

MASS CONFUSION REIGNS as freshmen pick up class cards in Minard Hall.

Opinions Differ About Pre-Registration System

"We expect to use the same type of pre-registration spring quarter," said Burton B. Brandrud, director of admissions and records, "there were no particular problems and we were very pleased with the way it worked out."

Brandrud said that administrators did notice a bottleneck when freshmen were picking up their master cards, but that they are considering ways to correct this.

He stressed the importance of students not losing their cards, especially their IBM master cards. When several students lost their master cards, the cards could not be replaced for several days and those students were delayed in picking up their class cards.

On the last day of pre-registration, several people were asked their opinions of the registration system. Some of the replies are:

"We registered over 1,000 freshmen in English between 8:30 and noon Friday," commented John Hove, chairman of the English department. He said that he was happy with the pre-registration and that it worked well with the English department.

However, Hove also said that his idea of pre-registration was a more leisurely process and shouldn't be completed in one day.

"It generally progressed satisfactorily, but two things need improvement," was the opinion of David E. Eustice, associate professor of math and education. First, the clerical work of handing out cards needs improvement.

Secondly, all colleges and departments should standardize and adhere to the same published regulations.

Jerry Anderson, EA 3, expressed a student view when

he said, "I like not having to stand in line and not having to waste an extra day just registering, but I had to skip a class to get all of my class cards."

Russell A. Snyder, assistant professor of economics, commented that things haven't improved.

Donations From Campus Chest Drive Estimated About \$1,100 By Wetzel

The North Dakota State University Campus Chest Drive was held Nov. 9-14.

This annual event was patterned several years ago after the United Fund of Fargo. Commission of Inter-campus Affairs organized the drive.

Rodger Wetzel, CP 3 and chairman of the drive, said that "We felt that solicitation went well on campus, but it was hard to contact off-campus students."

Total amount collected is not yet determined, but Wetzel estimated it to be \$1,100. This is about the same quantity that was received last year.

Wetzel commented that next year the drive should be held earlier. This year all dormitory room rent had to be paid by Nov. 10, which was during the middle of Campus Chest Week.

About 100 persons worked on solicitations, according to Sandy Fossum, AS 3 and solicitations co-chairman. Dorms were all contacted and one floor in Reed Hall gave over \$50 to the charity drive.

Little was collected in the old chests placed on campus, but "They were good advertising," Miss Fossum said.

The biggest problem of the drive was finding off-campus students at home.

Money from the drive will be

Organization And Activities Board Approves Funds For Swimming Pool

Student Senate's request for the Fieldhouse swimming pool was approved by the Board of Organizations and Activities Nov. 19.

The approved motion reads: "The Board of Organizations and Activities recommends that monies be appropriated from the Student Service Fund to provide a sufficient financial base for the initiation of the completion of the Fieldhouse swimming pool."

In the motion no mention was made of the \$8,000 requested by Student Senate because the Board thought it unnecessary to request a specific amount.

Since a student organization cannot be a party to a contract, the administration, not senate, will pay the contractor of the pool. The Board believed that the \$8,000 would be given to senate only to be returned to the administration to pay the bill.

Board members also questioned whether money could be given to a student group for a building project.

The change, said the Board, would not weaken the motion to complete the swimming pool. The pool now has to be approved by the President and administration and then by the Board of Higher Education.

COST
The pool can be completed for about \$15,000, according to the contractor. He is willing to finish it for \$10,000 cash and a guarantee for the rest. "Operation Splash" collected \$1,722 and about \$8,000 more is needed.

STUDENT SERVICE FUND
This fund is the "bank" of the campus. Part of every student's registration fee goes into this central fund. Any organization such as Student Senate may request money. Budgets are submitted and organizations receive an "account" in the

fund which they use for expenses.

No college department or student organization has money of its own. If "Operation Splash" had raised \$8,000, the money would have been put into this fund. If the athletic department could find a philanthropist who would give \$2 million for a new Fieldhouse, the \$2 million would be put in the fund.

The reasoning behind this, said the Board, is that no college department or student organization may be party to a contract. Bills are paid by the administration through this fund.

Money in the general fund is allotted to organizations according to their budgets. The Board believed that although the request for the pool was approved, it would be necessary to transfer \$8,000 from the general fund into Student Senate's budget.

Sigma Chi Win First College Bowl

The Sigma Chi fraternity was awarded the traveling trophy in the first all-campus College Bowl at North Dakota State University. Sigma Chi was victorious over Kappa Kappa Gamma, Burgum Hall and Sigma Nu in the final matches held last Sunday in the Memorial Union.

The College Bowl, presented by the Student Union Activities Board, is modeled after the National College Bowl, a regular television series. All fraternities, sororities and housing units were asked to submit

teams of four members. Competing teams numbered 15.

The first matches were held on the previous Sunday after which, by process of elimination, four teams remained undefeated and were invited back for the semi-finals and finals last Sunday.

The matches were Sigma Chi vs. Sigma Nu and KKG vs. Burgum Hall. Sigma Chi and Burgum Hall defeated their opponents and then went into the final match. For half an hour Andrew Bushko, director of activities for the Memorial Union,

presented questions covering a range of subjects for the teams to answer. Of the questions asked only three remained unanswered by the two teams.

When points were tallied Sigma Chi was ruled the victor and was presented a silver trophy by Leo Johnson, chairman of this year's College Bowl.

The Sigma Chi team consisted of Bill Wilson, AS 3, George Foulkes, AS 4, Spencer Duin, EA 4, and Bill Reichert, EA 2.

