Symposium Attracts Scientists

The Great Plains Symposium was held April 20-22 at North Dakota State University under the sponsorship of the Institute for Regional Studies.

The Symposium was structured around an analysis of the total population and the use of the Great Plains on a "sustained yield" basis. One of the items discussed was an outline planned by Thomas Ostenson, assistant professor of agriculture economics, which would reorganize North Dakota's counties into eight governmental "districts." Each of these districts, according to Ostenson, could serve as shopping centers for the rural people for government-wide and professional services and for education, transportation and other activities.

"The objective of the plan," Ostenson, "is to meet a major problem in North Dakota--that of adjusting rural government to the changing social and economic conditions in the state." Another item discussed was the implementation of the Gar- dner Extension project for North Dakota. "This would be the most economic boost the state could expect for years to come," stated James Petrick, regional assistant. "He finish the S. B. Barrentine. "More family farms can be maintained for irrigation than is possible on dryland farming condi-

Raschke To Present Address

Commissioner of Higher Education Kenneth Raschke will speak at the annual banquet of the campus chapter of the American Association of University Profes-

sionals, May 3 in the Memorial Union Ballroom.

"We think that the commissioner's pivotal role in North Dakota colleges and universities makes him an ideal speaker for our banquet," said Banquet Chairman Tom d'Erico, professor of political science department. "The commissioner is expected to discuss problems of higher education. A question and answer period is scheduled following the talk."

"President Herbert Albrecht will act as host for the entire Board of Higher Education has been invited to the banquet," d'Erico said.

"The dinner, a rib eye steak, will cost $3 per person. Tickets are available from AUPP mem-

bers and from banquet committee members, d'Erico, Dr. John Bond, associate professor of poli-

tical science; Catherine Cather, professor of English. The banquet starts at 6 p.m., anyone who wishes to buy a ticket, d'Erico said.

"The only way to get around the drought plains and we will continue to have droughts until the government can be overcome."

Extension Horticulturist Harry Graves made further discussion with a talk on the beautification of the environment in the Great Plains on a "sustained yield" basis. His comments centered on trees, shelter belts and irrigation. A summary of Carle Zimmerman, visiting associate professor of sociology, was: "Recreational needs are growing in North Dakota," said Zimmerman, "but the problem is getting people to start thinking of our state as a vacation land." Zimmerman stated that the proceedings of the Symposium with be printed and made available at cost by the North Dakota Institute for Regional Studies.

Native Son Returns

Albrecht Appointed Aide

Four star General Harold R. Johnson officially appointed H. R. Albrecht, North Dakota State University president, as civilian aide to Secretary of the Army, Stephen Ailes.

Dr. Albrecht was first contact-

ed by Fifth Army Commanding General Charles Dodge and asked if an appointment as a civilian aide to Ailes was tendered, would he accept? Dr. Albrecht answered affirmatively. Ailes later called and offered the post. Dr. Al-

brecht accepted the appointment in a ceremony in the Hultz Lounge of the Memorial Union Friday afternoon, April 22. He replaces Ralph Borman, retired vice-president of North Western Bell Telephone Company.

On hand for the ceremony were:

Dr. Albrecht's appointment adds his name to prominent civic, industrial, business and professional leaders who repre-

sent the Army in each state, Puerto Rico and the nation at large. Civilian aides serve for two years in an honorary capacity with remuneration.

In a short speech after the ceremony Johnson stressed im-

portance of the ROTC. "The Army, while in Fargo Johnson also addressed the North Dakota Press Association and made a brief tour of the ROTC facilities at NDSU.

Students To Cover Half Of Building Costs

"The flu bug has stung North Dakota State University and is now moving into the rest of Fargo," according to Dr. Henry Weyers, campus physician.

Dr. Weyers said that 69 vic-

tims came to the health center on both Monday and Tuesday and another 60 came Wednesday. He thinks the flu has reached its peak at NDSU but a few more people are likely to get it.

"The flu usually comes every spring and fall so we can expect another outbreak later next Aug-

ust," said Dr. Weyers. It is the third time this year that it has attacked the campus.

