President Presents
Budget Proposals

President H. R. Albrecht presented a proposal to the Governor and the Legislature that will be considered for the next fiscal year. The state's proposed operating budget, including tuition and fees, resident hall accommodations, and other improvements necessary to properly maintain and improve the state's investment in NDSU's physical plant, was allowed by the budget request. Of the amount requested, some $2,190,182.12 over the next biennium, which further reduces the proposed increase to an actual total of $285,255; a percentage increase for the next biennium of about 3.9 percent.

In addition, to its operating budget NDSU has requested appropriations for a new classroom building, a physical education and athletic unit, a re-placement for its laundry building, an addition to Sudro Hall, and other improvements necessary to properly maintain and improve the state's investment in NDSU's physical plant. Of the amount requested, some $5,525,206, only $606,000 was allowed by the budget board to be recommended to the Legislature. The classroom building and the physical education building were not included in the recommendation. In addition to the cuts made in the operating budget and the building proposals, the proposed state appropriated portion of the Agricultural Experiment Station budget was decreased by $1,029,886 and that of the Cooperative Extension Service by $169,337.

What does all this mean for the future of NDSU and the State of North Dakota? As stated earlier by President Albrecht, comments on the budget request, what has been granted, and exclusive recommendations by the AAUP, our.similar institutions throughout the United States for its faculties and staff, will be made in last year's computations by the AAUP, our salaries ranged from ten dollars a year above the national average for people of the instructor rank, to more than $2,000 a year below the national average in 1963.

Because of this, in our most recent pay raise the full cost of living, instructional buildings have been cut from $2,125,172.12, the figure represents an increase in NDSU's enrollment has increased to about 183 over the past two years and staff members have been added. All of these increased expenditures are obligations for the next biennium, which further reduces the proposed increase to an actual total of $285,255; a percentage increase for the next two years of about 3.9 percent.

In addition to its operating budget NDSU has requested appropriations for a new classroom building, a physical education and athletic unit, a re-placement for its laundry building, an addition to Sudro Hall, and other improvements necessary to properly maintain and improve the state's investment in NDSU's physical plant.

Christmas is for the kids, you know?" "Christmas only comes once a year." "What'll we get Uncle Harry if we can't mail booze?" "He'll get the same Santa Claus. He always wants the same thing anyway." "Jesus." "Christmas is a time for cliches." There is visual triteness, too. Holly wreath and mistletoe, suburban homes, 236 identical trees and a "For Rent" sign. Claus passing for refreshment with a Coke; freshening up with lightning up with Lucky Strike, G. E. bulbs, and Rudolph the Red-Nosed Reindeer, a perusal of the pictures, shows me that, musical phrasing to the tune, it was the night that was so calm around the holy place and experience was the closest I have come to Satori.
Science Grant Received

The National Science Foundation has in current academic year... by the Institute of Science and Mathematics at North Dakota State University to conduct an institute of science and mathematics for junior and senior high school teachers. The institute will be conducted through the summer months and will provide selected teachers with up to $75 a week to participate in the institute, plus one course in science and math in grades 7-12. Those selected will have until Mar. 15 to accept or decline the invitation to participate.

The institute will be the second one conducted by the Institute of Science and Mathematics at North Dakota State University. The first institute was held in the summer of 1964 and was conducted at the North Dakota State University College of Chemistry and Physics. The stated purpose of the summer institutes is to upgrade the teachers' knowledge of subject matter in order to enrich the courses they teach. Minnear emphasized that the courses deal primarily with subject matter, not methods of teaching it.

In the interest of assessing the impact of the summer institutes and the in-service programs in science which are conducted throughout the year, the NDSU Institute of Chemistry and Physics has conducted an informal study of incoming freshmen. Results of the study, Minnear noted, have shown a marked increase in both the quantity and quality of freshmen with both interest and knowledge in the fields of science and math.

A brochure, describing the 1965 institute in detail, will be available by writing Dr. Minnear after the first of January.

GOVERNOR WILLIAM GUY entertains his friends at a luncheon in the NDSU Food Service building.

FORD MOTOR COMPANY BUILDS A TOUGH ONE

IT SWIMS
Ford Motor Company's new military truck floats. Air-inflated seals and internal air pressure keep the body and mechanical components dry. Its water speed is 2.5 mph.