Team members expressed mixed feelings over their victory. Wilson said he didn't think they were going to win and that he still couldn't believe that they had won. Foulkes said he didn't doubt for a minute that they would win.

Reichert said he was just mad that they missed as many questions as they did. Duin said the victory just didn't figure since the Sigma Chi overall average leaves much to be desired.

Foulkes added: "It all goes to show that a person's scholastic average is not a very good measure of intelligence."

Bowl Game Transportation Arranged To Aid Students

Transportation arrangements have been made to accommodate students, faculty, alumni and friends so they will be able to back the Bison in North Dakota State University's first bowl football game.

| Bus | |
|----------------------------|----------------------|
| Cost per person | \$20.00 |
| Leave - Fargo | 6:30 p.m. (Nov. 27) |
| Arrive - Excelsior Springs | 9:00 a.m. (Nov. 28) |
| Leave - Excelsior Springs | 8:00 p.m. (Nov. 28) |
| Arrive - Fargo | 10:00 a.m. (Nov. 29) |

| Train | |
|-----------------|---------------------|
| Cost per person | \$21.10 |
| Leave - Fargo | 2:50 p.m. (Nov. 27) |

Parnassus Besieged

by Steve A. W.

THE AUDIENCE AS A CURIOUS PLAY-SEEKER
Last week end I was host to a thousand children. They thronged the pompous halls of Old Main—bright, eager, critical, demanding, needing so much as to be allowed to judge for themselves the worth of a play designed especially for them. Their judgment, happily, was favorable. We knew their judgment was favorable, because they stayed to watch the play through to its finish.

Had they been bored, had the play disappointed them, they would have turned immediately to more interesting things. A dangling tail, an unattended window, the mordant peregrinations of a beetle, clamorous troop advancing up the aisle to do battle with an imaginary foe—all these might have called them away, had the play been less than excellent.

An audience of children carries with it none of the polite reserve and none of prejudice of adults. Their only questions are "Can I go?" and "Will I attend?" If their curiosity is piqued, they find the means, mothers or pennies, to go. If their curiosity is prolonged, they give willingly their attention to the end of the show. Wonderful immediacy.

What questions manifest this curiosity, I don't know, but some of them were these. From a young lad digging in several pockets for the grubby nickel to make up his fare: "Who gets all this money? That's what I want to know. Who will spend it all? And for what? He will be a journalist, someday, perhaps."

From Kim Hanson, age 4, on seeing or not-seeing Ron Mrnak appear in a cloud of smoke and imprecations: "Where did he go? Where did that funny green man go? Into the clock?"

A small boy, his smooth forehead now creased with concentration, wearing a green jacket and one mitten, the other left behind in his haste to expose the trickery of the world, paces back and forth in agitation before Bob Thorson, normally clean-shaven, now wearing a full gray beard stuck on with spirit gum and Kurt Knudson, wearing a bit of shoe polish in his own home-sprouted adornment. The boy gives Thorson a nod and a wink, advances on Knudson, and demands: "Take off that beard. I know it's fake." Thorson comes well enough laughing off his own camouflage.

These are some of the questions and some of the desires that spring from curiosity. That "Rumpelstiltskin" satisfied many of them is due to the great work, talent and, yes, and love, too, that goes into making things as well and as truly as one can.

THE AUDIENCE AS A BLOB OF COAGULANT PUTTY
The main descriptions that one can make of the audiences where on campus this past week are that they were small, listless, and as prone to any significant reaction as a fossil flounder at below zero.

Where is the excitement that should greet a troupe of actors skilled as the Guthrie Theatre Group? Where the eagerness, where the anticipation? Where the "Oh, can hardly wait till it begins," where the children brought to help the actors who performed for them?

Where are the early arrival, excited pre-curtain buzz, immediate laugh or groan during performance, enthusiastic response at the curtain and continuing discussion after the event?

Children throughout Fargo are even now playing Rumpelstiltskin, dividing up the parts among themselves, running again through the show they saw. They are applying what they have experienced to what goes on about them, badgering their parents about transmutation, straw and other base metals into gold, wondering at the efficacy of magic, seeking dwarfs in unlikely places, remembering the evil queen mother who maunders about poking babies in the eye.

Yet the Memorial Union can scarcely give away a cup of coffee for "Alexander Nevsky," the audience preferring to stow away among the chaff of mass media, rather than to haggle alternate interpretations.

What child will miss the next play put on for him at the Livingstone Country Theatre? None who saw the first. Yet who, having been amused, or titillated or entertained by "The Threepenny Opera," is cared enough to come to tryouts for "King Lear?" Who will be there this afternoon at 3?

Who went to Emlyn Williams last night, being curious enough to give it a try? Who saw the film at the Livingston Lord Library?

Until the spirit of play and sense of curiosity come to this campus, Parnassus shall remain besieged. I had hoped in time to change the title of this column to something more triumphant less austere aloof. But that time is not yet here. Until then, it will go on, if it goes on at all, as the same crochety spatter of words you have been so kind as to thus far tolerate.

ROTC Will Nominate Academy Cadet On The Social Scene . . .

Colonel Melvin W. Faulk, air force professor, announced last week that the Air Force ROTC detachment 610 at North Dakota State University is authorized to nominate one cadet to the United States Air Force Academy.

This nominee will compete with nominees from other Air Force ROTC detachments for appointment to the academy.

Spectrum Editor Is Announced

Lynn R. Leavens has been chosen by the Board of Publications to succeed Joe Schneider as editor of the *Spectrum*. The Board of Publications is comprised of four students and three faculty members.

