The Spectum

Budget Requests
Allocations Approved

by Lynn R. Leavens

After hearing Finance Commis-

sion members explain and defend

their actions on budget requests

from seven different student or-
d

ganizations, Student Senate gave

"rubber stamp" approval Thurs-
day afternoon to five allocations

on the approved budget, and the

commission agreed to table the

two defeated budgets.

Heading the list of budgets ap-

proved was the Commission of

Student Publications with a total

budget of $54,826. Of that amount,

$41,736 was requested from stu-
dent funds. The balance will be

made up in revenue received from

the Spectrum and Bi

annual.

The Commission of Student

Publications budget is printed on

two pages. Several senators ques-
tioned the expenditure of student

funds, but Finance Committee mem-

bers explained and defended

their actions.

Other budgets meeting Student

Senate approval will not be of-

ficial until the University recog-
nized the organizations and activ-

ities have been approved by

the university board. These five

budgets are:

- Commission of Model United

Nations

- Finance Committee

- Athletics — $332 with $402 re-

quested from student funds

- Student Senate scholarship

- Student Senate publication

Defeated budgets were submit-
	ted by the Student Senate Secre-
	ary and Finance Commission.

Commissioner Lionel Estenson

stated that the Physical Educa-

tion Club requested only $50

from senate to be used for a soc-
eological study. The commis-
sion felt that students should not

pay for such a study. It was rec-

ommended that the Student Senate

Secretaries budget was defeated,

because there was not enough

money for such a budget.

"The objective of the various

organizations is to receive their

supplies from their commissions,

and we are not going to under-

write for the Finances Commis-

sion," said Estenson. The secre-
tary of the Finance Commis-
sion will write to the Commis-
sioner regarding the matter.

MUN Proposed Budget

A lively discussion brought in-

to the budget meeting for the

MUN budget was not recom-

mended for approval.

The history of the MUN budget

follows: The Commission of Fin-

ances defeated a $453 budget on

April 27. Student Senate approv-

ed two budgets for a special meet-

ing early in May. At the May 13

meeting of senate it was recom-

mended and tabled until the next

regular meeting, May 20.

Campus Affairs Budget

Some senators wanted a free

handicapped dance brought in

for the Campus Affairs bud-

get, which had been approved at

a previous meeting before sena-

tes had a chance to recon-

sider.

The recommendation of having

a handicapped dance was approved by Student Senate at the next meeting. Before students had a chance to recon-

sider, the dance was defeated.

The reconsideration of the bud-

get was defeated when a senator

pointed out that the student sena-

tes had no record of a special

dance being planned.

The motion to defeat the budget

would have been defeated if it had

been free.

Two Year Program Dropped

Physical education require-

ments have been reduced from

two years by action of the Uni-

versity Senate at the May 17 meet-

ing. An amendment by Regula

Guire, associate professor and

chairman of special physical education, to require two years of physical education for women was defeated by the senate.

The requirement of a second

year of physical education has

been left to the discretion of

each college. The one year re-

quirement is University-wide.

Traffic regulations, as pro-

posed by the Campus Commit-
	eee, created considerable debate and a motion to raise the requi-

tions, with an amendment to per-

mit curb parking after 5:30 p.m.,

was defeated.

After being informed by Presi-

tent H. B. Brown that the gener-

ter of traffic was important and

that a special meeting should be

held to have to be held to resolve

the matter, the senate voted to

reconsider the regulations.

Approval of the regulations was

voted down and President Brown

was directed to make an amend-

ment to reduce the fine for fail-

ure to stop, $25 to $10 and reduc-

ing fines for traffic violations

from $5 to $2 during examination

period. The $15 fine for exceeding

the 15 miles per hour limit was

not changed.

A motion by Shubel Owen,

chairman of the Student Senate

Committee, to require owners of

off-campus housing to sign an

anti discriminating clause, placing

their names on the University

approved housing list was defeated.

Final action of the meeting was a

motion to allowable the previ-

ous action concerning the sched-

duling of segments during examina-

tion week. The motion approved

will, in effect, assure that no

student events, over which the

University has administrative or

scheduling control, will be held
during examination week.

