Northern Dakota State University
Fargo, North Dakota 822, 1965

**Requirements Reduced New Program Initiated**

Ernest Van Vlissingen, chairman of academic affairs for AS, said the new program would not produce a degree less valuable than one received by students graduating with 204 credits.

Students in the College of Arts and Sciences will have 16 credits in a 30-credit hour or less, except those in English, speech, philosophy, foreign language, humanities, and social and behavioral sciences.

The program will award the completion of the two basic purposes, storing important data and breaking down into the individual students.

A student with 151 credits would meet the stipulations for graduation and would not be required to take 17 credits for the remaining 49 credits to qualify for the new program.

The decision to allow students to graduate with 180 credits hour or less, in the result of four years of work by a committee which studied the program since 1960.

Second Award

The Spectrum, North Dakota State University's student newspaper, has won a second "All American" rating for the 1964-65 school year.

The newspaper was rated during the summer by the Associated Collegiate Press for issues from February through May. Editor is Lynn R. Leavens who served as Managing Editor under Joe Schneider during the first half of the year when the SPECRUM was his first "All American" award.

Spectrum Advisor Verne Nies, associate professor of communications was informed of the award Saturday.

"Naturally," he commented, "I must be filled with joy that the editor and staff of The Spectrum earned this high award. NDSU fulfills a third of the requirements of the larger college and university papers, those with enrollment of 4,000 or more. To come out at the top of this category speaks a lot for the composition of the student staff and the advisor of the Spectrum." He added Brandrud. "Everyone who filled in one of these forms should come to this office and fill out the form so we can certify them as full time students."

Brandrud defined "satisfactory work" as a normal course load of C average or better. A student must be in regular attendance to be considered a full time student. "Whenever a student drops out of school for a quarter, we have to notify their draft boards they are no longer full time students," said Brandrud.

The records of irregular or below average students are being looked at more closely when increased quotas must be filled," Brandrud stated. Officials of the local selective service board said they had received no new information from the national office concerning the students.

**Nine-Story Dorms Being Built**

Two nine-story residence halls should be ready for 1965-66 North Dakota State University students.

Construction is expected to begin this fall in a new complex area west of the Roost-Johnson dormitories. According to the plans of the architects, Clark and Holman, the dormitories will be 88 feet long, 84 inches wide and 88 feet 4 inches high.

Each unit will be constructed to house 72 or more students. The units will be constructed to permit easy conversion into women's residence halls if needed.

Residents will be housed 34 to a floor on the top eight floors, with a central lounge for every two floors; the first floor will be used as a lobby and recreation room. The head resident will have his living quarters on the first floor. Each unit will feature an elevator service, and will have two room nuisures, each with a bath and shower.

Bid opening, originally scheduled for Sept. 21, has been delayed. The estimated cost of each unit is $1 million, to be financed by self-liquidating bonds.

**Full Time College Students Won't Be Affected By Draft**

October and November draft calls numbering 70,000—largest peace time call-up since the Korean War—are not likely to affect most students.

According to Burton Brandrud, director of admissions and records, "Full time college students don't have to worry about a draft."

"It is important that students notify their draft boards that they are full time students," added Brandrud. "Everyone who filled in the selective service form at registration has, in effect, served notice to their draft boards. Anyone who failed to fill in one of these forms should come to this office and fill out the form so we can..."
HULTZ LOUNGE
Exhibit Depicts Life In Bali

On view in Hultz lounge of the Memorial Union are paintings by several Balinese teenagers. The paintings are taken from scenes in and around an isolated village near Ubud, Bali, and reflect themes common to the everyday experience of the average Balinese.

The paintings are characterized by lush colors with blues, reds, yellows and greens pre­dominant. Typical is a simple pen and ink sketch by Made Sint­tee, 12, entitled "Working in the Paddies." The painting illustrates an interesting use of per­pective, bold color and design.

The exhibition will remain on view until Oct. 3.

Campus Notices

HOMECOMING PARADE
All organizations that want units in the Homecoming Parade are to pick up application packages from Dave Bakken, 41, the Alpha Gamma Rho house by 4 p.m. on Friday, Sept. 25. The Student Non-Violent Coordi­nating Committee will pick today at 8:30 p.m. in room 207 of the Memorial Union.

THEATER TRYOUTS
The Little Country Theatre announces tryouts for three Fall productions to be held on Monday and Tuesday, Sept. 27-28. Auditions will be set for 4:30; tryouts at 7-9 p.m.

Capable of speeds better than 2,000 mph, the YF-12A is the hottest aircraft around. Now Maj. Walter F. Daniel, test pilot for the YF-12A, answers your questions about the world's fastest manned airplane and America's Aerospace Team.