Dr. Weyers' advice to flu sufferers is to stay in bed and drink plenty of liquids.
Three Counting Stations

Senators Conducting Pedestrian Survey

Student Senators and Commissioners are counting students crossing University Drive today. In their April 22 meeting the Senate was informed that the traffic bureau required a count of the number of students crossing the street to determine whether it would be feasible to put up a stop light there.

Tanfield Miller, chairman of the senate committee to investigate the stop light, gave the report and moved that the members of senate do the counting. He said that in their campaigns the senators pledged their time and this was one way they could fulfill the promise.

Miller's plan called for three counting stations to keep track of all students crossing along University Drive from 12th Avenue to the Fieldhouse. The counting time is from 7:15 a.m. to 6 p.m. The senators are scheduled to count for two hours and the commissioners for one hour.

Among other business conducted, senate voted in Arif M. Hayat, assistant professor of botony, as a new advisor.

They also voted in favor of joining the Association of Student Governments. The chairman of Region Six of this national organization, Dick Crockett, from the University of North Dakota, spoke to the senate urging them to join.

A unanimous endorsement was given on having a Model United Nations on campus December 9-12, 1965.

Another motion presented to senate stated, "Be it resolved that all owners of off campus housing be compelled to sign the following pledge: 'I will not discriminate according to race, color or creed in the renting of my housing facilities'."

The motion was passed with eight votes in favor and five votes against it.

The senate voted to formally request sufficient funds to complete the swimming pool.

Science Courses Evolved

"Three courses are being developed in connection with the establishment of an electron microscope laboratory in the college of Arts and Sciences at North Dakota State University," stated Arif Hayat, botany instructor at NDSU.

The first course offered is called cell ultra structure which will explain the origin, structure and function of cell components of both plant and animal tissue.

The second course will be taught by Fethi Salama, professor of agriculture biochemistry, which is the introduction to the electron microscope itself. The third course will be called the techniques of ultra-thin sectioning of plant and animal tissues.

Hayat will be teaching the other two courses. He has applied for $80,000 in research grants from the National Science Foundation and the National Institute of Health which will be used in connection with the electron microscope.

The source of power in the electron microscope is a tungsten filament that is heated to provide the electrons.

The electron microscope has a resolving power 100,000 times greater than the naked eye, whereas the conventional microscope has resolving power only 400 times greater than the naked eye.

SHOWING counting stations is Stop Light Committee Chairman Tanfield Miller.

Coeds Appointed Internships; To Train In Nation's Hospitals

Eight coeds from the department of Food and Nutrition have received their one-year appointments as dietetic interns.

The dietetic appointments were distributed throughout the United States on April 12. The North Dakota State University coeds received their appointments at a tea in the Founder's Room in the Home Economics Building.

The eight coeds receiving appointments were: Gail Anderson, HE 4, Massachusetts General Hospital, Boston, Mass.; Diane Benson, HE 4, U. S. Veterans Administration, Houston, Tex.; Barbara Wyzard, HE 4, U. S. Public Health Service Hospital, Staten Island, N. Y.; Karen Kruken, HE 4, St. Mary's Hospital, Rochester, Minn.; Doris Wong, HE 4, Ancker Hospital, St. Paul, Minn.; Marilyn Amstorp, HE 4, Colorado State Hospital, Pueblo, Colo.; Sandra Anderson, HE 4, Veterans Administration Center, Bronx, N. Y. and Norma Tvet, HE 4, Baylor University Medical Center, Dallas, Tex.

Five girls in the Food and Nutrition Department received the summer practicum appointment at the tea. The practicum provides experience in hospital food service to these girls.

Wendy Pile, HE 3, will be going to Letterman General Hospital, San Francisco, Calif.; Lois Peterson, HE 3, Madigan General Hospital, Tacoma, Wash.; Glori Huber, HE 3, University Hospital, University of Wisconsin, Madison; Henrietta Brakel, HE 3, Veterans Administration Hospital, Fargo, N. D.

Miss Ethel Flaten, assistant professor of food and nutrition, is in charge of the placement of the dietetic interns.
Mary Alice "Annie" Oakley Munroe. 