Participation by North Dakota

State University in events sched-

uled by other universities will

be limited when requested by the

adoption of this policy.

Street Student

Highway Death

Robert L. Peterson, North Da-

kota State captain of the football

team, was killed last Friday in a

car-truck collision near Fergus

Falls. Peterson was a senior and

students were injured in the col-

lision. The group of seniors re-

turned to Fargo after a mechanical

engineering field trip to Alexandria, Minn.

Several days before this ac-

t

was established this week by fellow en-

gineers. The group decided to

contribute to the memorial fund

established to the dean of engineering

office in Dovel Hall.
**Growth And Events Of Colleges Noted**

The various colleges within North Dakota State University have been very active during the past year showing increases in enrollment fields of study and educational facilities.

The College of Agriculture has an enrollment of 700 students showing an increase over the last 10 years of about five per cent yearly. The number of graduate students has also increased by an estimated 10 per cent for the last five years.

A new facility will be dedicated in July in the form of the Federal Metabolism and Research Laboratory which along with the efforts of the college experimental station will provide the agricultural industry of the area with a source of valuable information.

Some of the major events which were sponsored by the school of agriculture during the year were the Little International, the Agricultural Economics banquet, Friends Night banquet sponsored by the Collegiate Chapter of the Future Farmers of America and the Alpha Zeta dinner, held in honor of two outstanding agriculturalists of the state.

The College of Chemistry and Physics has moved into its new facility, the Dunbar Laboratory, which will be dedicated May 28. The structure, valued at $1,000,000, has greatly increased the research and the interest in the graduate program within the college.

The students in arts and science make up one-fourth of the enrollment of NDSU and the college has greatly broadened its scope of studies which include English, mathematics, history, bacteriology, psychology, speech, entomology and many others. The college boasts a high academic standing and each year produces a growing number of students receiving Wilsonian grants, Fulbright scholarships and the Rhodes scholarship. A new facility will soon be built for the speech and dramatic students.

The College of Pharmacy is highly recognized on the national level and many new research projects come to the school each year. It too, has had an increasing enrollment each year.

The College of Home Economics has twice the enrollment that it had 10 years ago. The college is active in research as well as teaching and many service courses are taught outside of the regular classes.

The faculty of the College of Engineering will be moving into the new million dollar engineering center this summer in time to greet the new and returning group of students entering fall quarter.

The faculty of the College of Engineering will be moving into the new million dollar engineering center this summer in time to greet the new and returning group of students entering fall quarter.

Five NDSU students were placed on disciplinary probation because of a shoplifting spree in downtown stores during November. Four of these were protested by civil authorities as well as being disciplined by University officials.

An automobile engine, complete with radiator and transmission, was stolen from the Agricultural engineering laboratory in April. A number of the parts were discovered but the engine was never found.

**Miss Fargo Title; Three Others Receive Honors**

The "Miss Fargo" title was won Saturday night by Onalee Olson, a freshman in home economics at North Dakota State University.

The eleven women entered in the pageant were Patty Dodge, the reigning Miss Fargo and Karen Kopseng, the current Miss North Dakota.

Patty Olson won top honors in the evening gown and swimming suit competition, and for her talent act, danced a Charleston as a cheerleader might have danced it in the roaring 20's.

Five other NDSU coeds competed in the Miss Fargo contest including first runner-up Claudia Mae Pearson; Mona Brandthagen, winner of the talent competition with a torchy song and dance routine; Judith Horton; Susan Peterson and Barbara Ann Miller, who gained the "Miss Personality" title bestowed by her fellow contestants.

Performing at the pageant were Patty Dodge, the reigning Miss Fargo and Karen Kopseng, the current Miss North Dakota.

We at the Fargo Toggery want to congratulate all of the graduates. We wish you the best of luck for the future and appreciate your past patronage.

If you still haven't picked out your graduation suit we still have a nice selection

Suits from $50.00

**Criminal Activities Reviewed**

Crime also took a part in the activities at North Dakota State University during the school year. Five photographs were stolen from the 'Impressions of Russia' exhibit in late November; one of the photos was returned through the mail in early December but the other four were never recovered.