Richard Grahe has been appointed as managing editor and Allan Peterson and Jim Glynn as co-news editors. Peterson also remains as sports editor.

Leavens is a junior major in business economics and communications. He has been associated with the *Spectrum* the past two quarters, holding the position of sports editor for two quarters, co-managing editor for one quarter and managing editor this fall term.

YWCA Will Sell Christmas Wreaths

The YWCA will again sell Christmas wreaths to raise money for its projects this year. The wreaths are made by two low-income families in Minnesota.

Wreaths will be sold for \$2.50—\$1.10 will go to the families and the rest goes to the Y and auxiliary units. Chairman of this program Judy Rodger, AS 1, said they will be sold from Dec. 1-23.

Orders also may be placed through the Y office in the Library, 235-8712.

All applicants must meet the following basic requirements:

1. Be enrolled in the Air Force ROTC program.
2. Satisfactorily completed at least one year of college work by July 1, 1965.
3. Must not have passed his 22nd birthday by July 1, 1965.
4. Must be a citizen of the United States and of highest moral character.
5. Must meet stringent physical requirements.
6. Must not be, and never have been, married.

Information and applications are available in the administrative office of the Air Force ROTC detachment room 201 of the Fieldhouse. Applications must be submitted not later than Jan. 11, 1965.

ENGAGEMENTS

Cheryl Stock, HE 3, (AGD), is engaged to Mike Fair, Sigma Chi alumnus.

Betsy Reid, HE 4, (AGD), is engaged to Dan Thesing, AS 4.

Doris Wolf, AS 3, is engaged to Lyle Guerkle, Theta Chi.

Margaret Nurembor is engaged to Jim Amann, Theta Chi.

PLEDGES

New Alpha Gamma Delta pledges are Doreen Ramsey, AS 1, and Betsy Jennings, AS 1.

New Phi Mu pledges are Doris delegate.

Felt, HE 1, Joeldine Haug, HE 1, and Karen Larsen, HE 1.

ACTIVES

New Alpha Gamma Delta actives are Diane Hewitt, AS 2, and Sandra Groom, EA 2.

PLEDGE OFFICERS

Alpha Gamma Delta pledge officers are Susan Restemayer, HE 1, president; Jeannette Ferris, AS 1, first vice president; Gail Saugstad, AS 1, second vice-president; Chere Brenden, AS 3, treasurer; and Joan Clairmont, HE 1, Panhellenic

"The development of management is essential to our goal of great growth"

At the 1964 stockholders' meeting, Arjay Miller, President of Ford Motor Company, emphasized the Company's far-sighted recruitment program and its accent on developing management talent:

"One aspect of our planning is crucial to the success of everything else we do. It engages the best thoughts and efforts of our whole management team, from top to bottom, throughout the world. I am speaking of the development of management. The immediate future of our Company depends heavily upon the abilities of the people who are now key members of our management team.

"In the longer run, our future depends on what we are doing at the present time to attract and develop the people who will be making the major decisions 10 to 20 years from now. We are developing management competence in depth in order to attack the problems that will confront a company of great growth—and that growth (both in profits and sales) is exactly the goal we have established for Ford Motor Company.

"We are continuing to emphasize recruiting. Last spring, 180 of our management people devoted part of their time to recruiting outstanding graduates from colleges and universities throughout the U.S. Last year, these efforts resulted in our hiring over 1,000 graduates, 220 more than the year before.

"We are seeking and we are finding young men—and young women, too—with brains and backbone—people who have the ability and the desire to make room for themselves at the top. We give our trainees challenging assignments with as much responsibility as they can carry. We promote them as fast as they are ready. Those who are interested in easy security soon drop out. Those who have what we want stay with us, and move up quickly to increased responsibility and the pay that goes with it. Thanks to the quality of the people we are recruiting and developing, I am firmly convinced that our outlook is most promising."

Editorials

Editorial Policy Stated By Editor

Following in Joe Schneider's footsteps will not be easy. The staff and the newspapers of this fall quarter have been the best that North Dakota State University has seen in a long time—possibly ever.

Editing a publication which is one of North Dakota's largest circulation weeklies is a full-time job. Schneider was working almost full time and he believes that he needs more time to study.

Schneider has tried to build a university newspaper on a campus that is itself working to build the University. He admits that its a big job. We believe he tends to be modest—one of his editorials last week was a little self-deprecating. He doesn't have to be.

He has done a competent, responsible job and we hope to carry on in the same way.

We have inherited Schneider's headaches as the next editor will inherit ours. He has given us the opportunity to make the *Spectrum* the best student publication in North Dakota.

We hope to take advantage of this opportunity and as a first step we will state our editorial policy.

As editors we will not comment in an editorial on any situation without first presenting the facts to the readers in a news story.

Editorials will be sincere and used with care and courage. They will be written to influence, to add background information and explanation or, if possible, to amuse.

The editors of a student publication have one main responsibility and that is to their fellow students.

A five-man editorial board will help us carry out this policy. On the board are Joe and John Schneider, Allan Peterson, Jim Glynn and Dick Grage.

Joe Schneider has also agreed to stay on the *Spectrum's* staff as student advisor to the new editor. L.R.L.

Criticism Of Annual Are Not Based On Fact

As mass communicators, we tend to be sympathetic when uninformed criticism is made of any mass media.

We may have abetted such an unfair attack. Last week we printed a story about the investigation of the Bison annual which carried only Tanfield C. Miller's inaccurate statements and failed to get a comment from the annual staff.