What kind of future do I have in the Air Force? A bright one. As we move further into the Space Age, the Air Force is going to grow even more important. And you can grow with it!

How big is the YF-12A? The exact dimensions of the YF-12A have not been released yet. But it's approximately 100 feet long, a manned airplane and America's Aerospace Team.

The Air Force officer. The new two-year Air Force ROTC program makes this method available to men who have already completed a year or two of their college education. For college graduates, if you did not take advantage of ROTC, you can still get started through Air Force Officer Training School (OTS), a three-month course open to both men and women.

Can I keep up my studies while I'm in the Air Force? The Air Force encourages its men and women to continue their education. For instance, you may qualify to study for a graduate degree during off­ duty hours, with the Air Force paying a substantial part of the tuition.

What other kinds of jobs does the Air Force offer? Since it's one of the world's foremost technological organizations, the Air Force has plenty of openings for scientists and engineers. There are also many challenging and varied administrative-managerial positions.

The new two-year Air Force ROTC program makes this method available to men who have already completed a year or two of their college education. For college graduates, if you did not take advantage of ROTC, you can still get started through Air Force Officer Training School (OTS), a three-month course open to both men and women.

What do I have to do to become an Air Force officer? Air Force ROTC is the best way to get started as an Air Force officer. The new two-year Air Force ROTC program makes this method available to men who have already completed a year or two of their college education. For college graduates, if you did not take advantage of ROTC, you can still get started through Air Force Officer Training School (OTS), a three-month course open to both men and women.

Letters to the Editor

Model UN Gives Opportunity For Trial

To the editor:

First Annual United Nations Conference at North Dakota State University will be held in December. Delegates from nine states and Canada are expected to take part in the meetings. The purpose of this assembly is to provide an opportunity for students to think beyond themselves. It is an attempt to discuss, debate and examine meticulously and dispositionally the issues that concern human dignity, equality and justice. For the first time in history, women, race, war is in danger of being exterminated. Yet how many of us think about it?

The primary cause of evil in the world is ignorance. Good and sincere intentions, if unquestioned, can do as much harm as malevolence. The most incorrigible vice is that of ignorance which presumes to know everything and has ready and simple answers for all questions, and therefore, claims the right to condemn.

The greatest evil, in my opinion, is the evil that one man inflicts upon another or one nation to another. The foundations of human dignity and decency must not be built on mytyr; rather, it must rest on justice, love and respect for mankind.

We live, or rather exist, surrounded by many myths; rather, it must rest on justice, love and respect for mankind.

Most of the news about U.N. has concerned its peace efforts, and has been reported regarding its spread economic and social influence. Of 23,000 U.N. staff members, all over the world, 20,300 are working exclusively in economic and social affairs. U.N. agencies: U.N. are: UNESCO, offering education and training in the field of education; WHO, concentrating on improving health and thearan, helping in raising levels of literacy and living standards; UNESCO, increasing efficiency of food production; UNICEF, devoting its efforts to the alleviation of perishing and mothers in less fortunate conditions.

LITTLE MAN ON CAMPUS

As seen by:

The students ...... the manager...

The president ...

A great many faculty...

The student body president, feels at this late date, that the Mitchell Trio performance should be paid the figure agreed upon in the original contract; the performance should be canceled, and the contract signed and all students will have to go along with this and make the best of the situation.

Solution Not Simple

Lack of communications—an old problem at North Dakota State University—has returned, although it does have a new twist.

The situation, at a glance, is quite simple. Some student leaders feel that the Mitchell Trio—a homecoming attraction—should perform in the Fieldhouse. Dr. Frederick Walsh, co-ordinator of the Laramie Project, and the group, will perform in Festival Hall.

However, the problem is not as simple as it seems. More background information is needed before a value judgment can be reached.

A committee met a year ago and tentatively formulated plans for this year’s homecoming. At that time, the first commissioner of Public Programs requested that the Mitchell Trio perform in Festival Hall. The committee believed that the group was twofold. It would allow early detection on the Fieldhouse and student decorators would be able to attend the homecoming parade and football game—something they had not been allowed to do.

Dr. Walsh’s committee, taking the above into consideration, and realizing that there would be no public sale of tickets (along with some questionable figures that Dr. Walsh supplied concerning other attractions) decided to use Festival Hall’s facilities.

We call these figures questionable for the simple reason that we believe this group can not be compared to the majority of other attractions NDSU has offered in the past. If Jan Proe—-not to belittle his talent—was the featured homecoming artist, Festival Hall would probably hold his college admires.