During this same period, a break-in occurred in a professor's office in Minard Hall on an evening before a scheduled physics examination. The test questions were kept in a locked file in the thieves had to use their wits rather than a crib during the examination.

Five NDSU students were placed on disciplinary probation because of a shoplifting spree in downtown stores during November. Four of these were protested by civil authorities as well as being disciplined by University officials.

Cost Comparison

Fraternity Charges Are Slightly Higher

Jim Glynn

How do the costs of a fraternity compare with the money spent by a student on a North Dakota State University board and room contract?

In the May 5 issue of the Spectrum a new student costs figure of $1,066 as total fees payable to the University was reported. This amount includes tuition, board, matriculation fees and parking fees.

The main item of difference in fraternity men and dorm students is the board and room fees. A student on a five day and contract pays per quarter $112 for board and $80 room rent.

Fraternity men can expect to pay about $90 per month for their room and board. Factors such as parking fees and type of rooms lived in cause differences. An approximate amount figured per quarter for the fraternity man's room and board amounts to $180 or $27 less than the University board and room fee.

Upon releasing their costs fraternity representatives said such costs were as refunds for meals unused and open kitchens had not been included.

The fraternity pledge, whose dues are not as high, pays $42 less than the $1,066. Initiation fees have not been added. The total cost for an active fraternity is $1,123 and for a fraternity pledge it is $1,024.

These figures are estimates found by averaging the costs of several fraternities. The purpose of the figures is to give the fraternity man a general idea of his expenses for the coming academic year. Special factors of the individual student and fraternity should be figured from them.

As the May 5 article on student costs stated, the $1,066 is not a total cost of a student's expenses. Books, clothing and recreation expenses are included in the total figures.
Legislation

Editor Reviews Year

North Dakota legislators spent the majority of their time in the 1965 session considering and discarding legislation aimed at bettering higher education in North Dakota. The people of this state also took a strong interest in education, an interest which resulted in the nation’s share of the $125 million budgeted by the legislature.

The legislature passed a bill raising the out-of-state tuition costs at the universities in North Dakota; the non-resident charges at North Dakota’s universities would be no less than $500 per year. This was not a new idea, but one which many neighboring states (Montana, South Dakota and Minnesota) had already taken. This bill provided for an advertising tax of two per cent upon the gross receipts from all sales of advertising published in the state of North Dakota.

The legislature did not accept this bi-partisan proposal and Mayor Lashkowitz made an alternate proposal to raise tuition by not more than $500 per person per school year.

In the March 3 issue of the Spectrum it was reported that permission of the legislature had been sought to sell bonds to improve parking facilities with sufficiently large bond proceeds to pay the parking fees.

Enabling legislation was passed Feb. 5 by the North Dakota Legislature for construction of a building to house NDSU’s Little Country Theatre and other activities of the speech and drama department.

Also in the first week in February a bill calling for the issuance of revenue bonds to finance college or university construction was introduced into the Senate. Two bills were being considered. One called for increased student fees to pay for one-quarter of the buildings and the rest to be paid by the State, while the other required a special tax

Late in February a $10 million bonding bill intended by the legislature to finance future college and university building programs was passed.

The legislature budgeted $125 million for the fiscal year, 1972 million dollars to go to educational purposes.

The legislature closed its session for 1965 leaving a difference of $11.7 million between the request for education and the appropriation made by the legislature. The legislature budgeted $125 million for the fiscal year, $72 million dollars to go to educational purposes.

The Spectrum in its March 24 issue stressed the need for new programs to raise the agriculture income if North Dakota is going to meet its educational needs.

In the March 31 issue, North Dakota Farmers Union Legislative Director, L. F. Bremer stated, “Today, the farmer can take as much as possible for education from the people of North Dakota.”

Educational problems were also considered on the national level by the 88th (education) Congress. Two approaches to the high cost of education were considered. The one, proposed by Representative R. I. Kefauver, was aimed at encouraging states to send their students to out-of-state colleges and universities.

One plan, proposed by President Johnson, is aimed primarily at helping college students in families who, otherwise, could not go to college at all. It would do this through cash and government guarantees on private loans, with the taxpayers picking up part of the interest tab.