IT CLIMBS STEPS
Climbing over a 27-inch high step or negotiating a 60% grade fully loaded is no problem for this Ford vehicle. Proof that it can go over rough cross-country terrain.

IN FACT, THE ARMY'S NEW TRUCK GOES ALMOST ANYWHERE

Early in 1963, Ford Motor Company received a contract from the U.S. Army to design and develop a 5-ton cargo truck for use in tactical military operations. Before the end of that year, the first test unit had been designed and built.

This new vehicle, called the XM606 cargo truck, was sent to Aberdeen Proving Ground for 40,000 miles of testing - twice that required for military acceptance. The vehicle was tested against road conditions that might be found anywhere in the world: swamps... loose sand... hilly back-country... and highways. During the test, the truck carried a 10,000-lb. payload and, half the time, towed a 13,000-lb. load. Outstanding characteristics of the truck's design are its floatability, improved cross-country mobility, light weight, reduced need for maintenance and a multi-fuel power plant that will run on anything from diesel oil to gasoline.

This is only one of many exciting new developments at Ford Motor Company. From manufacturing to marketing, we are finding better ways to do things. Career opportunities at Ford Motor Company have never been better. Schedule an interview with our representative to find one just right for you.

International Christmas?

To the joys that inspire us all at Christmas time, each nation lends unique elements.

In Sweden where family ties are strong, the prettiest daughter becomes, for a day, Lucia, the medieval saint who carries food to the hungry. Wearing a crown of leaves and candles, she tip-toes to the house of each family member, leaves cake and coffee and departs with a smile and a kiss.

In England, the "Mummers of Marshfield," clad in shredded paper capes, stride into square to oblige the minor holiday season and delight their townsmen—with a table of England's traditional heroes.

Snow never fails in Haiti and the thermometer, even in December, hovers near 80. Nevertheless, this does not dampen the natives' air of festival at Christmas. They come to town from hills and coastal villages; they vie for the most colorful shawls, the lowest noise-makers. They shoulder their plow and head toward home for a merry Christmas.

Javanese village become a stage for a chronic procession. It moves happily from house to house until, at last, it stops before the door to the entire event. This is the "possesed," connotation of the journey of Mary and Joseph.

Japanese shops are decked with tinsel, holly and season's greetings—"Christmas Omendeta." From the Hildegard of New Years, the chime of voices raised in Yuletide song—the children listen intently to hear the universally loved stories of Christmas.

The snow-covered valleys of Switzerland are quiet except for the sweet sound of carols in the frosty air. A child trudges through the snow to implant a pine branch at the foot of a simple grave. This is Christmas in Switzerland—a time of tranquility and prayer.

America, too, has a contribution to the world's distinctive Christmas custom. Throughout the nation, families meet to exchange gifts and with each other glad tidings. In the southern states, fire-crackers boom out the exhilarating on the eve of the Savior's birth. In the east, the Beacon Hill Bells Ringers fill the night with the magic carols and carols of Christmas.

Throughout the world at Christmas time, people tend to forget the feeling that they hold toward their fellowmen. We wish that this feeling of joy and love could continue all through the year.

Greetings At Christmas

The pace quickens on a university campus as the Christmas holidays draw near. There are the last minute things to get done—papers and term papers. The atmosphere is an expectant and excitement that comes before traveling home and seeing family and friends. Our best wishes for a merry Christmas and happiness throughout the New Year.

When you return to the campus, the University will begin celebration of Joe's 30th anniversary. NDSU has compiled an exceptional record of accomplishment since its beginning in 1890. Its future looks as bright as its past; but it takes a student body and faculty to make this happen.

This depends upon each individual for each of us to give to the University and take from it. The success of a university is the sum of the success of its students, its faculty and its staff. We have good reason to look forward to 1965 and the celebration of its 75th anniversary.

H. R. Albrecht, President

Violence And Bloodshed Envisioned By Gutkind

There will be many more violations of human rights and many more bloodshed in Africa before stability comes to that continent according to Dr. Peter Gutkind, visiting Assistant Professor of Anthropology at McGill and specialist on African affairs.