But, this is not the case.

A realistic approach has to be taken. Attendance at the homecoming football game is expected to be in the neighborhood of 12,000 fans. How was this figure arrived at?

The highest test evil, in my opinion, is the evil that one man inflicts upon another or one nation to another. The foundations of human dignity and decency must not be built on mytyr; rather, it must rest on justice, love and respect for mankind.

The primary cause of evil in the world is ignorance. Good and sincere intentions, if unquestioned, can do as much harm as malevolence. Student Choice Disregarded

To the editor:

At the May 20 meeting of the Student Senate a motion was presented and carried designating that the Mitchell Trio perform in the Fieldhouse as there was obviously not enough room in Festival Hall for anything approaching the enrollment at the University.

Considering the fact that this motion was passed through proper channels, it seems to me that the majority of the students in a matter which exclusively involves student money.

Many times in the past the students have demonstrated that they are in favor of the Mitchell Trio in every year, and especially in this our seventy-fifth year. There is all the reason in the world to believe that this year will see the largest crowds of students, alumni and friends of the university attending Homecoming events.

In this manner what is done? The Mitchell Trio, one of the main attractions connected with Homecoming, is limited in attendance to 1200 people.

Is this fair? NO!

Is this responsible? NO!

Is this good university relations? NO!

Is this what he, the students, want? NO!!!

Gary Powell, AS4

Student Council

Proxy Favors Student U

To the editor:

North Dakota State University is pleased to invite the local community to represent at the United Nations Conference, December, 1965. The conference will provide a meaningful opportunity for the student to take part in a world-wide inter-cultural problems will be paramount. The former students who must prepare: careers that will carry them the Twentieth-century era, of the world. Every student must have an understanding by the time they are graduated, of the world's major problems.

The conference presents an opportunity to participate in an activity designed to demonstrate the role of the individual and of our country in the vast complex of national relations.

The Spectrum
Redecoration Of Bison Room Planned

Decorate to add atmosphere to the Bison Room. Paint the room. Put crests into Crest Hall. There are the plans come from the office of George Schmidt Jr., new director of the Memorial Union.

Schmidt stated that the Memorial Union would be much the same as it had been in the past but the director working closely with the Student Union Activities Board. He did mean, however, that SUAB needs more financial support. "They should be of greater service."

Schmidt stated that the union food service will be expanded. Dacotah Inn will extend their serving time one hour. They will now serve from 5 p.m. to 8 p.m. Smorgasbord, formerly served once a week, will now be served on both Mondays and Wednesdays.

Professional and student art will be displayed in permanent displays, and the walls of the lobby will be used for student art exhibits.

Other programs and services include: typewriter service, expanded duplicating service, alternate weekly coffee house programs, new art shows and a Fall sports day which will be like the Winter Mauler Bowl.

Linderman Receives All-American Award

Lowell Linderman, North Dakota State's versatile football and track star, has been named to the All-American track and field team. The selection was made by the National Collegiate Athletic Association of Coaches.

The Bison pole vaulter attained the honor after placing third in the national NCAA track and field meet last June with a vault of 14'7". Earlier the Bison sophomore set a North Central Conference record with an equal mark.

Track coach Walt Weaver expressed confidence in the 6 ft. 118 pound Bison star's future when he stated, "If he keeps developing he should be in the 15' to 15'9" range by next year. He's never bothered by track conditions or bad weather, in fact the tougher it gets the better he performs."

Linderman set his personal goal, a foot each year, early last spring after reaching the 14' mark. Following football season, Linderman begins track workouts in Concordia College's Fieldhouse.

As a sophomore griddler, Linderman led the Bison in pass receiving with 18 catches for 138 yards and two touchdowns. Linderman played both offensive and defensive halfback on the highly successful Mineral Bowl champion team.

This season, Bison coaches expect Linderman only at offensive split end, although if needed he would be switched to defense. Bison mentors are quick to commend the 1965 track captain's athletic prowess. Head football coach Darrell Mauds stated, "Lowell's a steady performer and a real all-around athlete."

Linderman demonstrated football ability Saturday night against the University of Minnesota (Duluth) when he caught four passes for 72 yards and one touchdown. The tall and swift end also is a punt return specialist.

When asked which sport he prefers, a self-conscious Linderman stated, "I don't know, I enjoy both sports."

Bison Post 55-8 Victory; Rota Chosen Most Valuable

A balanced offensive attack and a stingy defense paved the way for a one-sided 55-8 Bison victory over the University of Minnesota (Duluth) Bulldogs Saturday evening.