An accomplished markswoman, "Annie" was born on October 13, 1860, in Darke County, Ohio. She was the daughter of Horatio and Eliza Munroe and had two brothers, Harry and Joseph.

As a child, "Annie" was already displaying a natural talent for shooting. She reportedly hit a 40-inch target with a single shot at the age of four. Her father, a rural mailman, encouraged her shooting skills and provided her with a variety of, much larger, targets as she grew older.

By the age of 15, "Annie" had learned to shoot a bow and arrow and became known as the "Little Sharpshooter." She was known for her accuracy and her ability to hit targets from a distance.

"Annie" was discovered by Buffalo Bill Cody, who was looking for a marksman for his Wild West Show. "Annie" was immediately hired by Cody and became one of the most popular attractions in the show.

"Annie" was known for herability to shoot targets with precision and speed. She was also known for her ability to shoot while moving, such as while riding a horse or while running.

"Annie" was married to Frank Butler in 1895. Together, they had two children, Kay and Bob. "Annie" and Frank Butler were known as the "Buck and Sallie Show," and their act was one of the most popular attractions in the Wild West Show.

After the Wild West Show, "Annie" and Frank Butler continued to perform together as "The Butler-Oakley Show." They were known for their skillful marksmanship and their ability to entertain audiences with their unique performance.

"Annie" died on November 3, 1926, in Dayton, Ohio. She was buried in Cincinnati, Ohio. Her legacy lives on through her performances and the stories of her skillful marksmanship.

"Annie" was a true American legend and her influence can still be seen today in the world of marksmanship and entertainment. Her story is a testament to the power of determination and hard work, and she will always be remembered as one of the greatest marksmen in history.
The establishment of a special student fee of $15 each per academic year and $6 each for summer school students by the Board of Trustees of the University of Montana is the subject of a recent editorial in The Spectrum, the newspaper of the University of Montana. The editorial points out that the fee is unjustified because it is not based on the cost of education to which it is supposed to contribute.

The editorial raises several questions about the fee. It asks why the fee is being imposed at a time when the state is facing financial difficulties. It also wonders why the fee is being imposed on all students, regardless of their ability to pay. The editorial also questions the fairness of the fee, since it is not proportional to the cost of education.

The editorial concludes by urging the administration to reconsider the fee and to come up with a fairer and more just solution to the financial problems of the university.

Federal Program Provides Employment

A new federal program is now in effect to provide employment to qualified state instructors from low income families who have found it financially difficult or impossible to continue their education.

According to a memorandum put out by the Student Aid Office, this College Work-Study Program should provide up to 60 summer jobs on North Dakota State University's campus beginning next September.

Quiring K. Tesmer, financial aid officer, emphasizes that the program is not designed merely to provide employment for those students who would like to work;

rather, it is aimed at those students who are qualified for college, motivated to attend, but financially unable to do so.

The student's parents' combined income must be $3,000 or less. Financial aid is allowed for each additional dependent and the student must be a fulltime resident of the United States or plan to make permanent residence in the United States. He must be capable of maintaining good academic standing while employed under the program. He must be accepted by the University or if already attending the institution must be in good standing there.

Qualified students may be employed up to 460 hours per year during the summer unless enrolled in summer school in which case they would be restricted to a 15-hour work week. During the regular school term maximum hours are 15 per week. Jobs will range from ordinary laborer to research assistant with students working in their field of study whenever possible.

Minimum wages will be $1 per hour. Higher wages will be paid to those students having more experience and skill. Students could expect earnings up to $1,090 gross income a year at the minimum wage working maximum hours.

Information regarding making applications for the program may be obtained from Tesmer in the business office.

Associated Women Students Coed Governing Stressed

"Associated Women Students organization is vital to coeds at North Dakota State University," stated Joan Quick, HE 2, when she spoke to the Ceres Hall residents about the AWS convention she attended in Salt Lake City, Utah, March 21-25.

Five hundred women representing 230 college AWS organizations attended the convention, according to Miss Quick. She stated, "Measures regarding all AWS colleges were passed. Representative from all these programs sponsored by the organization on the campus and what AWS can do for the college woman."