Dr. Gutkind was taking part in a panel discussion last Friday on determinants of revolution and the conflict between the concept of an international brotherhood and the need for change in Africa. He said he hoped these revolutions would occur. Many changes are needed in Africa and it takes "strong-armed dictators" to make these changes.

Dr. Gutkind astonished the audience and fellow panelists when he indicated that he has not resigned his job last quarter unmis taken impression that former Spectrum editor Joe Schneider resigned his job last quarter under some form of pressure, primarily either from the administration, students, or the commission of student publications.

He did resign under pressure, but it was the pressure of grades. The job of editing the Spectrum is more nearly a full-time than a part-time chore and it takes an exceptional student to maintain a decent average and still put out a good newspaper.

This past quarter NDSU has seen the best Spectrum ever printed, and Joe Schneider has received the highest grade he has ever given. This has been an exceptional effort, but only because Joe possessed the desire and perseverance necessary to accomplish such an unheard of feat.

Three quarters of applied effort at the expense of tone to one's self to make this a quality University is not a fact that can be expected of anyone.

If there was any outside pressure created with Joe's resignation, it was that of Advisor Verne Nies, the King, who himself and is trying to persuade him to stay on. Other pressures by the administration, students and faculty have long ago been dissipated by his fleeting tenses and indestructible pen.

Controversy, the Spectrum, and Joe Schneider are synonymous.

The Spectrum

The Spectrum is published every Wednesday during the school year at Fargo, N. D. by the NDSU Student Publications, State University Station, Fargo, N. D.

Subscription rates: 50c per year.

Second class postage is paid at Fargo, N. D. 58102.

The opinions stated in the Spectrum editorials are those of the editor and do not necessarily represent the opinion of the student body or administration.

PREXY'S PROPOSED BUDGET CONTINUED

(Continued from page 1)

The current annual operating budget for both students and faculty has been adjusted by 25 per cent last year when the faculty did not receive a salary increase. The new schedule rather than an eight-hour schedule will be adhered to. This system has posed some inconveniences for both students and faculty but the adjustment has been made willingly. However, PREXY, presently there is not sufficient room for the 1,000 student enrollment increase which is expected to be about 400. The three fighting dollars have kicked in and are not necessarily due to the increased enrollment this year.

The last Legislature did not act quickly to vote student and faculty contracts. If nothing is done this semester, the students may be the first to suffer because the faculty may not have their contracts. If this occurs, PREXY will have to hunt for the necessary funds from the National Research Foundation, the National Science Foundation and others to pay these salaries. The faculty will still have their jobs but the state in turn will still have to pay nothing.

Elected people are not to be blamed. They earn more than most students. But even they should not be doing better on what in the face of a dynamic increasingly challenging socio-economic scale. The cost of living may raise the quality of the education otherwise the students may even worse that in which they live.

The faculty is responsible for the quality of their work and the courses they teach. The students are responsible for the quality of the education set by their professors. They must maintain standards of academic performance set by the institution and the quality of the education which is paid for and the certificate of competency which results from the exercises of rights.

The faculty should provide the protection against unjust grading errors, the preservation of freedom of expression and freedom of thought. They must maintain standards of academic performance set by the institution and the quality of the education which is paid for and the certificate of competency which results from the exercises of rights.

SC Urges End To Congo Revolutions

The Secretary of the Inter-Collegiate Student Conference has said that the revolution in the Congo will not end until there is a complete and immediate with­drawal of the perpetrators of acts of violence. The ISC has been given the responsibility of formulating a plan for the presentation of this proposed legislation to the legislators, said Aarnes.

Policy Forms Sought For AU Senate

Washington, D. C. (UPI) — Assistant Secretary of the Interior, Charles Van Way, Jr., announced that the association of students had the authority to obtain the necessary permission to continue school. We are directly concerned with the success of these efforts to prevent further violence.

Two Year Degree's Offered

A two-year associate degree now offered by the College of Arts Economics. Degrees are available in child and family service, fashion and clothing construction, food service, home furnishing, home and family living and commercial design. The course is designed to accommodate women who want a skill for a nonprofessional job or who wish to attend college but do not have the time or money to major in fashion design.