The other, proposed by several members of Congress, is aimed at helping college students in families who are college-bound but at considerable sacrifice to themselves. It would permit college expenses to be deducted by the parents for income tax purposes.

The Spectrum agreed with Congress that the President’s measure would not go far enough, but also pointed out that there is a segment of students already in college who could use a tax break. We proposed that Congress look to the Christian tax system, which allows students (not parents) to deduct their fees, tuition, and books from income and receive tax credits for the amounts paid.

In April, the Spectrum, found a different average than Kenneth Rasche, commissioner of higher education, did for the new proposals, in the form of figures released by University of Minnesota figures. They questioned Dr. Rasche for comparing North Dakota’s universities to those in Minnesota.

The Board of Higher Education established a special student fee of $42.40 per academic year for $4 for each summer school student to go into a special building fund to pay up to half the cost of the $5 million bond program established by the 1965 legislature in February.

A friendly suit to test the bonds constitutionality of the $5 million bond issue will be brought before the Supreme Court sometime in the summer.

Education, particularly higher education, has been a constant concern of everyone in North Dakota the past academic year. The legislature and the State Board of Higher Education must continue trying to meet the needs of education.

Reason For Campus Revolts Given; Students Left With Nothing To Do

(Reprinted from Winnipeg Free Press) by W. Reubach

There has been a great deal of discussion about campus revolts spreading across the United States. It is obvious the students are restless and it’s making our educators very nervous.

The question is why, and I think I’ve got the answer. The reason the college students are restless is because education is taking as much as possible for education from the people of North Dakota.

Educational problems were also considered on the national level by the 88th (education) Congress. Two approaches to the high cost of education were considered. The one, proposed by Representative R. I. Kefauver, was aimed at encouraging states to send their students to out-of-state colleges and universities.

One plan, proposed by President Johnson, is aimed primarily at helping college students in families who, otherwise, could not go to college at all. It would do this through cash and government guarantees on private loans, with the taxpayers picking up part of the interest tab.

The other, proposed by several members of Congress, is aimed at helping college students in families who are college-bound but at considerable sacrifice to themselves. It would permit college expenses to be deducted by the parents for income tax purposes.

The Spectrum agreed with Congress that the President’s measure would not go far enough, but also pointed out that there is a segment of students already in college who could use a tax break. We proposed that Congress look to the Christian tax system, which allows students (not parents) to deduct their fees, tuition, and books from income and receive tax credits for the amounts paid.

In April, the Spectrum, found a different average than Kenneth Rasche, commissioner of higher education, did for the new proposals, in the form of figures released by University of Minnesota figures. They questioned Dr. Rasche for comparing North Dakota’s universities to those in Minnesota.

The Board of Higher Education established a special student fee of $42.40 per academic year for $4 for each summer school student to go into a special building fund to pay up to half the cost of the $5 million bond program established by the 1965 legislature in February.

A friendly suit to test the bonds constitutionality of the $5 million bond issue will be brought before the Supreme Court sometime in the summer.

Education, particularly higher education, has been a constant concern of everyone in North Dakota the past academic year. The legislature and the State Board of Higher Education must continue trying to meet the needs of education.

Sharivar Must Be Evaluated; Need Program Improvement

The editor:

Many months of hard work Sharivar is over. Many who worked very hard and did contribute seem to have been forgotten. Now is the time to critical analyze Sharivar; is it accomplishing what it is supposed to? Is it valuable to those who work for it; is it of value to the Faculty?

Objectively, it is all an open house. Many wonder if really accomplishes this goal. Many people counted that supposed "should have cooperation." We at the Squire Shop hope you will feel we can no longer afford ineffective programs on our campus.

Let us either integrate Sharivar with the academic program in a meaningful manner or dispense with it.

Gary Powell, AS 4

We at the Squire Shop hope you will have a good summer. For "many" of your summer needs, shop at the Squire Shop. We have a complete selection for every kind of graduate. Seniors: Pick up gowns and bonnets.