The importance of AWS to the college women, the university and faculty was stressed by Miss Quick during her talk. She emphasized that the fact women through AWS can govern themselves with co-operation between residence halls, services and administration, if the women and the administration see the advantages of putting some of the responsibility in the hands of women residents.

Miss Quick expressed her concern about the lack of women representation in Student Senate. She hopes that AWS will be able to promote a realization among coeds for the need of the women's voice in this organization.

Food can be eaten after contamination, if you know the technique.

Hardships from floods and tornadoes can be minimised, if you know what to do.

A 12 hour workshop on "Emergency Preparedness" will be held April 30-May 1 in the Memorial Union. North Dakota State University has been selected as the first site of one of the largest college workshops on civil defense.

Preparedness for such an emergency as occurred in 1957 will be discussed during the workshop this weekend. 

CAMPUS CUTIE this week is Janice Martin, a freshman in Arts and Science from Trenton, N. D.
VOYAGE TO THE BOTTOM OF THE BARREL

As everyone knows, thirteen-twelfths of the earth's surface is water. Thus we can see how important it is to know and understand our oceans. Toward this end American colleges last year embarked on a program to increase enrollment in oceanography.

I am pleased to report that results were nothing short of spectacular: In one single semester the number of students majoring in oceanography rose by 100%—from one student to two!

But more oceanographers are still needed, and so today this column, normally a vehicle for slapdash jocularity, will instead beep-beep or any other brand you can name—if, by chance, you are one of the students devoted to a brief course in oceanography. In view of the solemnity of the subject matter, my sponsors, the Persons, devote itself to a brief course in oceanography. In view of the.

The Pacific is not only the largest ocean, but the deepest. The ocean depths are measured in fathoms—lengths of six feet—so a voyage to the bottom of the Pacific would be quite a challenge.

But I digress. Let us, as the poet Masefield says, go down to the sea again. (The sea, incidentally, has ever been a favorite subject for poets and composers. Who does not know and love the many robust sea chanties that have enriched our folk music—songs like "Sailing Through Kansas" and "I'll Swab Your Deck."

My own favorite sea chanty goes like this: (I'm sure you all know it. Why don't you sing along as you read?)

And every place I'll shave my face
With Stainless Steel Personor.
And take my shaves upon the waves,
And sing "Salt and Spray and Curds and Whey,
Sing Night and Noon and Morning,
Sing "Mother's Day."
I'll harpoon whales and jib my sails,
I'll swab your deck and I won't care.

The landlocked makers of Personor® and Personor Injector Blades wish you smooth sailing and smooth sharing—with your family and your own "perfect partner"—regardless of marital status. It seeks rings around any other lover!
women who hold the same position. This difference in pay is based on the fact that men are usually the head of a family." Mrs. Powers emphasized that women have to pay the same amount for their education as men do, so they should receive the same wages.

Rep. Powers was a sponsor of the Equal Pay for Equal Work Bill which became a state law this year. North Dakota was the 25th state to enact this law. "It was not the commission's intention to have women superior to men but to enable them to take their place beside the men," stressed Mrs. Powers.

The goals of the commission as outlined by Rep. Powers are:
* To create an awareness of the value of women as part-time workers and to teach employers how to effectively make use of their employment potential.
* To promote retraining programs for women who must go back to work.
* To teach women the dignity of work and enable them to get dignified employment.
* To provide counselling for women who want to work and raise a family.
* To establish community centers which could supply information about educational opportunities for women.
* To have more women recognized in higher jobs, such as governmental appointments.

**Sophomore Architect Designs Model Symbolizing Sharivar**

Norman Trischwasser, EN 2, was announced winner among the 34 sophomore architectural students who presented models of their solutions for the Sharivar symbol to be constructed for this year's all-university open house.

Dave Otis, chairman of the Sharivar poster committee, addressed the class and explained the basic requirements of the symbol. Through abstract symbolism, the design had to represent the theme, "Advancing and Creating Knowledge for the Betterment of Mankind."

Blue, light blue and white, the colors of the 75th anniversary, were used in the composition of the symbol. The maximum amount appropriated for the project was $110.

Harlan Ombreck and Amnap Raney, sophomore design instructors, selected the ten best solutions to the problem and presented them to the Sharivar publicity committee for the final selection.