How To End It All

"If we will tend to oppose each other, by self-appointed Harmonics of morals to impose on groups, by our will of our own or by any "other-eels-throws" tactic, a conformity to externally applied standards, we will continue to support various groups to themselves and their academic programs and progress.

"We will use our resources to get their attention on the part of their students. In effect, we are directly concerned with the success of these efforts to prevent further violence."

"We will continue to support various groups to themselves and their academic programs and progress.

"We will support efforts of the students to adopt high standards of ethical behavior and to promote the highest possible degree of honesty and to create procedures whereby these ideals may become a part of our student body. In the other hand, we will tend to oppose efforts to impose upon groups morally or otherwise, without the consent of the group."

"Professor, over 100 years ago, Charles Colton pointed out that the world was in a terrible situation and that we were going to the best prepared, for the greatest evil may ask more than the wise man may answer. And, the wise man may answer more than the greatest evil we may ask."

Editor's Note: Below is a story released over the Associated Press Wire last Thursday. It is an excerpt from a report appearing in the New York Times which was released over the Associated Press.

"Minard Office Broken Into Night Before Examination," is a story telling the "State in the Congo," that was broken into the night before a scheduled examination. The other headline, "Five Photographs Stolen From Union," related the other headlines. The ISC Secretariat feels that the presence of students should be kept to the minimum possible. The ISC Secretariat feels that the presence of students should be kept to the minimum possible.
Statue Project Defeated by Senate

After considerable discussion, Senate moved to discontinue the Illini statue project. After several officials of the university had discouraged the project, Athletics Commissioner Dave Lee suggested further investigation into reasons why a Bison statue should not be erected.

President Findley suggested it might be symbolic of school tradition and the elected Whitehalls of North Dakota. Vice President Al Redman suggested the money might be more wisely invested elsewhere such as freshman scholarships.

Eldon Walker, faculty advisor, said that he had never seen the athletic mascot as a symbol of a university and cited the absence of a donkey or jackass at West Point. A motion to terminate the project followed and passed.

Findley criticized legitimate action of the Homecoming Central Committee after Finance Commissioner Frank Lantz announced that the 1964 homecoming activities had incurred a loss of $450. Lantz said that the Homecoming Central Committee had requisitioned funds for expenditures which they had no authority to approve.

Findley said that it is absolutely imperative that Senate have carried. It was decided that the suggestion box was no longer needed.

The Commission of Campus Affairs announced that the Sharivar Steering Committee (SSC) for 1966 has been selected.

This year students were selected through interviews by the commission as well as applications; this is the first year interviews were held.

In addition to holding interviews, the commission decided to use the chairman-assistant chairman system in order to clearly define the authority resting on each member.

Commissioner Al Redman said that the chairmen set up all plans, delegates authority, while the assistant chairman checks to see that all plans are carried out and deadlines are met.

Chairman of Sharivar is Gaylen Taylor, AS 3. Assistant chairman is Gary Pfeifer, AS 3. Miss Taylor and Pfeifer are in charge of all student events for Sharivar.

Finance chairman is Lionel Esch, AS 3. This entails programming. Euni Kirking, Drayton, is assistant chairman. Miss Kirking has been selected as KDSU station manager as well as applications to Russell Tveit, AG 2 (Farm House).

Sharon Houge, HE 3, is engaged to Mike Kline, PH 2 (Sigma Nu).

FA "Friends Night" Banquet Held, North Dakota Star Farmer Honored

North Dakota State University chapter held its 10th annual NDSU FFA "Friends Night" banquet Wednesday evening in the Memorial Union. About 150 members and guests attended the event.

The main purpose of this type of event is to acquaint members with the collegiate chapter, assist with the development of the FFA parent-son banquet which will be required of all members attending NDSU in the future position as agriculture instructors in North Dakota.

The FFA parent-son banquet was presented. A number of awards were presented by Marcella Bergland, a 37-year member of the Co-op House, Robert Knorr, AG 4, and Al Anderson, president of the North Dakota FFA association.

Reports on the collegiate chapter's activities were given by Roger Bergland, David Wahus, Rodney Fred, Gary Rosenfeld and John Berdahl. Ken Silva presented the FFA creed.

The closing ceremony was conducted by the chapter officers followed by a get-acquainted visitation period for members and guests.

