committee to wage war on societal

and a motion to erect a bar on

campus, this column might not

have been started.

Of course we cannot forget

our pep club—our "pep club" in this

writing wonder, Tony Sotolongo. They

have managed to sneak into the spotlight several times

this year with their antics and stunts.

Of course they aren't all bad,

and although they like to dance more than they like to cheer,

the school wouldn't be the same with­

out them.

Besides, they have started to

shape themselves up so that next

year it is very likely that they will

be a credit to this university.

The past year has seen many

students separated from the ranks of the "Betty Coeds" and

placed on a special pedestal as queenly, womanly, royal,
and queenly. We would attempt to name them, but it does not

seem necessary, and any­

one who can possibly remember all of them.

The seniors will leave of SU

remembering this as the year

of the great fright. Contract

feeding, and all the worries and

sore stomachs that come with it,

was introduced on­

to campus as a possible plan for the future.

With this "forced feeding" in

effect, the old custom of running

across 13th street (excuse us, an­
other present change) to the fra­
ternities and sororities to eat will be gone. Along with this

will be the chance to complain about the inefficiency of the

city in not putting up any signs to guide the children safely

across the busy intersection.

Of course we all realize that

the city has had more important projects to deal with first, like
elevating tributes to Roger Maris,

the obscure baseball player.

Even on a very last issue, a

sigh of relief is appropriate. We

will continue reliving the old year

and suggest some possible changes

for the new.

Letters to the Editor:

Gackle Praises Blue Key

During the past three years it has been my privilege to have worked with this group of men at NDSU who many times do not get the credit due them for their accomplishments. Too much goes unheralded. I would like to take this opportunity to thank them for the association, which has been a most rewarding experience for me and with whom I enjoy my stay at NDSU.

I am speaking of the men of Blue Key National Honor Fraternity. It has given me the fortune to have the time and chance to work with this group of students in their most publicized function, the all college (University) musical production of Blue Key." I thought it was nice.

KaDUS W riteS

Your campus radio station, KDSU, will soon come to the close of another school year. Much appreciation is extended to all of those, both old and new, and to those who have willingly given of their time and efforts to make KDSU the outstanding radio station it is today. Much time, both on the air and even more so behind the scenes, is not enough, off air time is required to keep a radio station on the move; even if it only operates from 4 p.m. to 1 a.m. Monday thru Thursday and from 4 p.m. to 1 a.m. Friday and Saturday.

KDSU will be moving into new headquarters next fall and Andrea needs to have a better than ever season of broadcasting to keep you the students of NDSU. With larger facilities, more modern equipment, and more experiences on the job, Andrea will probably come to the fall term full. No experience is necessary as this is where the experien

Jealousy

In the sky the silent sleuth was flying. Without a care. It wasn't fair. Without worry. His life was nice. He had no vice, and no shade. It was a beautiful day. He had no love. Nor God above. Didn't a dime. No work. No hate. No need. He had no war. Madison Ave. He was well off. For him was free. Free to fly. Good luck to him. Unnoticed in the sky he flew the silent sleuth. His life was nice. He had no vice, and no shade. It was a beautiful day. He had no love. Nor God above. Didn't a dime. No work. No hate. No need. He had no war. Madison Ave. He was well off. For him was free. Free to fly. Good luck to him.

"Silent Sleuth" and News

We've met a man we don't like. His name is the Silent Sleuth. He's a sleuth with whom the Fedora can do nothing. One day he crept out of a dark alley when a news story broke about a U.S. spy plane that "wanedly staggered off its course while on a routine flight over Turkey and Iran."

He disappeared after that. The next time he came on the scene, we spotted him in Cuba. And now, in the last few days, we thought we saw him sailing a Spanish galleon. And, as the story goes, the Fedora has never slumbered in the face, and so far, no court has ordered us to reveal any of the sources we have ever quoted. But the court should understand the existence of the Silent Sleuth. We don't even think you have to be in the newspaper business to see something dangerous is on the loose.

We don't know if the Sleuth deals in white lies or if silence is his only weapon. But even knew exactly where he's from.

He says he wants to insure the safety and well-being of the people of America. Well, that's fine. So be it.

Now while we may never see one of his works, he doesn't even know it's printed on white. He has decided that in this age of megaton bombs, secret intelligence apparatus and Communist plots, that there is no room for a man's land. He insists that the nation needs to look to its own land. Based on this, he keys his news releases at his own discretion, deciding what is and what is not fit to print.

The result is that everyone wants to know, "Who owns the news?" We don't think anyone does, but we do think that a press which calls itself free must alone decide what to publish.

groups of one-act plays will open on alternate evenings to through Saturday night in the College of Agriculture auditorium. The contest is under the management of the Engelsdorff and Foss competition.

Charlene Herman directs this third in the series of Tennessee Williams one-acts to be presented at 8:15 Wednesday and Friday in the Circle-T. Admission is 50c.

Two plays by Anton Chekov will be presented at each of two performances Thursday and Saturday evenings. Curtain times each night are 7:30 and 9:00 for the Chekov dramas; admission will be 25c for the shorter plays.

"Swan Song," directed by Jerome Exner, might be retitled, "An Old Actor Remembers." Largely it is hard-fought engagement in the battle of the sexes provides lively action when Smirnov, the Boor, in the play of that name, comes to collect a debt from the widow Mrs. Popov. His in-suiting collection tactics cause the widow, played by Ron Einfeld, to challenge the Boor, Keith Broadwell, to a duel as her servant Loka, Arthur Coffing, watches helplessly. Kenneth Hafer directs this delightful drama to a surprising but understandable ending.

Kinneberg Wins Architect Award

Robert Kinneberg, a senior in architecture, has received a $250 award as winner in the 1963 Foss Engelsdorff and Foss Competition for an architectural design problem.