A MESSAGE TO ROTC COLLEGE MEN

IF YOU’VE GOT WHAT IT TAKES TO BE AN ARMY OFFICER, STAY IN THE ROTC

Being an Army officer is a challenge. Officers must be leaders ... able to take responsibility ... get important jobs done.

It isn’t easy to win a commission as an Army officer. But if you are taking the Basic Course in ROTC you’re well on your way—provided you can measure up to the high standards required for admission to the Advanced Course.

As a student in one of the 247 colleges and universities offering senior ROTC training, you are in a privileged group. There’s no better way for any college man to get the training and skills needed to be an Army officer than through the on-campus program created specifically for that purpose—ROTC.

Here you learn to be a leader ... to develop the qualities that add a vital plus to your academic training ... qualities that will pay off for the rest of your life in whatever career you choose to follow.

There are other advantages too. Pay, at the rate of $40 per month during the Advanced Course plus allowances for summer training and travel; Fellowship and social activity. The chance to work with modern Army equipment, and perhaps to qualify for Army flight training if it is offered at your school. And then gold bars and a commission as an Army officer.

Why not talk to your Professor of Military Science now? Let him know you’re interested in signing up for the Advanced Course. Then if you are offered an opportunity to join, don’t pass it up. It’s the program that’s best for you ... and best for your country.

If you’re good enough to be an Army officer, don’t settle for less.

ARMY ROTC

Spring Maneuvers

Cadets Participate In Field Exercises

Advanced cadets in the Army ROTC, participated in a practical field training exercise near Detroit Lakes, Minn. last weekend. The exercise lasted 36 hours and included training in communications, physical workout and field problems.

At 5:30 Saturday morning the cadets left the campus, arriving at the training site at 7:30. The first exercise conducted by the cadets was a mapping and compass reading problem.

According to Maj. Earl Perry, assistant professor of military science, the senior cadets acted as commanding officers while the juniors carried out assigned problems.

Each cadet in the field carried a rifle or communications equipment. Stationed at various strategic points, machinegunners harassed unwary cadets. Firing blanks, the machine guns "killed" a number of the pathfinders. The senior cadets at the command post kept in touch with all units and co-ordinated attack plans.

Capt. George Hall, one of the Army supervisors, said that one of the chief objectives of the exercise is the training of the cadets to reach clear decisions quickly and effectively. The combined groups of juniors and seniors participated in a night march through the surrounding forest and afterwards were transported by truck to the Detroit Lakes National Guard Headquarters.

The purpose of the competition is to encourage young men and women engaged in college work to recognize and become familiar with the modern Army and its traditions. The cadets were advanced in rank and recognized for their efforts.

The Army also encourages its ROTC cadets to participate in national design contests. The competition was open to all colleges, universities and institutions in the United States. Hanyzewski’s design was one of over ten entries from NDSU.

Engineering Student Places Sixth In Arc Welding Design

Edward Hanyzewski, a former North Dakota State University student enrolled in Mechanical Engineering, won sixth place in a national design contest, the James F. Lincoln Arc Welding Foundation’s Undergraduate Design Competition. The purpose of the competition is to encourage young men and women engaged in college work to recognize and become familiar with the modern Army and its traditions. The cadets were advanced in rank and recognized for their efforts.

New Officers Chosen By Organizations

THETA CHI

Theta Chi fraternity officers are: Tom Reinarts, president; Gary Rosevold, vice president; Ron Anderson, secretary; Allan Adolph, treasurer; Fred Hynak, pledge marshal; Terry Wilner, house manager; Trent Young, steward and Alton Steinmetz, social chairman.

CHEMISTRY CLUB

New officers for the Chemistry Club are: Janice Romstad, president; Loy Thielman, vice president; Amelia Hoffman, secretary and Dave Meyers, treasurer.

INTRAMURAL BOARD

Officers for the Intramural Board are: Gerald Paulsen, president; Orland Amundson, vice president and Loren Nett, secretary.

KAPPA ALPHA THETA

Newly elected officers of Kappa Alpha Theta are: Linda Parsons, president; Helen Leeland, vice president; Rusty Krueger, secretary and Kris Bjornson, treasurer.