We learned from questioning the Bison editor that despite the authorization for Miller's committee several weeks ago, Miller has not yet formed a working group. However, he has not used the privilege which every student has of examining the records, asking questions and acquainting himself with the situation he said he would investigate.

Miller has four main criticisms of the annual. He criticizes the staff, the cost of the book, the cost of class pictures and the cover.

Let us take these points, one by one.

Miller said that the Bison should try to get a larger and better-trained staff.

Does he realize that the editor, Mary Beth Billing, has eight editors under her? This is one editor for each section of the yearbook and these assistant editors have from four to six members on their staffs. This means that there are at least 40 students working on the annual.

We ask you, Mr. Miller, aren't 40 competent and conscientious students enough for one annual staff?

We call them competent and conscientious because we have before us the *Associated Collegiate Press Yearbook Guide* which rates our annual, the same one that Miller tried to rate as poor, as excellent in many phases of yearbook editing. The staff received a rating of excellent on basic idea and organization of the yearbook, for two examples.

Now cost. The cost of this year's annual will be the same as last year's—\$7.50. Miller said this cost is too much to pay for the quality of the annual. We disagree with him but do not believe the point is worth arguing.

Another complaint of Miller's was that students have to pay a professional photographer \$4.50 if they want their picture in the annual. This is a valid complaint and we agree with him. However, do undergraduates need their pictures in the annual?

A quick survey of eight staff members showed that only one of them had his picture in the annual as an undergraduate.

In the ACP ratings last year the cover of the annual received a rating of excellent. Should we take Miller's advice and lower the quality of the annual to decrease the cost?

In addition, advisors to student publications at NDSU are professionals in the field of mass media and have years of dealing with publication problems.

We are not saying that the Bison annual has no faults. We do say that Miller's criticisms are invalid and that he should be more aware of the annual's problems if he is going to investigate the annual. L.R.L.

The Spectrum

The *Spectrum* is published every Wednesday during the school year at Fargo, N. D. by the NDSU Board of Publications, State University Station, Fargo, N. D.

Subscription rate \$1.00 per term. Second class postage is paid at Fargo, N. D. 58102.

The opinions stated in the *Spectrum* editorials are those of the editor and do not necessarily represent the opinion of the student body or administration of NDSU.

Volume Six Praised By Professor

To the editor:

A year or so ago when Vol. 6 first made its appearance few would have gambled on its chance of surviving more than a term. For one thing, its policy to publish every couple of weeks seemed

suicidal. Where was the material to come from? And the enfant terrible had no visible means of support.

Nevertheless it has survived. This would be a small miracle in itself but Vol. 6 has done more

than survive. Raggedy and downright bad as it has been at times it has continued to improve and the latest number is the best of the lot.

It is better, I think, than the literary magazines from across the river or up north, even though these magazines published once or twice a year and they can choose from material gathered over several months.

Someone should strike a me for Steve Ward who more than anyone else, (except, perhaps his wife) has worked to keep the magazine going. Aside from reaching a respectable literary level, it seems to me that Vol. 6 is doing two things of considerable importance for the University.

First, it appears to be generating creative material from students in spite of the scarcity of creative writing classes and the absence of literary or arts club organizations very badly needed at North Dakota State University.

Secondly, in Sam Brekke it appears to be nurturing a true poet—about as rare in North Dakota as the appearance of a super nova. There are other young writers too, who look promising.

So when the University becomes a little Athens-on-the-Red River Vol. 6 and its literary guerrillas will have had a hand in it. In the absence of medals let us say Amen! Huzza!! Selah!!!

NDSU Professors Criticize Spectrum And Bethany College President

North Dakota State University professors spoke up this week in defense of college teachers in answer to the *Spectrum* article from Bethany College, W. Va.

"It is quite evident that someone in the editorial department of the campus newspaper selected this article especially for student reading," said David Nelson, assistant professor of agricultural economics.

This type of story provides students with a totally wrong impression of their college faculty, according to Nelson.

Teachers are not so naive as to think that their first responsibility is to the educational system. Students do come first and most teachers do make an effort within the time available to give their best to the student, remarked Nelson.

If a total educational program is to continue—someone must do research. There is generally a greater reward for research than for good teaching. This is the American system and so we accept it, according to Nelson.

"It seems to me that this fel-

low is ignoring completely the fact that being a university professor does not just mean teaching 18 hours a day—he ignores the scholarship aspect involved," said B. P. Sleeper, associate professor of bacteriology.

It may be true that some professors are annoyed with teaching but one cannot ignore the fact that in a good university research is on a par with teaching. It is also true that there are teachers on this campus that should be doing research and are not doing it, according to Sleeper.

"I don't know anyone that takes a three-month holiday in the summer—they either have to do research during that period or go out and try to scrounge a living for their families," said Sleeper.

One should not make generalizations about professors anymore than of any other group, according to H. G. Heggeness, assistant professor of chemistry. Some people are dedicated to their jobs but professors do not get together as a group so these statements are not valid.

"There are exceptions, I admit,

but I know many teachers who put in extra hours trying to help students. They are dedicated to their profession and not to the salary that they receive," said Heggeness.

"Just because it appears in a newspaper is no indication that it is true," said L. D. Loftsgard, "and it appears to me that some people are looking for a scapegoat for their own use."

Students often think that a teacher stands between them and a degree but ten years from now they will know that this was not true, according to Loftsgard.

"The trend in recent years in universities is to reduce teaching loads and allow some time for research work by professors," stated F. H. Sands, associate professor of chemistry.