The Spectra
TESTS, AND HOW THEY GREW

Just the other night I was saying to the little woman, “Do you think the importance of tests in American colleges is being overemphasized?” (Incidentally, the little woman is not, as you might think, my wife. My wife is far from a little woman. She is, in fact, nearly seven feet high and mantled with rippling muscles. She is a full-blooded Ogallala Sioux and holds the world’s shot put record. The little woman I referred to is someone we found crouching under the sofa when we moved into our apartment back in 1928, and there she has remained ever since. She never speaks except to make a kind of guttural clicking sound when she is hungry. To tell you the truth, she’s not too much fun to have around the house, but with my wife away at track meets most of the time, at least it gives me someone to talk to.)

But I digress. “Do you think the importance of tests in American colleges is being overemphasized?” I said the other night to the little woman, and then I said, “Yes, Max, I do think the importance of tests in American colleges is being overemphasized.” (As I explained, the little woman does not speak, so when we have conversations, I am forced to do both parts.)

But I digress. To get back to tests—sure, they’re important, but let’s not allow them to get too important. There are, after all, many talents which simply can’t be measured by quizzes. Is it right to penalize a gifted student whose gifts don’t happen to fall into an academic category? Like, for instance, Finster Sigaloos?

Finster, a freshman at the Wyoming College of Belo Lettres and Fingerprint Identification, has never passed a single test; yet all who know him agree he is studded with talent like a ham with cloves. He can, for example, sleep standing up. He can do a perfect imitation of a scarlet tanantelope. He can pick up BB’s with his toes. He can telephone, but emptying the Personna packs. To empty a Personna pack is not an easy accomplishment, believe me, not if you’re a person who likes to get full value out of his razor blades. And full value is just what Personnas deliver. They last and last and keep on lasting; luxury shave follows luxury shave in numbers that make the mind boggle. Why don’t you see for yourself? Personnas are now available in two varieties: a brand-new stainless steel injector blade for users of injector razors—and the familiar double-edge stainless steel blade so dear to the hearts and kind to the kissers of so many happy Americans, blades so smooth-shaving, so long-lasting that the Personna Co. makes the following guarantee: If you don’t agree Personna gives you more luxury shaves than Beep-Beep or any other brand you might name, Personnas will buy you a pack of whatever kind you think is better.)

But I digress. Back to Finster Sigaloos—artist, humanist, philosopher, and freshman since 1939. Will the world ever wake up and realize that Finster is one of the most promising young men in the Wyoming College of Belo Lettres? This is not so hard to believe, of course. Finster has never passed a single test. And the question is: wouldn’t you be Max, I do think the importance of tests in American colleges is being overemphasized.” (As I explained, the little woman does not speak, so when we have conversations, I am forced to do both parts.)
Karate Students Are Rated

"Kei" was the cry that echoed through the wrestling room of the Fieldhouse last Thursday evening as 20 sasos (Karate students) were evaluated for blue and fifth degree purple belt ratings. Louis Averson, assistant instructor, explained that the Karate program consists of 26 two hour sessions of vigorous training. "The extensive physical exercise involved causes an 80 per cent drop out," commented Averson. Head instructor Jim Fuehrer explained the oriental sport stated, "Karate is the oldest form of self defense used by man. Now, however, it is used primarily as a sport for entertainment and keeping the human body in shape. Self-defense is its secondary purpose - to be used only when necessary."

"The expression 'Kei' has three purposes. It promotes rapid exhalation of air which prevents the person from getting the wind knocked out of their lungs; it has a psychological effect on your opponent by scaring him, and it brings all of the abdominal muscles into play."

Mike Stone, assistant instructor stated, "The students are evaluated by their speed and accuracy in delivering their blows on the vulnerable points of their opponent's body. There are very few injuries during training sessions, except for an occasional hand or toe injury caused by an improperly executed blow."

Drugs sold in the pharmacy are sold for less than those in a regular drug store," informed Danielski, "because there is little mark up-offered - an average mark up would be around 20 per cent. The largest month for prescriptions was April, 1965 when 546 orders were filled.

As a requirement for graduation, a pharmacy student must put in two hours a week per quarter in the University Pharmacy. Normally there are from one to three fifth year students on duty at a given time. The state stipulates, however, that a registered pharmacist, such as Danielski, be on duty at all times.