Shubel Owen, advisor to the collegiate chapter, was presented with a token of appreciation for his past work with the NDSU collegiate chapter.

The Hall of Fame Banquet actually honors the outstanding men of agriculture in North Dakota. In 1939, the agronomy show became a part of the Little International and in 1951, the agricultural engineering and home economics shows were added to the two-day event.

CONCERT CHOIR of North Dakota State University sings of Christmas.

Fraternity Receives Final Warning From University

The Sigma Alpha Epsilon fraternity has again been placed on probation for activities following a party held on campus.

It was learned that the SAEs served punch containing liquor at their party thus violating a state and school rule. The administration heard of the violation from a professor whose son is a member of the fraternity.

The disciplinary meeting was called by Dean Scott, assistant dean of students and advisor of IFC. Attending the meeting were Dean Leasure, dean of students; Frank Bancroft, advisor to the SAE fraternity; Ray Barnhardt, president of the SAE house; Joe Schneider, president of IFC; and Bill Burnett, a member of IFC. The group met in order to determine the SAEs' punishment.

Dean Scott reviewed the SAEs' past record. Last winter quarter the SAEs were given an official warning from the Dean of Students office following a party held in their house over Christmas vacation. At that time several members of the fraternity had invited girls to the house after midnight. The SAE fraternity punished the members following the warning.

During the Spring quarter group of SAEs were apprehended at an unscheduled picnic with a keg of beer. At this time the disciplinary board placed the SAEs on probation for one quarter. They were removed from probation two weeks ago.

At their party celebrating their renewed status liquor was served in punch at a dinner. President Barnhardt reported to the group that ten gallons of spiked punch was consumed, the last being served at approximately 9 p.m. In addition, 30 gallons of regular punch and soft drinks were served during the evening.

Barnhardt added that no person in attendance was intoxicated or disordered.

His recommendations were:

1. That the chapter be issued a probation warning, to be effective through Winter quarter;
2. That during this warning period, any violation of University regulations shall be due cause for the committee on group discipline to recommend that the National Fraternity office suspend the charter of North Dakota Beta chapter;
3. That during this warning period, the chapter shall subject to a monthly inspection by a Province office who shall be responsible, and report to the National office.

In explaining his recommendation, Bancroft stated, "The purpose of this recommendation is that it will pose a very real threat to the existence of the fraternity should anyone consider violating any regulations, thus placing the responsibility for mature behavior on the shoulders of the members.

"It will also provide the members of the house an opportunity to realize that good times are possible without the presence of alcoholic beverages, so that old traditions will not prevail in deterring the structure of a party.

The committee discussed the seriousness of Barnhardt's statement.

Dr. Leasure mentioned that on the two previous infractions the SAE president had promised that his house would improve its behavior. However, this had not materialized.

Barnhardt commented that discipline within the fraternity was not as firm as he would have liked it.

Bancroft mentioned that he was impressed with the action of the SAE chapter when Barnhardt informed them of his recommendation. "The threat of taking away their charter really impressed them," stated Bancroft.

Schneider moved that the Disciplinary Committee accept President Barnhardt's recommendation with the probation period to be extended until the end of Spring quarter. The motion was seconded and passed.

A projection based on last year's registration has been completed. At the Topeka convention publication was judged in a competition with those from North Dakota, Minnesota, Nebraska, Kansas, and Missouri.

"Bison Briefs" regularly news about the University's academic and cultural activities and relating to alumni. A graphic feature and special items on faculty and alumni notes.

Enrollment Record Set

Winter enrollment records at North Dakota State University are already broken and the total enrollment is still increasing.

Approximately 4,220 students had registered for the winter quarter by Dec. 7. Burton B. Brandrud, director of admissions and records, upon releasing this figure added that he expected the number of students to grow to 4,400 before registration has been completed.

Last year at this time 3,704 students were registered. When final registration ended the total enrollment exceeded 3,900 students. A projection based on last year's figures helped to form the estimated 4,400 total expected this quarter.

Although the registration total is the highest ever recorded for any winter quarter, it is not in the highest in the NDSU fall quarter of this year is higher than total enrollment with students.

Brandrud said that this year enrollment is normal at approximately 100 fewer students than winter quarter than fall quarter. Last year enrollment was 3,068 fall and 3,900 winter quarter.