"However in the area of the rapidly changing information available to chemists," Sands added, "it would be disastrous to expect a heavy teaching load and not allow time for keeping abreast with current studies and allow some time for research."

Michigan Authority Predicts Automation To Affect Teaching Methods Of College

Ann Arbor, Mich. (I.P.)—Automation will turn college lecture halls into discussion forums, a University of Michigan authority predicts. Dr. Stanford C. Erickson, director of the Center for Research on Learning and Teaching, said that teaching machines will allow students to learn more on their own initiative.

The professor thereby will gain "some degree of freedom from his traditional role of telling things to students and moves closer to the more rewarding relationship of discussing things with his students," he explained.

Technological means of presenting information to the student—such as educational television and

programmed instruction—will come to utilize "the powerful factors that lie within individually different students," Dr. Erickson said.

"Insofar as the student can acquire the prerequisite information by himself, he can then converse with his teacher in a two-way inquiry about problems and issues for which answers are not yet known," Dr. Erickson continued. "Similar to the dialogues Greek philosophers had with their students, this is university teaching at its best," he added.

Michigan's Center for Research on Learning and Teaching is working to achieve this level of teaching, Dr. Erickson said.

He pointed out that graduating

seniors in future years will not only have acquired basic information, but will have learned how new knowledge is acquired and how they as members of society can adapt to the rapidly expanding body of information concerning the physical and biological world as well as the social affairs of man.

"This means that college teaching must go beyond the relatively easy task of transmitting established knowledge. The more difficult future role will not be a choice between teaching or researching, but rather how to bring these attitudes and issues and methods of intellectual exploration and inquiry into the classroom," he concluded.

Negro Finds Problems In Fargo

"I went to 112 places in Fargo looking for a place to stay," said Dr. William H. Waddell, a Negro veterinarian who was transferred to Fargo by the U. S. Department of Agriculture.

Dr. Waddell and two Valley City State College students, Lester Galt and Dean Zimmermann, spoke Nov. 20 at a civil rights program sponsored by the Inter-Religious Council. Galt and Zimmermann took part in the Mississippi Freedom Movement this summer.

Waddell explained that he would look in the newspaper for apartments for rent and be accepted as a renter over the phone. Then, when he went in person to look at the place, he would be told that the apartment had been rented.

"All these places appeared in the paper for one or two weeks after they were taken," said Waddell.

Another reason given by the renter was: "I don't mind myself, but I don't know what the neighbors will think."

"We have segregation here," said Waddell. "Off-hand, no one person is responsible for it." He suggested that realtors, churchmen and the area's three universities should give better leadership in civil rights.

"In Fargo, 80% of your people can't believe this takes place," he added.

MISSISSIPPI

"There was less violence in Mississippi during last summer than in any other three months in history," said Galt and Zimmermann.

Negro violence is almost nil because, instead of fighting back physically, Negroes join the Freedom Movement.

The movements was organized by the Council of Federal Organizations containing groups such as

Congress of Racial Equality, National Association for the Advancement of Colored People and others.

A large, well-coordinated organization is needed because the opposition in the state is so great, they said.

Community centers were set up

to organize theater projects, freedom schools for Negro education and voter registration.

There is an organized plan of suppression against Negro education—no graduate of Mississippi Negro colleges is permitted to teach in the state.

WINTER QUARTER REGISTRATION

Students in attendance fall quarter must register during the pre-registration period Nov. 19-25. There will be a registration period on Dec. 4 from 1-3 p.m. at the Fieldhouse for new students and for returning students not in attendance fall quarter. Classes begin Dec. 7.

CAMPUS CUTIE this week is Dorothy Heintz, a freshman in home economics from Chaseley. She currently reigns as State Dairy Princess.

Survey Shows Campus Lots Not Used By All Students

Where do off-campus students park their cars? A survey attempting to answer that question was taken of 30 Fargo and Moorhead students living more than a few blocks from school who attended North Dakota State University both last year and this fall.

The students were asked (1) if they drive to school, (2) if they park their cars in school parking lots, (3) if they drove to school last year and (4) if they parked their cars in school lots last year. Of the thirty, 17 drive cars to school this year and 13 get here by other means. Ten of the 17 drivers park their cars on school lots and five do not. Last year 20 of the 30 drove and ten did not. Of the 20 who drove, 17 parked in school parking lots and two did not.

Reasons mentioned for not driving to school or driving but not parking on school lots were the fees and the poor condition of the lots. Most students who park on school lots use Minard and many said they are displeased with its muddiness.

Some expressed the desire to see the lots paved or blacktopped. Generally, students said they felt an addition to lot fees at this time would be ridiculous because the lots are not good enough to warrant the expense.

Proposed Bison Statue Viewed As Item For Abuse

Should the Student Senate approve the building of a "Bison Statue" as a symbol of the college and to enhance school spirit?

A random sample taken this week of students at large gave many varied opinions on the subject.

"Before another dime is spent on such a project—it should be brought before the student body for a vote to determine whether the majority is for or against it," said Dale Trenbeath, AG 3.

Trenbeath continued, "If this amount of money is going to be

spent—why not spend it on a swimming pool so the whole campus will be able to utilize it and benefit from it. The buffalo will most greatly benefit the "painter pranksters." If some frat wants it—let them pay for it, remarked Trenbeath.

Dennis Haugen, AG 3, stated that the Vets club went on record Nov. 5 opposing the building of a Bison statue by over a 75% majority. The resolution was to keep the Bison off campus.