After graduation, pharmacy students are required to spend one year working in a regular pharmacy or hospital before they can take the practical portion of their state exam.

Chem Building To Be Dedicated

Dunbar Laboratories, the new chemistry building at North Dakota State University, will be dedicated May 28 as part of commencement exercises.

Speaker for the ceremony is Lyle Phillips, head of the planning and evaluation unit of the division of scientific personnel and education of the National Science Foundation. Phillips will receive a honorary doctorate from NDSU. He graduated from NDSU in 1932 with a B.S. degree and previously was head of the department of physics at the University of Buffalo. In 1959 Phillips received the Alumni Achievement Award.

According to Dr. Roger Malta, associate professor of chemistry and chairman of the arrangements committee, Phillips will give his address at 11 a.m. in the Memorial Union. A ribbon-cutting ceremony and his chosen for invited guests will follow. The building will be open to visitors Friday and Saturday.

Dunbar Laboratories was named after Dr. Ralph Dunbar, dean of the College of Chemistry from 1943 until his death in 1960. Expected in the official party for the dedication are Dr. Dunbar's widow and a brother and his family. Other state dignitaries have also been invited, according to Meister.

Work on the million-dollar structure was begun in the summer of 1963. Used primarily for research, Dunbar Laboratories has biochemistry on the top floor, organic on the second, physics and mathematics on the first and polymers and coatings on the bottom floor. The building approximately doubled the area of facilities, and now about 50 graduates are working in four-man laboratories.

EXTENSION COURSES

Grant Given Science Program

North Dakota State University has received a $29,160 National Science Foundation Grant to conduct classes for high school teachers in three North Dakota cities next year.

The grant will provide for continuation of a program begun four years ago.

Dr. Joel W. Broberg, associate professor of chemistry, will direct the program.

Over the past four years, the classes have been conducted on Saturday mornings in Fargo, Minot and Bismarck. Some 250 high school science teachers have taken part.

Under the program, a teacher can remain on the job but use his Saturday mornings to improve himself professionally. The courses carry university credit and may be applied toward advanced degrees.

Three-quarter Century Celebration Of Anniversary Summarized

Creating and Advancing Knowledge for the Betterment of Man and Society was the theme for the 75th anniversary of North Dakota State University.

Underlying the observance is the University's reaffirmation of its dedication to diffusing knowledge, advancing science through research and providing educational opportunities to all regardless of class, wealth, race or social position.

Efforts are being devoted to identifying the vigor which NDSU is applying to its objectives such as:

- Increasing its sensitivity to the changing needs of the state and reflecting these needs in research, curricula, and off-campus teaching services.
- Accepting the widening range of responsibility and service to the many sectors it serves.
- Recognizing and helping share the interdependence of our natural and human resources and the geographic and cultural factors of the upper Great Plains as they affect our economy, our social patterns, our future.
- Joining as an active partner with other public and private agencies in the economic and social development of North Dakota.
- Developing and maintaining a pool of professionally competent manpower to serve the agricultural, industrial and cultural needs of the state and nation.

Opening ceremony of the 75th anniversary was held Jan. 5 at the Little Country Theatre and the Memorial Union. President E. R. Albrecht commented on the role of the University. In the past and future. Tours of the administration building and the Memorial Union were held. Dr. Elmo Nickerson, vice-president and professor in the department of veterinary science at North Dakota State University, was in attendance.

Prof Appointed Chairman

Appointment of Dr. Myron F. Andrews as department chairman and professor in the department of veterinary science at North Dakota State University, has been announced by President E. R. Albrecht.

The State Board of Higher Education has approved the appointment, to become effective July 1.

Andrews has been acting chairman of the department and associate professor since last July.

The new department chairman first joined NDSU's College of Agriculture faculty in 1968, following graduation from the University of California with a doctorate in veterinary medicine.

After a record 12 years as an assistant veterinarian at NDSU, he joined the Norwich Pharmaceutical Co., at Norwich, N. Y., as director of the company's large animal clinical research program.

He returned to NDSU as an assistant professor in 1961 where he has remained since.