So who says we don't have graduation suits at the Straus Squire Shop

See Dave, Don, Noel, Tim
from last Saturday's intersquad football game may have been dis­interesting. The game, which was held in conjunction with the North Dakota State University football clinic and sponsored by the Mandan Athletic and Recreation Club was played in a steady drizzle. Similar to last year, it was a one sided contest. From a coaches' viewpoint it was a worthwhile experiment. Head football coach, Darrell Mudra said the game was played better than he expected for having only seven practices prior to the game. He concludes that the sophomores played better than he had expected. Mudra was quick to point out that the crop of sophomores should be a lot of good football by next fall. Dan Lee and Ken Rota, two sophomore backs, played an exceptional game according to Mudra.

Six usually prominent names were missing from Mudra’s lineup at Mandan. These included four trackmen: Ken Evenson, Dick Sciacca, Russ Gustin and Lowell Linderman. Sciacca and Gustin both are weight men while Evenson and Linderman are known for their sprinting and pole-vaulting feats on Walt Weaver’s track team. Mudra noted that Evenson, a standout defensive performer last season, would be given a chance to play both offense and defense next year in NDSU’s two platoon system.

Russ Auen and Andy Knudson, the other two missing names, are currently playing baseball. The two form a battery combination with Auen pitching and Knudson catching. Knudson, who played an iron man’s role last season will likely be called on for more 60 minute performances this year.

Spring practice for NDSU’s 60 man squad will continue from now until May 10 when they meet the alumni in a contest at 8 p.m. at Dakota Field. There is no confirmation on this report but it is expected that assistant football coach, Carl “Buck” Nygren will also be playing. If the former Michigan State star decides to play it could be one of the most interesting games of the year.

LITTTEN PROVIDES BOOST FOR BISON ATHLETICS

Chipper Litten, three-sport star at Fargo Central High School, has decided to enroll at NDSU. Litten’s announcement was probably not as big a surprise to Bison coaches as it was to other interested parties. This prep star, who is the top high school track man in the state, had recently announced his intentions to break into one of the larger Big Ten schools. Litten had recently signed a tender to protect a football scholarship position he will be playing in basketball.

This winter, long before Litten had announced his intentions going places. The North Dakota Automobile Club’s Travel Agency can handle ticketing for early season train, bus, airplane, has complete planning service for domestic or foreign travel. Available to anyone.

FOOTBALL Game Highlights Mandan Clinic

North Dakota’s Team of the year beat itself Friday as the game down in the second half after the green unit scored four times in the first half. Rota finished scoring with a 14 yard run after four minutes had elapsed in the third period.

Ball football clinic sponsored by the North Dakota State University Athletic and Recreation department. The green unit, with a plenti­ful of lettermen, overs­aw the younger whites with 51 yards gained to the losers’ 43. Both water and field were scored in white touchdown with an early first half return in the third period.

Green’s running attack netted 167 yards on the efforts of Rota, Ken Rota, Dan Loose and Dave Oden.

Quarterbacks, Gary Showers and Jim Carlson, balanced the game attack with 128 yards pas­sing on eight completions in 16 throws. Showers combined with Steve Legres on two passes total­ling 45 yards to score late in the second period.

Rain and cold weather slowed the game down in the second half after the green unit scored four times in the first half. Rota finished scoring with a 14 yard run after four minutes had elapsed in the third period.

Rain and cold weather slowed the game down in the second half after the green unit scored four times in the first half. Rota finished scoring with a 14 yard run after four minutes had elapsed in the third period.

The Bison footballers practiced six times in preparation for the game after being hampered by rain and cold weather for one week. Concordia’s athletic de­partment allowed the Bison three practices in their fieldhouse af­ter which the Bison moved out.

Just say “Charge It”

Bison Win Jamestown Relays

McDowell replaced Lokken in the mile relay event which the Bison also won.

Evenson, besides running first or second in the relay events, won first place in the 100 yard with a time of :10.1 and fourth in the triple jump. Mike Harper won the high jump at 6’ while Bison pole vault­er, Lowell Lin­derman, set a relay record at 14’.