"Bison Briefs Wins Award

"Bison Briefs," a quarterly letter published by North Dakota State University for its alumni, friends, former students and others of students, has won a prize in a regional contest college and university publications.

The award was presented by the Region of the American College and University Public Relations Association, Topeka, Kan.

Edited for the past year by Beth Rachefort, assistant in public relations and universities in the Dakotas, Minnesota, Nebraska, Kansas, and Missouri.

Austin's Fees Are Stabilized

Sherman, Tex. (I.P.)-Students at Austin College won't have to worry about tuition raises after the first of the year.

Students in 1964-65 will pay $1,050 tuition, juniors $1,250, seniors $1,450; $1,350 tuition and $100 fees. In his sophomore year tuition will not be raised after the first of the year.

Students already enrolled her senior year will be guaranteed for the remainder of their college careers the less his tuition for the beginning of the 1964-65 academic year. The institution has announced that the tuition in effect at the beginning of their freshman year will not be raised during their four years of college.

Students in the plan is a graduated, declining schedule of payments, which stresses the college's four-year program. The lon- ter a student remains at college, the guarantee will be reduced.

Am The Victim Of Shaking Hands"

Gerald G. Hudson

The day I spent an hour of trying to put a new ribbon into my typewriter. I can cope with this, and I can even afford the uncountable hours in which I try to write my answer to the plume. I have written a Chinese puzzle, and about the twentieth time I essayed to write English, my typewriter refused. My problem is that I am too little to do that. How was my typewriter to whom I asked what my hands had been tumescent to which I answered, "And how?" He asked about my mother's hands. I told him how as a small child I used to giggle when mother tried to thread a needle.

The doctor told me that I had what is commonly known as Con genital Shakes. He said, "There is absolutely nothing you can do about them, and I might as well tell you this: the older you get, the worse they will become." He was certainly right. They have.

Psychology Club Forming

Further plans for forming a Psychology Club on the North Dakota State University campus were dis closed on Thursday, Dec. 10 at an organization meeting held in Me neke Lounge. The members formed committees to write a constitution and register the club with the University. Meetings will be held every two weeks on Thursday nights at 8 p.m. and club officers will be elected at their next meet ing on Jan. 7.

The main topics of discussion at the Dec. 10 meeting were purposes, goals and projects of the club. Several members expressed the opinion that the primary aim of the club would be to make possible regular informal discussions and an organized means of information exchange among psychology people on campus. This could be an organization of public relations for the psychology department and it could bring more interested students into psychology.

Possible projects suggested at the meetings included field trips to institutions for the mentally abnormal, speakers from the different fields of psychology, building of equipment for the psychology department, obtaining films on psychology and conducting experimental research projects.

James O. Whitaker, professor of psychology, will act as advisor to the club. Whittaker and Joseph A. Ray, Jr., assistant professor of psychology, gave short talks on their respective fields of psychology. Ray also commented on various grants and experimental assistant jobs that would soon be available to students on this campus in psychology.

The people attending the meeting were urged to bring anyone interested in psychology to the next meeting.

DOUBTING THOMAS?

HOPEFUL AGNOSTIC?

Christiansity has more to offer than hope, it has positive proof in the form of a MIRACLE which was formed, described and is intensely personal. Ask the Religious Leaders or send me a card marked ESP-17. My reply is free. Non-Denominational.

CHRISTIAN. MARYW H. HART

Box 53, Glen Ridge, N. J. 07028 (USA).

Bison Gymnasts Have Six Meet Schedule

North Dakota State University gymnastics team under the coaching of Erv Kaiser began its six-meet schedule Friday with a dual meet at the University of North Dakota.

Kaiser expressed optimism that his team could improve on last year's 3-4 record, although two of his better point-getters have graduated. The absence of Dan Dillon and Roy Theis will be felt but Kaiser believes the team has the potential necessary for making a respectable showing.

Jack Discher, Al French, and Tom Vick look like the most promising scorers. Discher, last year's second leading scorer, uses his gymnastic ability to the maximum by participating in every event except the rings. Coach Kaiser believes French has exceptional potential on the trampoline and should get the team some points this year. Vick is a steady, gifted horse performer.