"I believe that such a statue would be deformed and mutilated

by many of our students and those of our neighbor colleges especially those from that "other college" up north," said Bill Tapper, EA 3. This money could be better used for something of a more traditional value such as a "Campanile", according to Tapper.

Mary Ellen Watson, AS 3, stated that she thought that the statue would not lend that much to the campus or to school spirit and this money could be used for a more constructive project.

"Economically, it is the most ridiculous thing," said John Sch-

neider, AS 2. "I think our canon shows what will happen to it. We should spend that money on something more constructive and not on something that can be so easily destroyed."

The student body shouldn't build an item that would be a target for jokes on our university and the statue would be a prime subject for rival schools to use as ridicule material, according to Dennis Erickson, EA 1.

Norman Triebwasser, EA 2, commented that he thought the statue would be a nice gesture but one

can foresee many problems connected with sustaining such a structure.

"Since we are an agricultural university," said Steve Ward, AS 6, "it seems only appropriate that we scrap the buffalo and construct instead a monumental cow with functional innards.

"The student could place two bits in the cow's mouth, depress the right horn for white or the left horn for chocolate and commence yanking the cunning placed spigots to produce as much sweat and "NRG" as he can in given time," said Ward.

"Competition between agricultural students would lead to such great financial rewards that in short time, we could go in here to build a bronze bull adjacent

"Then maybe some dark night the bronze bull and the electronic cow might clash in a flurry of sparks—thereby frightening University of North Dakota students into acute neuritis and at the same time produce enough IBM cards to run this campus for a hundred years. Ah, Progress!" said Ward.

This is a student project and each student is entitled to his views—pro or con—and may contact his representative on the Student Senate or write a letter to the editor.

Any student who has not indicated his proof choice to Dan E. Olson should do so immediately. After tomorrow Olson will choose the proof which he thinks will be best for the yearbook.

Providing power for every environment . . .

provides challenge for virtually every technical talent at Pratt & Whitney Aircraft

Being a technically trained man . . . we assume you are looking ahead to a career of exciting growth and accomplishment and that you are looking for a company possessing these same qualities.

If our assumption is correct, we would like you to take a close look at us. For this Company, while solving the problems of the day, thrives on a sort of creative restlessness which anticipates the challenges of tomorrow. And more important to you, it recognizes its engineers and scientists as the master key to its present success and future progress.

From a solid foundation of basic and applied research, our Company has gained a firm foothold in the land, sea, air, and space programs that are helping to shape our nation's future. Our engineers and scientists are exploring ever-broadening avenues of energy conversion for every environment. Should you join them, you'll be assigned early responsibility . . . to apply your engineering talents to such areas as advanced gas turbines . . . rocket engines . . . fuel cells and nuclear power.

Such trail-blazing projects command the best of varied

talent. That's why you'll find at Pratt & Whitney Aircraft men with college training as diverse as their responsibilities. You will also find that opportunities for professional growth are further enhanced by our corporation-financed Graduate Education Program. Your degree? It can be a B.S., M.S. or Ph.D. in: MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL and NUCLEAR ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • CERAMICS • MATHEMATICS • ENGINEERING SCIENCE or APPLIED MECHANICS.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or—write to Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford 8, Connecticut.

Intercollegiate Judging Contest Winners Announced

Johnson, AG 4, placed overall individual in the Intercollegiate Livestock Judging Contest held on campus Sat., Nov. 14, received 552 points out of a possible 600.

High overall individuals: Robert Knorr, AG 3, second; Knutson, AG 4, third; with Knutson, AG 2, and Dave Rinke, AG 2, tying for fourth. Jules Van der Ke, AG 3, was high individual in group placings, with Knutson taking first in oral re-

of livestock consisting of swine, sheep and cattle. High individuals in each division were: beef, Rodger Johnson, first and Gary Knutson, second; swine, Robert Knorr, first, with Roger Halverson, AG 2, and Rodger Johnson tying for second; sheep, Palmer Holden, AG 4, first and Gary Knutson, second.

Contestants were mainly from Animal Science 319, junior livestock judging; and Animal Science 407, senior livestock judging. The contest was open to anyone on campus wishing to enter.

This is the first year that an in-

tercollegiate livestock judging contest was held in the fall. In the past it has been held in the spring prior to selecting the senior judging team for the following year.

According to Coach Merle Light, associate professor of animal science, the contest will become an annual event. Light also stated that the purpose of the contest is to encourage competition and interest among the students in the area of livestock judging.

Winners in the divisions received trophies furnished by the Saddle and Sirlion Club.

assistant professor of dairy husbandry.

The group will leave Fargo Friday, making several stops in Wisconsin and Illinois at pre-selected farms to judge dairy cattle. They will arrive in Chicago Tuesday and appear in the judging contest Wednesday.

The team judged earlier this fall at the National Dairy Cattle Congress in Waterloo, Ia. Jerry Lynn said that "I hope we do better at the Chicago contest." Team members will return to campus Dec. 4.

Charles Dickens Portrayal as Performed Yesterday

Williams, veteran actor, light and director, appeared in a Lyceum program at Dakota State University, Fargo, last evening, Nov. 24.

Williams was "one of the English world's most distinguished actors." Williams appeared in a portrayal of novelist Charles Dickens.

Williams' current tour will take him to more than 80 U. S. and foreign cities. Included in his appearance were selections from "David Copperfield," "A Tale of Two Cities" and one of Dickens' Christmas stories, "The Christmas Carol."

Williams has been active in the theater for more than 30 years.

He began his acting career while an undergraduate at Oxford University.