Bison trackmen will host the annual Bison-Jaycee Track Meet Saturday, May 1. Some 300 ath­letes from high schools and col­leges throughout North Dakota and Minnesota participate in the meet.

Upcoming Events

After 42 Years
Former Dean of Women is Retiring

After 42 years of service to North Dakota State University, Miss Matilda A. Thompson is retiring. Miss Thompson has served this University in the mathematics department, as Dean of Women, Associate Dean of Students and as advisor to many student organizations.

A native of Page, N.D., Miss Thompson received a Bachelor of Science degree in 1921 from NDSU, then North Dakota Agricultural College.

Miss Thompson began her service to this University as an instructor in the mathematics department in 1923. In 1946 she was named associate professor of mathematics, and in 1957 a full professorship. Columbia University granted Miss Thompson a Master of Science degree in mathematics in 1929. She has done advanced work at the University of Wisconsin, the University of Colorado and the University of Minnesota.

In 1957 Miss Thompson was appointed Dean of Woman. The manual entitled "Introductory Mathematics for College Students of Home Economics," was written by Miss Thompson for the required mathematics course taken by all freshman women in Home Economics.

A member of Kappa Kappa Gamma Sorority, Miss Thompson has served this organization as President. She is a member of the National Graduate Scholarship Committee of Kappa Kappa Gamma.

The Fargo-Moorhead Symphony Association has also been among Miss Thompson’s interests. She has served this organization as board treasurer.

Miss Thompson is listed in the North Dakota section of "The American Woman," "The American Education Who’s Who" and the "American Men of Science."

Summer Workshops Offered

Special workshops dealing with 22 different academic subjects have been scheduled during summer quarter at North Dakota State University.

Educational television and its significance as an instructional tool will be the focal point for discussion during a two-week educational television utilization workshop, July 19-30. Participants will gain insights into planning techniques and develop a working philosophy for the use of TV in the school curriculum.

NDSU’s College of Home Economics will offer two special workshop sessions. The first, running June 14-18, concerns supervision in home economics education. A second home economics session will deal with teaching child development in the secondary school, June 28 to July 9.

On the agenda are seven workshops offered by the Institute of Education and the Education Department. Content is designed to attract teachers, counselors and administrators based on the theme, "Schools for the Seventies."

The education workshops and dates are: Significant Issues in Education, June 21-July 2; Introduction to Counselling, June 9-18; New Concepts in Education, June 21-25; School for the Seventies, June 28-July 2; Guidance Workshop, June 21-July 2; Principles and Techniques of Group Guidance, July 6-14, and Supervision of Student Teachers, July 19-30.

A Health-Physics Workshop will be provided for one week during the summer for students to work with the public health service on state surveys for radiological health.

In addition to the several workshops and regular classes, five special science programs emphasizing research will be sponsored by the National Science Foundation. The NSF-sponsored sessions provide opportunities for high school science teachers and students and undergraduate college students to work with top NDSU professors in specialized research areas.

Regular courses during the summer session will be offered in two five-week sessions from June 8-July 15 and July 16-Aug. 20, or in the full-quarter term running from June 8 through Aug. 20.

Seniors Honored; Wives Get Degrees

The Senior Class of the College of Engineering and Architecture will be honored at a tea to be held in the Memorial Union at 8 p.m. May 4.

Wives of married graduating seniors will be awarded the Phi Kappa Phi Cut and Matching Award.

The Senior Class of the College of Home Economics, "Students of the Year," will be honored at a tea to be held in the Memorial Union at 5 p.m. May 3.

Wives of married graduating seniors will be awarded the Phi Kappa Phi Cut Award.

Six Debate Members Compete in Tournament

Six members of the Lincoln Debate Society will travel to Missouri this weekend to participate in the Big Sky Speech Tournament at Montana State University. Entering the competition will be Curtis Sorteberg, CP 3 and Alan Buett, AS 2, in Debate; Pierre du Charme, AS 4 and Joan Swanson, AS 1, Oratory; and Jim Norgard, AS 3, and Donna Lang, AS 1, Oral Interpretation.

The elegant Emerald cut and matching band in gleaming white gold.