This contest was sponsored by the Foss, Engelsdorff and Foss Company of Moorhead, Minn., and was part of the architecture class problem to design a combined elementary high school plan for a small North Dakota Community. The instructor was Prof. Harold Jenkinson, assistant professor of architecture.
Canning Awarded Foreign Grant
For Year Study

Michael Canning, math senior, has received a foreign government grant for a year's study in Germany.

The grant is the first foreign government grant to be awarded to an NDSU student. It is sponsored by the German Academic Exchange Service, Deutscher Akademischer Austauschdienst, which is similar to the Fulbright Scholarship in scope and work. Travel expenses from New York as well as living and scholastic expenses will be paid for a year. Canning will study advanced mathematics and general German culture while in Germany.

The award is one of the 1200 foreign government grants given to students who have completed their degrees and are ready for graduate study. It is the highest academic award given by a foreign government.

It is also known as Dankstipendium, which means "thanks for the Fulbright." It is the way the German government expressed appreciation for American generosity in sponsoring such programs as the Fulbright Scholarships.

Canning is a Fargo High School graduate. He was vice president of his senior class, a member of the National Honor society and of Quill and Scroll. During his four years at NDSU, he has consistently been on the Honor Roll and Dean's List.

He was chosen Outstanding Mathematics Student as a freshman and was co-chairman of publicity for this year's open house, Shanty Days.

He has a brother, Tim, a sophomore in electrical engineering at NDSU and a brother Terry, a mechanical engineering graduate from NDSU.

Burgess Elected

Ruthanne Burgess, AAS Jr., was recently elected president of Kap-pa Delta PI. Other officers are Marlett Anderson, vice president; Susan Hofstrand, secretary; James Mortensen, treasurer; and Bob Lenz, historian. The chapter advisor is Prof. Shubel Owen.

Kappa Delta PI is a national honor society in education. The purpose of the organization is to develop professional fellowship and growth and to recognize outstanding contributions in education.

Tennis Team Ties 1st Place; Nammar Wins NCC Gold Medal

North Dakota State’s Tennis team tied first place in the North Central Conference Tennis tournament at Sioux City. The Bison scored 9 points to share the title with State College of Iowa. Bisons’ Dave Nammar won the singles crown to capture the gold medal for that event. Nammar won the first three matches 3-6, 6-2, 75 and then went on to beat SCT’s Bill Dodd in the finals for the title.

Kermit Konston, SU, won two singles matches, but lost out in the semifinals to Dodd.

State players in the doubles, Dave Herstad and Mike Yahna, beat South Dakota State and Morningside but lost to defending champion Iowa in the finals. The Bison pulled down two points in the doubles events and seven in the singles.

“The scoring is what cost us the clear title,” commented tennis coach Chuck Benton. “The doubles are worth 3 points in the finals and the other rounds 2. This is unfair as you only have to win 3 matches to take the title. In the singles, you have to play four to win,” stated Benton.

Yahna and Herstad received silver medals for taking the runner-up spot in the doubles.

The finals scores for participating teams were NDSU 9, SCI 9, SDS 2, UND 2, Augustana O, Morningside 0, USD 0.

“It was a real good trip and this had a lot of effect on our playing,” commented Benton. On their invasion south, the Bison encountered those opponents, beating two and losing one: They beat Nebraska Wesleyan and Creighton University and lost to the University of Nebraska. Benton related that the V of Nebraska started practice in February and travels South where the tennis gets tougher. From this they compete against better competition and sharpen their own playing.

NDSU’s record for the season is 7-2 in doubles and 2-1-0 in single tournament play.

Pollock’s Pitches

The NDSU golf team shot 588 to win second place in the NCC Golf tournament played at Sioux City this past weekend. UND took first place with 583. Ron McLeod of Morningside for medalist honors. Both had totals of 111 for 37 holes. The Bison golfers have had real sharp seasons in the past, and again proved themselves this year. Their record under Coach W. E. Kaiser is one for SU to boast about.

Another team SU should be proud of is the tennis team. The recent tie for first in the NCC, the gold medal Dave Nammer won, the silver medals that Herstad and Yahna won, their season record and the prestige they brought to NDSU, all merit praise. But the teams they did at Sioux City was not easy. Indeed, I had two champions entered and were defending champions from last year. The schools down south offer scholarships (full type) and draw top talent. This in itself points out the tennis teams ability.

Co-Captains Named

The 1963 Football team elected Senior Joe Anderson and Junior Jim Driscoll as co-captains for the coming season. The two ends were selected by a vote of their teammates last week.

NCC Track Finals

Bison tracksters pulled down 4th place in the NCC Track finals at Vermillion last week. USD won the Track Crown with a total of 83 points. Chuck Offerdahl pulled down the only Varsity win, that being the two-mile run. The victory gave the Bison a 4-8 record.

The 1963 Football team elected Senior Joe Anderson and Junior Jim Driscoll as co-captains for the coming season.

The Last Pitch

NDSU’s Baseball team swept a 6-4 victory over Moorhead’s Dragons at Barnett Saturday. The victory gave the Bison a 4-8 record.

WRA Results

The Women’s Recreation Association has received the final results of the National Intercollegiates Bowling Tournament. The NDSU team placed sixth in the United States with a total of 50 colleges and universities entered in the tournament.

Carole Lemke placed sixth in the high single game with 191 and placed sixth in the high series with 555. The WRA team placed sixth with a total of 1535.

Team members are Carole Lemke, Roberta Quick, Gall Anderson, Rae Ann Winlaw, Doreen Loberg, Janet Anderson, Janice Score, Lois McDonald, Dorothy Edwards and Kathy Degen.