Bison quarterbacks, Terry Hanson and Jim Carlson, passed for 160 yards and four touchdowns while varying the attack with a running game which netted 295 yards. Hanson, a sophomore, teamed with split-end Lowell Linderman for 72 yards in four completions.

Andy Knudson, the Bison pound tight end, caught touchdown passes in the conference battle. Bison coaches showed real confidence in passing game by calling only pass plays on fourth down situations.

Ken Rota, Bison's senior right half, gained 132 yards in 13 carries and won TRUMS' poll of the west ward. The 5'10" 180 pound Minnesota griddler has gained 545 yards in 94 carries and six touchdowns in the two games.

In Saturday evening's game the 105 pound back broke loose from defenders for a 41 yard touchdown jaunt early in the game. Later in the first quarter Rota teamed with Hanson for 12 yard pass play that netted a Bison touchdown.

Defensively, the Bison held the Bulldogs to two yards rush and 91 yards passing. Ray Bob Wilkowski with a 20 yard pass for the only Bulldog score.

Bison defensive line coach Ronald Erhardt, commented, "We're real happy about the play of our linemen, although the first two games were against teams that primarily used short attacks."

Erhardt lauded the play of ends, Walt Odegard and Greg Lanning, and Matt Vukelich and guard Artell Wiegandt.

Mike Ahneman, sopho more fullback, covered seven of six extra point attempts for the Bison. The 5'8" 190-pound fullback specialist also handled Bison kick-offs.

THE SPECTRUM Sept. 22,
JOE SATROM

Gridders Show Determination

Determination charged the locker room atmosphere during half time of the Bison's battle with the University of Minnesota (Duluth). Players and coaches were there for one purpose, to make the Bison's game a complete well-balanced performance. Despite the 28-8 Bison edge, discontent with their first half showing was apparent in both players and coaches.

As the traditional chalk talk began, Bison coaches welcomed comments from the players. However, many of the gridders were content to learn what they had done wrong and in some cases, what should be done differently. Each coach took his turn discussing his specialty with the team. Players brought up specific problems they had encountered during the first half.

The evident dedication of each player and the inquisitive desire to improve showed through in attentiveness to the coaches' words. Other than the coaches' voices and an occasional question, the only noise was the sound of the players' cleats as they picked up ice cubes, lemons or oranges for their thing.

The most surprising thing I found in the Bison dressing room was the manner in which coaches and players discussed the plays. From watching the quarterbacks and playing the game, I knew that plays were numbered. Bison half time talks revolve around a flow of numbers, making them seem almost as intricate as a chemist's hydrocarbons or a mathematician's differential equations. As an observer, I had to check the positions of the players to get even a hint of what the coaches were discussing. There was no mention of a slant off tackle or an end sweep, as I had expected. There was only a discussion of numbers.

As the session ended, the players became restless in anticipation of the second half. Some finished their ice and picked up their helmets while others touched their toes, loosening stiffened muscles. Slaps and yells of encouragement were given players who had a disappointing first half.

I doubt if a half time talk has ever solved all of a team's problems, but the Bison must have gained profitably from the talks I heard. The Bulldogs of UMD never scored again and the game ended in a 55-8 rout.

SCI FORMIDABLE NCC FOE

Bison gridders put their unbeaten status on the line against a twice beaten State College of Iowa team in the North Central Conference opener for both clubs. The SCI Panthers will seek an explosive offensive play which has averaged 57 points a game.

Southern Illinois handed the Panthers a 23-16 defeat Saturday on a strong defensive effort by the Illini linemen. Randy Schultz, SCI's Little-All-American fullback, was held to 45 yards rushing, his lowest output as a collegiate back.

Officials Considering System Change

In the near future, a decision regarding recorded music — will be decided by Memorial Union officials. A local firm currently transmits music into the union for $1.50 a day.

According to Roger Wehrle, assistant director for the Memorial Union, the union could have better quality music to offer by maximizing its own facilities.

"We already have the best equipment money can buy, and eventually, we will pipe music from the turntables in the music room to all parts of the building, if we drop Muzak," he said.

The union has a new F-M tuner, and the approximately 5,000 hours of listening that could be played through it.

"Students could practice programming the music," said George Schmidt, Memorial Union director.

"Muzak, a New York company that records music especially for background use, cur- rently has 15,000 selections or about 3,750 hours of listening available to the union and other businesses," said Ruben Reinke, field representative of Muzak.

"All of the songs recorded, plus approximately 40 new songs per month, are used by Muzak. The songs are programmed for 24 hours, and moods of the music are changed every 15 minutes throughout the day," said Reinke.

Playing music 12 hours a day, the union could provide music for 47 days without repetition.