Most recently Williams spent the 1963 season on Broadway playing Sir Thomas More in "A Man for All Seasons." Last spring, again on Broadway, he played Pope Pius XII in the controversial play "The Deputy."

In presenting the portrayal of Dickens, Williams recreated the novelist's characters, costumed as Dickens.

Democrats Elect Officers

A monthly meeting of the Dakota State University Democrats was held Nov. 18 at the Memorial Union. The group adopted a constitution.

Officers elected for the coming year are: Charles Fleming, AG 2, president; William Guy, Jr., AS 1, vice president; Judy Moir, AS 2, secretary; and David Weinlaeder, AS 2, treasurer.

Scott, assistant dean of the school, was introduced as the sponsor to the club.

He announced the arrival of new members printed with the initials of John F. Kennedy, to be sold by the members.

Dairy Team

A dairy judging team will represent North Dakota State University at the Intercollegiate International Dairy Cattle Judging Contest held in conjunction with the International Livestock Exposition at Chicago, Ill. on Tuesday.

Members of the team are Jerry Lynn, AG 3, Thomas Revier, AG 3, Allan Anderson, AG 2, Neil Morkassel, AG 3. Coach of the team is Charles G. M. Edgerly,

Maughan Heads Varsity Wrestlers

Bucky Maughan, who was the second wrestler in history to win two national intercollegiate wrestling titles in one season, is North Dakota State University's varsity wrestling coach this year.

Maughan won the two titles in 1963 while representing Moorhead State College. He took the National Collegiate Athletic Association 115-pound class at Kent, Ohio and the 123-pound championship in the National Association of Intercollegiate Athletics tournament.

Although the wrestlers had a 3-10 record last year, Darrell Mudra, athletic director, is hopeful that Maughan will be able to eliminate this weak area in NDSU's athletic program.

Mudra said that "Bucky has a sound working knowledge of wrestling. His championship attitude coupled with a desire to build a good program is what we need."

Speaking about the team's prospects, Maughan said, "We should be able to finish with a break-even season if the boys will really get in there and scrap."

"If the conference makes freshmen eligible for the varsity, our chances of having an equal record will even be better, for it will add depth and increase the competition in the team," continued Maughan.

Maughan said that the prestige the football team is adding to the University will enlarge chances of getting better wrestlers with more background to come to NDSU.

"Also, allowing freshmen to compete with the varsity will help to recruit more prospective grabblers," Maughan explained, "for many boys want to wrestle on the varsity as frosh."

Besides coaching, Maughan is teaching the wrestling sequence course for the physical education major and is doing graduate work in counseling and guidance.

Maughan, who is a native of Canonsburg, Pa., got his B.A. degree in English from MSC last August.

Graduation was only the beginning of Jim Brown's education

Because he joined Western Electric

Jim Brown, Northwestern University, '62, came with Western Electric because he had heard about the Company's concern for the continued development of its engineers after college graduation.

Jim has his degree in industrial engineering and is continuing to learn and grow in professional stature through Western Electric's Graduate Engineering Training Program. The objectives and educational philosophy of this Program are in the best of academic traditions, designed for both experienced and new engineers.

Like other Western Electric engineers, Jim started out in this Program with a six-week course to help in the transition from the classroom to industry. Since then, Jim Brown has continued to take courses that will help him keep up with the newest engineering techniques in communications.

This training, together with formal college engineering studies, has given Jim the ability to develop his talents to the fullest extent. His present responsibilities include the solution of engineering problems in the manufacture of moly-permalloy core rings, a component used to improve the quality of voice transmission.

If you set the highest standards for yourself, enjoy a challenge, and have the qualifications we're looking for — we want to talk to you! Opportunities exist now for electrical, mechanical and industrial engineers, and for physical science, liberal arts and business majors. For more information, get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.

NCC Adopts New Freshman Eligibility Rule

The North Central Athletic Conference approved action Monday to allow freshmen to compete on varsity teams in spring sports.

The sports are baseball, tennis, and golf.

How this action will effect North Dakota State University teams in these various sports is unknown; however the athletic department has expressed enthusiasm for the new program.

Erv Kaiser, golf and tennis coach, stated that it would provide NDSU field better teams. He said the rule would also benefit other schools in the conference as well.

Darrell Mudra, athletic director and head football coach, said the action would help NDSU provide a better freshmen program of athletics. He commented, "I was somewhat disappointed that the action didn't include wrestling, but we have hopes that similar action will be taken on wrestling in the spring."

Walt Weaver, varsity tennis coach, didn't feel the new freshman eligibility ruling would benefit NDSU track teams as much as some of the other schools in the conference. Weaver stated, "NDSU doesn't recruit track stars like other sports and the advantage of having freshmen participate would be small except in the case of an exceptional athlete."

BISON FOOTBALLERS are practicing for the bowl game.

Senior Footballers Prefer Coaching Careers

Satrom
The success of the Bison's 1964 bowl campaign is due to the play of the 11 seniors on the team. They played important roles in every phase of the game and also demonstrated varying degrees of ability in other sports.

Ability extends into track
One has smashed North Dakota University records in the 100- and 440-yard dashes. Several other seniors have participated in track and will in the future.

Basketball prowess is
evident by the fact that one of the seniors was a regular on last year's team. Another played two years in the North Dakota Athletic Conference and still another was a member of North Dakota's first high school team. Several have earned letters in baseball and wrestling.

Seniors on this year's team
will demonstrate athletic ability and also show scholastic accomplishments. Their ambitions include academic qualifications.