Coach Kaiser organized the NDSU gymnastic program in 1960. Kaiser spent the first three years teaching interested boys the fundamentals of gym competition. The first step of NDSU gymnasts into intercollegiate competition. Their respectable showing increased interest in the sport, but Coach Kaiser had hoped there would be more participation so that the team would have the depth necessary for successful competition.

This year's call for gymnasts drew between 16-20 boys who have been working out regularly. Kaiser forseees a difficult season since both Bemidji and the University of North Dakota are believed to have improved, experienced teams.

The Bison are setting their sights on the Northwest Gym Meet in Minneapolis in February. The Bison won the Class B division of the Minneapolis meet last year and although their victory forsets them into Class A competition Kaiser feels a respectable showing is possible.

The schedule for the entire season is:

- December 12 - UND (there)
- January 16 - Bemidji (here)
- February 6 - Bemidji (there), tentative
- February 20 - Northwest Gym Meet (Minneapolis)
- February 27 - UND (here)

Bison Drop Pair To Montana Teams, Loyola And Valparaiso Next Foes

North Dakota State University, suffering from mechanical errors, lost to Montana State College 80-74 last Friday night at Bozeman, Mont.

The Bison trailed 38-33 at the end of the first half. They held brief leads throughout the second half but with four minutes left the Bobcats took the lead and kept it.

Late in the game NDSU had a chance of closing a 75-70 gap with a free throw 11 situation and a technical foul shot to capitalise on; however they lost possession of the ball and got only one point from the break.

The Bison had a 36-25 edge in field goals but lost on free throws as Montana State made 50 with 22 for the Bison. NDSU sank 26 out of 67 field goals attempted for 39.1 per cent. Montana posted 35.6 per cent on 25 of 70. The Bobcats had 44 free shot attempts and NDSU had 36.

Sophomore Bob Maier continued to be a stand out as he collected 11 buckets from the field and 2 gifts for a total of 24 points. Tom Noyes had 11, followed by Jerry Olson, 9, Dave Lee, 8, and Jerry Suman, 5. Pierre duCharme, playing in his first game returning from football, collected four points.

NDSU ran into foul trouble against the Montana Grizzlies Saturday and went down to a 87-72 defeat, after trailing 48-33 at half time. The second half scoring was even up 39-39.

Bob Maier, Bison standout in earlier games, was benched early because of four fouls and saw only one minute of action in the second half before fouling out. Jerry Suman, 6-6 center, also fouled out as the Bison picked up 22 personal fouls.

The Grizzlies sized the net for 33 field goals in 70 attempts for 47.1 per cent. The Bison fell 37.5 per cent on 28 of 76, picked off 47 rebounds and Montana got 52.

Montana's Ed Samelson led scorers with 23 points. Don tafted 22, Bob Turbough got Suman picked up at downtown, as ten Bison added points to the score board.

December 16 and 17 the basketball team journeys to Indiana Illinois. They play Loyola University in Chicago Dec. 16 and next night move on to Valparaiso, Ind. to take on Valparaiso University. Two years ago Loyola, one of the top two teams in nation and is still considered strong.

The Bison will be taking 1-4 record into these final games before the Christmas vacation.

During the vacation they will be playing in the Red River Classic held at Concordia Dec. 25.

DON'T LET US TEMPT YOU!

You wouldn't want to trade North Dakota's invigorating year-end weather for a chance to loll and look on the beach at Waikiki . . . or would you?

Here's an opportunity to spend Christmas and New Year's away from the snow and into the sunshine . . .

Call World Wide Travel Department, N. D. Auto Club 232-7441, for details.

EXERCISING ON THE HIGH BAR IS NDSU gymnast Jack Discher.
North Dakota State Baby wrestlers are experiencing the weather between the last day of classes and the holidays. The Baby Bison closed the gap to seven at the half.

The scoring was led by Salvi with 20, Erickson and Schieman with 16 and Streimikes with 12. Coach Palmer attributed the team's comeback in the latter part of the game to their fast break.

The Baby Bison now carry a 12-1 record, but Palmer feels his Bison are working to reasonable effectiveness in line of predictions. Palmer believes that if his team can continue to utilize their speed and play the wrestling efficiently they could go undefeated after Christmas.