October 14, will climax the 10 month anniversary observance. At this time dedication of the new engineering building complex will be held. The alumni achievement awards, usually given at commencement, will be presented then.

Robert Crom, director of communications and university relations, commented, "These events and activities are intended to provide the public an opportunity to participate and become better acquainted with the work, accomplishments and aspirations of NDSU."

ROUNDING THE CORNER in last Saturdays’ alumni-varsity football contest is Bill Sturdevant. Sturdevant was chosen most valuable back for the alumni. Clearing the way is brother Terry.

Varsity Wins Spring Football Contest

by Al Peterson

Spring football drills at North Dakota State University came to a climax Saturday evening when the NDSU varsity out powered a strong alumni squad 27-15 at rain soaked Dacotah Field. A strong running attack spearheaded by sophomore halfbacks Vance Conners and Ken Rota provided the biggest offensive punch for the varsity. Conners besides scoring three touchdowns, picked up 72 yards on 10 carries. Rota was equally effective picking up 83 yards in 11 carries.

NDSU's alumni team, however, was not without some outstanding personnel. Harry Timms, a 1959 Bison guard along with defensive end Buck Nystrum, defensive back Carl Bergman, and graduate lineman Sam Neis, Tom Holmgren and Jerry Schlict, all turned in creditable performances.

Halfbacks Bill Sturdevant and Ed Pflipsen were offensive guns for the alumni. Yardage came from the gifted arms of quarterbacks, Pierre Ducharme, Frank Hentges and Ross Fortier.

NDSU coaches were impressed with the strong varsity defense. Alumni backs showed a minus rushing total against the strong forward wall of the varsity. The alumni did, however, pick up 152 yards via the air route.

Three of the varsity scores were the results of two one yard plunges and a 43 yard scamper by Conners. Rota scored the other touchdown on a 13 yard pass from Gary Showers.

The most valuable back and lineman awards for the alumni went to guard Harry Timms and halfback Bill Sturdevant. Conners and center Gene Gebhards took honors for the varsity.

NDSU's football team opens its regular 1965 football season against the University of Wisconsin-Milwaukee Branch Sept. 10 at Dacotah Field.

Gridders Provide Sports Highlights '64

A Mineral Bowl victory and a North Central Conference crown are North Dakota State University's sports openings of the year. The successful Bison gridders were highlighted by sevenletter State Newswriters of the Year by state news writers association directors.

The Bison celebrated their first Mineral Bowl victory and the northern State of Gummison, Colo. in the 16th Annual Mineral Bowl action, finishing in a three tie with the University of North Dakota and South College Iowa in the NCC.

The Mineral Bowl, played in Minneapolis, Minn., defeated Ohio State for the season's first time until elected to go for two point conversion. Bison defensive started their campaign to play and preserved the one point lead to win.

NDSU earned an invitation to bowl in the Big Ten conference and that conference championship to be held in Laramie, Wyo. this summer.

NDSU at last place in the NCC crown since the days of Fritz Hanson in the 1930's. The Bison suffered their only loss last season which should be a definite advantage for the Bison.

The return of pitchers Russ Auen, Gary Pender and Gene Bakken should provide baseball coach, Verne Mckeely with a strong nucleus for next years squad. An old nemesis, UND, will be one of the favorites for the conference title. At least we know the Bison will be better than this year.

The industrial Engineering Society was first place in IM bowling by defeating the Alpha Gamma Rho fraternity. Psi and Theta Chi fraternities sacrificed points in third and fourth place competition by opposing teams.

IM softball bracket winners ran up action this week with a championship to be held Thursday or Friday afternoon. The teams that get into the championship and the third and fourth place game may choose their Thursday or Friday afternoon for the final games.

YMCA is the overall winner of the season with a lead of 100 points going into the softball finals. A team from the YMCA is entered in the finals and has compiled a 3-0 record in regular season.

Sigma Alpha Epsilon current holds the IM all-inclusive title. The IM Track Meet normally is held in the spring was cancelled for this year and no points will be given for that event.

Eighth Intramural Bowling loses last IM points they could drive through participation at a Monday meeting of the IM league. Action taken by the IM qualified teams for using players who were not signed up.