Holmgren, 1964 tri-captain,
has a career in business. His leadership has given him professional football possibilities and offer him a chance to satisfy his desire to play more football and give him exceptional business opportunities. He plans to continue his collegiate athletic career with track in the spring.

Sturdevant, 1964 tri-captain
and read-and-butter man of the

offensive backfield, plans to use his athletic ability with a physical education major. His degree in education coupled with his athletic accomplishments give him the qualifications for coaching.

AIRHEART
Halfback Bruce Airheart will enter the United States Army as a commissioned officer through the ROTC program. His civilian plans include coaching with his physical education degree.

HENTGES
Frank Hentges, starting quarterback, plans to further his education by getting a master's degree in physical education. He believes this will qualify him for a collegiate coaching job that will satisfy his personal ambitions.

NEIS
Harold Neis, one of NDSU's biggest linemen, will complete his education at NDSU where he will receive a degree in mathematics and physical education. The double major offers him both the teaching and coaching opportunities that Neis desires.

DUCHARME
Pierre duCharme, a place kicker and quarterback, will graduate with a degree in English. His combined education in English, speech and physical education offers him business opportunities that would satisfy his ambitions. A

sports public relations job is uppermost in duCharme's mind.

T. STURDEVANT
Terry Sturdevant, the other half of the brothers combination, plans on a career in coaching. He believes that high school or collegiate coaching would fulfill his desires.

SCHLICHT
Jerry Schlicht, an anchor lineman, plans to continue his education with a future in coaching. He believes his interest in football and wrestling coupled with his degree give him the necessary qualities for coaching either on the high school or collegiate level.

FREEMAN
Hal Freeman plans to enter Officers' Candidate School in either the Marines or Navy. His civilian plans revolve around a degree in composite sciences and biological science.

PFLIPSEN
Ed Pflipsen, a hard-driving halfback, looks forward to a future in education. With a physical education degree he believes he could satisfy his personal ambitions by becoming a coach, either on the high school or college level.

THESING
Dan Thesing will enter the United States Marine Corps as a second lieutenant. His civilian plans hinge on his service career.

Al Peterson - -

SU Students Needed In Mo.

It will be disappointing if students do not fill the trains and buses making the trip to the Mineral Bowl.

Although some people will be affected by spending \$21 for the fare more than others will, I am sure enough people in this school can afford the time and money to occupy the provided transportation.

Agreed—this game comes at an inopportune time regarding final tests; however, I don't believe this is the determining factor. Our school has little tradition.

Students at other universities, where tradition and school spirit play a major role in their college lives, would not have to be coaxed and coddled to follow their team to a post-season bowl game.

No time this year will be better for students to demonstrate their school spirit. Also, being practical, North Dakota State University students will have an enjoyable week end in Missouri.

Anyone who desires to make arrangements for the trip after today must make them through the business office.

SCI FULLBACK OUT-GAINS OPPONENTS

State College of Iowa's 200-pound fullback outrushed the ten Panther opponents this season by 184 yards.

Four times Shultz gained more

than 100 yards in a game finishing the season with a total of 1,072 yards. NDSU, who beat SCI, held the junior fullback to 71 yards in 25 carries.

BASKETBALL TEAM OPENS AGAINST ST. LOUIS

Bison Head Coach Chuck Benson has named an 11-man traveling squad that will fly to St. Louis Tuesday to open the '64-'65 basketball season. The Billikens have long been noted as a basketball power and should provide stiff opposition for the Bison's opener.

Last year the Bills finished with a 13-12 record but registered wins over such powers as Kentucky, Bradley, Ohio State, Cincinnati and Illinois.

From St. Louis the Bison will fly to Carbondale, Ill. to help Salukis of Southern Illinois University dedicate their new \$4 million arena. The Herd is expected to return to Fargo Thursday.

Probable starters for the Bison will be Verlin Anderson, center; Lowell Cook and Jerry Suman, forwards; and Dave Lee and Lee Grim, guards.

Other squad members making the trip include Joe Schaefer, Bob Tuhscherer, Al Breuer, Bob Maier, Jerry Olson and Tom Noyes.

CLOSING NOTES

Guard Gary Benson was the only Bison to appear in the all-opponents team chosen by the University of South Dakota.

Billiards Offered For First Time This Winter

Billiards will be offered by the North Dakota State University Intramural program for the first time during the winter quarter. At its regular meeting Monday the Intramural Board decided that one billiard league would begin next quarter.

The league will be run similarly to ping pong, with one doubles match and two singles.

Erv Kaiser, Intramural director, asked for rosters and fees to be turned in at the Dec. 7 meeting.

The Intramural Board received a recommendation from the Board

on Organizations and Activities advising the IM Board to revise its constitution to accommodate present-day problems in Intramural activities.

Kaiser explained that the NDSU athletic staff would review existing laws during winter quarter and then make a proposal to the IM Board.

Winter quarter Intramural activities will start the first week of the quarter with basketball as the main attraction. Ping Pong, bowling and billiards round out the program.

Play offs for the volleyball season will be completed Dec. 8-11.

BLAZER OF GLORY

The glories of scholarship are no reason for a carelessness of dress, the proprietor maintains. The blazer exhibited here is one sure method of addressing one's studies in spruce confidence.

from \$25.00 to \$39.95

Congratulations to all the football players and the coaching staff on a very successful season. Lets all spend Thanksgiving supporting the Bison at the Mineral Bowl.

Take plenty of reading along for the trip to the Mineral Bowl.

We still have a fine selection of paper backs on sale for 1/2 price.