Maughan commented, "I think we have a good chance to finish one in the top three spots and am not considering ourselves out by any means."

He continued, "Right now inexperience is our main problem. We are still looking for help this year from students who have had wrestling experience in high school." Anyone interested should contact Maughan at the Fieldhouse.

It was a welcome sight to see the 250 fans gathered at the Fieldhouse for the Moorhead State Meet. After seeing a few people gather in the pit like previous years, it was a welcome sight to see 250 people on the gymnasium bleachers for a wrestling meet.

Wrestling is an exciting sport to watch and I would certainly urge you to attend the next home meet.

CONFERENCE BASKETBALL SCHEDULE BEGINS AFTER CHRISTMAS

NDSU's varsity basketball team plagued by mechanical errors in the Montana games should find the going even rougher today and tomorrow against Loyola and Valparaiso, Loyola, a team that for three years was ranked among the nations best and holder of a national crown during this time, is expected to be the tougher of the two. The Rams are rebuilding this year but have Jim Coleman, a 5 foot 11 inch speedster, back at the guard position. Defense won't bolster Loyola hopes; six foot two inch Jim Coleman (no relation) Coleman averaged 35 points at Centralia Junior College last year and was named to the JC All-American squad.

OLSON AND NOYES MAKE BID FOR STARTING POSITIONS

Reserve center Jerry Olson, and reserve forward Tom Noyes each enjoyed 17-point performances against the Montanas. Senior forward Pierre duCharme also made his season debut against the Montanas hitting on two of four field goal attempts for four points.

BISON OPPONENTS WIN FOOTBALL BOWL GAMES

Two teams NDSU beat during the regular season have won their post season games. Montana State, a team NDSU whipped 70-0, won the Camelia Bowl held in Sacramento, Calif.

State College of Iowa, behind the running of Little All-American Randy Shultz, powered their way to victory over Lamar Tech in the then third placed Ablane, Tex. Shultz scored two touchdowns and gained 167 yards in the 19-17 conquest. P.S. WE WISH YOU A VERY MERRY CHRISTMAS FROM THE STAFF.

Agronomy Club Tips For Crop Show

The Agronomy Club wishes to pass on a tip to North Dakota State University students preparing to go home for the holidays: "The Christmas vacation offers a good opportunity to prepare crop samples for the 1965 Little International Crop Show which will be held February 20th," said Jerry Bergman, AG 3, chairman of the crop show.

Only students enrolled in NDSU, including short course students, are eligible to exhibit at the crop show. Each entry in the small-seeded grains and legumes must consist of one quart or more; all other entries, for example, wheat, barley, oats and soybeans, must consist of two quarts or more.

Silage entries must consist of four quarts of loosely packed silage in sealed plastic bags. A pure, uniform sample having good color and test weight is desired.

Five classes are established and prizes or ribbons will be awarded in the following categories: small grains or cereal crops, small-seeded legumes and grasses, horticultural, hay and silage, and miscellaneous.

To be eligible for the sweepstakes award, an entrant must show at least one sample in each of two classes and a minimum of three in the show.

Christmas Parties Held In Union

The Memorial Union House and Hospitality Committee sponsored three Christmas parties last weekend. All were held in the Memorial Union.

Last Saturday afternoon a Christmas party for the children of the North Dakota State University faculty, staff and students was given in the Ballroom. Cartoons were shown and toys from area merchants were displayed in a posterboard train. Santa Claus brought the children candy canes.

Sunday afternoon in Hultz Lounge a Christmas Workshop was held for all NDSU women. Featured were a reading by Mrs. Herbert Albrecht, a dance by Orchesis and various food and decoration how-to-dos and gift displays. Refreshments included a sandwich loaf demonstrated by Gladys Elsinger, assistant manager of student union food department.

The annual all-campus Christmas party was held Monday evening in the Ballroom. Christmas carols were sung. Other features were a reading by Steve Ward and a dance by Orchesis.

Christmas Convo Set For Dec. 17

North Dakota State University's traditional Christmas Convocation will be held at 9:45 a.m. Thursday in Festival Hall.

CAMPUS GOOD-GUYS Maurice Anderson, Allen Spittler and Ed Hill pose for their picture.