The players will lose the right to participate in IM bowling next season.

University of North Dakota Sioux, 20-33.

The single loss dropped the Bison into a three-way tie after SCI best the Sioux 40-0. The Bison completed the round with a 14-7 victory over the Panthers, SCI accepted a post-season invitation to the Pecan Bowl and went on to win.

A strong defense which allowed opponents an average of 194 yards per game and a running attack which netted 240 yards a game brought the Bison their most successful season in history.

Tom Holmgren and Sam Nies anchored the Bison line with allowed 90 points in ten contests. Speedster Bruce Airheart led the Bison rushing statistics with 834 yards and scored 54 points.

Rich Moche and Bill Sturdevant followed with 429 and 407 yards.

Rich Moche and Bill Sturdevant followed with 429 and 407 yards.

Ed Pflipsen, another hard-driv­

ing Bison halfback, finished the season with 255 yards rushing after missing much of the sea­

son with leg injuries. Pflipsen re­

turned a punt 65 yards against UND to set up the first Bison touchdown and late in the second half teamed with quarterback Frank Haynes on a 75 yard pass play to set up the second Bison score.

Airheart, Holmgren and Pflips­

en were voted as first team professional football. Airheart, Bison star track, plans on sign­

ing with the Baltimore Colts af­

ter completing his track career.

CLOSING NOTES

A sports editor's job would be more difficult if it were not for several helpful people. I owe a special thanks to NDSU's sports information director, Dave Sturgart. Sturgart came to the rescue with copy more than once when seeming there were no sports events happening at NDSU. Coaches Chuck Benton, Buck Nystrom, Darrell Muddie, Pat Norwood and others were seldom too busy to give me the additional information I needed. To them I offer my thanks.

CHEERLEADERS

Cheerleaders chosen for the 1965 football season are: Shirley Lawann, Siri Spong, Onalee Olson, Kay Grieve, Renee Scheiber, Mudra Pat Novacek and others were seldom too busy to give me the additional information I needed. To them I offer my thanks.

Judging Contest Winners Announced

Allen Odenthal, AG 3, and Bob Cook, AG 3, made near clean sweeps in the meat judging contests held here last weekend.

Odenthal was high individual in the livestock contest, was high judge in the beef and diviisions and placed second in sheep and swine. He was also high man in reasons.

Tom Cook placed second in the contest taking second and third in beef and horses respectively. Owen Brenna, AG 3, third in the swine division, placed third over all.

Allen Nipstad, AG 3, was first in swine.

Dorothy Holden, AS 1, one of two co-eds in the contest, was fourth high individual and was the high underclassman of the contest. Al Elliott, AG 2, was high individual in placings.

Bob Cook was high individual in the meats contest and was first in placings, tying with Roger Halverson, AG 2, for first in reasons. Eugene Zimmerman, AG 3, placed second and Loren Alvershers, AG 2, placed third in the contest.

The spring judging contests are held annually and are sponsored by the Saddle and Sirloin club.

Miss America Day Declared

A joint proclamation by Mayors Herschel Lashhookitis and Roy Stordahl will be made designating Tuesday, June 8 as Miss America Day in the Fargo-Moorhead area.

On that evening Miss America, Vonda Van Dyke, will give a public appearance of singing, speaking and ventriloquism. In the program she will give testimony of her personal faith in God and the Bible.

Production Termed Successful

Sharivar and the Blue Key production drew the 1964-65 school year to a close in grand style with both of them being termed "successful" by the students in charge.

Gary Pfeifer, Sharivar co-chairman, stated that this year Sharivar drew the largest attendance since it was initiated. Cooperation was received from everyone involved, and displays were well attended. "Annie Get Your Gun" brought Blue Key a profit this year. People attending the three performances numbered 3,632. "Since all balls are not in yet, an accurate figure of the financial results cannot be determined, but we are sure there was a substantial profit," said Production Business Manager Phil Wattles.

The money Blue Key receives from the production is used to finance scholarships and activities such as the Doctor of Service banquet, May 20 and a luncheon for members of the North Dakota Board of Higher Education, May 28.
